c. Economics Electives (15 hours): Electives will be selected consistent with the student’s planned program. They must be approved in advance by the M.S./Bu.E. Program director, Dr. Jon Mansfield. The suggested electives are listed below (all courses are 3 credit hours):

- ECON 8180 Applied Economic Analysis
- ECON 8440 Industrial Organization & Antitrust Economics
- ECON 8740 Applied Statistics & Econometrics
- ECON 8840 Applied Statistics & Econometrics 2
- ECON 8860 Economics Of Global Finance
- FI 8000 Valuation Of Financial Assets
- FI 8020 Financial Analysis & Loan Structure
- FI 8040 Survey of International Finance
- FI 8060 Current Issues In Finance
- FI 8240 Global Portfolio Management
- FI 8420 The Financial System
- BCOM 8250 Effective Executive Communication
- BCOM 8260 Corporate Communication
- MBA 8015 Strategic Business Communication
- MBA 8025 Financial Statement Analysis
3. Program of Study. Each student’s program must be planned in consultation with the M.S./Bu.E. program director before a non-required course is taken. Students may contact the department (404-413-0141) or Dr. Mansfield (jmansfield@gsu.edu) to schedule an appointment. A copy of the program will be filed with the Office of Graduate Student Services for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the program director and a copy of the changes sent to the Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

4. Time Limit: The time limit for completing the M.S./Bu.E. program is five years from the first semester a course in section B or C (above) is taken.

7200.15 Major in Finance

This program is currently only available in the cohort format. Program enrolls in fall semester only.

Michael Yates, Program Director, 404-413-7352, myates@gsu.edu

Cohort MS in Finance format

The Cohort Master of Science in Finance is offered in a 16-months format over four semesters (Fall, Spring, Summer, second Fall). The program is ideally suited for accounting, finance, banking, asset management, and wealth management professionals seeking to augment their professional expertise or students with an analytical background who wish to build expertise in finance. The program is focused on developing the decision-making, personal, analytical and technical skills required to compete in today’s ever-changing financial environment.

Students proceed as a flexible cohort – a structure that fosters peer learning, collaboration and the building of lifelong business networks while allowing students to customize their program of study. The courses are taught at Robinson’s Executive Education Center in Buckhead and meet one evening per week from 5:30 p.m. to 9:45 p.m., and one evening every other week from 5:30 p.m. to 9:45 p.m. during the Spring and Fall semesters. Two classes are offered during the Summer semester with a month-long break in between. An immersive course, Financial Leadership – Leading the Finance Function, designed to promote interaction with senior level finance executives, takes place during the last semester of the program.

In addition, students build leadership skills and networks by interacting with senior executives in our guest speaker series, financial leadership symposia, internships, and professional and social gatherings.
Furthermore, there is an opportunity for students to be part of a formal mentoring program.

Applicants must hold a four-year undergraduate degree from an accredited college or university. Work experience is preferred but not required.

The 30-hour curriculum consists of an integrated first semester, in which all students take the same three classes. After the first semester students take a combination of required courses and electives, which allow for a specialized focus on certain areas such as Corporate Finance, Financial Services and Capital Markets, Asset Management, and Fintech. In addition to the 30-hour curriculum, students may need to complete the specialized master’s foundation courses referenced in section 7110.10.

**Cohort MS Finance Curriculum**

**Required courses for all students**

- MBA 8135 Corporate Finance, First fall semester
- FI 8000 Valuation of Financial Assets, First fall semester
- FI 8090 Financial Data Analytics, First fall semester
- FI 8070 Financial Leadership, Second fall semester
- Experiential Practicum: FI 8391 Internship/CPT, FI 8387 Data Analytics Experience, FI 8388 Fintech Experience, or FI 8389 Directed Readings in Finance*

*The experiential practicum course requirement may be completed in the summer or second fall semester. Students choose one of the four FI 83** options above.

**Electives (students should choose six of the following electives for a total of 18 credit hours)**

- FI 8020 Financial Analysis and Loan Structuring
- FI 8040 Survey of International Finance
- FI 8200 Derivative Markets
- FI 8240 Global Portfolio Management
- FI 8260 Hedge Funds and Their Trading Strategies
- FI 8300 Advanced Corporate Finance
- FI 8310 Investment Banking
- FI 8320 Corporate Financial Strategy
- FI 8360 Special Topics in Finance
- FI 8460 Introduction to FinTech
- FI 8462 Blockchain and Business Disruption
- FI 8464 Financing Innovation

Three of the electives should be taken in the spring semester; one or two electives should be taken in the summer semester; and one or two electives should be taken in the second fall semester.

Students may also take courses from related areas, for instance accounting, subject to approval by the program director.

**Flex MS in Finance format**
*This program is currently not offered in a Flex format, and is only available in the cohort format.*

The MS-Finance curriculum is designed to provide graduates with advanced knowledge of master’s-level finance, including particular expertise in their area of specialization (chosen from Corporation Finance, Investments, or Financial Institutions and Markets). The primary emphasis of the program is to provide students with the theoretical, analytical and technical skills necessary to examine particular financial situations, formulate alternative plans for action and develop policy initiatives. The program prepares graduates to understand the context for issues encountered in the rapidly evolving domestic and international financial environment. Quantitative and analytical course requirements in the areas of optimization techniques, computer modeling and statistical methodology complement the finance course requirements.

Regulations for the Degree

All Master of Science students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the M.S.-Finance program. A maximum of six hours of transfer credit is permitted in this program only if 12 hours are taken in section B below; otherwise a maximum of three hours of transfer credit is permitted.

Course Requirements. The course requirements for the degree of Master of Science with a major in finance and the format of the program follow.

a. Foundation Courses. The courses in this list are in addition to the 30 semester hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with grades of C or higher.

Accounting: MBA 8025 or financial and managerial accounting principles and corporate finance principles (ACCT 2101, ACCT 2102 and FI 3300).

Behavioral Science: MBA 8165 Leadership and Organizational Behavior or Management principles (MGS 3400) or marketing principles (MK 3010).

Economics: Both macroeconomic principles (ECON 2105) and microeconomic principles (ECON 2106).

Mathematics: College algebra (MATH 1111) and calculus (MATH 1220).

Statistics: MATH 1070 or equivalent.

b. Required Major/Technical Support Courses (9-12 hours). These courses must be completed during the first 18 hours of 8000-level course work in the M.S.-Fi program.

- MGS 8020 Business Intelligence (3) (or MBA 8025 Financial Statement Analysis (3) subject to approval by the MS faculty advisor)
- MGS 8150 Business Modeling (3)
- MGS 8110 Applied Regression Analysis (3)
MBA 8135 Corporate Finance (3)

Note: MBA 8135 may be exempted (with replacement) if FI 3300, FI 4300, and FI 4320 or their equivalents have been completed with grades of C or higher at the time of admission.

c. Specializations (18-21 hours). Students not exempting MBA 8135 are required to take 18 hours of Fi-prefixed courses; 21 hours if exempting MBA 8135. These courses consist of the following:

(i) All M.S.-Finance students are required to take the following course:

- FI 8000 Valuation of Financial Assets (3)

(ii) All students are also required to take a minimum of nine (9) semester hours within a chosen finance specialization. Three areas of specialization are shown below along with various courses considered appropriate for each area that students may select from.

(iii) In addition to FI 8000 (3 hours) and the 3 courses (9 hours) comprising the chosen finance specialization, students must select an additional six to nine semester hours of any other Fi-prefixed courses (6 hours if MBA 8135 is not exempted; 9 hours otherwise).

Fi-prefixed courses comprising Specializations:

Corporate Finance

- FI 8040 Survey of International Finance (3)
- FI 8200 Derivative Markets I (3)
- FI 8300 Advanced Corporate Finance (3)
- FI 8320 Cases and Readings in Corporate Finance (3)
- FI 8350 Corporate Restructuring and Workouts (3)
- FI 8360 Special Topics in Corporate Finance (3) *

* May be taken multiple times for different topics.

Investments

- FI 8200 Financial Analysis and Loan Structuring (3)
- FI 8200 Derivative Markets I (3)
- FI 8240 Global Portfolio Management (3)
- FI 8260 Hedge Funds and Their Trading Strategies (3)
- FI 8310 Investment Banking (3)

Financial Institutions and Capital Markets

- FI 8200 Financial Analysis and Loan Structuring (3)
- FI 8040 Survey of International Finance (3)
- FI 8260 Hedge Funds and Their Trading Strategies (3)
- FI 8400 Financial Institutions (3)
The Department encourages all students pursuing the M.S.-Finance degree to take FI 8000 early in their program as it is a prerequisite for all electives except FI 8020 and FI 8040. FI 8000 is designed so that it may be taken concurrently with MBA 8135 to provide students greater scheduling flexibility.

Program of Study. Each student’s program of study must be planned in consultation with the M.S.-Finance program director prior to the completion of the first semester of enrollment. A copy of the program will be filed with the Office of Graduate Recruiting and Student Services (GRSS) for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the program director and a copy of the changes sent to GASS. Students always must consult the Course Descriptions chapter of this catalog to determine if they have met the prerequisites for any course to be taken.

Time Limit. The time limit for completing the M.S.-Finance program is five years from the first semester a course in section b or c (above) is taken.

7200.20 Major in Managerial Sciences

Thomas Conklin, Program Director, tconklin@gsu.edu

The Master of Science with a major in managerial sciences prepares professionals to assume leadership roles in organizations. Students learn critical management skills that allow them to communicate successfully, think creatively and adapt quickly to business fluctuations and transformations. There are two concentrations available for managerial sciences majors:

1. Human Resource Management: The human resource management concentration focuses on best practices in selecting, attaining and developing human resources within organizations and provides students with the knowledge and tools to lead and manage the human resources function.

2. Supply Chain and Analytics Management: The supply chain and analytics management concentration is designed to provide students with the knowledge necessary to assess the operations function of both goods-producing and service-rendering organizations, to diagnose current operating systems, and to prescribe and implement improvements. It also provides expertise for analytically oriented careers in business with an emphasis on applications of information technology

While this program is structured in both cohorted and non-cohorted formats, it is anticipated that all admissions in the coming year will be in the cohorted format only.

Regulations for the Degree

The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the Master of Science in Managerial Sciences.

Course Requirements. The course requirements for the degree Master of Science with a major in Managerial Sciences and the format of the program follow:
a. Foundation and Prerequisite Courses. See section 7110.10 for the foundation requirements for this degree.

b. Required Courses in the Major. Choose one of these concentrations:

Concentration 1: Human Resource Management
Gabriella Lewis, Faculty Coordinator

- MGS 8150 Business Modeling
- MGS 8320 Legal Environment of Human Resource Management
- MGS 8360 Designing Talent Acquisition and Development Systems
- MGS 8390 Designing Total Rewards Systems

Concentration 2: Supply Chain and Analytics Management
Peter Zhang, FacultyCoordinator

- MGS 8710 Managing Logistics and Supply Chains
- MGS 8770 Service Operations Management
- MGS 8040 Data Mining
- MGS 8150 Business Modeling

C. Elective Courses. (18 hours) Choose courses with an MGS prefix including any courses listed in the one concentration not chosen

Program of Study/Course Prerequisites

With the exception of cohort-enrolled students, each student’s program must be planned in consultation with the faculty coordinator for his or her concentration before a non-required course is taken. Students may contact the faculty coordinator directly to schedule an appointment. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the faculty coordinator and a copy of the changes sent to the Office of Graduate Student Services. Students must always consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

Time Limit. The time limit for completing the M.S./Managerial Science program is five years from the first semester a course in section B or C (above) is taken.

One Year MS in Managerial Sciences Format

The One Year Master of Science in Managerial Sciences is a cohorted program. In addition to the required courses in the two concentrations listed above, the 18 credit hours of electives will be pre-selected for the entire cohort.

7200.25 Major in Marketing

Bruce K. Pilling, Program Director, 404-413-7673, bpilling@gsu.edu
The MS in marketing is designed primarily for persons with an undergraduate business degree who want to distinguish themselves as marketing specialists. The major is designed to provide the in-depth theoretical and applied training needed to excel in a leadership position in marketing. The program extends the students’ previously acquired basic business and marketing skills by developing advanced technical and analytical competency in a selected area. It therefore allows graduates to make more informed decisions in an increasingly complex marketing environment.

* This program is currently only available in the one year format.

Regulations for the Degree

The Masters of Science in Marketing is now available in a one year fast-track format. For additional information on this format, please visit the following website: marketing.robinson.gsu.edu/academic-programs/ms/.

All Master of Science students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the M.S./Marketing program. A maximum of six hours of transfer credit is permitted in this 30-hour program.

Course Requirements. The course requirements for the degree Master of Science with a major in marketing and the format of the program follow:

a. Foundation Courses. The courses in this list are in addition to the 33 hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with grades of C or higher. For descriptions and prerequisites of the undergraduate foundation courses, see the Course Descriptions chapter of the Georgia State University Undergraduate Catalog. This catalog is available at catalog.gsu.edu.

**Accounting/Finance:** MBA 8025, or financial and managerial accounting principles and corporate finance principles (ACCT 2101, ACCT 2102 and FI 3300).

**Behavioral Science:** Management principles (MGS 3400), managerial decision making (MGS 4000), marketing principles (MK 3010), psychology (PSYC 1101), sociology (SOCI 1101) or anthropology (ANTH 1102).

**Economics:** Microeconomic principles (ECON 2106).

**Mathematics:** College algebra (MATH 1111).

**Statistics:** MATH 1070.

b. Required Courses in the Major (9 hours)

- MBA 8145 Marketing Management (3)
- MK 8100 Buyer Behavior (3)
- MK 8200 Marketing Research (3)
c. Marketing Electives (18 hours). These electives may be chosen from among the 8000-level marketing courses that are not required as core or capstone courses. A maximum of nine hours of appropriate 8000-level courses from other departments in the Robinson College of Business or from elsewhere in the university may be substituted for these courses with departmental approval.

d. Capstone Course (3 hours).

- MK 8900 Strategic Market Planning (3)

Program of Study. Each student’s program must be planned in consultation with the M.S./marketing faculty adviser before a non-required course is taken. Contact the department to schedule an appointment. A copy of the program will be filed with the Office of Graduate Student Services for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the faculty advisor and a copy of the changes sent to the Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

Time Limit. The time limit for completing the M.S./marketing is five years from the first semester a course in sections B, C, or D (above) is taken.

One Year MS in Marketing format

One Year Master of Science (MS) in Marketing is a year-long cohort program for marketing professionals who want to update/expand their knowledge, managers who oversee marketing activities but lack formal training, and career changers. Students proceed as a group through a sequenced curriculum of five session modules. The program runs from Fall to Summer semester of each year.

In addition to the required courses outlined in the general curriculum above, candidates must take 21 credit hours of pre-selected electives for this one year format. Students must fulfill the specialized master’s foundation requirement (section 7110.10). Courses meet at Georgia State University’s Buckhead Center on Monday and Wednesday evenings. New cohorts begin in August of each year. Program enrolls in the Fall semester only.

The internationally renowned faculty of Robinson’s Department of Marketing, Social Media Intelligence Lab, and Center for Excellence in Brand and Customer Management have developed the program, drawing on their expertise as researchers and theorists, strategists and practitioners. Concurrent to earning a Master of Science in Marketing, students also will earn Robinson’s Certificate in Brand and Customer Management.

The program is open to full-time working professionals, full-time students and international students.

**7200.35 Master of Science in Quantitative Risk Analysis and Management (QRAM)**

Haci Akcin, Director, 404-413-7467, hakcin1@gsu.edu
The mission of the Master of Science in Quantitative Risk Analysis and Management (QRAM) program is to provide students with a solid understanding of the application of mathematics in economics and finance to address contemporary risk management issues. Emphasis is placed on the diagnosis, analysis, pricing and customization of solutions to risk management problems, broadly defined to include both financial and operational risk exposures. The program is designed to prepare students for analytical and technical positions within financial institutions, risk management advisory organizations, and the treasury departments of non-financial corporations. Quantitative in focus, the program is well suited for students with undergraduate and graduate degrees in mathematics, statistics or similar technical disciplines. Students with an MBA or undergraduate degree in economics, finance or actuarial science, who can demonstrate the necessary skills in mathematics, also make excellent candidates.

The MS in Quantitative Risk Analysis and Management can be completed in 16 months over three semesters. Since the core courses are designed in a lockstep format, students should be prepared to begin their core sequence during the fall semester. Students who have not completed the foundational requirements for the degree should apply for admission during either the spring or summer semester so they can complete the prerequisites before the core sequence begins in the fall. Please contact the QRAM program director for advice about the appropriate time when you should apply to enter the program.

Two dual-degree options are available: one in which students will earn both the Master of Actuarial Science degree and the Master of Science in Quantitative Risk Analysis and Management (MAS/QRAM); and one in which students will earn both the Master of Science in Analytics degree and the Master of Science in Quantitative Risk Analysis and Management (MSA/QRAM). The programs provide students with increased career opportunities in the financial services industries specializing in the application of quantitative methods to solve complex business problems in an era of financial services and capital markets convergence.

Regulations for the Degree

A maximum of 9 hours of transfer credit is permitted in this 30-hour program or in the 48-hour dual degree programs.

1. Foundation Requirements:

These courses are in addition to the 30 hours required for the QRAM degree or in addition to the 48 hours required for the dual degree programs. They are assigned as part of the admissions process based on a review of each student’s transcripts.

Mathematics: Students must have completed three semesters of advanced calculus (MATH 2211, MATH 2212 and MATH 2215).

Statistics: Students must have completed two semesters of undergraduate mathematical statistics (MATH 4751, MATH 4752). Alternatively, these requirements can be satisfied by taking ECON 8710 or MSA 8190.

2. Course Requirements: Master of Science in Quantitative Risk Analysis and Management

This section is applicable to students interested in the MS in Quantitative Risk Analysis and Management.
Students interested in the dual degree programs should go to Section 3 (MAS/QRAM) or Section 4 (MSA/QRAM) below.

a. **Required Technical Support Courses**

The following courses must be completed within the first 18 hours of 8000-level course work.

- ECON 8740 Applied Statistics and Econometrics (3)
- MSA 8010 Data Programming for Analytics (3)

b. **Required Courses in the Specialization**

- ECON 8780 Financial Econometrics (3)
- QRAM 8600 Theory of Risk Sharing (3)
- QRAM 8610 Financial Engineering (3)
- QRAM 8630 Interest Rate Models (3)
- QRAM 8640 Advanced Credit Risk Models (3)
- RMI 8400 InsurTech (3)
- RMI 8300 Predictive Risk Modeling (3)

c. **Elective Courses in the Specialization**

Students should consult with the program director prior to beginning their elective coursework and may select from among the following courses.

- AS 8340 Life Contingencies (3)
- AS 8350 Insurance Mathematics (3)
- AS 8360 Insurance Risk Making (3)
- AS 8430 Loss Distributions and Credibility Theory (3)
- AS 8810 Actuarial Science Graduate Seminar (3)
- ECON 8860 Economics of Global Finance (3)
- FI 8020 Financial Analysis and Loan Structuring (3)
- FI 8240 Global Portfolio Management (3)
- FI 8260 Hedge Funds and Their Strategies (3)
- FI 8300 Advanced Corporate Finance (3)
- FI 8310 Investment Banking (3)
- FI 8320 Corporate Financial Strategy (3)
- FI 8460 Introduction to FinTech (3)
- FI 9100 The Theory of Asset Valuation (3) (Requires consent of instructor.)
- MGS 8040 Data Mining (3)
- MGS 8150 Business Modeling (3)
- MSA 8040 Data Management for Analytics (3)
- MSA 8050 Scalable Data Analytics (3)
- MSA 8100 Operations Research Models and Methods (3)
- MSA 8150 Machine Learning for Analytics (3)
- MSA 8190 Structural Foundations for Analytics (3)
- MSA 8250 Data Visualization (1.5)
Students may select, with the prior approval of the Faculty Director, electives other than those shown above if they can demonstrate the course(s) will better meet their educational objectives.

3. Course Requirements: Dual Degree Master of Actuarial Science and Master of Science in Quantitative Risk Analysis and Management Program.

This section is applicable to students interested in the dual degree program Master of Actuarial Science and Master of Science in Quantitative Risk Analysis and Management. Students interested in the MS in Quantitative Risk Analysis and Management should go to Section 2 above. Students interested in the dual degree program between the Master of Science in Analytics and the Master of Science in Quantitative Risk Analysis and Management Program should go to Section 4 below.

a. Required Technical Support Courses

The following courses must be completed within the first 18 hours of 8000-level course work.

- ECON 8740 Applied Statistics and Econometrics (3)
- MSA 8010 Data Programming for Analytics (3)

b. Required Courses in the Dual Degree Program

- AS 8340 Life Contingencies (3)**
- AS 8350 Insurance Mathematics (3)**
- AS 8430 Loss Distribution and Credibility Theory (3)
- AS 8360 Insurance Rate Making (3)
- ECON 8780 Financial Econometrics (3)
- QRAM 8600 Theory of Risk Sharing (3)
- QRAM 8610 Financial Engineering (3)
- QRAM 8630 Interest Rate Models (3)
- QRAM 8640 Advanced Credit Risk Models
- MSA 8200 Econometric Modeling for Analytics (3) (alternatively, students can take ECON 9720 Econometrics II)
- RMI 8300 Predictive Risk Modeling (3)

** Students who have completed AS 4340 and/or AS 4350 or their equivalents must substitute appropriate 8000-level actuarial science courses for AS 8340 and/or AS 8350. The substitutions must be selected from section C below in consultation with the Faculty Director.

c. Elective Courses in the Dual Degree Program

Students should consult with the program directors for the Master of Actuarial Science and Quantitative Risk Analysis and Management programs prior to beginning their elective coursework and may select from
among the following courses:

- Any of the 8000 level QRAM or MAS classes not listed in the required courses section
- ECON 8860 Economics of Global Finance (3)
- FI 8020 Financial Analysis and Load Structuring (3)
- FI 8240 Global Portfolio Management (3)
- FI 8260 Hedge Funds and Their Strategies (3)
- FI 8300 Advanced Corporate Finance (3)
- FI 8310 Investment Banking (3)
- FI 8320 Corporate Financial Strategy (3)
- FI 8400 Financial Management of Depository Institutions (3)
- FI 8460 Introduction to FinTech (3)
- FI 9100 The Theory of Asset Valuation (3) (Requires consent of instructor.)
- MSA 8040 Data Management for Analytics (3)
- MSA 8050 Scalable Data Analytics (3)
- MSA 8100 Operations Research Models and Methods (3)
- MSA 8150 Machine Learning for Analytics (3)
- MSA 8190 Statistical Foundations for Analytics (3)
- MSA 8250 Data Visualization (1.5)
- MSA 8500 Image Analytics for Operations (3)
- MSA 8650 Image and Text Analytics with Deep Neural Networks (3)
- MSA 8760 Risk Analytics (3)
- MSA 8770 Text Analytics (3)
- MSA 8780 Marketing Analytics (3)
- RMI 8150 Corporate Risk Management (3)

Students may select, with the prior approval of both program directors for the dual degree program, electives other than those shown above if they can demonstrate the course(s) will better meet their educational objectives.

4. Course Requirements: Dual Degree Master of Science in Analytics and Master of Science in Quantitative Risk Analysis and Management Program.

This section is applicable to students interested in the dual degree program Master of Science in Analytics and Master of Science in Quantitative Risk Analysis and Management Program. Students interested in the Master of Science in Quantitative Risk Analysis and Management should go to Section 2 above. Students interested in the dual degree program between the Master of Actuarial Science and the Master of Science in Quantitative Risk Analysis and Management Program should go to Section 3 above.

a. Required Technical Support Course

The following course must be completed within the first 18 hours of 8000-level course work.

- ECON 8740 Applied Statistics and Econometrics (3)

b. Required Courses in the Dual Degree Program
• MSA 8010 Data Programming for Analytics (3)
• MSA 8040 Data Management and Analytics (3)
• MSA 8050 Unstructured Data Management (3)
• MSA 8100 Operations Research Models and Methods (3)
• MSA 8150 Machine Learning for Analytics (3)
• MSA 8200 Predictive Analytics (3) (alternatively, students can take ECON 9720 Econometrics II)
• QRAM 8600 Theory of Risk Sharing (3)
• QRAM 8610 Financial Engineering (3)
• QRAM 8630 Stochastic Interest Rate and Credit Models (3)
• QRAM 8640 Advanced Credit Risk Models
• RMI 8300 Predictive Risk Analytics (3)
• ECON 8780 Financial Econometrics (3)

** Students who have completed AS 4340 and/or AS 4350 or their equivalents must substitute appropriate 8000-level actuarial science courses for AS 8340 and/or AS 8350. The substitutions must be selected from section C below in consultation with the actuarial science program director.

c. Elective Courses in the Dual Degree Program

Students should consult with the program directors for the Master of Actuarial Science and Quantitative Risk Analysis and Management programs prior to beginning their elective coursework and may select from among the following courses:

• Any of the 8000 level QRAM or MSA classes not listed in the above required course list
• ECON 8860 Economics of Global Finance (3)
• FI 8020 Financial Analysis and Loan Structuring (3)
• FI 8240 Global Portfolio Management (3)
• FI 8260 Hedge Funds and Their Strategies (3)
• FI 8300 Advanced Corporate Finance (3)
• FI 8310 Investment Banking (3)
• FI 8320 Corporate Financial Strategy (3)
• FI 8400 Financial Management of Depository Institutions (3)
• FI 8460 Introduction to FinTech (3)
• FI 9100 The Theory of Asset Valuation (3)
• MGS 8040 Data Mining (3)
• MSA 8050 Scalable Data Analytics (3)
• MSA 8100 Operations Research Models and Methods (3)
• MSA 8150 Machine Learning for Analytics (3)
• MSA 8190 Statistical Foundations for Analytics (3)
• MSA 8250 Data Visualization (1.5)
• MSA 8500 Image Analytics for Operations (3)
• MSA 8650 Image and Text Analytics with Deep Neural Networks (3)
• MSA 8760 Risk Analytics (3)
• MSA 8770 Text Analytics (3)
• MSA 8780 Marketing Analytics (3)
• RMI 8150 Corporate Risk Management (3)
Students may select, with the prior approval of both Faculty Directors for the dual degree program, electives other than those shown above if they can demonstrate the course(s) will better meet their educational objectives.

5. Program of Study: Each student’s program must be planned in consultation with the Faculty Director of the QRAM program and a copy of the program filed with the Office of Graduate Student Services for review and approval. The program of study should be planned before the student takes a non-required course. Progress toward the degree, including clearance for graduation, can be confirmed only with an approved program of study. Any changes in the program must be approved by the Faculty Director and a copy of the changes sent to Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

6. Time Limit: The time limit for completing the QRAM program is five calendar years from the first semester a course in section 2-4 is taken.

7205 Master of Science in Data Science and Analytics; Concentration: Data Science in Business

Dr. Yusen Xia, Program Director

The mission of the MS in Data Science and Analytics with the Data Science in Business concentration is to educate students how to acquire, organize and model data sets in order to formulate the questions that guide decision-making in corporate and non-corporate settings. Graduates are ideal candidates for the range of technical data-driven positions in a variety of industries/businesses currently emerging such as data scientist, quantitative marketing analyst, credit risk analyst, predictive modeler, health informatics, web analytics. Please see program website for more details.

Regulations for the Degree

All Data Science in Business students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to M.S. in Data Science and Analytics with a concentration in Data Science in Business program. A maximum of 6 semester hours of transfer credit is possible in this 30-hour program.

Foundation Requirements

These courses are in addition to the 30 hours required for the M.S. in Data Science and Analytics with a concentration in Data Science in Business. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent work has been previously completed with grades of C or higher, or as deemed suitable by the MSA Admission Committee.

Accounting: financial and managerial accounting principles (MBA 8025, or ACCT 2101 & ACCT 2102)
Behavioral Science: Management principles (MBA 8165, or MGS 3400). Students may satisfy this requirement with either management (MGS 3400), sociology (SOCI 1101), or psychology (PSYC 1101) principles.

Economics: Both macroeconomic principles (ECON 2105) and microeconomic principles (ECON 2106).

Mathematics: Students must have completed three semesters of advanced calculus (MATH 2211, MATH 2212, and MATH 2215). Students who have only completed one semester of calculus could be conditionally admitted and get full admission after taking MSA 8005 Mathematical Foundations for Analytics.

Statistics: Students must have ECON 8710 or completed two semesters of undergraduate mathematical statistics (MATH 4751, MATH 4752).

Course Requirements: The Master of Science in Analytics

a. Required Courses (21 hours):

- MSA 8020 Data Visualization (1.5)
- MSA 8040 Data Management for Analytics (3)
- MSA 8050 Scalable Data Analytics (3)
- MSA 8010 Data Programming for Analytics (3)
- MSA 8150 Machine Learning for Analytics (3)
- MSA 8190 Statistical Foundations for Analytics (3)
- MSA 8200 Predictive Analytics (3)
- MSA 8600 Deep Learning Analytics (1.5)

b. Elective Courses (9 hours):

Students will select at least two elective courses. These courses will either be in an application area of interest or the student can deepen their technical skill development. The faculty adviser must individually approve electives. Examples of possible electives include the following:

- CIS 8020 Systems Integration (3)
- CIS 8100 Management of Information Systems (3)
- CIS 8200 Information Systems Strategy (3)
- CIS 8401 Mobile Applications Development (3)
- ECON 8780 Financial Econometrics (3)
- FI 8000 Valuation of Financial Assets (3)
- FI 8200 Financial Derivatives (3)
- FI 8260 Hedge Fund Strategies (3)
- FI 8320 Corporate Financial Strategy (3)
- FI 8460 Introduction to Fin Tech (3)
- HA 8160 Health Care System (3)
- HA 8550 Health Planning and Financial Management (3)
- HA 8620 Operations Management and Quality in Health Care (3)
- HA 8670 Health Information Systems (3)
• HA 8750 Health Analytics (3)
• MK 8010 Marketing Metrics (3)
• MK 8705 Digital Marketing Analytics (3)
• MK 8715 Brand and Consumer Analytics (3)
• MK 8730 Marketing Engineering (3)
• QRAM 8610 Financial Engineering (3)
• QRAM 8620 Quantitative Financial Risk Models (3)
• MSA 8500 Image Analytics for Operations (3)
• MSA 8650 Image and Text Analytics with Deep Neural Networks (3)
• MSA 8770 Text Analytics (3)
• MGS 8110 Applied Regression Analysis (3)
• MGS 8730 Project Management (3)
• MGS 8740 Operations Strategy (3)
• RCB 8040 Competing on Analytics and Organizational Knowledge (3)
• RMI 8050 Risk Management Modeling (3)
• RMI 8300 Predictive Risk Models (3)

Program of Study

Any changes in the program must be approved by the faculty adviser and a copy of the changes sent to the GRSS.

Time Limit

The time limit for completing the M.S. in Data Science and Analytics program is five years from the first semester a course in section a, or b (above) is taken.

7210 Master of Science in Health Administration

Marie Cameron, FACHE, Faculty Director, 404-413-7637, mariecameron@gsu.edu

In addition to offering the M.B.A. and M.H.A. degrees as a dual degree program (described earlier), the Robinson College of Business offers the Master of Science in Health Administration as a single degree. This program is designed to meet the needs of students who desire a background in health administration and the opportunity to acquire specialized skills in areas of business or healthcare administration, including health information systems and data analytics. PMBA and other graduate degree students may apply for the MSHA as a second degree.

7210.10 Admissions

The application procedures and admission criteria are given in the “Master’s Admissions” section of this chapter. A personal interview normally is required for all applicants but may be waived.

Admission to the M.S.H.A. degree program may occur each semester. Early application is encouraged, however, since the number of applicants each year exceeds the capacity of the program.
7210.20 Regulations for the Degree

All Master of Science in Health Administration students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the M.S.H.A. program.

Course Requirements. The course requirements for the Master of Science in Health Administration degree and the format of the program follow. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below.

a. Foundation Courses. See section 7110.10 for the foundation requirements for this degree.

b. Required Courses in Health Administration (24 hours)

- HA 8160 Introduction to the Health Care System (3)
- HA 8190 Health Policy and Ethics (3)
- HA 8250 Health Economics and Financing (3)
- HA 8450 Legal Environment of Health Care (3)
- HA 8550 Healthcare Financial Management & Planning (3)
- HA 8620 Operations Management and Quality in Health Care (3)
- HA 8670 Health Information Systems (3)
- HA 8990 Strategic Management in Health Care (3)

c. Concentration (12 hours). An approved selected concentration may be taken such as: a customized concentration of 8000-level RCB courses, or MBA concentrations, to complete this section of the M.S.H.A. program. For concentrations in the Master of Business Administration program cited earlier in this chapter, follow the course requirements given for the chosen MBA concentration.

Program of Study/Course Selection. All M.S.H.A. students must contact the Institute for consultation and guidance. Concentration courses must be approved by the Faculty Director, and students are required submit a formal program of study to the Office of Graduate Student Services. Progress toward the degree, including clearance for graduation, will be determined by Office of Graduate Student Services by comparing courses taken with the foundation courses assigned at admission and the degree requirements stated above. Students must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

Time Limit. The time limit for completing the M.S.H.A. degree with a concentration is five years from the first semester a course in section b or c (above) is taken.

7210.30 Law and Health Administration Dual Degree Program

The College of Law and the Institute of Health Administration in the Robinson College of Business, offer two dual degree programs leading to the Juris Doctor degree (J.D) and either (1) a Master of Science in Health Administration degree (MSHA), or (2) an MBA/MHA (Master of Business Administration and Master of Health Administration).

The J.D./M.S.H.A. and J.D./M.B.A./M.H.A. are courses of study which allow selected previously-
approved course work earned in one degree program to satisfy some of the elective course requirements of the other degree program. This enables a student to complete the requirements for both or all three degrees in a shorter time than required to complete each of the degrees separately. Students who have already earned a J.D. and an M.S.H.A. degree or M.B.A./M.H.A. degree at Georgia State University or at another institution are not eligible for the dual program.

The following regulations apply to students who are accepted to the J.D. and M.S.H.A. or M.B.A./M.H.A., programs and are enrolled in the dual degree program as opposed to being enrolled in each degree program separately.

Application

Applicants to the J.D./M.S.H.A. or J.D./M.B.A./M.H.A. dual degree programs must meet the entrance requirements and follow the application procedures of both the College of Law and the Robinson College of Business. Applicants must be accepted by both colleges. Admission into one program does not presume admission to the other. To be in the J.D./M.S.H.A. of J.D./M.B.A./M.H.A. dual degree programs, students must be admitted to both programs before completing either program.

Applicants must take the LSAT to apply to the College of Law. Robinson College of Business will accept the LSAT in lieu of the GRE or GMAT for students already accepted into the J.D. program.

Students who are accepted to both the J.D. and M.S.H.A. or M.B.A./M.H.A. programs and wish to be enrolled in the dual degree program are responsible for providing written notification of their intentions to each college.

Requirements

Students must satisfy the curriculum requirements for both the J.D. and M.S.H.A. or M.B.A./M.H.A. degrees.

J.D. Degree requirements

As stated in the College of Law chapter of the catalog, a law student must earn 90 semester hours of credit to qualify for the J.D. degree. For students enrolled in the J.D./M.S.H.A. or J.D./M.B.A./M.H.A. dual degree programs, the College of Law will permit up to 12 semester hours of 8000-level M.S.H.A. or M.B.A./M.H.A. courses with grades of B or better to be credited toward elective hours required for the J.D.

M.S.H.A. Degree Requirements

The requirements for the M.S.H.A. are described in section 7210 of the Robinson College of Business catalog.

For students enrolled in the J.D./M.S.H.A. dual degree program, the Robinson College of Business will accept 12 semester hours of relevant health law elective courses from the J.D. program with grades of B or better to be credited toward the 12 semester hours of concentration/electives for the M.S.H.A.
In addition, 3 credit hours will be given for LAW 7239 Health Law: Quality and Access or LAW 7240 Health Law: Finance and Delivery in place of HA 8450 Legal Environment of Health Care.

**M.B.A./M.H.A. Degree Requirements**

The requirements for the M.B.A./M.H.A. are described in section 7170 of the Robinson College of Business catalog.

For students enrolled in the J.D./M.B.A./M.H.A. dual degree program, the Robinson College of Business will accept 3 credit hours for LAW 7239 Health Law: Quality and Access or LAW 7240 Health Law: Finance and Delivery in place of HA 8450 Legal Environment of Health Care. The Robinson College of Business will also accept 3 hours of legal externship courses or clinic in the health care area in place of HA 8810 Administrative Residency.

**Enrollment Sequencing and Time Limits**

The College of Law does not permit enrollment in the dual degree program after a student has completed more than 21 semester hours of 8000-level M.S.H.A. or M.B.A./M.H.A. coursework.

After students have been admitted to both the J.D. and M.B.A./M.H.A. programs and have declared intent to be enrolled in the dual degree program, they must, at the first opportunity, complete 30 semester hours of required courses in the J.D. program. After completion of these 30 hours, enrollment in the courses of either college or enrollment in both colleges concurrently is permitted.

Dual degree students may be required to take prerequisite, foundational or introductory courses prior to beginning M.B.A./M.H.A. coursework.

**Grading and Scholastic Discipline**

Students enrolled in either of the dual degree programs must meet the academic regulations of each college, including those related to the minimum GPA and scholastic discipline. The computation of the GPA in each college is based only on courses taken in that college.

**Graduation**

Prior to graduation, students completing the dual degree program are responsible for confirming with both colleges that the degree requirements for each program have been satisfied. Students must complete the graduate application for each degree.

No credit hours of J.D. course work will be applied toward the M.S.H.A. or M.B.A./M.H.A. degree requirements until the completion of J.D. degree requirements. No credit hours of M.S.H.A. or M.B.A./M.H.A. course work will be applied toward the J.D. degree requirements until the completion of M.S.H.A. or M.B.A./M.H.A. degree requirements. A simultaneous awarding of degrees will satisfy this requirement.

The requirements for the M.S.H.A. or M.B.A./M.H.A. degrees must be completed within five years of the initial semester of enrollment in the Robinson College of Business. The J.D. degree must be completed
within six years of the initial semester of enrollment in the J.D. program.

7220 Master of Science in Information Systems

Simha Magal, Program Director

The Master of Science in Information Systems (MSIS) is designed to meet the needs of students who want to build a strong background in information systems and the application of information and communications technology in business.

In today’s highly competitive global environment, the effective deployment of information technology has become critical to business success. New applications of information technology strike at the heart of what management does and how organizations are structured and compete. In many respects these applications are redefining the nature of work and its organization.

There is a continuing shortage of specialists and managers with the combination of business and technology skills needed to bring about this reshaping of international industries. The purpose of the Master of Science in Information Systems program is to produce graduates who are able to combine their general business knowledge with the latest information systems tools and techniques to enable organizations to compete strongly in the global marketplace. Graduates, through the use of optional concentrations in their programs of study, will be prepared for careers in specific areas such as information systems management; health informatics; or information technology consulting, project management, database management, and systems development.

The MSIS program is usually offered only as a cohort program.

Regulations for the Degree

1. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the Master of Science in Information Systems students. A maximum of 12 hours of transfer credit is permitted in this 36-hour program.

2. Course Requirements. The course requirements for the Master of Science in Information Systems and the format of the program follow. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below.

   a. **Foundation Courses.** The MSIS degree program foundation includes successful completion of the programming courses CIS 4920 Data Programming. The requirement for CIS 4920 may be waived upon approved evidence of equivalent accredited undergraduate coursework with a grade of at least C or successful completion of approved online courses and exams in programming as directed by the CIS Graduate Program Coordinator.

   b. **Required Courses in Computer Information Systems (12 hours).** These comprise the “MSIS Core”:

      - CIS 8000 or MIT 8000 Information Technology Project Management (3)
      - CIS 8010 or MIT 8010 Process Innovation (3)
      - CIS 8040 Fundamentals of Database Management Systems (3)
      - CIS 8080 or MIT 8080 Security and Privacy of Information and Information Systems (3)
c. **Elective Courses** in Computer Information Systems and Related Fields: Any 8000 level CIS or MIT graduate courses may be used to satisfy the electives requirements subject to approval by the MSIS faculty advisor.

d. **Capstone Requirement** (3-6 hours), selected from:
   - CIS 8391 Field Study in Computer Information Systems (0-6)
   - MIT 8990 IT Management Capstone Project (0-6)
   - CIS 8990 M.S. C.I.S. Thesis Research (0-6)

e. Optional Concentrations available within the MSIS

Subject to availability, MSIS students are expected to do full-time or part-time field study in the last two semesters in the program. MSIS students are required to begin their field study in the semester preceding the one in which they will graduate.

Students may complete the MSIS by meeting the requirements (2.a.) through (2.d.) above. Subject to course availability, students may additionally qualify for the following concentrations by substituting the below required courses in the concentration in place of Elective Courses detailed in (2.c.) above.

**MSIS with a Concentration in Cybersecurity**: The MSIS with a concentration in Cybersecurity is usually offered as a cohort program intended to prepare students for executive careers in the areas of privacy and security of information and information systems. Required courses for this concentration:

The MSIS Core (12 hours):

- CIS 8000 Information Technology Project Management (3)
- CIS 8010 Process Innovation (3)
- CIS 8040 Fundamentals of Database Management Systems (3)
- CIS 8080 Information Systems Security and Privacy (3)

The MSIS Cybersecurity Concentration Core (18 hours):

- CIS 8085 Information and Information Systems Risk Management (3)
- CIS 8086 Protecting Information Assets (3)
- CIS 8087 Cloud Computing and Security (3)
- CIS 8088 Network Security and Hacking (3)
- CIS 8394 Advanced Topics in Cybersecurity (3)
- CIS 8697 The Cybersecurity Experience (3)
- CIS 8391 Field Study in Computer Information Systems (3)
- Elective Courses in Computer Information Systems and Related Fields as detailed in (2.c.) above (3).

**MSIS with a Concentration in Big Data Management and Analytics**: The MSIS with a concentration in Big Data Management and Analytics is usually offered as a cohort program intended to prepare students for executive careers in the management and use of both structured and unstructured data. Required courses for this concentration:

The MSIS Core (12 hours):
• CIS 8000 Information Technology Project Management (3)
• CIS 8010 Process Innovation (3)
• CIS 8080 Information Systems Security and Privacy (3)
• CIS 8040 Fundamentals of Database Management Systems (3)

The MSIS Big Data Management and Analytics Concentration Core (18 hours):

• CIS 8005 Data Programming for Analytics (3)
• CIS 8045 Unstructured Data Management (3)
• CIS 8392 Advanced Topics in Big Data Analytics (3)
• CIS 8395 The Big Data Analytics Experience (3)
• CIS 8695 Managing Big Data for Analytics (3)
• CIS 8795 IT Infrastructure for Big Data (3)
• CIS 8391 Field Study in Computer Information Systems (3)
• Elective Courses in Computer Information Systems and Related Fields as detailed in (2.c.) above (3).

MSIS with a Concentration in Digital Innovation: The MSIS with a concentration in Digital Innovation is usually offered as a cohort program intended to provide students with the knowledge needed to help conceive and execute digital innovation and transformation initiatives in existing organizations and new entrants. Required courses for this concentration:

The MSIS Core (12 hours):

• CIS 8000 Information Technology Project Management (3)
• CIS 8010 Process Innovation (3)
• CIS 8040 Fundamentals of Database Management Systems (3)
• CIS 8080 Information Systems Security and Privacy (3)

The MSIS Digital Innovation Concentration Core (18 hours):

• CIS 8393 Advanced Topics in Digital Innovation (3)
• CIS 8396 The Digital Innovation Experience (3)
• CIS 8672 Integrated Process Platforms for Innovation (3)
• CIS 8674 Customizing Enterprise Systems Platforms (3)
• CIS 8676 Innovating with Emerging Technologies (3)
• CIS 8695 Managing Big Data for Analytics (3)
• CIS 8391 Field Study in Computer Information Systems (3)
• Elective Courses in Computer Information Systems and Related Fields as detailed in (2.c.) above (3).

MSIS with a Concentration in Information Technology:

The MSIS with a concentration in Information Technology is usually offered as a year-long cohort program. The purpose of the Master of Science in Information Systems program is to produce graduates who are able to combine business knowledge with the latest information systems tools and techniques. Graduates will be prepared for careers in a variety of areas such as systems development, information
systems managements, consulting, project management, software quality management, database management, security and privacy, and business process design. Required courses for this concentration:

- The MSIS Core (12 hours):
  - CIS 8000 Information Technology Project Management (3)
  - CIS 8010 Process Innovation (3)
  - CIS 8080 Information Systems Security and Privacy (3)
  - CIS 8040 Fundamentals of Database Management Systems (3)
- The MSIS IT Concentration Core (9 hours)
  - CIS 8025 Mobile Application Development (3)
  - CIS 8630 Business Computer Forensics and Incident Response (3)
  - CIS 8670 Enterprise Resource Planning Systems: Implementation and Management (3)
- CIS 8391 Field Study in Computer Information Systems (3)
- Elective Courses in Computer Information Systems and Related Fields as detailed in (2.c.) above (12).

MSIS with a Concentration in Health Informatics:

The MSIS with a concentration in Health Informatics is usually offered as a cohort program intended to prepare students for executive careers in the management of information resources in support of medical services and administration within the healthcare industry. Required courses for this concentration:

- The MSIS Core (12 hours):
  - CIS 8000 Information Technology Project Management (3)
  - CIS 8010 Process Innovation (3)
  - CIS 8080 Security and Privacy of Information and Information Systems (3)
  - CIS 8040 Fundamentals of Database Management Systems (3)
- The MSIS Health Informatics Concentration Core (12 hours):
  - CIS 8070 Mobile Health: Technologies and Applications (3)
  - HA 8160 Introduction to the Health Care System (3)
  - HA 8670 Health Information Systems (3)
  - HA 8740 Health Analytics (3)
- CIS 8391 Field Study in Computer Information Systems (3)
- Elective Courses in Computer Information Systems and Related Fields as detailed in (2.c.) above (9).

MSIS with a Concentration in Management of Information Technology: The MSIS with a concentration in Management of Information Technology is usually offered in executive format (See Section 7225 for details)

3. Program of Study/Course Prerequisites. With the exception of cohort-enrolled students, each student’s program must be planned in consultation with an M.S. faculty adviser in the Department of Computer Information Systems for approval by the MSIS coordinator before a non-required course is taken. Students may contact the department for the name of their faculty adviser and to schedule an appointment. A copy of the program will be filed with the Office of Graduate Student Services for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the faculty adviser and a
copy of the changes sent to Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the graduate catalog to determine if they have met the prerequisites for any course to be taken.

4. **Time Limit.** The time limit for completing the Master of Science in Information Systems is five years from the semester the first course in section B or C (above) is taken.

For additional information, please visit the following website: robinson.gsu.edu/masters-programs/ms-in-information-systems/.

### 7220.10 4 + 1 Programs

1. The Department of Computer Information Systems in the Robinson College of Business and the Department of Computer Science jointly offer a combined BS in Computer Science/MS in Information Systems program. The program is designed to take five years, at the end of which, a student will receive both a Bachelor of Science in Computer Science and a Master of Science in Information Systems. The graduate level coursework permits a choice of emphasis in Managing Information Technology or Information Systems Development. The program requires application. Please see the Computer Science undergraduate program for the complete description of this joint offering.

2. The Department of Computer Information Systems in the Robinson College of Business and the Department of Mathematics and Statistics jointly offer a combined BS in Mathematics/MS in Information Systems program. The program is designed to take five years, at the end of which, a student will receive both a Bachelor of Science in Mathematics and a Master of Science in Information Systems. The graduate level coursework permits a choice of emphasis in Managing Information Technology or Information Systems Development. The program requires application. Please see the Mathematics undergraduate program for the complete description of this joint offering.

### 7225 Executive Master of Science in Managing Information Technology

**Dr. Ephraim McLean, Program Director**

The Executive Master of Science in Information Systems concentrating on managing information technology (MSIS MIT) is a 12-month, lock-step program designed for rising professionals with a minimum of four years professional information technology (IT)-related experience. Students receive a Master of Science in Information Systems degree upon completion of the program.

The purpose of the Executive Master of Science in Information Systems program is to provide mid-level managers, and those aspiring to IT-related management, a challenging curriculum relevant to the needs of rising IT professionals. The MSIS MIT curriculum is designed to prepare IT professionals for significant management level positions. Participants will increase their ability to think efficiently, plan productively, manage effectively, and make decisions that create added value for the enterprise. For example, the curriculum will help managers assume a strategic role in the enterprise’s future; plan and manage for the next generation of IT business challenges; utilize and manage resources effectively and efficiently; and identify and broker solutions to current challenges utilizing best-in-practice IT methods. From an IT
perspective, managers will be better able to implement a business-focused approach to create value and deliver a competitive edge for their organization.

The program consists of ten three-hour courses and a six-hour capstone project. The courses cover a wide range of IT management topics extending from strategic to organizational, financial, and technical. All courses are enhanced versions of the award-winning courses offered in the traditional two-year program. The capstone projects will be selected based on the interests of participants and their value and relevance to their companies.

The lock-step format serves to forge strong networking, a more in-depth learning environment and support among the students as they take the same courses together during the program.

This Executive format program meets the needs of busy IT professionals; the program is designed to be completed in one year while maintaining full-time employment. Face-to-face classes are held on alternate Saturdays. Electronic distant-learning modules are offered in between these Saturdays at the convenience of the participant – any time, any place.

Another aspect of the strong commitment to the success of each participant is the Mentor of Excellence program. During the year-long experience, each participant will be paired with a business leader who will serve as mentor to guide, advise, and support.

**Required Courses in the MSIS MIT**

**The MSIS Core (12 hours)**

- MIT 8000 Information Technology Project Management (3)
- MIT 8010 Process Innovation (3)
- MIT 8080 Security and Privacy of Information and Information Systems (3)
- MIT 8090 Managing the Enterprise Architecture (3)

**The MIT Concentration Core (1 hours)**

- MIT 8070 Mobile and Wireless Information Systems (3)
- MIT 8100 Management of Information Services (3)
- MIT 8200 Information Systems Strategy (3)
- MIT 8210 Global Systems Sourcing (3)
- MIT 8299 Finance and Accounting for Information Systems (3)
- MIT 8699 Organizational Change Management (3)
- MIT 8990 IT Management Capstone Project (3-6)

Elective Courses in Computer Information Systems and Related Fields as detailed in (c.) above (0-3).

For additional information, please visit the following website: http://robinson.gsu.edu/cis/execms.html

**7230 Master of Science in Information Systems Audit and Control**
There is a continuing shortage of specialists with the combination of auditing and technology knowledge needed to properly inform and execute management decisions in areas such as IT Assurance, Information Security, IT Governance, and IT Risk Management. The purpose of the Master of Science in Information Systems Audit and Control (MSISAC) program is to produce graduates who are able to combine a thorough knowledge of auditing principles with an equally thorough knowledge of Information Technologies to enable organizations to competently operate in environments where auditing systems are tightly integrated with organizational information systems. Graduates will be well prepared for careers in IT auditing, but also for a variety of other areas such as auditing, information systems, consulting, and assurance.

Information Systems provide the basic fabric with which organizational management develop, record, and process abstractions and models that are both the basis of management strategy, decision making and of recording the flows of assets and liabilities within the organization and with its trading partners. Auditors are increasingly called upon to design, review, audit, and advise stakeholders with regard to the accuracy, timeliness and appropriateness of complex information systems. Developing competencies in IT audit often requires a broad understanding of enterprise-wide approaches for managing growing international risks and emerging regulations. IT auditors must know how to identify and mitigate information risks, effectively manage security-related incidents, and reduce the impact of these on people, profitability and property.

To summarize, the purpose of the Master of Science in Information Systems Audit and Control program is to produce graduates who are able to combine their knowledge of auditing with the latest information systems tools and techniques to enable organizations to achieve information assurance and security. MSISAC program graduates are expected to be academically prepared to take the CISA exam upon completion of their degree. This combination of skills necessary for obtaining these highly valued certifications is very rarely found in any program in the nation.

Regulations for the Degree

1. The regulations, policies, and procedures given in the “Master's Enrollment” and “Master's Programs” sections of this chapter apply to the MSISAC program. A maximum of six hours of transfer credit is permitted in this 30-hour program.

2. Course Requirements. The course requirements for the Master of Science in Information Systems Audit and Control degree and the format of the program follow. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below. For descriptions and prerequisites of the undergraduate foundation courses, see the Course Descriptions chapter of the Georgia State University Undergraduate and Graduate Catalogs. These catalogs are available on the web at www.gsu.edu; click on Students then University Catalogs.

a. Foundation Requirements:

The required courses in this list are in addition to the 30 hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with grades of C or higher. An accepted applicant, who at the time of admission to the MSISAC program, has not completed the foundation and prerequisite courses, must complete these requirements in a manner approved by the MSISAC program coordinator.
ACCT 2101 and ACCT 2102 Principles of Accounting I and II

b. Required Courses (30 hours):

Credit Hours/COURSES

Required Graduate Courses (24 hours)

- CIS 8000 Information Technology Project Management (3)
- CIS 8085 Information and Information Systems Risk Management (3)
- CIS 8086 Protecting Information Assets (3)

7300 Master of Science in Commercial Real Estate

Jon Wiley, Program Director, 404-413-7728, jwiley@gsu.edu

The Master of Science in Commercial Real Estate degree is designed for students who are principally interested in careers in the real estate industry and those who will use real property in business decision making. It provides the student with both general and specialized real estate knowledge and analytical skills. The degree prepares students for professional areas such as financial counseling, market analysis and valuation, as well as industry activities such as real property development, acquisition, disposition, and management. The MSCRE program is based on a synthesis of legal, physical, market and financial considerations that affect the real property decision process. The student’s educational experience is enhanced because the program attracts many experienced real estate professionals into the classroom, and the program has a practical orientation in which students participate in industry problem solving and research under the direction of the program’s faculty.

7300.10 Regulations for the Degree

Course Requirements: The Master of Science in Commercial Real Estate degree consists of 30 semester hours of course work numbered 8000 and above. Previous graduate real estate coursework successfully
completed at the Robinson College of Business will be evaluated and up to six hours credit toward the required or elective courses in the major (section “b” or “c” below) may be awarded to entering students. A maximum of six hours of transfer credit is permitted in this 30-hour program. The option of awarding credit toward the MSCRE degree is totally at the discretion of the Department of Real Estate and its designees. The course requirements for the degree and the format of the program follow. The number of hours of 8000-level credit required in each section of the program is shown in parentheses after the section heading. This number represents the minimum requirement. If prerequisites for the courses listed in each section have not been properly completed or if they are not included as electives within the M.S.C.R.E. program, they must be taken as additional hours. In most cases, however, the graduate-level prerequisites can be incorporated as electives into the student’s program of study. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

a. Foundation Courses: See section 7110.10 for the foundation requirements for this degree.

b. Required Courses in the Major (21 hours):

- RE 8020 Commercial Real Estate Modeling (3)
- RE 8030 Commercial Real Estate Financing (3)
- RE 8050 Commercial Real Estate Development (3)
- RE 8060 Commercial Real Estate Market Analysis (3)
- RE 8090 Commercial Real Estate Case Analysis (3)
- RE 8100 Commercial Real Estate Asset Management (3)
- RE 8400 Commercial Real Estate Investmentse (3)

c. Elective Courses (9 hours): Students may choose as electives any three 8000 level RE prefixed courses or appropriate courses from an approved list available from the Department of Real Estate.

Program of Study/Course Prerequisites: Each student’s program of study must be planned in consultation with the MSCRE program director or a designee of the director before a copy of the program of study is filed with the Office of Graduate Student Services for review and approval. Students may contact the department to schedule an appointment with a faculty adviser. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the faculty adviser and a copy of the changes sent to Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

Time Limit. The time limit for completing the M.S.C.R.E. program is five years from the first semester a course in section “b” or “c” (above) is taken.

7310 Master of Taxation

Lynn Comer Jones, Program Director, 404-413-7205, lcjones@gsu.edu

The Master of Taxation program offers a variety of courses that provide students with a meaningful opportunity to develop the technical, analytical, and research skills needed for tax practice. The Master of
Taxation Program is an academically rigorous program taught in the J. Mack Robinson College of Business Buckhead Center by School of Accountancy faculty. Students begin the program in the Fall semester and complete the program in either 16 months or two years. Classes meet once a week and are offered from either 4:30 pm to 7:00 pm or 7:15 pm to 9:45 pm in Fall and Spring. Summer classes are offered two days a week.

7310.20 Regulations for the Degree

The regulations, policies and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the MTx program.

Course Requirements. The course requirements for the degree of Master of Taxation and the format of the program follow:

a. Foundation and Prerequisite Courses.

The courses in this section are in addition to the 30 semester hours required for the MTx degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with minimum grades of C-. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below. For descriptions and prerequisites of the undergraduate foundation courses, see the Course Description chapter of the Georgia State University Undergraduate Catalog. This catalog is available on the web at catalog.gsu.edu.

Accounting: Financial accounting principles ACCT 2101 or MBA 8025 or managerial accounting principles ACCT 2102 or MBA 8115.

b. Courses in Taxation (30 hours)

Students will take ten of the following courses, including seven required courses totaling 21 hours. In addition, students will take three other courses totaling 9 hours. Program administrators will ensure that students take the courses in the appropriate sequence, e.g., the TX 8020 and TX 8030 must be the first two courses taken if a student takes only two courses the first semester in the program.

- TX 8020 Advanced Federal Income Taxation (3)***
- TX 8030 Tax Research (3)***
- TX 8040 Tax Practice and Procedures (3)***
- TX 8080 Taxation of Partnerships and Partners (3)***
- TX 8100 Taxation of Property and Securities Transactions (3)
- TX 8120 Taxation of Corporations and Shareholders (3)***
- TX 8140 Advanced Corporate Tax (3)
- TX 8180 Current Topics in Taxation (3)
- TX 8220 Estate and Gift Taxation (3)
- TX 8270 State and Local Taxation (3)
- TX 8300 International Taxation (3)
- TX 8320 Accounting for Income Taxes (3)***
- TX 8391 Field Study in Taxation (3)
- TX 8510 Issues in Individual Tax (3)
- TX 8670 Tax Crimes and Forensics (3)
- TX 8800 Tax Analytics (3)

*** Required courses

Advisement/Course Selection: The MTx program coordinator and graduate academic advisor are available to students for consultation and guidance as needed. Students are encouraged to contact the coordinator and/or advisor and schedule an appointment for advisement as needed. Progress toward the degree, including clearance for graduation, will be determined by the Office of Graduate Student Services by comparing courses taken by the student with the foundation courses assigned at admission and the degree requirements stated above. It is the responsibility of the students to monitor their progress toward the degree and to determine if they have met all the requirements of the degree.

The School of Accountancy requires strict adherence to the prerequisites listed for each of its courses (see the Course Descriptions chapter of this catalog). Students enrolled in taxation courses without having completed the stated prerequisites with minimum grades of C will be required to withdraw from the course. Please contact the School of Accountancy before registration if you have questions about course prerequisites.

Time Limit: The time limit for completing the MTx program is five years from the first semester a course is taken in the program.

7330 Graduate Certificate in Enterprise Risk Management

The Graduate Certificate in Enterprise Risk Management is intended for individuals who possess an MBA or a master’s degree in a business-related field, or hold a CPA or CPCU, and who desire graduate education in enterprise risk management but do not wish to complete the degree requirements for an MBA with a concentration in risk management and insurance. The Certificate in Enterprise Risk Management is designed for individuals seeking more broad-based education than what they might have gained in their undergraduate or graduate degree programs. There is an increasing demand for professionals who can efficiently manage financial and nonfinancial risk exposures faced by businesses. Course work taken to meet the certificate requirements emphasizes both financial risks (including, for example, derivatives and exchange rate risk) and nonfinancial risk (including political risk, property and liability exposures, risks associated with information technology, and employee welfare exposures).

7330.10 Regulations for the Certificate Program

All Graduate Certificate in Enterprise Risk Management students will complete the Business Communication Skills requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and Master’s Programs sections of this chapter apply to the C.E.R.M. program. The time limit for completing the certificate program is three calendar years. The certificate program requires completion of six graduate courses in residence at Georgia State University. In the event of waiver of one or more of the prescribed courses due to prior experience or education, substitute
courses will be approved by the Director of the E.R.M. Certificate Program. A minimum cumulative GPA of 3.00 is required. In addition to possessing the MBA or another business master’s degree, or the CPA or CPCU professional credential, applicants are required to meet the admission requirements for the MBA program with a concentration in risk management and insurance (enterprise risk management specialization)

**Course Requirements**

a. Required Courses (12)

- RMI 8050 Risk Management Modeling
- RMI 8370 Financial Risk Management
- FI 8000 Valuation of Financial Assets
- FI 8200 Derivative Markets I

b. Elective Courses (6)

Students select two courses from the following list with approval from the Director of the ERM Certificate Program: Students select two courses from the following list with approval from the Director of the ERM Certificate Program:

- RMI 8120 Property and Liability Insurance
- RMI 8150 Corporate Risk Management
- FI 8300 Advanced Corporate Finance
- FI 8320 Corporate Financial Strategy
- ACCT 8680/CIS 8080 Security and Privacy of Information and Information Systems
- ECON 8860 Economics of Global Finance

Other graduate-level course work may be substituted with prior approval by the Director of the E.R.M. Certificate Program other graduate-level course work may be substituted with prior approval by the Director of the E.R.M. Certificate Program.

**Awarding the Certificate.** After completing the requirements for the certificate according to these regulations, the student must make a written request to the academic advisor in Graduate Recruiting and Student Services to have the certificate awarded. The academic advisor then reviews the student’s record. If all requirements have been met, a request for the certificate on behalf of the student will be sent to the registrar’s office.

**7335 Graduate Certificate in Information Systems**

Dr. Bala Ramesh, Program Director, 404-413-7372, bramesh@gsu.edu

The purpose of the Graduate Certificate in Information Systems is to more formally acknowledge students who have chosen to strengthen their technical foundation by successfully undertaking and completing additional Information Systems studies. The Graduate Certificate in Information Systems program is designed for students in any graduate major who wish to prepare to meet business and personal challenges
through the use of information technology. From biology and the health sciences through the arts, social sciences, legal and business disciplines information systems are a fundamental enabler.

Admission to the Graduate Certificate in Information Systems program is subject to the minimum Georgia State University and RCB cumulative grade-point-average requirement for RCB graduate programs. Applicants for the Graduate Certificate in Information Systems must either be a current Robinson student or they must apply for admission to Robinson – meeting normal admission requirements and be accepted into the Robinson College.

Obtaining the Graduate Certificate in Information Systems requires completion of any three CIS 8000 level courses. For currently available courses, see www2.cis.gsu.edu/cis/program/syllabus/index.asp. In addition, you must have a grade point average of at least 3.0 for the three courses, with all grades a B- or higher. Please be aware that some of these courses have prerequisites and other requirements for enrollment. There are no additional fees required for the Graduate Certificate in Computer Information Systems. For more information including how to request the certificate after completing course work, please see www2.cis.gsu.edu/cis/program/ciscertificate.asp.

7340 Graduate Certificate in Personal Financial Planning

We are no longer accepting applications for this certificate program at this time.

The Graduate Certificate in Personal Financial Planning is intended for students who are CPAs or who possess an M.B.A., a master’s degree in a business-related field, or a J.D. and who desire graduate training in the field of personal financial planning. The program helps prepare students for a career in personal financial planning. Completion of the program will satisfy the education requirement for the Certified Financial Planner (CFP)™ examination.

The program provides a focus on individual and small business needs which complements the typical M.B.A./business master’s focus on larger business entities. Employers such as banks, brokerages, and other financial services firms will find this dual focus attractive as they seek employees capable of dealing effectively with both the demands of modern corporate life and the needs of the individuals and small businesses served by the financial services firms. The certificate provides attorneys with a focus on individual and small business financial needs which complements the legal services provided to those groups. Because of the close relationship between the financial planning and legal professions, the certificate also offers attorneys the opportunity to make a career change while using much of the knowledge and skill obtained through their legal training. For CPAs, the certificate provides the opportunity to expand the scope of services offered to clients.

7340.10 Regulations for the Certificate Program

All Graduate Certificate in Personal Financial Planning students will complete the “Business Communication Skills Requirement” explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to this certificate program. The time limit for completing the certificate program is two years. The certificate program requires completion of six graduate courses in residence at Georgia State University; in the event
of waiver of one or more of the listed courses due to prior experience or education, substitute courses will be approved by the program director. A minimum cumulative GPA of 3.00 is required. In addition to possessing the M.B.A., another business master’s, or C.P.A. credential, applicants are required to meet the admissions requirements for the M.S. program with a major in personal financial planning with the following exceptions. Graduate Certificate in P.F.P. applicants who are CPAs or who possess an M.B.A. or other master’s degree in business from an AACSB-accredited institution or who possess a J.D. degree are exempt from the requirement of providing GRE or GMAT scores as part of the application process. Such qualifying applicants will be required to provide transcripts or other proof that they possess the necessary professional or academic credentials. If admitted to the Graduate Certificate in Personal Financial Planning program with valid GMAT or GRE scores, such applicants must submit valid GMAT or GRE scores before being eligible for admission to a regular master’s degree program, another graduate certificate program, or nondegree status in the Robinson College of Business.

Course Requirements

Foundation Course. The Graduate Certificate in Personal Financial Planning requires completion of this foundation course or its equivalent: ACCT 4510 Introduction to Federal Income Taxation (3)

Required Courses (18 hours)

- PFP 8400 Personal Financial Planning (3)
- PFP 8420 Individual Retirement Planning (3)
- PFP 8460 Estate Planning (3)
- PFP 8520 Advanced Studies in Asset and Wealth Management (2)
- FI 8000 Valuation of Financial Assets (3)
- RMI 8200 Life Insurance (3)

Awarding the Certificate. After completing the requirements for the certificate according to these regulations, the student must make a written request to the Department of Risk Management and Insurance to have the certificate awarded. The request, an official Georgia State University transcript, and a certificate fee of $40.00 (check made payable to Georgia State University) must be sent to the director of the certificate program in the Department of Risk Management and Insurance. The director then reviews the student’s record. If all requirements have been met, the certificate, signed by the dean and the department chair, will be issued to the student.

7350 Graduate Certificate in Real Estate

We are no longer accepting applications for this certificate program at this time.

7350.10 Admissions

An accredited bachelor’s degree provides appropriate background for the nondegree certificate in real estate program (C.R.E.) in the Department of Real Estate. No specific undergraduate courses are required for consideration for admission to the program. The application procedures and admission criteria are given in the “Master’s Admissions” section of this chapter.
7350.20 Regulations for the Certificate Program

1. All Graduate Certificate in Real Estate students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the C.R.E. program. The time limit for completing the certificate program is two calendar years. The program requires 18 semester hours of course work. A maximum of nine hours of transfer credit is permitted in this program. A minimum cumulative GPA of 3.00 is required.

2. Course Requirements (3). There are three semester hours of required course work in the certificate program.
   - RE 8000 Real Estate Concepts and Practices (3)

   This course can be replaced in the program by another 8000-level real estate course with permission from the program coordinator. Replacement with a substitute course will be evaluated based on previous course work and experience.

3. Electives (15). The student can select any 8000-level course from the real estate curriculum for the program. The following courses are recommended as electives.
   - RE 8020 Real Estate Investment Analysis (3)
   - RE 8030 Real Estate Financing (3)
   - RE 8040 Legal and Regulatory Environment of Real Estate (3)
   - RE 8050 Real Estate Development (3)
   - RE 8060 Applied Real Estate Market Analysis (3)
   - RE 8100 Strategic Management of Real Property in a Corporate Environment (3)
   - RE 8410 Real Estate Appraisal Theory and Practice (3)

   Each student may petition the coordinator of the certificate program to substitute up to nine semester hours of course work from other departments or programs as electives in the C.R.E. program. These courses must have relevance for a real estate education. The student will prepare a written request in which the title of the course is identified, a full course description is attached, and a statement explaining the significance of the course to the student’s program is included. In each instance, these courses must be graduate level. The written request should be submitted to, and will be evaluated by, the C.R.E. coordinator, who will notify the Office of Graduate Student Services of any approvals.

4. Awarding of the Certificate. After completing the requirements for the certificate according to these regulations, the student must make a written request to the certificate adviser in the Department of Real Estate to have the certificate awarded; an official Georgia State University transcript and a certificate fee of $125 (check made payable to Georgia State University) must be sent with the request. The adviser then reviews the student’s record. If all requirements have been met, the certificate, signed by the dean and department chair, will be issued to the student.

7355 Graduate Certificate of Specialization in Brand & Customer
Management

This certificate program is open to all MBA students in the Robinson College of Business and graduate students from other colleges at Georgia State University who are qualified for admission to a master’s program in the Robinson College of Business.

To earn the (Graduate) Certificate of Specialization in Brand & Customer Management, students must complete the following 4 courses:

- MK 8200 Marketing Research (MR)
- MK 8710 Customer Relationship Management (CRM)
- MK 8620 Product and Brand Management (PBM)
- MK 8720 Data Driven Marketing (DDM)

Prerequisite for all courses: MBA 8145 Strategic Marketing Management

Students must earn an overall 3.0 grade point average (GPA) in all courses taken in the J. Mack Robinson College of Business and must earn a minimum of B- in all courses taken as part of this certificate.

Contact Dr. Alok Saboo for further information: asaboo@gsu.edu.

7356 Graduate Certificate in Strategic Sales Leadership

Applications are not currently being accepted for this program.

Kent Christopher Lemley, Program Director, 404-413-7668, clemley@gsu.edu

This certificate program is open to all MBA students in the Robinson College of Business and graduate students from other colleges at Georgia State University who are qualified for admission to a masters program in the Robinson College of Business.

To earn the (Graduate) Certificate in Strategic Sales Leadership, students must complete the following 2 courses:

- MK 8330 Strategic Selling
- MK 8340 Strategic Sales Leadership

And two or more of the following related electives:

- MK 8510 Business to Business Marketing
- MK 8710 Customer Relationship Management
- MGS 8430 Negotiation
- MGS 8425 Coaching For Leadership

Prerequisite for all courses: MBA 8145 Marketing Management
Students must earn an overall 3.0 grade point average (GPA) in all courses taken in the J. Mack Robinson College of Business and must earn an overall grade point average (GPA) of 3.0 in all courses taken as part of this certificate.

7358 Executive Doctorate in Business Administration (DBA)

Executive DBA Program Office
Tower Place 200, 3348 Peachtree Road NE, Suite 500, Atlanta, GA 30326
404-413-7178
Program website: robinson.gsu.edu/executive-doctorate-in-business
Email: lgrabowski1@gsu.edu

Louis J. Grabowski, MBA, DBA, Director of the Executive DBA Program
Lars Mathiassen, Ph.D., Academic Director of the Executive DBA Program

Please contact the Executive DBA Program Office for more information about this program.

7358.05 Goals and Expectations

The Executive Doctorate in Business Administration (DBA) program of the J. Mack Robinson College of Business is designed to transform executives with strong managerial, industry and academic experience into engaged practitioner-scholars with interdisciplinary, global perspectives on the dynamic business environment of today. This mission is accomplished by helping these executives develop general research competence in applied research (including demonstrating knowledge of relevant theory and scholarly literature) while creating new knowledge on contemporary business problems through both rigorous coursework and the writing and defense of a dissertation. Upon successful completion of the program students will have the:

- Knowledge and expertise required to identify, understand, and successfully tackle the interdisciplinary, big picture issues that characterize global business management today.
- Skills in formal social inquiry required to define and address complex issues and to disseminate knowledge in a variety of professional and public outlets to influence professional activity and public policy.
- Interdisciplinary and global systems-oriented perspective that is required to understand and address contemporary business problems.

The Executive DBA program is a 3-year degree program designed for senior executives who already possess an MBA, EMBA, or equivalent MS degree. It is offered in an executive format with students participating in four 3-day residencies (Thursday, Friday and Saturday) per semester for 6 semesters.

Conduct

All Executive DBA students must assume full responsibility for knowledge of the rules and regulations concerning their studies. Moreover, students are expected to abide by generally accepted standards of conduct. The university reserves the right to exclude any student whose conduct is prejudicial or injurious to the university, faculty, or other students. Students should review the “University Code of Conduct” in
Applications for the Executive DBA program are reviewed on a “rolling” basis throughout the year for once-a-year admission in the upcoming fall semester. Once approximately 24 students are accepted admission for that fall ends and admission for the next year’s fall semester begins. Applicants are therefore encouraged to apply as early as possible to ensure a seat in the fall semester.

The application is completed online at robinson.gsu.edu/executive-doctorate-in-business/application-process/.

Inquiries and questions may be addressed to:

Executive DBA Program Office
University
Tower Place 200
3348 Peachtree Road NE, Suite 500,
Atlanta, GA 30326

Georgia State
C/o Associate Director

404-413-7178

Admission Criteria

Admission decisions are based on a careful review of the applicant’s official transcripts, resume, required essays, and the other information submitted in support of the application. Applicants must possess an accredited MBA, EMBA, or equivalent MS degree. Applicants are not required to submit a certification of their state of health but on enrollment, must submit an immunization certification before being enrolled. The college reserves the right to investigate the health, character, and personality of each applicant. Listed below are the materials which all applicants must submit to the Executive DBA Program Office to be considered for admission. All applicants must provide proof of lawful presence.

Application

Applicants must submit all application forms, including the narrative essay section.

Application Fee

An application fee of $100 must be submitted by all applicants and may be paid by credit card. Checks or money orders should be made payable to Georgia State University in U.S. currency. Do not send cash. The
application fee cannot be waived, is nonrefundable, and does not apply toward registration fees.

**Transcripts**

Applicants either must request that two official copies of all transcripts be sent directly from each institution attended (even if a degree was not obtained) to the Executive DBA Program Office or submit the official transcripts unopened with the application. If the transcript is sent via E-script, it should be submitted to: execdoctorate@gsu.edu, ATTN: Associate Director. An applicant who has previously attended Georgia State University is permitted to submit only one copy of transcripts from each institution attended prior to entering the university; two copies are required from all institutions attended after having last been registered at Georgia State University.

**Resume**

A full, detailed resume should be submitted as part of the online application.

**Essays**

To assess the applicant’s writing skills and understand his/her goals and expectations, 3 essays of approximately 1-1.5 pages are required. The specific questions can be found on the website at robinson.gsu.edu/executive-doctorate-in-business/application-process/.

**Interview**

Applications will be reviewed by a selection committee comprising faculty and the directors of the Executive DBA Program. If short-listed, the selection committee will request a one hour, face-to-face interview with the candidate. Based upon the submitted information and the interview the selection committee will then make a final decision as to acceptance.

**International Applicants**

International and domestic students follow the same application process. International applicants are not required to take the Test of English as a Foreign Language (TOEFL) or the International English Testing System (IELTS). However, they must provide proof of a F-1 or J-1 Visa.

**Financial Requirements**

Georgia State University reserves the right to admit only those applicants who are academically qualified and who have documented their ability to meet the financial requirements while in attendance.

7358.20 Academic Regulations

I. Scholastic Warning and Termination

Each student must maintain a 3.00 doctoral GPA ("B" average). The doctoral grade-point average (GPA) is
defined as the GPA for all Executive DBA courses numbered 9000 or higher taken after admission to the Executive DBA program. A student whose doctoral GPA falls below 3.00 is on “scholastic warning.” After being placed on scholastic warning, a student must attain a 3.00 doctoral GPA within two consecutive calendar semesters; otherwise the individual will be terminated from Executive DBA studies in the Robinson College of Business. The doctoral GPA could differ from the GPA calculated by the university and reported on the student’s official transcript, since the university GPA would also include the grades from any graduate courses numbered 6000 or above taken at Georgia State University before admission to the Executive DBA program.

A student who has been terminated from the Executive DBA program will not be permitted to reapply to or reenter the program.

II. Standards of Performance

The requirements and regulations listed in this catalog refer to minimum standards of performance. The program may have additional requirements, as set forth in writing, that exceed the minimum standards published in this catalog. If a student fails to meet these additional requirements, the directors of the Executive DBA program may require that the student withdraw from Executive DBA study. To continue in the program, a student must make reasonable and timely progress toward the degree in terms of coursework completed.

Beginning with the semester of acceptance, an Executive DBA student must register for a full load each semester (excluding summer semester unless the student has completed all coursework) until graduation. A full load is considered a minimum of nine semester hours. Students who are visa-holders may need to register for more hours and should discuss their status with the Office of International Student and Scholar Services. An additional Dissertation Seminar, EDB 9171, may be used to satisfy this requirement until the student has passed the final dissertation defense. Students who fail to meet the continuous enrollment requirement are subject to withdrawal from Executive DBA studies in the Robinson College of Business.

As stated in the previous section concerning continuous enrollment, students must enroll for a full course load each semester (excluding summers). Any absence from the program must be approved by the academic director. Students who leave the program without an approved request or who do not fulfill the terms of an approved request for an absence may not be allowed to re-enter the program. Any student who is not registered for one calendar year must file a re-entry application with the Registrar’s Office. Students must be mindful of the deadline for this application. There is a charge to file a re-entry application. As previously stated, reentry approval is not automatic and the student should check with the EDB Program Office if considering re-entry.

III. The Dissertation

The purpose of the dissertation is for the Executive DBA candidate to demonstrate ability to conduct research leading to a significant contribution in a chosen area of inquiry. Before a student begins to collect any primary data from human subjects, the student must make sure that all data collection, including surveys, is in compliance with the guidelines set out by the Institutional Review Board (IRB). Included among these requirements is certification via an online test on ethical treatment of subjects. The IRB’s Human Subjects Manual is accessible online at ursa.research.gsu.edu/ursa/compliance/human-subjects/.
IV. The Dissertation Committee

The Dissertation Committee consists of a chair plus a minimum of two members. The committee, and any subsequent change in its membership, is appointed by the academic director of the Executive DBA program. Faculty from institutions other than Georgia State may serve as members of the committee, but at the time of the initial formation of the committee, there must be at least two Georgia State faculty on the committee. At least two committee members must be in good standing with respect to Georgia State graduate faculty status. Co-chair arrangements are not only acceptable, but even encouraged, especially in cases where one of the co-chairs is an assistant professor. When the student is ready to begin the initial work on the dissertation, he or she should first discuss with the Executive DBA academic director the names of potential faculty who would be the most appropriate chair of the Dissertation Committee. Only after the Executive DBA academic director has agreed with the student as to the choice of a particular faculty member should the student then invite the faculty member to be chair of the committee. Once the dissertation chair has been chosen, the chair, in consultation with the student, will recommend the selection of the remaining committee members to the Executive DBA academic director.

V. Dissertation Proposal and Dissertation Defense

Prior to admission to candidacy for the degree, a dissertation proposal defense must be held. After the student completes a written proposal that the Dissertation Committee deems to be ready for final defense, a dissertation proposal defense will be held before the Dissertation Committee.

The student’s dissertation proposal should include a summary of the following: the purpose of the study; the nature of the subject to be investigated and its importance; a brief review of the literature; the theory, if any, to be developed; the empirical methodology, techniques, and data sources, if any, to be used; the nature of the hypotheses to be developed or tested, where appropriate; and a time frame for completion of the dissertation.

The proposal defense will be open to all interested faculty and doctoral (Executive DBA and Ph.D.) students. After the proposal defense has been held, the members of the committee will vote to determine if the student is deemed to have a satisfactory research topic. A unanimous decision by the student’s Dissertation Committee is required. The members of the committee will sign the dissertation proposal defense approval form.

Submission of the approval form does not constitute a contractual agreement between the student and the Dissertation Committee. It is within the scope and function of the Dissertation Committee to recommend modifications to the research as it proceeds. Upon submission of the proposal defense approval form to the Executive DBA Program Office, the student is admitted to candidacy for the degree.

Committee members should be given a draft of the proposal (and also the final dissertation) at least two weeks before the proposed defense date. This will permit a revision cycle to both improve the work before the defense and ensure that committee members have adequate time to comment and raise substantive issues, should this be the case. It will also allow the defense date to be postponed in the event that required changes could not be completed before the proposed defense date.

When the candidate’s Dissertation Committee judges that the dissertation is complete, it must be defended orally in a final dissertation defense. At least two weeks in advance of the final dissertation defense, the
student will inform the Executive DBA Program Office of the scheduled date of defense and an announcement will be made to all academic units. While any interested faculty member or graduate student may attend the examination and participate in the discussion, only those individuals who are members of the candidate’s Dissertation Committee will vote to approve or disapprove the dissertation. Upon successful defense of the dissertation, a dissertation defense approval form will be signed by the members of the Dissertation Committee and submitted to the Executive DBA Program Office. Unanimous approval is required. Guidelines for the dissertation are available from the Executive DBA Program Office.

VI. Dissertation Embargo Policy

Students may request a 3-month, 6-month, 9-month, or 12-month restriction of dissertation publishing (hereafter termed embargo). Requests must be made in writing to the dissertation chair/co-chairs prior to the electronic uploads of the dissertation to ProQuest/UMI and Georgia State University’s Scholarworks Digital Archive Library. Written approval from the chair/co-chairs must be sent to the Executive DBA Program Office. Once the approval is received by the Executive DBA Program Office, the dissertation will not be published for the approved embargo period. The dissertation will be released for publishing after the embargo period ends.

VII. Dissertation Defense and Graduation

When the candidate’s Dissertation Committee judges that the dissertation is complete, it must be defended orally in a final dissertation defense. While any interested faculty member or graduate student may attend the examination and participate in the discussion, only those individuals who are members of the candidate’s Dissertation Committee will vote to approve or disapprove the dissertation. Upon successful defense of the dissertation, a dissertation defense approval form will be signed by the members of the Dissertation Committee and submitted to the Executive DBA Program Office. Unanimous approval is required. An electronic copy of the dissertation must be submitted to the Executive DBA Program Office two weeks prior to the anticipated date of graduation.

7358.25 Time Limits for the Degree

The time limits specified below should be interpreted as the maximum amount of time students may take to complete each of the degree requirements. It is anticipated that most students will complete the requirements within the intended three years of study:

- All requirements for the Executive DBA degree, including the dissertation, must be completed within five years from the semester of entry into the Executive DBA program.
- Additional tuition will be required for any program of study in the Executive DBA program, including the dissertation, beyond three years.

7360 Ph.D. Program

Ph.D. Program Office
802 RCB Building
404-413-7070
Program website: robinson.gsu.edu/phd/
7360.05 Goals and Expectations

The Ph.D. program of the J. Mack Robinson College of Business will develop in graduates a high level of competence in conducting research and in teaching business disciplines by requiring: (1) education in theory; (2) education in general research techniques as well as research techniques specific to a discipline; (3) research experience with faculty members on contemporary research problems and issues; and (4) training on teaching methodology reinforced with active classroom teaching experience.

The Ph.D. program requires that the student demonstrate mastery of a large and complex body of knowledge and a high degree of proficiency in the techniques of teaching and research. This is evidenced by the successful completion of coursework and examinations, effective performance in classroom instruction, participation with faculty members in research, presentation of papers and reports, and the writing of a dissertation of high quality. Given the substantial commitment of intellectual effort and time required to achieve these competencies, students are required to enroll on a full-time basis.

Conduct

All Ph.D. students must assume full responsibility for knowledge of the rules and regulations concerning their studies. Moreover, students are expected to abide by generally accepted standards of conduct. The university reserves the right to exclude any student whose conduct is prejudicial or injurious to the university, faculty, or other students. Students should review the “University Code of Conduct” in the General Information chapter of this catalog for explicit information on this topic.

The Nature of Ph.D. Studies

Ph.D. studies are fundamentally different from undergraduate or master’s programs. The Ph.D. student must be self-motivated and work well independently. The program is academically rigorous and students must have exceptional quantitative and verbal skills. Coursework is but one facet of the program. The research component is the heart of the Ph.D. program. The student must be highly motivated to work on research projects independently and with faculty. Most students take five years to complete the degree. Students are encouraged to present research papers at national and regional meetings. The college provides partial funding to help defray costs. The successful student is one who not only has excellent academic skills, but a passion for scholarly research.

7360.10 Ph.D. Majors Offered

The Robinson College of Business offers the Ph.D. in Business Administration with major fields in:

- Accountancy
- Computer Information Systems
- Finance
- Managerial Sciences (specializations are currently offered in Organization Behavior/Human
Resource Management and Strategic Management). Please contact the Ph.D. Program Office for information about which of these programs is currently admitting students.

- Marketing
- Real Estate
- Risk Management and Insurance

The specialization in international business is available to Ph.D. students majoring in any business major.

7360.15 Ph.D. Program Operation

The Ph.D. program of the Robinson College of Business is governed and administered as follows:

1. The Graduate Program Council of the Robinson College of Business, comprised of five faculty members, recommends Ph.D. degree requirements and academic regulations that are subsequently submitted for approval by the college faculty.
2. The Ph.D. Program Office is run by the Associate Director who reports to the Director. This office is the student’s primary point of contact for administrative matters. Applications for admission are reviewed by this office.
3. The Ph.D. Coordinator is the faculty member in the student’s academic unit who advises students on courses to be taken and other degree requirements.

7360.20 Admissions: Applications, Procedures, and Criteria

Applications for the Ph.D. programs will be accepted for once-a-year admission in the fall semester. The deadline for receipt of all required application materials is January 8.

The Ph.D. application is an online electronic application. Visit gradapply.gsu.edu/apply/ to apply online. All documents and other materials submitted by or for applicants for admission to the Ph.D. program become the property of Georgia State University and cannot be returned. It is the responsibility of each applicant to follow the application procedures completely and correctly and to be certain that all materials have been submitted to the Office of Admissions-Graduate Programs by the deadline for receipt of materials. Incomplete applications will not be processed. Admission is for entry in a specific major. A student may enter a different major only if, and after formal approval has been given by the Ph.D. admissions committee of that major. Not all majors admit students yearly.

Admission Criteria

Admission decisions are based on a careful review of the applicant’s scholastic record, admission test score(s), letters of recommendation, and the other information submitted in support of the application (including an interview, if required by the academic unit). In making the decision, each academic unit must consider at all times the optimum number of students in the program. This could result in the denial or deferral of otherwise qualified applicants.

Applicants are not required to submit a certification of their state of health but must submit an immunization certification upon admission. The college reserves the right to investigate the health, character, and personality of each applicant.
Listed below are the materials that all applicants must submit to the Office of Admissions-Graduate Programs to be considered for admission.

**Application**

Applicants must submit all application forms, including a statement of purpose and resume.

**Application Fee**

The $50.00 non-refundable application fee is payable by credit card (American Express, Visa, and Mastercard) and is due by the application deadline. The application will not be processed until the fee is paid. If the fee is not paid by the deadline, the application will not be reviewed. The application fee cannot be waived, is nonrefundable, and does not apply toward registration fees.

**Transcripts**

Applicants either must upload a copy of an official transcript with the application, request that one official copy of all transcripts be sent directly from each institution to the Office of Admissions-Graduate Programs, or submit the official transcripts to the Office of Admissions-Graduate Programs.

**Letters of Recommendation**

Three letters of recommendation are required from persons who are able to evaluate the applicant’s intellectual capacity for advanced study, independent research, analytical thinking, and the potential for effective teaching at the collegiate level. Applicants and students are not permitted to have access to letters of recommendation.

**Admission Test for Ph.D. in Business Administration**

All applicants to the Ph.D. in Business Administration program must submit official scores on the Graduate Management Admission Test (GMAT) of the Graduate Management Admission Council.

The following units —Business Process Innovation, Computer Information Systems, Finance, Marketing, Organizational Behavior/Human Resource Management, Real Estate, and Risk Management and Insurance—will accept scores on the Graduate Record Examinations (GRE) as a substitute for the GMAT from applicants. The GRE school code is 5251.

GMAT scores will not be considered if they are more than seven years old at the time of application to the Ph.D. program. The school code is QCK-ZW-59.

**Interview/Additional Information**

As part of the review of an applicant’s file by faculty representatives in the academic unit, an interview or additional information may be required. In such cases, the applicant will be notified.

**7360.25 International Applicants**
TOEFL: An international applicant whose native language is not English must submit official scores from the Educational Testing Service on the Test of English as a Foreign Language (TOEFL). An international applicant who has received a degree from an accredited U.S. institution is exempt from this requirement. However, international applicants who have taken the TOEFL within two years of application to the Ph.D. program are encouraged to upload official scores even if the exemption applies. The school code is 5251.

Financial Requirements: Georgia State University reserves the right to admit only those international applicants who are academically qualified and who have documented their ability to meet the financial requirements while in attendance. Although the Ph.D. program does award assistantships to the majority of accepted applicants, this funding is not always adequate to meet all living expenses. Applicants who are requesting a student (F-1) visa might be required to have some independent sources of funding, depending on the amount of their award. Visit the International Student and Scholar Services site at isss.gsu.edu for the estimated costs of attendance.

Immunization Certification

Georgia State University is in compliance with the Georgia Board of Regents immunization requirements. All new students must show proof of being immunized. The Ph.D. program will consider applicants for admission without this documentation. However, in order to matriculate, an applicant must have fulfilled this requirement. The Immunization Form can be obtained from the Georgia State University Student Health Clinic.

7360.30 Changing Year of Entry and Record Retention

Admission to the Ph.D. program is for the specific semester and year stated in the acceptance letter. Any accepted applicant who does not enroll for the semester and year for which acceptance was granted must notify the associate director of the Ph.D. program and the unit’s Ph.D. coordinator so his or her records may be updated for fall of the next year. Admission for the next year is not guaranteed. Applicants should be aware that assistantships, teaching fellow appointments, or fellowships could be affected by such a change. An applicant who wishes to reapply will need to submit a new application and may need to resubmit application materials.

7360.35 Ph.D. Assistantships, Teaching Fellow Appointments, and Fellowships

Ph.D. students in the Robinson College of Business are eligible for graduate research assistantships (GRA) and graduate teaching assistantships (GTA). The college also awards teaching fellow appointments to select Ph.D. students who have passed the dissertation proposal defense. In addition, there are various fellowships and scholarships awarded on a competitive basis to Ph.D. students. No separate application is required for applicants to be considered for funding.

7360.40 Graduate Research Assistantships

Newly admitted Ph.D. students. Soon after admission to the Ph.D. program, the Ph.D. Program Office will inform newly admitted students of the type and number of appointments, if any, which they have been allocated by their academic unit. All accepted applicants are automatically considered for assistantships.

Students in their second and successive years of Ph.D. studies. Each academic unit will determine the
assistantship appointment level to be allocated to its continuing Ph.D. students based on the students’ performance in the program and on the unit’s assistantship budget.

**7360.45 Graduate Teaching Assistantships**

The teaching assignment of a graduate teaching assistant is usually a basic undergraduate course in the student’s area of interest.

Advanced Ph.D. students may be permitted to teach advanced-level courses. Only Ph.D. students who have completed the requirements for a master’s degree, or the equivalent amount of graduate coursework, can be considered for appointment as a GTA.

Prior to the actual appointment as a GTA, a student must be recommended for hiring by the academic unit and receive approval to teach from the University. The student is responsible for completing all paperwork involved in this process well in advance of the semester for which approval is sought.

Any Ph.D. student appointed as a GTA must take BA 9200, Seminar in University Teaching, during his or her first or second semester of teaching. Prior teaching experience does not exempt a student from this requirement. Nonnative speakers of English must demonstrate adequate proficiency in their language skills to the satisfaction of their academic unit prior to being hired as a GTA.

**7360.50 Tuition for GRAs and GTAs**

A student hired as a GRA or GTA receives a tuition waiver. A registration fee assessed each semester includes the health clinic, student activity, student athletics, recreation and transportation fees. International students and all graduate students who have a full tuition waiver (as defined by the university) must pay a mandatory health insurance fee or provide proof of health insurance. Submission of proof of insurance does not automatically exempt a student from this requirement. Approval is contingent on verification of coverage. For further information, students should visit the Student Financial Services website: sfs.gsu.edu/tuition-fees/student-health-insurance/.

**Standards Applying to Both GRA and GTA Appointments**

1. Students must register for a minimum of nine credit hours of appropriate coursework (or research/dissertation (BA 9000/BA 9500) hours). During each semester in which an assistantship is held, students must register for a full load (as defined by the university) of credit hours that may be a combination of courses, dissertation hours, and/or research hours. Students who are visa-holders should discuss their status with the Office of International Student and Scholar Services to make certain that they are registered for a sufficient number of hours.
2. Students must maintain satisfactory academic standing during the period(s) of their appointment, including a minimum 3.0 cumulative grade-point average. Ph.D. students must also be making normal progress toward completion of the degree requirements.
3. Satisfactory performance, as measured by the academic unit, as a GRA or a GTA is required for continuation of such appointments in subsequent semesters.
4. For further information on policies and procedures applying to GRA and GTA appointments, contact the associate director in the Ph.D. Program Office.
7360.60 Teaching Fellow Appointment

A teaching fellow is appointed for one academic year at a time. Appointment as a teaching fellow benefits Ph.D. students who have passed the dissertation proposal defense and have demonstrated satisfactory classroom teaching ability over a period of two or more semesters by providing them with a significant level of income during the year in which they are working full time on their dissertation.

7360.65 Fellowships and Scholarships

The Robinson College of Business has a number of fellowships and scholarships available, ranging from $500 to $10,000 per year. Such fellowship and scholarship stipends are awarded in addition to the amounts received by Ph.D. students who are appointed as GRAs or GTAs. Information on specific fellowships and scholarships is available from the Ph.D. coordinator of the student’s academic unit.

7360.70 Doctor of Philosophy in Business Administration

Program of Study

The Ph.D. Coordinator is the faculty member in the student’s academic unit who advises students on courses to be taken and on other degree requirements. As a function of, and implicit in course selection for the student’s program of study the academic unit will consider how the discipline fits into managerial and organizational contexts and will select courses accordingly.

A program of study indicating how the student will fulfill each of the degree requirements must be approved by the student’s Ph.D. Coordinator and the Director of the Ph.D. Program by the end of the second semester of enrollment. This program of study is filed in the RCB Ph.D. Program Office; it may be revised, as appropriate, but must be kept current, as it will be a key factor in determining satisfactory progress in the program. Courses would generally be at the 9000 Ph.D. level, except as advised by the Ph.D. Coordinator of the student’s academic unit, and would support and complement the student’s research interest. Undergraduate courses cannot be used towards the program of study.

Forty-two (42) semester hours of coursework, as a minimum, must be completed successfully for graduation. The major field requirement is a minimum of 18 credit hours; the research methods requirement is a minimum of 15 credit hours; and free elective or secondary area courses are a minimum of 9 credit hours for a total of 42 semester hours. Students are expected to complete the courses on their program of study on a timely basis. When feasible, registration for a full load (as defined by the college) each semester is encouraged, including courses for research and dissertation credit (BA 9000 or BA 9500). At a minimum, students who do not hold an assistantship must register for nine hours per semester (excluding summer semester unless the student holds a GRA/GTA or is in the last semester of the program). BA 9000 or BA 9500 can be used to satisfy this requirement. Students who are visa holders should discuss their enrollment status with the Office of International Student and Scholar Services.

Quantitative and Research Foundations (15 semester hours)

Students entering the Ph.D. program are presumed to have background and current knowledge in the following additional areas:
• multi-variable calculus including multiple integration, partial derivatives, and infinite series;
• matrix algebra including linear transformations, vector differentiation, and eigenstructures;
• computer skills for empirical research including statistical packages and the use of databases; and
• macroeconomics and microeconomics through the intermediate level.

Students can remedy a deficiency in any or all of these areas by taking credit or noncredit courses, auditing appropriate graduate or undergraduate classes, and/or attending tutorial sessions. Students who feel their background is not adequate may consult with their Ph.D. Coordinator for recommendations on overcoming deficiencies.

Major Field (18 semester hours)

Hours of Course work. The satisfactory completion of no fewer than 18 graduate-level semester hours constitutes minimum preparation in the major field.

Students must have satisfactorily completed all courses on the program of study in the major field and in the research methods requirement area to be eligible to take the preliminary examination. Requests to take the preliminary examination are made through the Ph.D. Coordinator. The Ph.D. Coordinator will notify the Office of Ph.D. Programs with the names of the student(s) prepared to take the examination.

Students will not be permitted a second attempt to pass the preliminary examination except upon recommendation, by majority vote, of the group of faculty members who graded the examination. A maximum of two attempts is permitted to pass the preliminary examination.

Research Methods Requirements (15 semester hours)

The satisfactory completion of no fewer than 15 graduate-level semester hours constitutes minimum preparation in research methods. The Ph.D. Coordinator may approve substitutions for any of the following research methods requirements.

1. Intermediate Statistics: Approved graduate-level statistics course (3)
2. Research Design: MGS 9940(3)
3. Regression: MGS 9950(3)
4. Multivariate Data Analysis: MGS 9960(3)
5. Elective: research methods/theory development course: BA 9260; BA 9280; BA 9300; IFI 9000; IFI 8650 or a course may be from the student’s major field and department (3)
6. Free Electives or Secondary Area (9 semester hours)
7. The satisfactory completion of no fewer than nine (9) semester hours fulfills this coursework requirement and students may choose to fulfill these credits, with the approval of their Ph.D. Coordinator, either with a secondary area or with free electives.
8. Courses for each secondary area shall be taken from a list of courses prepared by the academic unit offering the secondary area, but students must have the approval of their Ph.D. Coordinator for both taking a secondary area and for the set of courses making up that secondary area.
9. Substitutes for secondary area courses can be made with the approval of the unit offering the secondary area and the student’s Ph.D. coordinator.

7360.75 Academic Regulations
Transfer Credit

A maximum of 15 semester hours may be transferred from other institutions or from other programs at Georgia State University. Transfer credit, whether from other institutions or from Georgia State, must have been completed within five years of the semester of entry to the Ph.D. program. The course must have been limited to graduate students only, and a grade of A or B must have been received.

At the time the program of study is planned with the Ph.D. coordinator, the student who requests transfer credit must submit a course description from the catalog of the institution, a syllabus or course outline, and written justification stating why the course is relevant to the program of study. Requests for transfer credit are approved at the discretion of the unit coordinator in consultation with Ph.D. faculty. Final approval for the acceptance of transfer credit rests with the director of the Ph.D. program at the time the program of study is submitted to the Ph.D. Program Office.

Residency Requirement

In order to earn a graduate degree at Georgia State University, students must earn the majority of their graduate program credit hours from Georgia State University. All transfer hours are subject to unit/college level approval. The Robinson College of Business defines residency in the Ph.D. program as being enrolled in approved coursework that is appropriate for the program, and that have not been counted toward another graduate degree of this college. The minimum residency requirement is 18 semester hours.

Scholastic Warning and Termination

The Ph.D. grade-point average (GPA) is defined as the GPA for all courses numbered 6000 or higher taken after admission to the Ph.D. program. Each student must maintain a 3.0 Ph.D. GPA (“B” average). A student whose semester or overall Ph.D. GPA falls below 3.0 is on “scholastic warning.” After being placed on scholastic warning, a student must attain a 3.0 Ph.D. GPA within two consecutive calendar semesters; otherwise, the individual will be terminated from Ph.D. studies in the Robinson College of Business.

The Ph.D. GPA could differ from the GPA calculated by the university and reported on the student’s official transcript, since the university GPA would also include the grades from all courses taken at Georgia State University before admission to the Ph.D. program.

No student will be permitted to sit for any examination required for the Ph.D. degree, other than course examinations, without having a minimum 3.0 Ph.D. GPA at the time the examination is to be taken. A student with a Ph.D. GPA below 3.0 is ineligible for graduate assistantship appointments as either a GRA or GTA. Students must have at least a 3.0 Ph.D. GPA in order to graduate.

A student who has been terminated from the Ph.D. program will not be permitted to reapply to or reenter the program.

Standards of Performance

The requirements and regulations listed in this catalog refer to minimum standards of performance. The student’s academic unit may have additional requirements, as set forth in writing that exceed the minimum standards published in this catalog. If a student fails to meet these additional requirements, the director of
the Ph.D. program, in consultation with the chair of the student’s major academic unit and the Ph.D.
coordinator of the unit may require that the student withdraw from Ph.D. study.

To continue in the program, a student must make reasonable and timely progress toward the degree in
terms of coursework completed and examinations. Students who fail to adhere to the minimum standards
published in the catalog or to any higher standards established by the academic unit will be terminated
from the program.

Petitions

When a student feels that unusual circumstances call for an exception to any of the regulations or
requirements relating to the degree in his or her particular case, the student may write to the Ph.D.
coordinator and request exemption from or change in the policy. The petition by the student must be
submitted with accompanying justifications. If the Ph.D. coordinator and academic unit support the
request, the Ph.D. coordinator will write a letter of support for the student and submit the material to the
director of the Ph.D. program for a decision.

Continuous Registration

Beginning with the semester of acceptance, a Ph.D. student must register for a full load each semester) until
graduation. Summer enrollment is mandatory if required by the Ph.D. faculty coordinator, if the student is
receiving a GRA/GTA, if the student is in the last semester of the program, and for certain visa holders. A
full load is considered a minimum of nine semester hours. Students who are visa-holders may need to
register for more hours and should discuss their status with the Office of International Student and Scholar
Services. BA 9000, Doctoral Research, may be used to satisfy this requirement until the student has passed
the dissertation proposal defense. BA 9500, Dissertation Research, may be used to satisfy the minimum
hours requirement once the student has passed the dissertation proposal defense. Students who fail to meet
the continuous registration requirement are subject to withdrawal from Ph.D. studies in the Robinson
College of Business.

Re-entry

As stated in the previous section concerning continuous registration, students must enroll for a full course
load each semester. Summer enrollment requirements may vary. Consult the Ph.D. Program Office for
details. Any absence from the program must be approved through the petition procedure (see section
regarding petitions). Students who leave the program without an approved petition or who do not fulfill the
terms of an approved petition for an absence, may not be allowed to re-enter the program. Any student who
is not registered for one calendar year must file a re-entry application with the Ph.D. Program Office.
Students must be mindful of the deadline for this application. There is a charge to file a reentry
application. As previously stated, re-entry approval is not automatic and the student should check with the
Ph.D. Program Office if considering re-entry.

Preliminary Examination

The purpose of the preliminary examination is to determine the student’s mastery of the body of knowledge
in their area of specialization and their readiness for dissertation research. Students are encouraged to
confer with their Ph.D. coordinator regarding the areas the examination will encompass. The preliminary
examination is a written examination, supplemented in some cases by an oral examination. The preliminary exam may have several parts and students must have successfully completed all parts before being designated, informally, as ABD (“All-But-Dissertation”). The units offering Ph.D. programs will determine how many parts there will be to their preliminary exam and when these will be offered.

Students must have satisfactorily completed all required courses in the program of study in the major field and in the research methods requirement area to be eligible to take the preliminary examination (or the first part in the event of a multi-part exam). Requests to take the preliminary examination are made through their Ph.D. coordinator. The Ph.D. coordinator will notify the Ph.D. Program Office which student(s) are prepared to take the examination.

Students will not be permitted a second attempt to pass the preliminary examination except upon recommendation, by majority vote, of the group of faculty members who graded the examination. A maximum of two attempts is permitted to pass the preliminary examination.

The Dissertation

The purpose of the dissertation is for the Ph.D. candidate to demonstrate his or her ability to conduct research leading to a significant contribution to the candidate’s discipline. Before a student begins to collect any primary data from human subjects, s/he must make sure that all data collection, including surveys and use of archival data, are in compliance with the guidelines set out by the Institutional Review Board (IRB). Included among these requirements is certification via an online test on ethical treatment of subjects. The IRB’s Human Subjects Manual is accessible online at ursa.research.gsu.edu/ursa/compliance/human-subjects/.

Acceptable Forms of Dissertation

Dissertations may be a single study or they may be composed of multiple essays or papers. In the latter case, these papers make up separate chapters of the overall dissertation or they are summarized within the dissertation and attached in full text.

Guidelines for Multi-Paper Dissertation

Whereas the essay(s) or paper(s) that are included in the dissertation may be co-authored, it is critical that the student provide evidence of leadership to demonstrate ability to conduct independent research. Committee members can and should exercise their own judgment as to the quality of the dissertation. Unit standards for multi-paper dissertations may be formulated and distributed to students to equal or exceed the guidelines expressed here.

The Dissertation Committee

The Dissertation Committee consists of a chair plus a minimum of three members. The chair must be tenured, have graduate faculty status, and be from the home department. If the chair is not tenured, the co-chair must be tenured. The committee, and any subsequent change in its membership, is appointed by the director of the Ph.D. program upon the recommendation of the Ph.D. coordinator. Faculty from institutions other than GSU may serve as members of the committee, but at the time of the initial formation of the committee, there must be at least three GSU faculty members on the committee. At least
three committee members must be from the home department and in good standing with respect to GSU graduate faculty status. One member must be from outside of the academic unit. Co-chair arrangements are not only acceptable, but even encouraged, especially in cases where one of the co-chairs is an assistant professor. Unit standards for committee membership may be formulated and distributed to students to equal or exceed the policies expressed here.

As the student develops an interest in a potential dissertation topic, he or she should discuss the topic with individual faculty members both to determine the topic’s feasibility and merit and the faculty members’ interest and expertise in that area. When the student is ready to begin the initial work on the dissertation, he or she should first discuss with the Ph.D. coordinator names of potential faculty who would be the most appropriate chair of the Dissertation Committee. Only after the Ph.D. coordinator has agreed with the student as to the choice of a particular faculty member should the student then invite the faculty member to be chair of the committee.

Once the dissertation chair has been chosen, the chair, in consultation with the student, will recommend the selection of the three remaining committee members to the Ph.D. coordinator, which should include at least one committee member from outside the academic unit. The final committee membership is then sent to the unit Ph.D. coordinator and the director of the Ph.D. program for their approval. The committee and approvals should be documented on the PhD Dissertation Committee Policy and Approval Process Form. Should either of these managers disapprove of a particular committee member(s), the chair will work with the student to find a suitable replacement(s).

**Dissertation Proposal Defense**

Prior to admission to candidacy for the degree, a dissertation proposal defense must be held. After the student completes a written proposal that the Dissertation Committee deems to be ready for final defense, a dissertation proposal defense will be held before the Dissertation Committee.

The student’s dissertation proposal should include a summary of the following: the purpose of the study; the nature of the subject to be investigated and its importance; a brief review of the literature; the theory, if any, to be developed; the empirical methodology, techniques, and data sources, if any, to be used; the nature of the hypotheses to be developed or tested, where appropriate; and a time frame for completion of the dissertation.

The proposal defense will be open to all interested faculty and Ph.D. students. After the proposal defense has been held, the members of the committee will vote to determine if the student is deemed to have a satisfactory research topic. A unanimous decision by the student’s Dissertation Committee is required. The members of the committee will sign the dissertation proposal defense approval form.

Submission of the approval form does not constitute a contractual agreement between the student and the Dissertation Committee. It is within the scope and function of the Dissertation Committee to recommend modifications to the research as it proceeds. Upon submission of the proposal defense approval form to the Ph.D. Program Office, the student is admitted to candidacy for the degree.

Committee members should be given a draft of the proposal (and also the final dissertation) at least a month before the proposed defense date. This will permit a revision cycle to both improve the work before the defense and ensure that committee members have adequate time to comment and raise substantive
issues, should this be the case. It will also allow the defense date to be postponed in the event that required changes could not be completed before the proposed defense date.

Final Dissertation Defense

When the candidate’s Dissertation Committee judges that the dissertation is complete, it must be defended orally in a final dissertation defense. At least a month in advance of the final dissertation defense, the draft should be submitted to the committee for review, the Ph.D. coordinator will inform the Ph.D. Program Office of the candidate’s date of defense and an announcement will be made to all academic units. While any interested faculty member or graduate student may attend the examination and participate in the discussion, only those individuals who are members of the candidate’s Dissertation Committee will vote to approve or disapprove the dissertation. Upon successful defense of the dissertation, a final oral examination approval form will be signed by the members of the Dissertation Committee and submitted to the Ph.D. Program Office. A signed Acceptance form is required for evidence of satisfactory completion of the written dissertation. Unanimous approval is required for the oral defense and written dissertation. Guidelines for the dissertation are available from the Ph.D. Program Office and on the Ph.D. website at robinson.gsu.edu/phd/online-student-handbook/dissertation/.

Dissertation Embargo Policy

Students may request a 3-month, 6-month, 9-month, or 12-month restriction of dissertation publishing (hereafter termed embargo). Requests must be made in writing to the dissertation chair/co-chairs prior to the electronic uploads of the dissertation to ProQuest/UMI and Georgia State University’s Scholar Works. Written approval from the chair/co-chairs must be sent to the Ph.D. Program Office. Once the approval is received by the Ph.D. Program Office, the dissertation will not be published for the approved embargo period. The dissertation will be released for publishing after the embargo period ends.

Graduation

Students must apply for graduation through the Office of Graduation. The deadline for applying for graduation is usually several months before the anticipated graduation date, so students need to apply in a timely manner. There is no summer commencement. More information concerning applying for graduation can be found at registrar.gsu.edu/graduation. The associate director of the Ph.D. program will provide the candidate with information regarding clearance for graduation. An electronic copy of the dissertation must be uploaded to Georgia State University’s Scholar Works two weeks prior to the anticipated date of graduation.

Time Limits for the Degree

These time limits should be interpreted as the maximum amount of time students may take to complete each of the degree requirements. It is anticipated that most students will complete the requirements much earlier than the maximum time limits specified below:

- All coursework on the program of study and the preliminary examination in the Ph.D. in Business Administration program must be completed within four years from the semester of entry into the Ph.D. program.
- The Dissertation Committee must be appointed, the dissertation proposal defense must be held, and
the student’s dissertation proposal must be approved within one year after completion of all parts of the preliminary exam.

- All requirements for the Ph.D. degree, including the dissertation, must be completed within seven years from the semester of entry into the Ph.D. program.
Graduate programs in the School of Public Health are described in detail in this chapter. See subsections for specific program information as well as policies and procedures. Information about the Bachelor of Science (B.S.) in public health is available in the School of Public Health section of the undergraduate catalog. Interested students should visit the School of Public Health website at publichealth.gsu.edu for updates on our degree offerings.

About the School of Public Health

The School of Public Health (SPH) is a multi-disciplinary, research-based unit, drawing upon partnerships with community members and organizations, dedicated to the mission of providing the high quality and relevant teaching, research, and service needed to evolve public health practice in a changing world. By investigating the contemporary problems that challenge diverse urban communities, the SPH is preparing the next generation of public health professionals to make a difference through leadership, scholarship, and practice in Georgia communities and around the globe. The School of Public Health achieves this mission by applying existing scholarship within Georgia State University to priority public health problems, particularly those that are aimed at reducing health disparities in urban settings. Training and research programs focus on both building the science base that underlies public health practice, as well as applying effective interventions that have been demonstrated to improve the public health. Academic and training efforts emphasize the basic prevention sciences (e.g., emerging infectious diseases, immunology, virology, bioinformatics, genomics, and geographic sciences), as well as applied public health efforts (e.g., chronic disease prevention, health promotion, environmental health, program evaluation, health policy, public health ethics and law, health communications, community-based participatory research, and global health).

School of Public Health Main Office
400 Urban Life Building

publichealth.gsu.edu

Rodney Lyn, Interim Dean and Senior Associate Dean for Academic and Strategic Initiatives
Daniel J. Whitaker, Associate Dean for Research and Faculty Affairs
Lindy Parker, Assistant Dean for Academic Programs
Travis J. Chambers, College Administrative Officer
Gerardo Chowell-Puente, Chair of the Department of Population Health Sciences
Shannon Self-Brown, Chair of the Department of Health Policy and Behavioral Sciences
Harry Heiman, Director of the Doctor of Public Health Program (DrPH)
Kim Ramsey-White, Director of the Undergraduate Program (BSPH)
Laura Salazar, Director of the Doctor of Philosophy Program (PhD)

Department of Health Policy and Behavioral Sciences
Shannon Self-Brown, Department Chair
Theresa Glasheen, Department Coordinator

Core Faculty: Collins Airhihenbuwa, Elizabeth Armstrong-Mensah, Kathleen Baggett, Jacques-Corey Cormier, Daniel Crimmins, Michael Eriksen, Xiangming Fang, Amanda Gilmore, Emily Graybill, Harry
In June 2016, The Council on Education for Public Health (CEPH) Board of Councilors accredited the SPH at Georgia State University. The school received a ‘met’ finding, the highest possible, on all criteria evaluated and the school’s initial school-level accreditation is for a five-year term, extending through July 1, 2021.

CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside schools of public health.

**8000.10 Accreditation**

**Mission.** The School of Public Health provides the high quality and relevant teaching, research and service needed to evolve public health practice in a changing world. By investigating the contemporary problems that challenge diverse urban communities, the School is preparing the next generation of public health professionals to make a difference through leadership, scholarship and practice in Georgia communities and around the globe. The School’s mission is strengthened by the objective of the University System of Georgia, through its Strategic Plan for Public Health Education, Research and Service, “to ensure that the System becomes one of the national leaders in public health education, research and service.”

**Vision.** The School’s vision is to be a leading public health research institution dedicated to understanding and solving contemporary health problems. The School will be the destination of choice for students seeking an affordable and meaningful public health education.

**Values.** Six values were determined in a School-wide review process. All values were developed with input from the administration, faculty, staff and students and are reaffirmed or revised during each subsequent review process. The values are succinct and specific in nature and are reflected in faculty, staff and students’ instruction, service and learning activities. The values are:

1. Integrity, accountability, and transparency in our operations
2. Scholarship and inquiry
3. Respect for all aspects of diversity
4. Health as a human right
5. Prioritizing health in all policy decisions
6. Sustainable healthy environments
7. Student Success

Goals. The goals of the School of Public Health are to:

Research

1. Exceed $20 million annually in sponsor-funded research.
2. Establish a new Center to promote interdisciplinary research and training around non-communicable diseases (NCD) and other contemporary global health problems.
3. Receive University-wide recognition for our ability to contribute to excellence in interdisciplinary research methodologies.
4. All junior tenure track faculty to obtain sponsored funding within their first three academic years of service; lead the University in career development awards.
5. Double the number of our peer-reviewed publications.

Education

1. Attract and retain a diverse student body, staff, and faculty.
2. Successfully graduate 70% of our bachelor’s students within six years, 80% of our MPH students within four years, and 60% of our doctoral students within seven years.
3. Double the number of our online and hybrid course offerings.
4. Increase external support for graduate students by emphasizing training grants, student fellowships and graduate student support through our faculty’s grant-seeking activities.
5. Develop and offer a professional doctoral program (DrPH) and targeted executive education offerings for public health workers hoping to increase their knowledge and skills.

Service

1. Promote and expand the involvement of faculty and staff in university, community-based and professional education projects so that service activities will be greater than 3 times the number of faculty.
2. Better recognize those who contribute to public health practice and education communities through service.
3. Offer at least 2 continuing education activities for the workforce each year, aligned with needs identified in our communities’ workforce.

8000.30 Degrees and Certificates Offered

The School of Public Health offers the following graduate programs:

- Graduate Certificate in Public Health
- Master of Public Health
- Doctor of Philosophy in Public Health
8000.40 Research Centers, Collectives, and Initiatives

The Mark Chaffin Center for Healthy Development
14 Marietta Street NW, 2nd Floor
404-413-1281
families.publichealth.gsu.edu/

The Mark Chaffin Center for Healthy Development (CHD) was established in August 2008 to house the National SafeCare® Training and Research Center (NSTRC) and the Center for Leadership in Disability (CLD), a University Center for Excellence in Developmental Disabilities (UCEDD). In 2011 CHD welcomed Prevent Child Abuse Georgia, a state chapter of Prevent Child Abuse America, which will provide a statewide direction to promote healthy children and develop strong families through community resources, public awareness, prevention programs, research, and advocacy activities. The center was designated a university-level research center in 2015, and its name honors and memorializes Dr. Mark Chaffin (1952 – 2015), a pre-eminent scholar in child maltreatment, parenting, implementation science and services for disadvantaged people and populations with disabilities.

The NSTRC is funded by a number of private and public service and research grants and contracts. It was created in 2007 with a center grant from the Doris Duke Charitable Foundation. The CLD is primarily funded by a center grant from the Administration on Developmental Disabilities (ADD) of the Administration on Children and Families (ACF) within the U.S. Department of Health and Human Services (USDHHS). PCA Georgia is funded by a grant from the Governor’s Office for Children and Families, the Arthur M. Blank Family Foundation, and other sources. The general mission of the CHD is to promote the health, safety, well-being, and quality of life of children, adults, and families with and without disabilities through research, service, advocacy, and to prevent child maltreatment.

Biostatistics Research Collaborative
400 Urban Life Building
404-413-9513
publichealth.gsu.edu/research/biostatistics-research-collaborative/

The collaborative generates collaborations between Georgia State investigators for high-quality health-related research. Biostatistics Research Collaborative (BRC) team members collaborate with investigators on grant development, study design, statistical analysis, interpretation of results and manuscript preparation.

Center for Research on Interpersonal Violence
1104 Urban Life Building
404-413-6200
violence.gsu.edu/

In the third year of its Next Generation Program, Georgia State University identified interpersonal violence as an interdisciplinary area in which it seeks to become an internationally recognized resource and authority. As a result of this Interpersonal Violence Initiative, the Center for Research on Interpersonal
Violence was established, and the Center aims to (1) understand the causes and consequences of interpersonal violence, (2) emphasize the development, refinement, and evaluation of interventions to reduce or prevent the perpetration of interpersonal violence and address the impact of victimization, and (3) inform public policy. Researchers in the center come from multiple disciplines at Georgia State: Psychology, Criminal Justice, Public Health, Sociology, Social Work, and Neuroscience.”

Center for Resilient Youth
1112 Urban Life Building
404-413-6287
resy.gsu.edu/

The Resilient Youth (ResY) was funded by the Next Generation Program and is an initiative that seeks to build interdisciplinary scholarship that uses the concept of resilience as a framework for addressing health disparities among urban youth. ResY builds on existing strengths among current senior and supporting GSU faculty in Psychology, Public Health, and Sociology that have established, externally funded, and nationally/internationally recognized research programs. The initiative will attract new faculty and seed a new postdoctoral fellowship program that will collaborate with current faculty to build an internationally recognized Center of Excellence focused on scholarship focused specifically on urban drivers among youth in Atlanta and other major urban centers in the U.S. and across the globe.

8000.50 Academic Resources and Services

Office of Academic Assistance and Career Services

140 Decatur Street, Suite 300
404-413-1452
publichealthadvising@gsu.edu

Contacts:

Denise Gouveia, Director
Vanessa Thomas-Meikle, Assistant Director
Lynette Reid, Graduate Admissions Coordinator
Jessica Pratt, Practice and Career Coordinator
Gina Sample, MPH Curriculum and Advisement Coordinator
Jonathan Key, Undergraduate Advisor
Anthony Still, Undergraduate Advisor
Esther Singh, Administrative Coordinator

The Office of Academic Assistance and Career Services (OAA) provides the SPH current and prospective students with comprehensive student support services to promote academic and career success.

Advising and Academic Assistance

publichealth.gsu.edu/students/academic-advising/
For students in the Master of Public Health (MPH) program, academic advisement is provided using a two-pronged approach. The MPH Curriculum and Advisement Coordinator in OAA provides guidance on administrative matters such as program of study advisement, degree petition process, thesis/capstone registration, graduation, and referral to other student support services on campus. The School of Public Health faculty serve as faculty mentors, and students are encouraged to talk to their mentors about how to select a concentration, determining which course electives make sense for future career goals, exploring research interests and opportunities, developing professional networks, and serving on thesis or capstone committees. MPH and Graduate Certificate in Public Health (GCPH) students are not assigned a faculty advisor but are instead encouraged to develop multiple mentoring relationships with SPH faculty.

Doctoral students are assigned (PhD), or supported in selecting (DrPH), a Faculty Advisor and build a Doctoral Advisory Committee; however, they are also encouraged to develop multiple mentoring relationships with other SPH faculty, their doctoral program director, and even the MPH Curriculum and Advisement Coordinator as they navigate doctoral program administrative matters.

Career Services

publichealth.gsu.edu/students/career-resources/

The School of Public Health provides public health specific career support and leadership development services to all current SPH graduate students and alumni. Students are invited to attend our career events and workshops as well as meet with our SPH Practice and Career Coordinator to discuss individual career questions. Career Services can help students with resume writing, interviewing, job searching, internship development, and networking.

Biostatistics Student Lab

Location: Room 645, Urban Life Building, 140 Decatur Street

The purpose of the Biostatistics Computer Lab is to provide Georgia State University SPH students with computer access and statistical software needed for class and research activities. All computers are equipped with standard statistical software, including SAS, STATA, SPSS and Mplus, as well as Microsoft Office tools and internet access. The computer lab is supervised by a Graduate Assistant (GA), and is generally open Monday thru Friday, 9am-5pm. The GA is available to assist students with questions related to [PH 7017] Fundamentals of Biostatistics I, [PH 7027] Fundamentals of Biostatistics II, and [PH 7525] Statistical Computing, as well as basic computer assistance and questions related to the use of SAS. publichealth.gsu.edu/academics-student-life/graduate-biostatistics-computer-lab/

8000.60 Student Organizations

The OAA also supports all SPH student clubs and organizations – students are encouraged to read about the various groups within the college, and join one while being enrolled in the SPH: publichealth.gsu.edu/academics-student-life/.

Public Health Student Association (PHSA)
The Public Health Student Association (PHSA) is the student organization of the School of Public Health at Georgia State University. PHSA seeks to develop well-rounded public health professionals and promote meaningful interactions between students, faculty and staff, and public health professionals. Throughout the school year, PHSA organizes social events, professional development opportunities, and public service events for students, faculty, and staff. For more information: publichealth.gsu.edu/students/student-association-phisa/.

8000.70 Study Abroad

SPH Study Abroad Website: publichealth.gsu.edu/academic/study-abroad/

Contact: SPHstudyabroad@gsu.edu

Study abroad is one of the ways the School provides a learning environment that prepares students with broad skills regarding diversity and cultural competence. Opportunities to earn graduate degree and certificate applicable credits abroad are available in most years, and opportunities increase as student interest increases. Previously planned study abroad opportunity cities include: Salvador, Brazil; Kampala, Uganda; Santo Domingo, Dominican Republic; and Shanghai, China. Students should check the above-linked study abroad website for future opportunities.

8010 Graduate Admissions

The School of Public Health accepts students into the Master of Public Health (MPH) and Graduate Certificate in Public Health (GCPH) programs for both the fall and spring semesters. The doctoral programs in Public Health only accepts students in the Fall semester. The application deadlines are as follows:

<table>
<thead>
<tr>

8010.10 Master of Public Health (MPH) Application Requirements

For complete application materials instructions, visit the following School of Public Health website: publichealth.gsu.edu/academic/apply/.

The following materials are required for admission to the MPH program. GRE scores are submitted directly to Georgia State University. All other application materials are submitted through SOPHAS (portal.sophas.org/):
1. SOPHAS application – $135 fee (sophas.org) This fee is nonrefundable.
2. Georgia State University Graduate Supplemental application (GSU/CAS-Liaison Program) – $50 (gradapply.gsu.edu/apply/) This fee is nonrefundable.
3. A resume or curriculum vitae – uploaded to SOPHAS application.
4. One official transcript from each college and/or university attended (including Georgia State University). Transcripts are required regardless of length of stay or if the grades are listed on another school’s transcript. Applicants must have a bachelor’s degree or its equivalent at the time of enrollment from a regionally accredited institution. All transcripts are sent directly to SOPHAS.
5. Note: Any applicant who has completed all or part of their education outside the United States is required to have foreign credentials evaluated by World Education Services (WES). Study abroad credit is exempt from evaluation. WES is the only evaluation service accepted by SOPHAS.
6. Three references from individuals knowledgeable of the applicant’s academic, professional and intellectual abilities. References are processed via SOPHAS application.
7. A statement of purpose and objectives – upload to SOPHAS application.
8. Official scores on the Graduate Record Examination (GRE), the Graduate Management Admission Test (GMAT), or the Medical College Admissions Test (MCAT). Please note that GRE, GMAT, and MCAT scores over five years old cannot be accepted. (Applicants with an earned doctorate or J.D. from a regionally accredited institution may not be required to take the GRE, GMAT, or MCAT examination. Those applicants should check with the School well before the admission deadline to see if this examination requirement may be waived. The School reserves the right to require the GRE, GMAT, or MCAT examination for applicants with an earned doctoral or J.D.
9. Official scores on the Test of English as a Foreign Language (TOEFL) or via the International English Language Testing System (IELTS), for applicants whose native language is not English. Please note that TOEFL and IELTS scores over two years old cannot be accepted. The TOEFL and IELTS may not be required of international applicants who have received a degree from a regionally accredited U.S. institution. See section 8010.40 for more information.
   - TOEFL: www.toefl.org/
   - IELTS: www.ielts.org/
10. Verification of Lawful Presence may be required if accepted – see sections 1110 and 1120 for more information.
11. A Certificate of Immunization (after acceptance)

8010.20 Graduate Certificate in Public Health (GCPH) Application Requirements

For complete GCPH application materials instructions, visit the following School of Public Health website: publichealth.gsu.edu/academic/apply/

The following materials are required for admission to the GCPH. All application materials are submitted through SLATE:

1. Application for Graduate Programs, submitted through gradapply.gsu.edu/apply/
2. A $50.00 application fee. This fee is nonrefundable.
3. A resume or curriculum vitae
4. One official transcript from each college and/or university attended, except from Georgia State University. Transcripts are required regardless of length of stay or if the grades are listed on another school’s transcript. You will collect and submit all unopened official transcripts. Transcripts can be
submitted directly to Georgia State University electronically, by express delivery service, or by U.S. postal mail. If you are enrolled in another graduate program at Georgia State University, you may complete a Request for Transfer of Records in your current college's graduate admissions office. If you attended Georgia State University as an undergraduate, we will be able to pull your records, so your undergraduate transcripts from Georgia State University do not need to be sent.

5. Three references from individuals knowledgeable of the applicant’s academic, professional, and intellectual abilities.

6. A statement of interest and professional intent.

7. Official scores on the Graduate Record Examination (GRE), the Graduate Management Admission Test (GMAT), or the Medical College Admissions Test (MCAT). Test scores older than five years cannot be accepted. Send to Georgia State University via school code 5251. (Applicants with an earned doctorate or J.D. from a regionally accredited US institution may not be required to take the GRE, GMAT, or MCAT examination. Those applicants should check with the School well before the admission deadline to see if this examination requirement may be waived. The School reserves the right to require the GRE, GMAT, or MCAT examination for applicants with an earned doctoral or J.D.

8. Official scores on the Test of English as a Foreign Language (TOEFL) or via the International English Language Testing System (IELTS), for applicants whose native language is not English. Please note that TOEFL and IELTS scores over two years old cannot be accepted. The TOEFL and IELTS may not be required of international applicants who have received a degree from a regionally accredited U.S. institution. See section 8010.40 for more information.
   - TOEFL: www.toefl.org/
   - IELTS: www.ielts.org/

9. Verification of Lawful Presence may be required if accepted – see sections 1110 and 1120 for more information.

10. A Certificate of Immunization (after acceptance).

Completed application materials must be sent to the address below by the deadline date:

**Electronic Transcripts**
Electronic transcripts must be submitted directly from the institution, either by email or through the use of a transcript ordering site:
Email: gradapplytranscripts@gsu.edu
Order Site Institution Name: Georgia State University – Graduate Programs

**Mailing Address (U.S. Postal Service)**
Office of Graduate Admissions
Georgia State University
P.O. Box 4018
Atlanta, GA 30302

**Delivery Address (FedEx, DHL, UPS, etc.)**
Office of Graduate Admissions
Georgia State University – Sparks Hall 200
33 Gilmer Street SE
Atlanta, GA 30303
A Graduate Certificate in Public Health (GCPH) student may apply a maximum of sixteen (16) semester hours of applicable Georgia State University course credit earned while completing the GCPH and prior to MPH program admission toward fulfilling MPH degree requirements. Courses that satisfy the MPH core courses must be completed with a grade of B (3.0) or better, and courses that satisfy a concentration required or elective course must be completed with a grade of C (2.0) or better. Credits are processed by the School—petition is not required, but students should confirm their previously completed courses are applicable. Students may work with the MPH Curriculum and Advisement Coordinator in the Office of Academic Assistance to confirm applicability. Approval of applicable courses is at the discretion of the Department Chair of the student’s home department and concentration—it is not guaranteed. All Georgia State University credits presented for the MPH degree must have been earned within six calendar years of the date of degree conferral.

8010.30 Doctoral Programs in Public Health Application Requirements

For complete DrPH and/or Ph.D. application materials instructions, visit the following School of Public Health website: publichealth.gsu.edu/academic/apply/

The following materials are required for admission to the DrPH and/or Ph.D. program. GRE scores are submitted directly to Georgia State University. All other application materials are submitted through SOPHAS (portal.sophas.org):

1. SOHAS application – $135 fee (sophas.org) This fee is nonrefundable.
2. Georgia State University Graduate Supplemental application (GSU/CAS-Liaison Program) – $50 (gradapply.gsu.edu/apply/) This fee is nonrefundable.
3. A resume or curriculum vitae
4. One official transcript from each college and/or university attended (including Georgia State University). Transcripts are required regardless of length of stay or if the grades are listed on another school’s transcript. Applicants must have a master’s degree or its equivalent at the time of enrollment from a regionally accredited institution. All transcripts are sent directly to SOPHAS. Note: Any applicant who has completed all or part of their education outside the United States is required to have foreign credentials evaluated by World Education Services (WES). Study abroad credit is exempt from evaluation. WES is the only evaluation service accepted by SOPHAS.
5. Three references from individuals knowledgeable of the applicant’s academic, professional and intellectual abilities. References are processed via SOPHAS application.
6. A statement of purpose and objectives – upload to SOPHAS application.
7. Official scores on the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT). Test scores older than five years cannot be accepted. Send to Georgia State University via school code 5251. (Applicants with an earned doctorate or J.D. from a regionally accredited institution located in the United States may not be required to take the GRE or GMAT examination. Those applicants should check with the School well before the admission deadline to see if this examination requirement may be waived. The School reserves the right to require the GRE or GMAT examination for applicants with an earned doctorate or J.D.) Please note that the Medical College Admission Test (MCAT) cannot be accepted in lieu of GRE or GMAT scores for DrPH or Ph.D. applicants.
8. Official scores on the Test of English as a Foreign Language (TOEFL) or via the International English Language Testing System (IELTS), for applicants whose native language is not English.
Please note that TOEFL and IELTS scores over two years old cannot be accepted. The TOEFL and IELTS may not be required of international applicants who have received a degree from a regionally accredited U.S. institution. See section 8010.40 for more information.

- **TOEFL**: www.toefl.org/
- **IELTS**: www.ielts.org/

9. Verification of Lawful Presence may be required if accepted – see sections 1110 and 1120 for more information.

10. DrPH applicants only: Applicants invited to the DrPH admissions interview must provide documentation of successful completion of a minimum of three years of verifiable, applied public health professional experience. Applicants with five or more years of applied work experience will be given preference.

11. A Certificate of Immunization (after acceptance)

---

### 8010.40 International Student Admission

It is the policy of Georgia State University to encourage the enrollment of students from other countries. The University subscribes to the principles of international education and to the basic concept that only through education and understanding can mutual respect, appreciation and tolerance of others be accomplished. The recognition of the values of cultural exchange is inherent in our philosophy of education and is predicated on an awareness of the need to foster better cooperation, friendship, and understanding among the peoples of the world. In this regard, we welcome international students to our campus because we believe in a cultural exchange program which will be beneficial to our own student body, to the international students involved, and to metropolitan Atlanta.

- **Academic Credentials**: An applicant who has completed all or part of his/her education outside the United States is required to have his/her foreign credentials evaluated by World Education Services (http://www.wes.org/sophas/). WES is the only evaluation service accepted by SOPHAS. Foreign credential evaluation: (course by course, GPA calculations, and include copies of documents evaluated).

- **English Proficiency**: Applicants whose native language is not English must submit scores, not more than two years old, on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). Official scores must be reported from the Educational Testing Service to SOPHAS prior to the application deadline. The TOEFL is not required of international applicants who have received a degree from a regionally accredited U.S. institution. TOEFL information can be found at toefl.org. IELTS information can be found at ielts.org. Note: Applicants to all SPH degree and certificate programs may petition the Academic Affairs Committee Chair and/or members to waive TOEFL and/or IELTS after achieving a USG Intensive English Program certificate (iep.gsu.edu); however, petitions are considered individually and the Chair and/or committee members may still require the TOEFL and/or IELTS from IEP certificate completers. Therefore, Petitions should be submitted well in advance of application deadlines so that if their petition is denied, applicants will still have ample time to submit TOEFL and/or IELTS scores prior to application deadlines. A denied Petition—and subsequent requirement to complete the TOEFL and/or IELTS—does not waive or extend the application deadline; the TOEFL and/or IELTS scores must be submitted by the application deadline.

- **Financial Resources**: Applicants who have been accepted and plan to attend Georgia State University on an F-1 or J-1 visa must submit a Financial Statement showing the financial support
necessary for the cost associated with the first year of study. This verification does not need to be submitted with your application but will be required by International Student and Scholar Services before you can enroll if you are accepted.

- **Course Load:** An international student with a student visa is required to carry a full course of study in the fall and spring semesters. A full course of study for graduate students at Georgia State University is 9 semester hours in the fall and spring semesters and 6 semester hours in the summer semester. International students cannot be admitted as non-degree students.

For additional information pertaining to international applicants and students at Georgia State University, please refer to the Office of International Student and Scholar Services on the Georgia State University website at isss.gsu.edu.

### 8010.50 Transient Student Admission

A student enrolled in a graduate degree program at another accredited institution may seek admission as a transient (or visiting) student in the School of Public Health.

<table>
<thead>
<tr>
<th>Program</th>
<th>Fall</th>
<th>Spring</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Transient/Visiting Student</td>
<td>July 15</td>
<td>December 1</td>
<td>May 1</td>
</tr>
</tbody>
</table>

The Office of Academic Assistance & Career Services uses a self-managed application for admission to its graduate programs. It is the applicant’s responsibility to prepare or collect all credentials and submit them on time.

**The following items should be e-submitted to gradapply.gsu.edu/apply:**

1. Transient/Visiting students can apply online via gradapply.gsu.edu/apply.
2. $50.00 Application Fee: e-submit and pay application fee online. This fee is nonrefundable.
3. Transient Letter. This letter, from your home institution, must state that you are in good academic standing and that you have permission to attend Georgia State University. It should also contain a listing of the courses you plan to take. This letter should be a in a sealed, official envelope from the home institution and mailed to or delivered in person to one of the addresses below.
4. Your offer of admission is contingent upon completing or opting-out of the verification of lawful presence process—see sections 1110 and 1120 for more information.
5. Certificate of Immunization: this form is required for accepted applicants who have never attended Georgia State University. If admitted, you must submit this form to Georgia State University Health Services (address on form) prior to registration.

You can collect and submit all unopened official transient letters. Transient letters can be submitted directly to Georgia State University via express delivery service or U.S. postal mail.

**Mailing Address (U.S. Postal Service)**

Office of Graduate Admissions
Georgia State University
P.O. Box 4018
Admission to transient status is normally for one semester only. A transient student who wishes to enroll for a subsequent semester at Georgia State must file an Application for Re-entry with the Office of Academic Assistance and Graduate Career Services in the School of Public Health. Students must be in good academic standing at Georgia State University in order to continue as transient students at the University. Transient students who are not in good academic standing will not be allowed to continue taking courses as transient students per the University’s re-entry definition. If the student wishes to enroll in courses other than those listed in the original letter of good standing, the home institution must submit a new letter indicating approval of those courses. Application deadlines are sometimes extended provided there is space available. Contact OAA at 404-413-1452 or publichealthadvising@gsu.edu for additional information.

Although the university cannot guarantee the availability of space in desired courses, every effort will be made to assist students in the registration process. The student is responsible for requesting that transcripts of grades earned at Georgia State are sent to the home institution. Transient students who do not remain in good academic standing at Georgia State University may not be allowed to continue taking courses in the School of Public Health.

Students who wish to change from transient-status enrollment to graduate degree seeking status must file an application for the graduate program desired and provide all supporting documents by the appropriate deadline for the semester for which admission is sought. Further information on application procedures for admission to degree programs in the School of Public Health may be obtained from the Office of Academic Assistance: publichealth.gsu.edu/academic/apply/.

Up to nine (9) transient-status credit hours may apply to School of Public Health graduate degree or certificate programs. However, all credits, including transient-status-earned credits, presented for the Master’s degree must have been earned within six calendar years of the date of Master’s degree conferral, and all credits presented for the DrPH or Ph.D. degrees must have been earned within nine calendar years of the date of DrPH or Ph.D. degree conferral. Grades from all attempts at all Georgia State University courses that are taken at the graduate level will become part of the student’s GPA.

8010.60 Non-Degree Student Admission

The School of Public Health accepts non-degree students based on course availability. Non-degree students are admitted for a maximum of nine credit hours.

Applicants applying for non-degree status should hold a graduate degree or have been accepted into a graduate program but are no longer actively enrolled. If you are actively enrolled in another graduate program, please apply as a transient/visiting student. Contact the Office of Academic Assistance and
Career Services (OAA) at 404-413-1452 or publichealthadvising@gsu.edu for approval to submit a non-degree application. Application deadlines are sometimes extended provided there is space available. The application deadlines are as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>Fall</th>
<th>Spring</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-degree</td>
<td>July 15</td>
<td>December 1</td>
<td>May 1</td>
</tr>
</tbody>
</table>

The following items should be e-submitted to gradapply.gsu.edu/apply:

- Non-Degree students can apply online via gradapply.gsu.edu/apply.
- $50.00 Application Fee: e-submit and pay application fee online. This fee is nonrefundable.
- One official transcript from each college and/or university attended (including Georgia State University, if you attended Georgia State University while earning a different degree). Transcripts are required from all previously attended institutions regardless of length of stay or if the grades are listed on another school’s transcript. (See mailing/delivery address below or send electronically.)
- Statement of Intent, where you describe your goals and why completing coursework in the School of Public Health will help you attain those goals. Please limit your statement to two typed, double-spaced pages.
- Your offer of admission is contingent upon completing or opting-out of the verification of lawful presence process—see sections 1110 and 1120 for more information.
- Certificate of Immunization: this form is required for accepted applicants who have never attended Georgia State University. If admitted, you must submit this form to Georgia State University Health Services (address on form) prior to registration.

You can collect and submit all unopened official transcripts. Transcripts can be submitted directly to Georgia State University electronically, by express delivery service, or U.S. postal mail.

**Electronic Transcripts**
Electronic transcripts must be submitted directly from the institution, either by email or through the use of a transcript ordering site:
Email: gradapplytranscripts@gsu.edu
Order Site Institution Name: Georgia State University – Graduate Programs

**Mailing Address (U.S. Postal Service)**
Office of Graduate Admissions
Georgia State University
P.O. Box 4018
Atlanta, GA 30302

**In-Person and Express Delivery Address (FedEx, DHL, UPS, etc.)**
Office of Graduate Admissions
Georgia State University – Sparks Hall 200
33 Gilmer Street SE
Atlanta, GA 30303

Students who wish to change from non-degree enrollment to graduate degree seeking status must file an application for the graduate program desired and all supporting documents by the appropriate deadline for
the semester for which admission is sought. Further information on application procedures for admission to degree programs in the School of Public Health may be obtained from the Office of Academic Assistance: publichealth.gsu.edu/academic/apply/.

A student may apply a maximum of nine (9) semester hours of applicable Georgia State University course credit earned prior to MPH program admission (while taking public health courses as either transient, non-degree, or other-Georgia State University-degree status) toward fulfilling MPH degree requirements. Courses that satisfy the MPH core courses must be completed with a grade of B (3.0) or better, and courses that satisfy a concentration required or elective course must be completed with a grade of C (2.0) or better. Credits are processed by the School — petition is not required, but students should confirm their previously completed courses are applicable. Students may work with the MPH Curriculum and Advisement Coordinator in the Office of Academic Assistance to confirm applicability. Approval of applicable courses is at the discretion of the Department Chair of the student’s home department and concentration — it is not guaranteed. All Georgia State University credits presented for the MPH degree must have been earned within six calendar years of the date of degree conferral.

8010.70 Re-entry Students

A re-entry student is a student who has been enrolled at Georgia State University and who:

1. Has not maintained an enrollment totaling 6 hours (or more) of degree applicable courses over three consecutive semesters (including summer) until degree completion; or
2. Attended any semester as a transient student and wishes to attend an additional semester as a transient student.

Re-entry is approved by application and is not guaranteed. The application deadlines are as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>Fall</th>
<th>Spring</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Re-entry</td>
<td>July 15</td>
<td>December 1</td>
<td>May 1</td>
</tr>
</tbody>
</table>

Graduate students previously enrolled in the School of Public Health may only re-enter the same graduate program or status in which they were last enrolled and they may be required to satisfy the degree requirements of the graduate catalog in effect at the time of re-entry — the Office of Academic Assistance and Career Services will notify the student of their requirements and update their program of study. Students will be required to change to the graduate catalog in effect at the time of re-entry when they re-enter the university after a period of two or more consecutive years in which they have earned no academic credit at Georgia State University. Students must be approved for reentry through the School — re-entry is not guaranteed, even for students previously enrolled in School of Public Health graduate programs.

The following items should be e-submitted to gradapply.gsu.edu/apply:

- Non-Degree students can apply online via gradapply.gsu.edu/apply.
- $25.00 Application Fee: e-submit and pay application fee online. This fee is nonrefundable.
- Your offer of admission is contingent upon completing or opting-out of the verification of lawful presence process— see sections 1110 and 1120 for more information.
- If applicable, submit an official transcript from each college and/or university attended (since you
last attended Georgia State University).

You can collect and submit all unopened official transcripts. Transcripts can be submitted directly to Georgia State University electronically, by express delivery service, or by U.S. postal mail.

**Electronic Transcripts**
Electronic transcripts must be submitted directly from the institution, either by email or through the use of a transcript ordering site:
Email: gradapplytranscripts@gsu.edu
Order Site Institution Name: Georgia State University – Graduate Programs

**In-Person and Express Delivery Address (FedEx, DHL, UPS, etc.)**
Office of Graduate Admissions
Georgia State University – Sparks Hall 200
33 Gilmer Street SE
Atlanta, GA 30303

**U.S. Postal Service**
Office of Graduate Admissions
Georgia State University
P.O. Box 4018
Atlanta, GA 30302

**8010.80 Tuition Deposit for MPH Program**
The School of Public Health requires newly accepted applicants into their Master of Public Health program to submit a portion of their first semester’s tuition at the time of acceptance. The advanced tuition, which is nonrefundable, guarantees the student’s place in the class.

**8020 Graduate Enrollment**
Graduate degree and certificate students in the School of Public Health are responsible for knowledge of all regulations and procedures of the program and the university. Enrollment in a program constitutes a student’s acknowledgment that they are obligated to comply with all academic and administrative regulations and degree requirements. Students are encouraged to read carefully regulations related to the public health program.

**Summary of Georgia State University Policy on Responsible Conduct of Research Training:**
Georgia State University is committed to promoting research ethics within the University community and modeling integrity across all disciplines and areas of empirical research. As research has become more complex, collaborative, and costly, issues of research ethics similarly have become complex, extensive and important. The federally mandated training of all levels of research students at Georgia State University in the Responsible Conduct of Research (RCR) must prepare them to face these issues in their professional lives. The Scholarship and Research Integrity (SARI) program at Georgia State University, developed in
response to the America Competes Act requirements, is designed to offer students enrolled in undergraduate research, research graduate degree programs, and post-doctoral research programs comprehensive training in the RCR in a manner that is tailored to address the issues faced by students in their respective programs. As part of the commitment and policy, graduate research students and post-doctoral research fellows will be required to complete an online RCR training program provided by the Collaborative Institutional Training Initiative (CITI) and will also be required to engage in at least 5 hours of additional discussion-based RCR education.

ursa.research.gsu.edu/ursa/responsible-conduct-in-research/

The Georgia State University SPH has devised a RCR education program plan to be in compliance with Georgia State University’s RCR policy and to ensure SPH students graduating from our MPH and Ph.D. programs complete the required CITI RCR training program and receive the additional 5 hours of RCR education. In the MPH program, all students enrolled in PHPH 7011 Epidemiology for Public Health/PHPH 7711 Epidemiologic Methods I (MPH required course) will be required to complete the CITI RCR training and will receive 5 additional hours as part of in-class discussions during the PHPH 7011/PHPH 7711 course. In the Ph.D. program, all students enrolled in PHPB 9140 Advanced Research Methods (a Ph.D. required course) will be required to complete the CITI RCR training and will receive 5 additional hours as part of in-class discussions during the PHPB 9140 course. Doctoral level students enrolled in PHPB 9150 Public Health Ethics will also receive additional 1-5 hours of in-class discussion.

8020.10 Time Limit for Completion of Degree/Graduate Certificates

Before deciding to enroll in a graduate program of this school, students must examine seriously and realistically their abilities to adjust their personal and professional schedules to accommodate the challenge of graduate study. The maximum time limits set by the faculty for completing a graduate degree program are: six years from the first semester of admission for the master’s programs; three years from the first semester of admission for the certificate programs and nine years from the first semester of admission for the doctoral programs. Students or applicants with questions about the commitment needed to complete the graduate programs should schedule an appointment with the school’s Office of Academic Assistance and Career Services.

8020.20 Catalog Editions

Normally, students will be permitted to graduate under the provisions of the graduate catalog in effect at the time of first enrollment. Students may choose to graduate under the provisions of a subsequent graduate catalog; that is, they may choose to change their “catalog edition.” Students who choose to do this must meet all provisions of the subsequent graduate catalog.

Students are required to change to the current catalog edition when they change programs/statuses or after certain absences from the program, as explained below in section 8020.30. The School reserves the right to require students who wish to change their program of study concentration to update to the most recent catalog edition of their newly selected concentration.

8020.30 Continuous Enrollment Requirement and Requests to Reenter
Students in all graduate degree and graduate certificate programs must maintain an enrollment totaling six (6) hours or more of degree applicable courses over any consecutive three (3) semester period (including summers) until degree completion. In other words, the total enrollment of the current term plus the two terms preceding it must add to six (6) hours or more at all times. The status of all students will be checked by the midpoint of each term for compliance with the Continuous Enrollment Requirement. Any student whose enrollment is out of compliance will receive a continuous enrollment registration hold preventing all current and future registration. Those students will be notified by an email message sent to their official Georgia State University email account. To resume their programs of study, students with continuous enrollment registration holds must apply for re-entry admission by the published deadline (see section 8010.70), must be granted re-entry admission, and must enroll at a credit hour level sufficient to satisfy the continuous enrollment requirement. For more information on the re-entry process, see section 8010.70 or contact the Office of Academic Assistance and Career Services (OAA).

Students who do not attend the semester for which re-entry was originally required must complete a new re-entry form for subsequent semesters.

All students who wish to reenter one of the graduate level programs or non-degree status after an absence of one year must meet the degree requirements and academic regulations of the graduate catalog current upon return, along with other reentry provisions that may be in effect.

All students who are approved for re-entry will be eligible to retain all Georgia State course credit (and already approved transfer credit, if any) earned previously if their program can be completed within the time limit that was applicable to their program before the absence. The cumulative graduate GPA calculations will include all attempts in all courses at Georgia State University. Time limits would apply.

Students who plan not to register for a particular semester but who intend to continue the program at some later semester should discuss such plans with the MPH Curriculum and Advisement Coordinator in order to facilitate reentry at a subsequent time. Failure to comply with this request may complicate reentry in the semester preferred. An absence from the program, whether planned or unplanned, does not exempt students from the requirement to complete the program within the appropriate time limit.

8020.35 Enrollment in Approved Courses

Students must enroll for courses that are part of the approved curriculum for the program to which they have been accepted. Students who do otherwise are subject to loss of credit and/or loss of eligibility to continue to register. Failure to register for degree applicable courses over the course of three consecutive semesters will result in unsatisfactory progress and the rules of Continuous Enrollment Requirement will apply.

8020.40 Course Load

The course load of a master’s student may vary with the circumstances of the individual student each semester. A graduate student may enroll in 1 to 12 credit hours. Enrolling in more than 12 credit hours is not recommended and students should seek advisement with the Office of Academic Assistance and Career Services prior to registration unless employed as a Graduate Assistant (GA) with the university. A full-time course of study for graduate students at Georgia State University is nine (9) credit hours in fall and spring
In determining each semester’s course load, a student must balance other time constraints (work, family, civic, and other responsibilities) with the need to make reasonable and timely progress toward completion of the program.

8020.50 Grade Point Average and Course Grade Requirements

For Master’s level students, an overall institutional grade point average (GPA) of 3.0 or better must be earned to receive the MPH degree. All core courses in the MPH degree must be completed with a grade of B (3.0) or better, and any student earning a grade of B- or below must repeat the core course. No more than six semester hours of grades less than B (3.0) will be accepted for the degree in all other MPH program of study courses. No grade below a C will be accepted toward the degree. The records of students who fall below the 3.00 GPA requirement for all course attempts will be reviewed for continuation in the MPH program, and students may receive a scholastic warning or be scholastically dismissed from the MPH program.

For Graduate Certificate in Public Health (GCPH) students, an overall institutional grade point average (GPA) of 3.0 or better must be earned to receive the Graduate Certificate. The three core courses in the GCPH must be completed with a grade of B (3.0) or better any student earning a grade of B- or below must repeat the core course. No grade below a C will be accepted in the two Graduate Certificate program elective courses. The records of students who fall below the 3.00 GPA requirement for all course attempts will be reviewed for continuation in the GCPH program, and students may receive a scholastic warning or be scholastically dismissed from the GCPH program.

Transient students must maintain an overall institutional grade point average (GPA) of 3.0 or better in order to continue enrolling as a transient student. Transient students who do not maintain a 3.0 GPA or better may receive a scholastic warning or be scholastically dismissed.

Any doctoral student completing the prerequisite MPH core courses must earn a grade of B (3.0) or better in those MPH core courses; any doctoral student earning a grade of B- or below must repeat the prerequisite MPH core course. Doctoral students should refer to section 8060.40 Grade Point Average and Course Grade Requirements for Doctoral Students for more information regarding doctoral program grade point average requirements.

8020.60 Final Course Grades

Most public health faculty and instructors follow the following course grading scale:

- A 90-100
- B 80-89
- C 70-79
- D 60-69
- F below 60

Any deviations — including the availability of plus/minus grading — will be at the discretion of the
individual public health faculty member or instructor, and specifically stated in the course syllabus. Throughout this Catalog, there are noted grade requirements for certain courses in each program. It is important to note that if the grade requirement is a “B (3.0) or better,” then a B- (2.7) grade does NOT meet that “B (3.0) or better” grade requirement. Likewise, if the grade requirement is a “C (2.0) or better,” then a C- (1.7) grade does NOT meet that “C (2.0) or better” grade requirement.

8020.70 Transfer of Credit for MPH Program

Transfer Credits from another institution: A student may apply a maximum of nine (9) semester hours of approved course credit transferred from other institution(s) toward fulfilling MPH degree requirements. In order to transfer, the course grade must be a grade of B (3.0) or better. Transfer credits are processed by the School and must be approved by petition. Students requesting to petition for transfer of credits must work with the MPH Curriculum and Advisement Coordinator in the Office of Academic Assistance. Approval is at the discretion of the Department Chair of the student’s home department and concentration. All credits, including transfer credits, presented for the MPH degree must have been earned within six calendar years of the date of degree conferral from a program or school accredited by CEPH at the time of completion. With the exception of university-approved dual degree programs, if the course to be transferred in was used to satisfy another degree program either at Georgia State or elsewhere, the department chair reserves the right to require the student to complete a different graduate-level course prescribed by the department chair. That course will be substituted into the student’s MPH program, so that the student completes the forty-two (42) unique total credit hours for their MPH degree.

Credits earned at Georgia State University in either transient, non-degree, or other-Georgia State University-degree status: A student may apply a maximum of nine (9) semester hours of applicable Georgia State University course credit earned prior to MPH program admission (while taking public health courses as either transient, non-degree, or other-Georgia State University-degree status) toward fulfilling MPH degree requirements. Courses that satisfy the MPH core courses must be completed with a grade of B or better, and courses that satisfy a concentration required or elective course must be completed with a grade of C or better. Credits are processed by the School — petition is not required, but students should confirm their previously completed courses are applicable. Students may work with the MPH Curriculum and Advisement Coordinator in the Office of Academic Assistance to confirm applicability. Approval of applicable courses is at the discretion of the Department Chair of the student’s home department and concentration — it is not guaranteed. All Georgia State University credits presented for the MPH degree must have been earned within six calendar years of the date of degree conferral.

Credits earned at Georgia State University in GCPH enrollment status: A Graduate Certificate in Public Health (GCPH) student may apply a maximum of sixteen (16) semester hours of applicable Georgia State University course credit earned while completing the GCPH and prior to MPH program admission toward fulfilling MPH degree requirements. Courses that satisfy the MPH core courses must be completed with a grade of B (3.0) or better, and courses that satisfy a concentration required or elective course must be completed with a grade of C (2.0) or better. Credits are processed by the School — petition is not required, but students should confirm their previously completed courses are applicable. Students may work with the MPH Curriculum and Advisement Coordinator in the Office of Academic Assistance to confirm applicability. Approval of applicable courses is at the discretion of the Department Chair of the student’s home department and concentration — it is not guaranteed. All Georgia State University credits presented for the MPH degree must have been earned within six calendar years of the date of degree conferral. With
the exception of university-approved dual degree programs, if the course to be transferred in was used to satisfy another degree program either at Georgia State or elsewhere, the department chair reserves the right to require the student to complete a different graduate-level course prescribed by the department chair. That course will be substituted into the student’s MPH program, so that the student completes forty-two (42) unique total credit hours for their MPH degree. An exception is made for students completing a Graduate Certificate in Public Health (GCPH) prior to MPH admission—please see that exception detailed below.

Credits earned from another institution while currently enrolled: Students who have been accepted into a School of Public Health program and who wish to take courses at another institution for credit must first obtain written approval via the graduate petition process. The first step in this approval process is to meet with the MPH Curriculum and Advisement Coordinator in the Office of Academic Assistance and Career Services. All credits, including transfer credits, presented for the Master’s degree must have been earned within six calendar years of the date of degree conferral, all credits presented for the graduate certificate must have been earned within three calendar years of graduate certificate completion, and all credits presented for the DrPH or Ph.D. must have been earned within nine calendar years of the date of degree conferral. Courses transferred-in for the doctoral degree may not be used in fulfilling the Doctoral Public Health Core Courses requirements or the doctoral residency requirement for either doctoral degree.

JD/MPH Dual Degree Credits earned at Georgia State University just prior to dual degree (JD/MPH) status: A student may apply MPH-applicable Georgia State University College of Law course credit (earned for the JD degree) toward fulfilling MPH degree requirements if the JD/MPH dual degree student is admitted and enrolled into both degree programs prior to completion of 30 credit hours of MPH coursework and 60 hours of JD coursework. JD credits applied to the MPH degree are processed by the SPH—petition is not required, but students should confirm (in advance) with the MPH Curriculum and Advisement Coordinator that their planned JD courses are applicable to the MPH, and are correctly populating in their PAWS electronic MPH program of study. Approval of applicable courses is at the discretion of the SPH OAA and the Department Chair of the student’s home MPH department and concentration—it is not guaranteed. All Georgia State University credits presented for the MPH degree must have been earned within six calendar years of the date of degree conferral.

Ph.D. Community Psychology/MPH Dual Degree Credits earned at Georgia State University just prior to dual degree (Ph.D. Community Psychology/MPH) status: A student may apply MPH-applicable Georgia State University Community Psychology course credit (earned for the Ph.D. Community Psychology degree) toward fulfilling MPH degree requirements if the Ph.D. Community Psychology/MPH dual degree student is admitted and enrolled into both degree programs prior to completion of 30 credit hours of MPH coursework and 30 hours of Ph.D. Community Psychology coursework. Ph.D. Community Psychology credits applied to the MPH degree are processed by the SPH OAA – a petition is not required, but students should confirm (in advance) with the MPH Curriculum and Advisement Coordinator that their planned Ph.D. Community Psychology courses are applicable to the MPH, and are correctly populating in their PAWS electronic MPH program of study. Approval of applicable courses is at the discretion of the SPH OAA and the Department Chair of the student’s home MPH department and concentration — it is not guaranteed. All Georgia State University credits presented for the MPH degree must have been earned within six calendar years of the date of degree conferral.

8020.75 Out-of-Residence Credit and Graduation
Students who wish to take graduate courses at another institution to complete the coursework for their Georgia State University degree should provide the information listed above (except the transcript) to the Office of Academic Assistance and Career Services before enrolling at the other institution. Advance approval will ensure that the transfer credit can be granted if a grade of “B” or higher is earned in the course(s) and the coursework is completed within the time limit allowed for the student’s degree program. Such students should plan to graduate at least one semester after the Out-of-Residence quarter/semester in which the last course to be transferred has been taken. This will allow adequate time for the necessary transcript to be received and for the transfer credit to be processed. Please refer to the graduation office website for complete instructions and information concerning applying for graduation and the graduation fee: registrar.gsu.edu/graduation/. A letter certifying completion of degree requirements and stating the date the degree will be conferred can be furnished to the student by the OAA.

8020.80 Application for Graduation

All candidates for the MPH, DrPH, and Ph.D. degrees must file a formal application for graduation with the University’s Graduation Office at least two semesters in advance of the expected semester of graduation. Deadlines are published on the Georgia State website: registrar.gsu.edu/graduation/. The Graduation Office will inform the School when the application is filed by the student. The School of Public Health will then conduct an audit and inform the student of any remaining requirements — these items will include any graduation clearance requirements. A degree will be awarded only to a student who meets the university academic, residence, and graduation clearance requirements as well as the standards of performance and academic requirements for the MPH, DrPH, or Ph.D. degree.

All candidates for the GCPH must file a formal application for completion: publichealth.gsu.edu/students/program/ with the Office of Academic Assistance and Career Services (OAA) in the School of Public Health during the semester in which the student plans to complete the GCPH. OAA will conduct an audit to confirm completion of the requirements and inform the student of any remaining requirements — these items will include any graduation clearance requirements. A graduate certificate will be awarded only to a student who meets the university academic, residence, and/or graduation clearance requirements as well as the standards of performance and academic requirements for the GCPH.

8020.90 Scholastic Warning and Suspension for MPH, GCPH, and Transient Students

Each student admitted into the MPH or GCPH program in the School of Public Health must maintain a minimum cumulative grade point average of 3.00. A student whose cumulative institutional grade point average falls below 3.00 at the end of a semester will be placed on Scholastic Warning. The student will be notified of this standing by the School of Public Health. If a 3.00 cumulative grade point average is not achieved by the end of the next twelve semester hours or two semesters, whichever is longer, of completed coursework approved by the SPH faculty, the student will be suspended from the graduate program. Transient students must maintain a 3.00 cumulative grade point average in order to continue in that status. Transient students who do not maintain a 3.00 cumulative grade point average may be subject to scholastic exclusion.

A student may apply for reinstatement after one semester as a suspended student. Application for reinstatement must be made no later than six weeks prior to the first day of classes for the semester in
which reinstatement is sought.

8030 Student Appeals Procedures

The appeals procedure for graduate students in the School of Public Health will follow different paths, depending on the nature of the student’s appeal. The various types of situations and the appropriate appeals avenues are as follows:

8030.10 Admissions Appeals

At the graduate level, a person who wishes to appeal an admission decision first discusses the matter with the Director of the Office of Academic Assistance and Career Services (OAA) within 5 working days of the date of the denial. If the question is not settled there, a written appeal must be submitted to the OAA Director within 10 working days of the date of the denial or the date of the denial discussion with the OAA Director. (Workdays are counted as Monday through Friday except university holidays and closures.) The director will present the appeal to the appropriate Admissions Committee, which will examine the facts presented. The OAA Director, on behalf of the committee, will make a recommendation to the Senior Associate Dean for Academic and Strategic Initiatives and/or the Academic Affairs Committee Chair will render a written decision to the applicant normally within 10 workdays of the date the applicant’s letter was received by the OAA Director. See Section 1100 of the Graduate Catalog for University level appeals of admission decisions.

8030.20 Petitions for Policy Waivers and Variances, and Appeals, and Student Complaints, Concerns, or Grievances

Petitions for Policy Waivers and Variances, and Appeals Procedure

The petitions for policy waivers and variances, and appeals procedure for students will follow different courses depending on the nature of the student’s appeal. Please refer to University Information Section 1050.80 under Polices and Disclosures in this catalog or visit enrollment.gsu.edu/assistance/ or the Student Code of Conduct online: codeofconduct.gsu.edu/ for details.

Student Complaints, Concerns, or Grievances

Similarly, the student complaints, concerns, or grievance procedure for students will follow different courses depending on the nature of the student’s appeal. Please refer to University Information Section 1050.80 under Polices and Disclosures in this catalog or visit enrollment.gsu.edu/assistance/.

8030.30 Appeal of Exclusions, Dismissals and Terminations

Terminated, dismissed or excluded graduate students with questions about their status should first discuss their situation with the MPH Curriculum and Advisement Coordinator in the Office of Academic Assistance and Career Services (OAA). Following this discussion, students who believe they have extenuating circumstances may submit a written appeal of their termination or exclusion to the Director of OAA. The director will review the information submitted in support of the appeal and the student’s total
record. The Director will then make a recommendation to the Senior Associate Dean for Academic and Strategic Initiatives, who will make the decision regarding acceptance or denial of the appeal. The student will receive a written response from the school normally within 10 workdays of the date the appeal is received. (Workdays are counted as Monday through Friday except university holidays and closures.)

Requests for such consideration must be submitted, in writing, to the director of OAA within 10 workdays (defined as Monday through Friday except university holidays and closures). Students should write their appeals completely, but concisely, and include all facts germane to their case. Documentation should be provided, where possible, to substantiate statements made. Specific dates of the beginning and ending of particular problems should be included. Only circumstances described in the written and signed appeal as initially submitted will be accepted from the student; oral appeals are not permitted, nor are requests to submit additional information after the appeal has been reviewed. Appeals must be dated, signed, and include the student’s home address and telephone numbers (work and home).

Having been enrolled in too many courses relative to job requirements or other responsibilities or having continued to enroll while experiencing personal, work, or health-related problems very rarely constitutes such extenuating circumstances.

8040 Master Degree Programs

8040.10 Master in Public Health (MPH)

Contacts:

Gerardo Chowell-Puente, Chair of the Department of Population Health Sciences

- Biostatistics MPH Concentration
- Environmental Health MPH Concentration
- Environmental Epidemiology MPH Concentration
- Epidemiology MPH Concentration

Shannon Self-Brown, Chair of the Department of Health Policy and Behavioral Sciences

- Health Management and Policy MPH Concentration
- Health Promotion and Behavior MPH Concentration

The faculty and staff of the School of Public Health (SPH) are committed to providing a supportive academic environment that promotes the growth and progress of students engaged in graduate studies.

The Master of Public Health (MPH) program includes a minimum of forty-two (42) semester credit hours of study at the master’s level beyond the bachelor’s degree.

All MPH graduates are grounded in the following foundational public health knowledge learning objectives (and the course where the learning objective is assessed is noted in parenthesis):

*Profession & Science of Public Health*
1. Explain public health history, philosophy and values. (PHPH 7010)
2. Identify the core functions of public health and the 10 Essential Services. (PHPH 7010)
3. Explain the role of quantitative and qualitative methods and sciences in describing and assessing a population’s health. (PHPH 7010)
4. List major causes and trends of morbidity and mortality in the US or other community relevant to the school or program. (PHPH 7010)
5. Discuss the science of primary, secondary and tertiary prevention in population health, including health promotion, screening, etc. (PHPH 7010)
6. Explain the critical importance of evidence in advancing public health knowledge. (PHPH 7010)

Factors Related to Human Health

7. Explain effects of environmental factors on a population’s health. (PHPH 7010)
8. Explain biological and genetic factors that affect a population’s health. (PHPH 7010)
9. Explain behavioral and psychological factors that affect a population’s health. (PHPH 7010)
10. Explain the social, political and economic determinants of health and how they contribute to population health and health inequities. (PHPH 7010)
11. Explain how globalization affects global burdens of disease. (PHPH 7010)
12. Explain an ecological perspective on the connections among human health, animal health and ecosystem health (e.g., One Health). (PHPH 7010)

All MPH graduates demonstrate the following MPH foundational competencies (and the course where the competency is assessed is noted in parenthesis):

Evidence-based Approaches to Public Health

- MPH Foundational Core 1. Apply epidemiological methods to the breadth of settings and situations in public health practice. (PHPH 7011/PHPH 7711)
- MPH Foundational Core 2. Select quantitative and qualitative data collection methods appropriate for a given public health context. (PHPH 7011/PHPH 7711 and PHPH 7017)
- MPH Foundational Core 3. Analyze quantitative and qualitative data using biostatistics, informatics, computer-based programming and software, as appropriate. (PHPH 7011/PHPH 7711 and PHPH 7017)
- MPH Foundational Core 4. Interpret results of data analysis for public health research, policy or practice. (PHPH 7017)

Public Health & Health Care Systems

- MPH Foundational Core 5. Compare the organization, structure and function of health care, public health and regulatory systems across national and international settings. (PHPB 7160)
- MPH Foundational Core 6. Discuss the means by which structural bias, social inequities and racism undermine health and create challenges to achieving health equity at organizational, community and societal levels. (PHPB 7160)

Planning & Management to Promote Health

- MPH Foundational Core 7. Assess population needs, assets and capacities that affect communities’ health. (PHPB 7140)
- MPH Foundational Core 8. Apply awareness of cultural values and practices to the design or implementation of public health policies or programs. (PH 7140)
- MPH Foundational Core 9. Design a population-based policy, program, project or intervention.
MPH Foundational Core 10. Explain basic principles and tools of budget and resource management. (PHPB 7140)

MPH Foundational Core 11. Select methods to evaluate public health programs. (PHPB 7140)

Policy in Public Health

MPH Foundational Core 12. Discuss multiple dimensions of the policy-making process, including the roles of ethics and evidence. (PHPB 7160)

MPH Foundational Core 13. Propose strategies to identify stakeholders and build coalitions and partnerships for influencing public health outcomes. (PHPB 7160)

MPH Foundational Core 14. Advocate for political, social or economic policies and programs that will improve health in diverse populations. (PHPB 7160)

MPH Foundational Core 15. Evaluate policies for their impact on public health and health equity. (PHPB 7160)

Leadership

MPH Foundational Core 16. Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making. (PHPB 7160)

MPH Foundational Core 17. Apply negotiation and mediation skills to address organizational or community challenges. (PHPB 7160)

Communication

MPH Foundational Core 18. Select communication strategies for different audiences and sectors. (PHPB 7140)

MPH Foundational Core 19. Communicate audience-appropriate public health content, both in writing and through oral presentation. (PHPB 7140)

MPH Foundational Core 20. Describe the importance of cultural competence in communicating public health content. (PHPB 7140)

Interprofessional Practice

MPH Foundational Core 21. Perform effectively on interprofessional teams. (PHPB 7140)

Systems Thinking

MPH Foundational Core 22. Apply systems thinking tools to a public health issue. (PHPB 7160)

Additional GSU Content

- MPH Foundational Core 23. Recognize the ways diversity influences public health education and training, policies, programs, services, and the health of the nearby community. (PHPB 7160)

**MPH DEGREE REQUIREMENTS**

1. Required MPH Core Courses (16 hours):

   - PHPH 7010 Foundations in Public Health (3) **MPH students who have completed a CEPH-accredited bachelor’s degree may replace this PHPH 7010 Foundations of Public Health course with three (3) credit hours of concentration-approved elective course(s) from their chosen concentration.**
   - PHPH 7011 Epidemiology for Public Health (3) (required for Environmental Health, Health Management and Policy, and Health Promotion and Behavior concentrations or PHPH 7711 Epidemiologic Methods I (3) (required for Environmental Epidemiology, Epidemiology, and Biostatistics concentrations, and dual degree MPH/PhD Community Psychology students). **Note: Students changing their concentration from Environmental Epidemiology, Epidemiology, or Biostatistics to**
Environmental Health, Health Management and Policy, or Health Promotion and Behavior will be able to substitute PHPH 7011 with PHPH 7711 if already completed.

- PHPH 7017 Fundamentals of Biostatistics I (4)
- PHPB 7140 Health Promotion Planning, Administration, and Evaluation (3)
- PHPB 7160 Fundamentals of Health Systems, Leadership, and Policy (3)

2. Required MPH Concentration Courses (21 credit hours)
See “MPH CONCENTRATION REQUIREMENTS” section below

3. Required MPH Applied Practice Experience Course (2 credit hours)
   PHPH 7960 or PHPB 7960 Public Health Applied Practice Experience (2)
   Students will take two (2) credit hours of a required Applied Practice Experience in the students' specialty field of study, which equals 240 clock hours. The Applied Practice Experience is a planned, supervised and evaluated practice experience where graduate professional public health degree students develop skills in basic public health concepts and demonstrate the application of these concepts through a practice experience that is relevant to students’ areas of specialization and/or concentration. These opportunities can take place in a variety of governmental or non-governmental agencies and organizations and include local, state, national and international public health agencies to the extent possible and appropriate.

4. Required MPH Thesis or Capstone Project Course (3 credit hours)
   - PHPH 7990 or [PHPB] Thesis (3)
   - PHPH 7991 or PHPB 7991 Capstone (3)
   - PHPH 7992 or PHPB 7992 Integrative Learning Experience (3) (For students concentrating in Environmental Epidemiology, Environmental Health, Epidemiology, Health Management and Policy, or Health Promotion and Behavior only)

Following completion of all coursework, students must complete three (3) credit hours for a culminating experience in the form of a master’s thesis or a capstone project. All students in the School of Public Health who are involved in writing or defending a master’s thesis/capstone project shall register for at least three credit hours of thesis/capstone project credit each semester from the time they finish their course work until the time all requirements for the degree are completed. Students concentrating in Environmental Epidemiology, Environmental Health, Epidemiology, Health Management and Policy, or Health Promotion and Behavior have the option to register for PHPB/PHPH 7992 – Integrative Learning Experience, to complete their capstone as part of a course-based experience, rather than the more individualized PHPB/PHPH 7991 Capstone experience.

MPH CONCENTRATION REQUIREMENTS

In addition to the MPH foundational competencies taught and mastered in the MPH core courses, each of the distinct MPH concentrations (Biostatistics, Environmental Epidemiology, Environmental Health, Epidemiology, Health Promotion and Behavior, and Health Management and Policy) have their own program competencies that define what a graduate from that MPH concentration will know and be able to do upon degree program completion. These MPH program competencies are made available in the MPH student handbook, and appear on public health course syllabi. The SPH will only recommend the award of an MPH degree when the student has demonstrated mastery of necessary theories, concepts and content,
and demonstrated competence in the skills defined in the competencies for the student’s chosen MPH program and concentration.

**MPH Biostatistics Concentration**

The following MPH Biostatistics (BSTP) competencies describe the knowledge, skills, and abilities a successful graduate will demonstrate the conclusion of this MPH concentration (and the course where the competency is mastered and assessed is noted in parenthesis):

- MPH BSTP 1. Describe basic concepts of probability, random variation and commonly used statistical probability distributions. (PHPH 7017)
- MPH BSTP 2. Apply basic (univariate and bivariate) descriptive and inferential techniques commonly used with public health data. (PHPH 7017)
- MPH BSTP 3. Apply advanced (multivariate) descriptive and inferential techniques used with public health data. (PHPH 7027)
- MPH BSTP 4. Describe preferred methodological alternatives to commonly used statistical methods when assumptions are not met. (PHPH 8820)
- MPH BSTP 5. Distinguish among the different measurement scales and the implications for selection of statistical methods to be used based on these distinctions. (PHPH 8820)
- MPH BSTP 6. Apply basic informatics techniques (storage, access, management, organization, visualization, and evaluation of public health data) in public health research. (PHPH 7525)
- MPH BSTP 7. Describe different public health study designs, measures, and the appropriate statistical analyses for answering particular research questions. (PHPH 8830)
- MPH BSTP 8. Interpret results of statistical analyses found in public health studies. (PHPH 8830)
- MPH BSTP 9. Develop written and oral presentations based on statistical analyses for both public health professionals and educated lay audiences. (PHPH 8830)

**Required MPH BSTP Concentration Courses (12 hours):**

- PHPH 7027 Fundamentals of Biostatistics II (3)
- PHPH 7525 Statistical Computing (3)
- PHPH 8820 Generalized Linear Models (3)
- PHPH 8830 Advanced Statistical Topics (3)

**MPH BSTP Concentration Elective Courses (9 hours):**

Select at least three (3) pre-approved* courses focusing on advanced statistical techniques and quantitative research methods. Pre-approved BSTP elective courses include:

- PHPH 7019 Research Methods (3)
- PHPH 7150 Environmental Health (3)
- PHPB 8260 Spatial Population Health I (3)
- PHPH 8721 Epidemiologic Methods II (3)
- PHPH 8840 Statistical Modeling with Latent Variables I: Structural Equation Modeling (3)
- PHPH 8850 Statistical Modeling with Latent Variables II: Finite Mixture Modeling (3)
- PHPH 8860 Multilevel Models in Public Health (3)
- PHPH 8885 Fundamentals of Clinical Trials (3)
- PHPH 8890 Special Topics in Biostatistics (3) (may be repeated)
*The above listed pre-approved BSTP elective courses do not need further approval to satisfy the BSTP elective requirement. However, there are other academic departments at the university that may offer satisfying courses including, but not limited to the following departments: Math/Statistics, Decision Sciences, Marketing, Sociology, Policy Studies, Psychology, and Educational Policy Studies Research. Other courses that may be approved to satisfy this elective requirement generally have course titles including, but not limited to: Structural Equation Modeling, Finite Mixture Modeling, Hierarchical Linear Modeling, Longitudinal Modeling, Survival Analysis, Bayesian Inference, Survey Sampling, Causal Inference, Missing Data, or Nonparametric Statistics. Students should seek written, pre-approval of any course(s) — beyond the above listed pre-approved BSTP elective courses — to count toward the BSTP elective requirement. Approval must come from both the Department Chair and OAA.

**MPH Environmental Epidemiology Concentration**

The following MPH Environmental Epidemiology (ENEP) competencies describe the knowledge, skills, and abilities a successful graduate will demonstrate the conclusion of this MPH concentration (and the course where the competency is mastered and assessed is noted in parenthesis):

- MPH ENEP 1. Demonstrate knowledge of the implications of regulations, laws, standards, and various types of policy on activities aimed at protecting environmental health. (PHPH 7150)
- MPH ENEP 2. Describe major environmental and occupational contaminants, including biological, chemical and physical agents, and articulate how exposures to these contaminants interact with the environment to affect human health. (PHPH 7294)
- MPH ENEP 3. Identify key sources of data for epidemiologic purposes and their strengths and limitations. (PHPH 7525)
- MPH ENEP 4. Identify and discuss risk factors and their relationship to health outcomes. (PHPH 8721)
- MPH ENEP 5. Demonstrate proficiency in advanced epidemiologic methods. (PHPH 8721)
- MPH ENEP 6. Assess, synthesize and critically evaluate epidemiologic literature for strengths and weaknesses. (PHPH 8721)
- MPH ENEP 7. Design and evaluate interventions to reduce prevalence of major public health problems. (PHPH 8721)
- MPH ENEP 8. Identify and discuss ethical dilemmas in epidemiologic research. (PHPH 8721)
- MPH ENEP 9. Explain policy implications of epidemiologic research findings. (PHPH 8721)

**Required MPH ENEP Concentration Courses (12 hours):**

- PHPH 7150 Environmental Health (3)
- PHPH 7294 Exposure Assessment (3)
- PHPH 7525 Statistical Computing (3)
- PHPH 8721 Epidemiologic Methods II (3)

**MPH ENEP Concentration Elective Courses (9 hours):**

Select at least one (1) course from the following List A of ENEP concentration approved elective courses:

- PHPH 7027 Fundamentals of Biostatistics II (3)
- PHPH 7293 Environmental Health Toxicology (3)
- PHPH 7345 Introduction to Risk Assessment (3)
Select at least two (2) courses from the following List B of ENEP concentration approved elective courses:

- PHPH 7019 Research Methods (3)
- PHPH 7155 Air Quality and the Environment (3)
- PHPH 7265 Epidemiology and the Prevention of Violence (3)
- PHPH 7275 Chronic Disease Epidemiology (3)
- PHPH 7280 Infectious Disease Epidemiology (3)
- PHPH 7297 Global Water, Sanitation and Hygiene (3)
- PHPH 7300 Urban Health (3)
- PHPH 7340 Built Environment and Health (3)
- PHPB 7460 Forced Migration and Health (3)
- PHPH 8310 Environmental and Occupational Epidemiology (3)
- PHPH 8350 Biological Basis for Disease (3)
- PHPH 8690 Special Topics in Environmental Health (3)
- PHPH 8790 Special Topics in Epidemiology (3)
- PHPH 8880 or PHPB 8880 Public Health Study Abroad (3)
- Any course from the above ENEP list A of approved elective courses not used to satisfy ENEP list A requirements (6)

MPH Environmental Health Concentration

The following MPH Environmental Health (EVHT) competencies describe the knowledge, skills, and abilities a successful graduate will demonstrate the conclusion of this MPH concentration (and the course where the competency is mastered and assessed is noted in parenthesis):

- MPH EVHT 1. Demonstrate knowledge of the implications of regulations, laws, standards, and various types of policy on activities aimed at protecting environmental health. (PHPH 7150)
- MPH EVHT 2. Describe approaches to risk assessment for a wide variety of environmental hazards. (PHPH 7345)
- MPH EVHT 3. Describe major environmental and occupational contaminants, including biological, chemical and physical agents, and articulate how exposures to these contaminants interact with the environment to affect human health. (PHPH 7294)
- MPH EVHT 4. Apply biological, chemical, physical and public health principles to develop approaches for designing and maintaining health-promoting physical environments, and for assessing, preventing and controlling environmental hazards that pose risks to human health. (PHPH 7293)
- MPH EVHT 5. Identify important susceptible human sub-populations with respect to environmental exposures and the sources of variability. (PHPH 7345)

Required MPH EVHT Concentration Courses (12 hours):

- PHPH 7150 Environmental Health (3)
- PHPH 7293 Environmental Health Toxicology (3)
- PHPH 7294 Exposure Assessment (3)
- PHPH 7345 Introduction to Risk Assessment (3)

MPH EVHT Concentration Elective Courses (9 hours):
Select at least 3 courses from the following list of EVHT concentration approved elective courses:

- PHPH 7019 Research Methods (3)
- PHPB 7025 Health Disparities (3)
- PHPH 7155 Air Quality and the Environment (3)
- PHPH 7280 Infectious Disease Epidemiology (3)
- PHPH 7297 Global Water, Sanitation and Hygiene (3)
- PHPH 7300 Urban Health (3)
- PHPH 7325 Urban Health Seminar (1)
- PHPH 7340 Built Environment and Health (3)
- PHPB 7460 Forced Migration and Health (3)
- PHPH 7525 Statistical Computing (3)
- PHPB 7600 Global Health (3)
- PHPH 8350 Biological Basis for Disease (3)
- PHPB 8880 or PHPH 8880 Public Health Study Abroad (3) (up to 3 credits of PHPB/PHPH 8880 may count here)
- GEOS 6532 Introduction to Geographic Information Systems (4)
- GEOS 6538 Urban Health Geographic Information Systems (4)
- GEOS 6644 Environmental Conservation (4)
- GEOS 6784 Climatic Change (3)
- BIOL 6428 Medical Microbiology (4)
- BIOL 6451 Aquatic Pollution and Toxicology (4)
- BIOL 6480 Principles of Toxicology (4)
- BIOL 6484 Laboratory Techniques in Applied and Environmental Microbiology (4)
- NUTR 6170 Food Safety (3)

**MPH Epidemiology Concentration**

The following MPH Epidemiology (EPID) competencies describe the knowledge, skills, and abilities a successful graduate will demonstrate the conclusion of this MPH concentration (and the course where the competency is mastered and assessed is noted in parenthesis):

- **MPH EPID 1.** Identify and discuss risk factors and their relationship to health outcomes. (PHPH 8721)
- **MPH EPID 2.** Demonstrate proficiency in advanced epidemiologic methods. (PHPH 8721)
- **MPH EPID 3.** Assess, synthesize and critically evaluate epidemiologic literature for strengths and weaknesses. (PHPH 8721)
- **MPH EPID 4.** Identify key sources of data for epidemiologic purposes and their strengths and limitations. (PHPH 7525)
- **MPH EPID 5.** Demonstrate proficiency in data analysis and appropriate interpretation of results. (PHPH 7027)
- **MPH EPID 6.** Design, analyze, and evaluate an epidemiologic study. (PHPH 7027)
- **MPH EPID 7.** Design and evaluate interventions to reduce prevalence of major public health problems. (PHPH 8721)
- **MPH EPID 8.** Identify and discuss ethical dilemmas in epidemiologic research. (PHPH 8721)
- **MPH EPID 9.** Explain policy implications of epidemiologic research findings. (PHPH 8721)
Required MPH EPID Concentration Courses (9 hours):

- PHPH 8721 Epidemiologic Methods II (3)
- PHPH 7027 Fundamentals of Biostatistics II (3)
- PHPH 7525 Statistical Computing (3)

MPH EPID Concentration Elective Courses (12 hours):

Select at least 1 course from the following List A of EPID concentration approved elective courses:

- PHPH 7265 Epidemiology and the Prevention of Violence (3)
- PHPH 7275 Chronic Disease Epidemiology (3)
- PHPH 7280 Infectious Disease Epidemiology (3)
- PHPH 7365 Epidemiology of Adolescent and Young Adult Health Risk Behaviors (3)

Select at least 3 courses from the following List B of elective EPID concentration approved elective courses (the course satisfying List A cannot also satisfy List B requirements):

- PHPH 7014 Epidemiology of STDs and HIV (3)
- PHPH 7019 Research Methods (3)
- PHPH 7150 Environmental Health (3)
- PHPH 7019 Research Methods (3)
- PHPH 7265 Epidemiology and the Prevention of Violence (3)
- PHPH 7275 Chronic Disease Epidemiology (3)
- PHPH 7280 Infectious Disease Epidemiology (3)
- PHPH 7290 Case Studies in Epidemiology (3)
- PHPH 7355 Prevention Methods (3)
- PHPH 7365 Epidemiology of Adolescent and Young Adult Health Risk Behaviors (3)
- PHPB 7460 Forced Migration and Health (3)
- PHPB 8260 Spatial Population Health I (3)
- PHPB 8261 Spatial Population Health II (3)
- PHPB 8285 Social Determinants of Health (3)
- PHPH 8860 Multilevel Models in Public Health (3)
- PHPH 8790 Special Topics in Epidemiology (3)
- PHPB 8880 or PHPH 8880 Public Health Study Abroad (3) (up to 3 credits of PHPB/PHPH 8880 may count here)

MPH Health Management and Policy Concentration

The following MPH Health Management and Policy (HMGP) competencies describe the knowledge, skills, and abilities a successful graduate will demonstrate the conclusion of this MPH concentration (and the course where the competency is mastered and assessed is noted in parenthesis):

- MPH HMGP 1. Demonstrate application of economic principles to analyze public health issues. (PHPB 8250)
- MPH HMGP 2. Understand the market structure and the underlying sources of market power in the context of interlocking market segments in the health care system. (PHPB 8250)
- MPH HMGP 3. Apply the principles of program and financial management across the health care and public health systems. (PHPB 7330)
- MPH HMGP 4. Use strategic and business planning principles to develop and align the mission, vision, goals, and objectives for operating a public health or health care organization, and assure that plans align with evidenced-based approaches to improve population health. (PHPB 7330)
- MPH HMGP 5. Explain key elements of human resource management in the public health and health care contexts. (PHPB 7330)
- MPH HMGP 6. Describe public health and health care financing in the U.S., including revenue sources and reimbursement methods, historical origins and current policy, and their impact on health service delivery and population health. (PHPB 7330)
- MPH HMGP 7. Describe and demonstrate the attributes of effective leadership and the skills of effective leadership including decision making, vision setting, team building, conflict management, and strategic collaboration. (PHPB 7170)
- MPH HMGP 8. Evaluate the challenges and opportunities for health policy leadership to improve population health and advance health equity. (PHPB 7170)
- MPH HMGP 9. Utilize commonly used frameworks and theories of policymaking to develop policy proposals that address public health challenges, health equity, and improve population health. (PHPB 7170)
- MPH HMGP 10. Apply strategies for analyzing, evaluating, and advocating for public health and health care policies and programs. (PHPB 7170)

**Required MPH HMGP Concentration Courses (9 hours):**

- PHPB 7170 Public Health Leadership and Policy (3)
- PHPB 7330 Health Care Management and Finance (3)
- PHPB 8250 Health Economics and Policy (3)

**MPH HMGP Concentration Elective Courses (12 hours):**
Select at least one (1) course from the following List A of HMGP concentration approved elective courses (3 hours):

- PHPB 7521 Evaluation Research (3)
- PHPB 7522 Qualitative Research (3)
- PHPB 8410 Economic Evaluation (3)
- PHPB 8260 Spatial Population Health I (3)
- Other appropriate research methods/statistics courses may be approved by the Department Chair on the Master of Public Health Graduate Petition form. Students should receive approval from the Department Chair prior to enrolling in, paying for, and completing the course.

Select at least two (2) course from the following List B of HMGP concentration approved elective courses (6 hours):

- PHPB 7635 Health Policy and Health Equity (3)
- PHPB 7640 Comparative Health Systems (3)
- PHPB 8261 Spatial Population Health II (3)
- PHPB 8290 Population Health Informatics (3)
- Any course(s) from the above **HMGP list A of approved elective courses** not used to satisfy HMGP list
A requirements (3-6)

Select at least one (1) course from the following List C of HMGP concentration approved elective courses (3 hours)

- PHPH 7019 Research Methods (3)
- PHPB 7025 Health Disparities (3)
- PHPH 7150 Environmental Health (3)
- PHPH 7300 Urban Health (3)
- PHPH 7325 Urban Health Seminar (1)
- PHPH 7340 Built Environment and Health (3)
- PHPH 7425 Maternal and Child Health (3)
- PHPB 7460 Forced Migration and Health (3)
- PHPH 7525 Statistical Computing (3)
- PHPB 7535 Dissemination and Implementation Science (3)
- PHPB 7555 Disability and Public Health (3)
- PHPB 7565 Disability Policy (3)
- PHPB 7570 Childhood Obesity Prevention (3)
- PHPB 7600 Global Health (3)
- PHPB 8255 Health Communication (3)
- PHPB 8880 or PHPH 8880 Public Health Study Abroad (3) (up to 3 credits of PHPB/PHPH 8880 may count here)
- Any course from the above HMGP list A of approved elective courses not used to satisfy HMGP list A requirements (3)
- Any course from the above HMGP list B of approved elective courses not used to satisfy HMGP list B requirements (3)

MPH Health Promotion and Behavior Concentration

The following MPH Health Promotion and Behavior (HPMB) competencies describe the knowledge, skills, and abilities a successful graduate will demonstrate the conclusion of this MPH concentration (and the course where the competency is mastered and assessed is noted in parenthesis):

- MPH HPMB 1. Identify basic theories, concepts and models from a range of social and behavioral disciplines that are used in public health research and practice. (PHPB 7022)
- MPH HPMB 2. Describe how social and behavioral risk factors contribute to health outcomes. (PHPB 7022)
- MPH HPMB 3. Describe steps and procedures for the developing, planning, implementing and evaluating public health programs, policies and interventions. (PHPB 7410)
- MPH HPMB 4. Apply evidence-based principles and the scientific knowledge base to critical evaluation and decision making in public health. (PHPB 7535)
- MPH HPMB 5. Develop a logic model for use in program development, implementation, and evaluation. (PHPB 7521)
- MPH HPMB 6. Differentiate among goals, measurable objectives, related activities, and expected outcomes for a public health program. (PHPB 7521)
- MPH HPMB 7. Differentiate the purposes of formative, process, and outcome evaluation, and explain how findings from each are used. (PHPB 7521)
• MPH HPMB 8. Collaboratively assess individual, organizational, and community concerns and resources for public health programs. (PHPB 7521)
• MPH HPMB 9. Assess evaluation reports in relation to their quality, utility, and impact on public health. (PHPB 7521)

Required MPH HPMB Concentration Courses (12 hours):

• PHPB 7022 Health Behavior Theory for Public Health Research (3)
• PHPB 7410 Intervention Development for Public Health (3)
• PHPB 7521 Evaluation Research (3)
• PHPB 7535 Dissemination and Implementation Science (3)

MPH HPMB Concentration Elective Courses (9 hours):
Select at least 3 courses from the following list of HPMB concentration approved elective courses:

• PHPH 7014 Epidemiology of STDs and HIV (3)
• PHPH 7019 Research Methods (3)
• PHPB 7020 Principles of Tobacco Control (3)
• PHPB 7025 Health Disparities (3)
• PHPB 7027 Fundamentals of Biostatistics II (3)
• [PHPH 7150 Environmental Health (3)
• PHPB 7170 Public Health Leadership and Policy (3)
• PHPH 7265 Epidemiology and the Prevention of Violence (3)
• PHPH 7275 Chronic Disease Epidemiology (3)
• PHPH 7300 Urban Health (3)
• PHPH 7340 Built Environment and Health (3)
• PHPH 7365 Epidemiology of Adolescent and Young Adult Health Risk Behaviors (3)
• PHPH 7425 Maternal and Child Health (3)
• [PHPB 7460] Forced Migration and Health (3)
• PHPB 7522 Qualitative Research (3)
• PHPH 7525 Statistical Computing (3)
• PHPB 7555 Disabilities and Public Health (3)
• PHPB 7565 Disability Policy (3)
• PHPB 7570 Childhood Obesity Prevention (3)
• PHPB 7600 Global Health (3)
• PHPB 8255 Health Communication (3)
• PHPB 8260 Spatial Population Health I (3)
• PHPB 8261 Spatial Population Health II (3)
• PHPB 8275 Health Literacy (3)
• PHPB 8285 Social Determinants of Public Health (3)
• PHPB 8880 or PHPH 8880 Public Health Study Abroad (3) (up to 3 credits of PHPB/PHPH 8880 may count here)

8040.15 MPH Degree Progression

Critical milestones are assessed based on credit hours and semesters completed within the MPH degree
Milestone #1: Students are expected to have their thesis/capstone (culminating experience) proposal accepted by their thesis/capstone chair and committee by no later than the completion of 36 credit hours in the MPH program. The approved thesis proposal form must be submitted to the Office of Academic Assistance and Career Services within the same 36 credit hours. Waivers to this credit rule are for students planning to complete PHPB/PHPH 7992 Integrative Learning Experience, or by petition only and may be adjusted for approved leaves of absence, medical leave or disability as detailed elsewhere in school or university policies. Failure to submit an approved thesis/capstone proposal by the conclusion of 36 credit hours, with no intentions to complete PHPB/PHPH 7992 Integrative Learning Experience, will place the student on scholastic probation.

Milestone #2: Once a student initially enrolls in their thesis/capstone course, students are expected to successfully defend and publish (upload to Georgia State University) their thesis/capstone within two academic semesters (including summer). Failure to complete the thesis/capstone within two academic semesters will place the student on scholastic probation. Failure to complete the thesis/capstone by the end of the 3rd semester will result in a scholastic exclusion from the MPH program.

Milestone #3: The maximum time limit set by the faculty for completing the MPH graduate degree program is six (6) years from the first semester of admission to the MPH. After six years, courses will begin to expire in order of first completed, and may require re-enrollment or replacement with advanced coursework to satisfy degree requirements.

If a student’s progress indicates scholastic probation, the student will receive a notice of this from the Director of the Office of Academic Assistance and Career Services (OAA), and the notice will be sent by e-mail message to their official Georgia State University e-mail account. Within fifteen (15) working days of receipt of this notice, the student should submit a memo to the Director of OAA (from the student’s Georgia State University e-mail account) documenting how the student intends to achieve the relevant milestone before reaching the criterion for initiating a dismissal action. If a student’s progress indicates initiation of a scholastic exclusion action or if a student fails to submit a memo, the student will receive a scholastic exclusion action notice from the Director of OAA.

Students may appeal the pending exclusion action by petitioning the Dean of the School of Public Health but they must do so before the end of the semester in which their progress first indicated initiation of an exclusion action. If they appeal, students are required to submit as part of their appeal an individualized plan, approved by their thesis/capstone chair, detailing dates by which they intend to meet any milestones yet unachieved.

At any time the student believes they may have difficulty meeting the critical milestones, they should immediately consult with their advisor in the Office of Academic Assistance and Career Services.

8040.20 Master of Public Health /Juris Doctor Dual Degree

The College of Law and the School of Public Health offer a Juris Doctor (JD)/ Master of Public Health (MPH) in the Health Management and Policy (HMGP) concentration dual degree program. This dual program provides an opportunity to pursue studies in law and public health concurrently. The JD/MPH-HMGP enables students to earn both degrees in a shorter time than would be possible if students pursued
each degree separately. Dual degree programs include separate, but affiliated degree programs that are linked through shared curricular offerings and collaborative administrative processes.

Credit hours earned in one degree program satisfy some requirements of the other degree program. No credit hours for the MPH courses will be applied toward the JD requirements until a student has completed the MPH; similarly, no credit hours for the JD courses will be applied toward the MPH requirements until completion of the JD. In other words, a student cannot graduate from the JD and MPH in the same semester—a student must graduate from either program in a given semester, and then the second program in a subsequent semester. Students interested in pursuing a JD/MPH must be admitted into and enroll in both degree programs prior to completion of 30 credit hours of MPH coursework and 60 hours of JD coursework in order to qualify for the dual degree program. When admitted to the JD/MPH program, students must complete the first 30 hours of required courses in the JD program as soon as possible (immediately upon JD admission). After completion of these 30 hours of law courses, course enrollment in either college or both colleges concurrently is permitted and may resume. Students must complete the dual degree program within six years of the initial semester of enrollment. Students should be able to complete both degrees in four years.

### JD/MPH Dual Degree Admissions

To participate in the JD/MPH dual degree program, students must apply separately for admission to the College of Law and the School of Public Health. Students are strongly encouraged to apply to both programs simultaneously. However, there is some opportunity to apply and enroll in the dual degree program after admission to only one of the schools, if a student has not proceeded too far in that school’s program. Students interested in pursuing a JD/MPH must be admitted into and enroll in both degree programs prior to completion of 30 credit hours of MPH coursework and 60 hours of JD coursework in order to qualify for the dual degree program.

Students must take the LSAT to apply to the College of Law. The School of Public Health will accept the LSAT in lieu of the GRE if a student is admitted into the College of Law first. If a student applies concurrently to the College of Law and School of Public Health, or if a student is admitted to the College of Law after they are admitted to the School of Public Health, that student will need to provide a GRE score as well. Admission into one program does not presume admission into the other. Students who gain admission into both programs and become dual degree JD/MPH students should self-disclose their dual degree status to the MPH Curriculum and Advisement Coordinator at the School of Public Health and the Associate Director of the Center for Law, Health and Society at the College of Law immediately upon admission into their second program of study (either JD or MPH). An email from the student to both the MPH Curriculum and Advisement Coordinator and CLHS Associate Director is preferred. Failure to send this notification to their two advisors may result in the student having to complete both programs in their entirety and become ineligible for the dual JD/MPH degree program opportunity.

### What can I do with a dual degree in law and public health?

- Private law practices specializing in healthcare, pharmaceuticals, and food and drug policy
- Legal counsel in federal, state, and local government agencies
- Government affairs and advocacy
- Research institutions and higher education
- Non-profit organizations
Resources like the CDC’s Public Health Law Program, Network for Public Health Law, APHA Law Section, and the American Health Lawyers Association provide connections to similarly trained individuals throughout the country through conferences, training, and networking. Read more information in the findings from the Network for Public Health Law’s interactive tool.

**JD/MPH HMGP DUAL DEGREE REQUIREMENTS (106 hours)**

**MPH – minimum 28 School of Public Health credit hours (+ 14 or more public health-related College of Law credit hours, taken for the JD)**

**Required MPH Core Courses (16 hours):**

- PHPH 7010 Foundations of Public Health (3) *MPH students who have completed a CEPH-accredited bachelor’s degree may replace this PHPH 7010 Foundations of Public Health course with three (3) credit hours of health management and policy concentration-approved elective course(s).*
- PHPH 7011 Epidemiology for Public Health (3) or PHPH 7711 Epidemiologic Methods I (3)
- PHPH 7017 Fundamentals of Biostatistics I (4)
- PHPB 7140 Health Promotion Planning, Administration, and Evaluation (3)
- PHPB 7160 Fundamentals of Health Systems, Leadership, and Policy (3)

**Required MPH HMGP Concentration Courses (9 hours):**

- PHPB 7170 Public Health Leadership and Policy (3)
- PHPB 7330 Health Care Management and Finance (3)

**Required MPH HMGP Concentration-related College of Law Elective Courses (12 hours):**
Select at least one (1) course from the following List A of HMGP concentration approved elective courses (3 hours):

- PHPB 8410 Economic Evaluation (3)
- PHPB 7521 Evaluation Research (3)
- PHPB 7522 Qualitative Research (3)
- PHPB 8260 Spatial Population Health I (3)
- Other appropriate research methods/statistics courses may be approved by the Department Chair on the Master of Public Health Graduate Petition form. Students should receive approval from the Department Chair prior to enrolling in, paying for, and completing the course.

Select at least three (3) courses from the following HMGP List B of approved MPH HMGP/JD elective courses (9 hours):

- [LAW 7244] Public Health Law (3)
- Other SPH approved Health law electives with “B” grade (3.0) or better – counted below (3-9 hours)

**Required MPH Applied Practice Experience Course (2 credit hours) or (2 credit hours minimum)**
of public health-related Lawyering Skills Course:

Public Health-Related Lawyering skills course, such as clinic or externship, and must specifically be HeLP, a health law related externship, or HLA (in lieu of PHPB 7960 MPH Applied Practice Experience) (2)

*Standard MPH HMGP students complete two (2) credit hours of PH 7960 MPH Applied Practice Experience; however, JD/MPH HMGP dual degree students may satisfy this PHPB 7960 requirement by completing 3-6 credit hours of a College of Law lawyering skills course: specifically in the Health Law Partnership (HeLP) Legal Services Clinic at Georgia State University [law.gsu.edu/clinics/help-legal-services-clinic/], a health law related externship [law.gsu.edu/experiential-learning/externships/], or Health Legislation and Advocacy clinical program [law.gsu.edu/clinics/]. For either a traditional PHPB 7960 MPH Applied Practice Experience or for a lawyering skills course in lieu of a MPH Applied Practice Experience, the student must FIRST complete all MPH core courses, LAW 7240, and LAW 7244 before beginning the MPH Applied Practice Experience or lawyering skills course. If a lawyering skills course is taken prior to completing those required MPH core courses, it will not count for the PHPB 7960 MPH Applied Practice Experience requirement. This is simply because the MPH curriculum design requires the MPH Applied Practice Experience to be an opportunity for students to demonstrate the specific MPH knowledge and skills they learned in their MPH courses; therefore, students cannot apply the knowledge and skills acquired through their MPH courses of study in the MPH Applied Practice Experience until after they have completed those MPH courses. Students must submit a Waiver/Substitution form to the School of Public Health for the lawyering skills course to be counted in lieu of the PHPB 7960 MPH Applied Practice Experience requirement [publichealth.gsu.edu/students/practicum/practicum-forms/], and the form must indicate how the student will demonstrate attainment of at least five public health competencies, of which at least three must be foundational competencies, in at least two products. The School of Public Health will make the final decision on if a completed lawyering skills course fulfills the PHPB 7960 requirement. Alternatively, JD/MPH student may elect to complete the standard public health Applied Practice Experience course.

Required MPH Thesis or Capstone Project Course (3 credit hours):

- PHPB 7990 Thesis (3)
- PHPB 7991 Capstone (3)
- PHPB 7992 Integrative Learning Experience (3)

JD – minimum 78 College of Law hours (+12 or more law-related School of Public Health credit hours, taken for the MPH)

Students should refer to the College of Law for the specific JD requirements of this dual degree program.

8040.20 Master of Public Health/Doctor of Philosophy in Community Psychology Dual Degree

The Department of Psychology and the School of Public Health offer a joint Master of Public Health/Doctor of Philosophy Degree in Psychology. Students enroll in either the Health Promotion and Behavior or the Epidemiology concentrations of the MPH program in the School of Public Health and in the Community Psychology concentration of the Department of Psychology. This dual program provides an opportunity to pursue studies in public health and community psychology concurrently. The
MPH/Ph.D. Community Psychology enables students to earn both degrees in a shorter time than would be possible if they pursued each degree separately.

Admissions

To participate in the MPH/Ph.D. Community Psychology dual degree program, prospective students are strongly encouraged to apply separately for admission to the College of Arts and Sciences, Department of Psychology (Community Concentration) and the School of Public Health, but are not required to do so. Applicants may complete a single application to the College of Arts and Sciences, Department of Psychology (Community Concentration) and indicate on the application their interest in the dual degree program on their Ph.D. Community Psychology application — if admitted into the Ph.D. Community Psychology program, applicants should email their assigned Ph.D. Community Psychology advisor to ensure their interest in the dual degree program has been noted, and their application is now being considered by the other program of interest (the MPH in the School of Public Health).

Prospective students are strongly encouraged to apply to both programs simultaneously for the same entry term/semester. This gives students the best opportunity to apply the maximum number of dual degree (having credit hours earned in one degree program satisfy some requirements of the other degree program). Still, there is some opportunity to apply and enroll in the dual degree program after admission to only one of the schools, if a student has not proceeded too far in that school’s program. If interested in pursuing a MPH/Ph.D. Community Psychology, students must be admitted into both programs and enroll in the dual degree program prior to completion of 30 hours of MPH coursework or 30 hours of Ph.D. Community Psychology coursework.

Applicants must take the GRE to apply to both programs. Admission into one program does not presume admission to the other. Students who gain admission into both programs and become dual degree MPH/Ph.D. Community Psychology students should self-disclose their dual degree status to their Ph.D. Community Psychology advisor and the MPH Curriculum and Advisement Coordinator immediately upon admission into their second program of study (either Ph.D. Community Psychology or MPH). A joint email from the student to both their Ph.D. Community Psychology advisor and the MPH Curriculum and Advisement Coordinator is preferred. Failure to send this notification to their advisors may result in the student having to complete both programs in their entirety and become ineligible for the dual MPH/Ph.D. Community Psychology degree program opportunity.

Once admitted to the dual program students will be enrolled in both the School of Public Health and the College of Arts and Sciences concurrently. A student cannot graduate from the Ph.D. Community Psychology and MPH programs in the same semester—a student must graduate from either program in a given semester, and then the second program in a subsequent semester. Students are expected to complete your dual degree program within six years of the initial semester of enrollment (and must complete it in no longer than 8 years). The MPH program must be completed within 6 years of initial enrollment. Students should be able to complete both degrees in five to six years.

What can a graduate do with a dual degree in public health and psychology?

- University/College appointments in higher education in public health, psychology, or allied disciplines
- Research, evaluation, and/or program roles in international, federal, state, and local government
agencies

- Research, evaluation, and/or program roles in public and private research and evaluation firms, foundations, and advocacy organizations
- Variety of roles in policy and advocacy organizations
- Independent consulting

In addition to major organizations in Public Health (e.g., American Public Health Association, APHA) and Community Psychology (Society for Community Research and Action, SCRA), several interdisciplinary professional organizations like the Society for Public Health Education (SOPHE), American Evaluation Association (AEA), and the Society for Prevention Research (SPR) provide links to similarly trained individuals throughout the country through conferences, training, and networking.

Degree Requirements for Dual MPH/Ph.D. Community Psychology Program
(98-104 for Students in MPH Health Promotion and Behavior and 101-107 hours for Students in MPH Epidemiology Concentration)

MPH HPMB Concentration—42 hours
16 hours of MPH core courses

- PHPH 7010 Foundations of Public Health (3) *MPH students who have completed a CEPH-accredited bachelor’s degree may replace this PHPH 7010 Foundations of Public Health course with three (3) credit hours of health promotion and behavior concentration-approved elective course(s).*
- PHPH 7711 Epidemiologic Methods I (3) *Dual MPH/Ph.D. Community Psychology students should complete PHPH 7711 so that they are prepared for the doctoral-level psychology statistics and methods courses.*
- PHPH 7017 Fundamentals of Biostatistics I (4)
- PHPB 7140 Health Promotion Planning, Administration, and Evaluation (3)
- PHPB 7160 Fundamentals of Health Systems, Leadership, and Policy (3)

12 hours of MPH HPMB concentration courses

- PHPB 7022 Health Behavior Theory for Public Health Research (3) *(possibly satisfies Ph.D Community Psychology elective)*
- PHPB 7410 Intervention Development for Public Health (3)
- PHPB 7521 Evaluation Research (3)
- PHPB 7535 Dissemination and Implementation Science (3)

9 hours of Psychology Core/Community Psychology *(possibly satisfies MPH electives)*

- PSYC 8200 Introduction to Community Psychology (3)
- PSYC 8420 Psychological Research Statistics II (3)

Choose one (3):

- PSYC 8220 Community Interventions, Social Change, and Prevention (3)
- PSYC 8060 Issues of Human Diversity (3)
- PSYC 8230 Assessment, Consultation, and Evaluation I (ACE I)
- PSYC 8260 Assessment, Consultation, and Evaluation in Community Psychology II (ACE II)
- PSYC 8280 Psychology, Advocacy, and Organizing (3)
- PSYC 9900 Qualitative Methods (3)
- PHPB 7522 Qualitative Research (3)

2 hours of MPH Applied Practice Experience

PHPB 7960 MPH Applied Practice Experience (2)

3 hours of MPH thesis
PHPB 7990 Thesis (3)

Note: Students should simultaneously register for PSYC 8999 Master’s Thesis Research (3) to fulfill psychology thesis requirements; however, this PSYC 8999 course does not count towards the MPH thesis requirement or MPH degree program.

Note: MPH/Ph.D. dual degree students must complete PHPB 7990 Public Thesis (3); Capstones or other MPH culminating experiences are not permitted for MPH/Ph.D. Community Psychology dual degree students.

MPH EPID Concentration – 42 hours

16 hours of MPH core courses

- PHPH 7010 Foundations of Public Health (3) MPH students who have completed a CEPH-accredited bachelor’s degree may replace this PHPH 7010 Foundations of Public Health course with three (3) credit hours of health promotion and behavior concentration-approved elective course(s).
- PHPH 7711 Epidemiologic Methods I (3)
- PHPH 7017 Fundamentals of Biostatistics I (4)
- PHPB 7140 Program Planning, Administration, and Evaluation (3)

12 hours of MPH EPID concentration courses and elective

- PHPH 8721 Epidemiologic Methods II (3)
- PHPH 7027 Fundamentals of Biostatistics II (3)
- PHPH 7525 Statistical Computing (3)

Select at least one (1) course from the following List A of EPID concentration-approved elective courses:

- PHPH 7265 Epidemiology and the Prevention of Violence (3)
- PHPH 7275 Chronic Disease Epidemiology (3)
- PHPH 7280 Infectious Disease Epidemiology (3)
- PHPH 7365 Epidemiology of Adolescent and Young Adult Health Risk Behaviors (3)

9 hours of Psychology Core/Community Psychology (possibly satisfies MPH electives)

- PSYC 8200 Introduction to Community Psychology (3)
PSYC 8420 Psychological Research Statistics II (3)

Choose one (3):

- PSYC 8220 Community Interventions, Social Change, and Prevention (3)
- PSYC 8060 Issues of Human Diversity (3)
- PSYC 8230 Assessment, Consultation, and Evaluation I (ACE I)
- [PSCY 8260] Assessment, Consultation, and Evaluation in Community Psychology II (ACE II)
- PSYC 8280 Psychology, Advocacy, and Organizing (3)
- PSYC 9900 Qualitative Methods (3)
- PHPB 7522 Qualitative Research (3)

2 hours of MPH Applied Practice Experience
PHPH 7960 MPH Applied Practice Experience (2)

3 hours of MPH thesis
PHPH 7990 Thesis (3)

Note: Students should simultaneously register for PSYC 8999 Master’s Thesis Research (3) to fulfill psychology thesis requirements; however, this PSYC 8999 course does not count towards the MPH thesis requirement or MPH degree program.

Note: MPH/Ph.D. dual degree students must complete PHPH 7990 Thesis (3): Capstones or other MPH culminating experiences are not permitted for MPH/Ph.D. Community Psychology dual degree students.

Ph.D. Community Psychology—53-59 hours for most students, depending on their unique Ph.D. program of study. Students should consult the Department of Psychology.

8050 Graduate Certificate in Public Health

8050 Graduate Certificate in Public Health

The Graduate Certificate in Public Health (GCPH) is a 16-credit hour program of study. The content includes three core courses taught in the Master of Public Health degree program and two electives. All courses have been specially designed and developed for students currently working in public health or related field who seek to maintain, upgrade, or advance their public health knowledge and skills.

The Graduate Certificate in Public Health will offer strong foundations in public health theory, research, and practice, for example:

- Community Health Practice and Research
- Program Planning, Management, and Evaluation
- Human Communication
- Health Promotion and Education
- Environmental Health
- Health and Human Rights
Graduate Certificate in Public Health Requirements (16 hours):

1. Required GCPH Core Courses (10 hours)
   - PHPH 7011 Epidemiology for Public Health (3) or PHPH 7711 Epidemiologic Methods I (3)
   - PHPH 7017 Fundamentals of Biostatistics I (4)
   - PHPB 7160 Fundamentals of Health Systems, Leadership, and Policy (3)

2. Required GCPH Elective Courses (6 hours):
   - Select at least two electives in consultation with either the SPH Advisement Coordinator in the Office of Academic Assistance and Career Services (OAA) or a faculty mentor. Electives must be approved, in writing, by OAA and should be geared toward maintaining, upgrading, or advancing public health knowledge and skills related to the student’s current or future career. Students considering in pursuing the Master of Public Health (MPH) degree at GSU should select the following courses as their GCPH electives:
     - PHPH 7010 Foundations in Public Health (3)
     - PHPB 7140 Health Promotion Planning, Administration, and Evaluation (3)

Transfer credits and the time limit on enrollment in the Graduate Certificate program

A student may apply a maximum of four (4) semester credit hours transferred from another institution or used in another graduate program toward fulfilling the GCPH requirements. Transfer credits are approved by the corresponding Department Chair that houses the Georgia State University-equivalent course and processed by the OAA.

Credits earned at Georgia State University in either transient, non-degree, or other-Georgia State University-degree status: A student may apply a maximum of four (4) semester hours of applicable Georgia State University course credit earned prior to GCPH program admission (while taking public health courses as either transient, non-degree, or other-Georgia State University-degree or program status) toward fulfilling GCPH degree requirements. All Georgia State University credits presented for the GCPH degree must have been earned within three calendar years of the date of certificate conferral. Courses taken at Georgia State University that were applied to another Georgia State University graduate certificate or degree program may not be applied to the GCPH degree; instead, a student should seek a GCPH course waiver for these courses already applied to another Georgia State University graduate certificate or degree program.

GCPH Course Waivers: GCPH students may be granted a course waiver for any GCPH course already completed as part of another Georgia State University graduate certificate or degree program. Students are still expected to take the minimum number of credit hours expected for the GCPH program at Georgia State University (sixteen (16) credit hours), but when granted a course waiver, the student may complete a different graduate level course (usually higher-level), substituted into their GCPH program in order to complete the total sixteen (16) credit hour requirement of their GCPH program. Waivers and course replacements are decided by the corresponding Department Chair that houses the GCPH course being requested for replacement.

Time Limits. The time limit for completing the GCPH program is three (3) years from the term of entry.
Applying GCPH credit hours to Public Health Graduate degree programs.

Students who wish to change from GCPH enrollment to graduate degree seeking status must file an application for the graduate program desired and provide all supporting documents by the appropriate deadline for the semester for which admission is sought. Further information on application procedures for admission to degree programs in the School of Public Health may be obtained from the Office of Academic Assistance and Graduate Career Services: publichealth.gsu.edu/academic/apply/.

GCPH credit hours may apply to School of Public Health graduate degree programs. However, all credits, including GCPH-earned credits, presented for the Master’s degree must have been earned within six calendar years of the date of Master’s degree conferral, and all credits presented for the Doctoral degrees must have been earned within nine calendar years of the date of Doctoral degree conferral. Grades from all attempts at all Georgia State University courses that are taken at the graduate level will become part of the student’s GPA.

8060 Doctor of Philosophy in Public Health

Laura Salazar
Professor and PhD Program Director

Approved by the University System of Georgia Board of Regents in March 2011, the Doctor of Philosophy (Ph.D.) in Public Health academic degree in the School of Public Health was the first Georgia Board of Regent’s approved public health Doctor of Philosophy degree based in the metropolitan Atlanta area. The degree requirements will serve to educate the next generation of prevention scientists conducting public health research in academia, governmental public health, health care organizations and the private sector. Within the doctoral degree, students choose between distinct doctoral concentrations, or programs of study, offered by the School. They include: Epidemiology (EPID), Environmental Health (EVHT), Health Promotion and Behavior (HPMB), or Health Services and Policy Research (HSRP). While the Georgia State University School of Public Health offers four distinct Ph.D. programs in four different concentrations—EPID, EVHT, HPMB, and HSRP—this catalog will occasionally refer to a singular Ph.D. degree when discussing requirements that pertain to all School of Public Health Ph.D. programs of study and students.

8060.10 Ph.D. Degree Requirements

The Ph.D. degree requires completion of a minimum of sixty-two (62) credit hours of coursework and a declared concentration in a public health core area. Students are also required to complete a dissertation. The candidates must satisfy the course requirements and credit hours in the following areas:

Required Prerequisites – MPH Core Courses (3 – 13 hours):

All Ph.D. graduates are grounded in the following foundational public health knowledge learning objectives (and the course where the learning objective is assessed is noted in parenthesis):

Profession & Science of Public Health
1. Explain public health history, philosophy and values. (PHPH 7010)
2. Identify the core functions of public health and the 10 Essential Services. (PHPH 7010)
3. Explain the role of quantitative and qualitative methods and sciences in describing and assessing a population’s health. (PHPH 7010)
4. List major causes and trends of morbidity and mortality in the US or other community relevant to the school or program. (PHPH 7010)
5. Discuss the science of primary, secondary and tertiary prevention in population health, including health promotion, screening, etc. (PHPH 7010)
6. Explain the critical importance of evidence in advancing public health knowledge. (PHPH 7010)

Factors Related to Human Health

1. Explain effects of environmental factors on a population’s health. (PHPH 7010)
2. Explain biological and genetic factors that affect a population’s health. (PHPH 7010)
3. Explain behavioral and psychological factors that affect a population’s health. (PHPH 7010)
4. Explain the social, political and economic determinants of health and how they contribute to population health and health inequities. (PHPH 7010)
5. Explain how globalization affects global burdens of disease. (PHPH 7010)
6. Explain an ecological perspective on the connections among human health, animal health and ecosystem health (eg, One Health). (PHPH 7010)

For students admitted to the PhD program who have not completed a CEPH-accredited bachelor’s degree in public health or MPH degree, the following course will be required as prerequisite to the PhD program:

- PHPH 7010 Foundations of Public Health

Two additional courses may be required upon review of the student’s completed graduate coursework by the PhD Director and Faculty Advisor.

- PHPH 7011 Epidemiology for Public Health or PHPH 7711 Epidemiologic Methods I
- PHPH 7017- Fundamentals of Biostatistics I

Based upon the PhD program concentration area declared by the incoming student, the following courses will be required:

- For students declaring Health Promotion and Behavior as a concentration: PHPB 7140 Health Promotion Planning, Administration, and Evaluation
- For students declaring Environmental Health as a concentration: PHPH 7150 Environmental Health
- For students declaring Health Services and Policy Research as a concentration: PHPB 7160 Fundamentals of Health Systems, Leadership, and Policy

Doctoral students may waive these prerequisite MPH Core Courses if they:

- enter the Ph.D. program with a CEPH accredited MPH degree that included “B” grades or better in their MPH courses related to the MPH Foundational Public Health Knowledge learning objectives and MPH Foundational Competencies, as documented by an official university transcript. Syllabi
for courses may also be requested.

- and/or have completed employment or other training(s) that enable them to demonstrate the knowledge, skills, and abilities acquired in the MPH core courses listed above. Note: PHPH 7010 Foundations of Public Health cannot be waived by employment or other training(s). PHPH 7010 Foundations of Public Health is only waived after the School verifies a students’ previous completion of a CEPH-accredited bachelor’s degree in public health or MPH degree.

Students meeting the above criteria should provide a petitions for waiver for each of the five courses being requested for waiver. The Petition for Waiver is a written statement, along with any evidentiary documentation, that assures the School that the doctoral student has mastered one (or more) of the MPH Foundational Public Health Knowledge learning objectives and/or MPH Foundational Competencies through another manner (i.e. MPH degree, career experience, etc.). This Petition must be approved by the Doctoral Program Director. The Doctoral Program Director may defer to the Department Chair in which the petitioned course is offered. Upon approval by the Doctoral Program or Department Chair, the Petition is then forwarded to the Office of Academic Assistance and Career Services (OAA) for their approval. OAA may request the input of the Senior Associate Dean for Academic and Strategic Initiatives and/or the Academic Affairs Committee Chair and/or members, but that is not required. Once the Director of OAA notes OAA’s approval, the student’s file and PAWS electronic program of study is updated to note satisfaction of the required prerequisite(s).

**Doctoral Degree Requirements (62 hours):**

1. **Required Ph.D. Core Courses (18 hours):**
   - PHPH 8721 Epidemiologic Methods II (3)
   - PHPB 9120 Theory and Practice in Health and Prevention Instruction (3)
   - PHPB 9140 Advanced Research Methods (3)
   - PHPB 9150 Public Health Ethics (3)
   - PHPH 9810 Biostatistical Methods I (3)
   - PHPH 9820 Biostatistical Methods II (3)

2. **Required Ph.D. Concentration Courses (27 hours):**
   Twenty seven (27) hours of required coursework and electives have been established to ensure that students achieve proficiency in the competencies and skills related to each Ph.D. program of study: Environmental Health (EVHT), Epidemiology (EPID), Health Promotion and Behavior (HPMB), or Health Services and Policy Research (HSRP). Each student selects a program concentration upon application to the Ph.D. degree. To meet the individualized, in-depth training needs of doctoral students, many concentration research methods and/or elective areas have multiple course options that doctoral students may choose from to satisfy their unique learning needs and future career paths. All choices should be made in consultation with the student’s Faculty Advisor, and Faculty Advisor agreement with the course choices is noted on the Faculty Advisor and Doctoral Advisory Committee approved Doctoral Program of Study form (see Section 8060.60 Doctoral Program of Study Form for more information). Students should seek Faculty Advisor consultation well before concentration research methods and/or elective course registration.

3. **Required Ph.D. Professional Seminar Courses (5 hours):**
   - PHPB 9180 or PHPH 9180 Doctoral Research Seminar I (3)
   - PHPB 9181 or PHPH 9181 Doctoral Research Seminar II (2)

4. **Required Comprehensive Ph.D. Examination:**
Students will be expected to pass a doctoral comprehensive exam where the student demonstrates mastery of the program competencies and proficiency in the doctoral program body of knowledge. Students will have two opportunities to pass this exam, which is graded Pass/Fail by at least two faculty members in the School of Public Health. Please see the doctoral student handbook for more details about the doctoral comprehensive exam.

5. **Required Ph.D. Teaching Practicum (3 hours):**

PHPB 9960 or PHPH 9960 Public Health Doctoral Practicum (3)

6. **Required Ph.D. Culminating Experience (9 hours):**

PHPB 9990 or PHPH 9990 Dissertation (9)

The dissertation will provide the student with an educational experience that enables the student to make a significant contribution to the field of public health and to apply the doctoral program knowledge and skills that allow him or her to contribute to the theoretical, conceptual, empirical, or practice base in the field of public health. Enrollment for dissertation credit is permitted only after successful completion of the comprehensive examination. Students must register for a minimum of nine (9) credit hours of PH 9990. Please see the doctoral student handbook for more details about the doctoral dissertation.

**Ph.D. Environmental Health Concentration**

The following Ph.D. Environmental (EVHT) competencies describe the knowledge, skills, and abilities a successful graduate will demonstrate the conclusion of this doctoral program (and the course where the competency is mastered and assessed is noted in parenthesis):

- **Ph.D. EVHT 1:** Effectively communicate the concepts of source to receptor of environmental and occupational hazards and the differentiation of the concepts of exposure from dose. (PHPH 8310)
- **Ph.D. EVHT 2:** Critically analyze alternate routes of entry of toxins into the body including inhalation, ingestion (both dietary and non-dietary) and dermal and the importance of integration of routes with regards to total dose. (PHPH 9270)
- **Ph.D. EVHT 3:** Demonstrate expertise with instrumentation and their underlying constructs employed for the measurement of chemical, physical and biologic hazards in air, water, soil, and dust. (PHPH 9270)
- **Ph.D. EVHT 4:** Understand health effects of chemical, physical and biologic agents and the interrelationship of toxicity and dose in defining levels of risk. (PHPH 8310)
- **Ph.D. EVHT 5:** Critically review, synthesize, and evaluate community and governmental agency conduct of environmental research and interventions and present appropriate implications for public health practice, public policy, and further research. (PHPH 8320)
- **Ph.D. EVHT 6:** Incorporate ethical standards of practice as the basis of interactions with organizations, communities, and individuals. (PHPB 9150)

**Required Ph.D. EVHT Concentration Courses (9 hours)**

- PHPH 9270 Environmental Exposure Analysis (3)
- PHPH 8310 Environmental and Occupational Epidemiology (3)
- PHPH 8320 Human Health and Global Environmental Change (3)
Required Ph.D. EVHT Advanced Research Methods and Statistics Courses (12 hours)

Select at least 4 courses in consultation with the Faculty Advisor.

- PHPB 8260 Spatial Population Health I (3)
- PHPB 8261 Spatial Population Health II (3)
- PHPH 8690 Special Topics in Environmental Health (3)
- PHPH 8830 Advanced Statistical Topics (3)
- PHPH 8840 Statistical Modeling with Latent Variables I: Structural Equation Modeling (3)
- PHPH 8850 Statistical Modeling with Latent Variables II: Finite Mixture Modeling (3)
- PHPH 8860 Multilevel Models in Public Health (3)
- PHPH 8890 Special Topics in Biostatistics (3)
- PHPH 9731 Epidemiologic Methods III (3)
- PHPH 9741 Advanced Topics in Epidemiologic Methods (3)
- PHPH 9890 Doctoral Seminar in Advanced Statistical Modeling (3)
- Other appropriate research methods/statistics courses may be approved by the Faculty Advisor on the Doctoral Program of Study form. There are a number of departments at the university that offer relevant courses including, but not limited to, Mathematics and Statistics, Managerial Sciences (Decision Sciences unit), Economics, Marketing, Sociology, Public Management and Policy Studies, Psychology, and Educational Policy Studies (Research unit). Other courses that may be approved to satisfy this elective requirement include, but are not limited to, Structural Equation Modeling, Finite Mixture Modeling, Hierarchical Linear Modeling, Longitudinal Modeling, Survival Analysis, Bayesian Inference, Survey Sampling, Causal Inference, Missing Data, or Nonparametric Statistics. Students are recommended to receive approval from their Faculty Advisor prior to enrolling in, paying for, and completing the course.

Required Ph.D. EVHT Concentration Elective Courses (6 hours):

Select at least 2 courses in consultation with the Faculty Advisor.

- PHPB 8285 Social Determinants of Health (3)
- PHPH 8330 Environmental Factors in Maternal and Child Health (3)
- PHPH 8340 Genetic Susceptibilities and Environmental Health (3)
- Other appropriate Ph.D. EVHT elective courses may be approved by the Faculty Advisor on the Doctoral Program of Study form. Students are recommended to receive approval from their Faculty Advisor prior to enrolling in, paying for, and completing the course.

Ph.D. Epidemiology Concentration

The following Ph.D. Epidemiology (EPID) competencies describe the knowledge, skills, and abilities a successful graduate will demonstrate the conclusion of this doctoral program (and the course where the competency is mastered and assessed is noted in parenthesis):

- Ph.D. EPID 1: Understand the strengths and weaknesses of various epidemiologic study designs and research methods. (PHPH 9741)
- Ph.D. EPID 2: Demonstrate expertise in the ethical conduct of human subjects research, including confidentiality and vulnerable populations. (PHPB 9150)
- Ph.D. EPID 3: Critically review, synthesize, and evaluate the scientific literature and present appropriate implications for public health practice, public policy, and further research. (PHPH 9731)
- Ph.D. EPID 4: Demonstrate proficiency in epidemiological research by: (1) formulating a research question and/or corresponding hypotheses, (2) developing the study design, (3) participating in data collection, (4) conducting statistical analyses, and (5) interpreting scientific results. (PHPH 9741)
- Ph.D. EPID 5: Demonstrate mastery and independence as a researcher by pursuing and completing a specialized area of epidemiologic research. (PHPH 9741)
- Ph.D. EPID 6: Effectively present and disseminate findings from epidemiologic research to scientific and lay audiences. (PHPH 8830)

**Required Ph.D. EPID Concentration Courses (9 hours)**

- PHPH 9731 Epidemiologic Methods III (3)
- PHPH 9741 Advanced Topics in Epidemiologic Methods (3)
- PHPH 8830 Advanced Statistical Topics (3)

**Required Ph.D. EPID Advanced Research Methods and Statistics Courses (6 hours)**

Select at least 2 courses in consultation with the Faculty Advisor.

- PHPB 8260 Spatial Population Health I (3)
- PHPB 8261 Spatial Population Health II (3)
- PHPH 8840 Statistical Modeling with Latent Variables I: Structural Equation Modeling (3)
- PHPH 8850 Statistical Modeling with Latent Variables II: Finite Mixture Modeling (3)
- PHPH 8860 Multilevel Models in Public Health (3)
- PHPH 8885 Fundamentals of Clinical Trials (3)
- PHPH 8890 Special Topics in Biostatistics (3)
- PHPH 9890 Doctoral Seminar in Advanced Statistical Modeling (3)
- Other appropriate research methods/statistics courses may be approved by the Faculty Advisor on the Doctoral Program of Study form. There are a number of departments at the university that offer relevant courses including, but not limited to, Mathematics and Statistics, Managerial Sciences (Decision Sciences unit), Economics, Marketing, Sociology, Public Management and Policy Studies, Psychology, and Educational Policy Studies (Research unit). Other courses that may be approved to satisfy this elective requirement include, but are not limited to, Structural Equation Modeling, Finite Mixture Modeling, Hierarchical Linear Modeling, Longitudinal Modeling, Survival Analysis, Bayesian Inference, Survey Sampling, Causal Inference, Missing Data, or Nonparametric Statistics. Students are recommended to receive approval from their Faculty Advisor prior to enrolling in, paying for, and completing the course.

**Required Ph.D. EPID Concentration Elective Courses (12 hours):**

Select at least 4 courses in consultation with the Faculty Advisor.

- PHPH 7265 Epidemiology and the Prevention of Violence (3)
- PHPH 7275 Chronic Disease Epidemiology (3)
- PHPH 7280 Infectious Disease Epidemiology (3)
- PHPH 7290 Case Studies in Epidemiology (3)
- PHPH 7365 Epidemiology of Adolescent and Young Adult Risk Behaviors (3)
- PHPB 8285 Social Determinants of Health (3)
- PHPH 8790 Special Topics in Epidemiology (3)
- Other appropriate Ph.D. EPID elective courses may be approved by the Faculty Advisor on the Doctoral Program of Study form. Students are recommended to receive approval from their Faculty Advisor prior to enrolling in, paying for, and completing the course.

### Ph.D. Health Promotion and Behavior Concentration

The following Ph.D. Health Promotion and Behavior (HPMB) competencies describe the knowledge, skills, and abilities a successful graduate will demonstrate the conclusion of this doctoral program (and the course where the competency is mastered and assessed is noted in parenthesis):

- Ph.D. HPMB 1: Develop expertise in social and behavioral theory, and application of theory to address public health problems at the individual, community or population level. (PHPB 9120)
- Ph.D. HPMB 2: Critically analyze research in terms of the appropriateness of the study design, sample, measures, data analysis, results, and interpretation and critically evaluate the potential impact of the new knowledge gained on public health practices and policies. (PHPB 9095)
- Ph.D. HPMB 3: Develop expertise in research methods and the ethical conduct of research to address scientific questions regarding health promotion research and practice. (PHPB 9130)
- Ph.D. HPMB 4: Develop expertise in statistical and analytic methods used in health promotion research and practice. (PHPB 9140)
- Ph.D. HPMB 5: Develop expertise in planning, implementation, evaluation, and dissemination of social and behavior interventions and/or policies that address public health and health behavior, especially around social-ecological interventions and interventions that address health disparities. (PHPB 7535)
- Ph.D. HPMB 6: Develop expertise in the communication of scientific findings, both writing and oral presentations, for both scientific and lay audiences. (PHPB 7535)

### Required Ph.D. HPMB Concentration Courses (9 hours):

- PHPB 7535 Dissemination and Implementation Science (3)
- PHPB 9130 Intervention and Evaluation of Health Promotion and Disease Prevention (3)
- PHPB 9095 Measurement and Outcomes in Social and Behavioral Health (3)

### Required Ph.D. HPMB Advanced Research Methods and Statistics Courses (12 hours):

Select at least 4 courses in consultation with the Faculty Advisor:

- PHPB 8260 Spatial Population Health I (3)
- PHPB 8261 Spatial Population Health II (3)
- PHPH 8830 Advanced Statistical Topics (3)
- PHPH 8840 Statistical Modeling with Latent Variables I: Structural Equation Modeling (3)
- PHPH 8850 Statistical Modeling with Latent Variables II: Finite Mixture Modeling (3)
- PHPH 8860 Multilevel Models in Public Health (3)
- PHPH 8885 Fundamentals of Clinical Trials (3)
• PHPH 8890 Special Topics in Biostatistics (3)
• PHPH 9731 Epidemiologic Methods III (3)
• PHPH 9741 Advanced Topics in Epidemiologic Methods (3)
• PHPH 9890 Doctoral Seminar in Advanced Statistical Modeling (3)
• Other appropriate research methods/statistics courses may be approved by the Faculty Advisor on the Doctoral Program of Study form. There are a number of departments at the university that offer relevant courses including, but not limited to, Mathematics and Statistics, Managerial Sciences (Decision Sciences unit), Economics, Marketing, Sociology, Public Management and Policy Studies, Psychology, and Educational Policy Studies (Research unit). Other courses that may be approved to satisfy this elective requirement include, but are not limited to, Structural Equation Modeling, Finite Mixture Modeling, Hierarchical Linear Modeling, Longitudinal Modeling, Survival Analysis, Bayesian Inference, Survey Sampling, Causal Inference, Missing Data, or Nonparametric Statistics. Students are recommended to receive approval from their Faculty Advisor prior to enrolling in, paying for, and completing the course.

Ph.D. HPMB Concentration Electives courses (6 hours)

Select at least 2 courses in public health or other graduate-level programs in consultation with the Faculty Advisor and approved by the Faculty Advisor on the Doctoral Program of Study form. Students are recommended to receive approval from their Faculty Advisor prior to enrolling in, paying for, and completing the course.

Ph.D. Health Services and Policy Research Concentration

The following Ph.D. Health Services and Policy Research (HSRP) competencies describe the knowledge, skills, and abilities a successful graduate will demonstrate the conclusion of this doctoral program (and the course where the competency is mastered and assessed is noted in parenthesis):

• Ph.D. HSRP 1: Apply social science (economics, political science, sociology, etc.) concepts, theories and methods to the framing and analysis of research questions in health services delivery and health care policy. (PHPB 9240)
• Ph.D. HSRP 2: Describe major problems in health services delivery and health care policy that are currently the subject of empirical investigations. (PHPB 9220)
• Ph.D. HSRP 3: Apply advanced methods of analysis and research design to describe policy-relevant issues in contemporary health care, such as: access to health care, health care financing, insurance market functioning, physician and hospital performance, healthcare management and organization, patient safety and quality of care, and health care workforce. (PHPB 9240)
• Ph.D. HSRP 4: Effectively teach concepts and methods of health services and health policy research to students. (PHPB 9240)
• Ph.D. HSRP 5: Design a health services or health policy research proposal involving qualitative, quantitative, or mixed methods approaches. (PHPB 9220)
• Ph.D. HSRP 6: Conduct a health services or health policy research activity investigation suitable for peer-reviewed publication as an independent researcher. (PHPB 8250)
• Ph.D. HSRP 7: Function as a collaborative team member in the design and conduct of a health services or health policy investigation. (PHPB 8250)

Required Ph.D. HSRP Concentration Courses (9 hours):
- PHPB 9220 Principles of Health Service Research I: Themes (3)
- PHPB 9240 Principles of Health Service Research II: Methods (3)
- PHPB 8250 Health Economics and Policy (3)

**Ph.D. HSRP Concentration Advanced Research Methods, Statistics and Electives Courses (18 hours)**

Select at least 6 pre-approved courses in consultation with the Faculty Advisor.

- PHPB 8260 Spatial Population Health I (3)
- PHPB 8261 Spatial Population Health II (3)
- PHPB 8285 Social Determinants of Health (3)
- PHPB 8290 Population Health Informatics (3)
- PHPH 8830 Advanced Statistical Topics (3)
- PHPH 8840 Statistical Modeling with Latent Variables I: Structural Equation Modeling (3)
- PHPH 8850 Statistical Modeling with Latent Variables II: Finite Mixture Modeling (3)
- PHPH 8860 Multilevel Models in Public Health (3)
- PHPH 8885 Fundamentals of Clinical Trials (3)
- PHPH 8890 Special Topics in Biostatistics (3)
- PHPH 9890 Doctoral Seminar in Advanced Statistical Modeling (3)
- ECON 8220 Human Resources and Labor Markets (3)
- PMAP 8141 Microeconomics for Public Policy (3)
- PMAP 9211 Applying Research to Policymaking: Examples from Health Care Policy (3)
- SOCI 8118 Aging, Health, and Disability (3)
- SOCI 8234 Race-Ethnicity and Health (3)

Other appropriate Ph.D. HSRP research methods/statistics and elective courses may be approved by the Faculty Advisor on the Doctoral Program of Study form. There are a number of departments at the university that offer relevant courses including, but not limited to, Mathematics and Statistics, Managerial Sciences (Decision Sciences unit), Economics, Marketing, Sociology, Public Management and Policy Studies, Psychology, and Educational Policy Studies (Research unit). Other courses that may be approved to satisfy this elective requirement include, but are not limited to, Structural Equation Modeling, Finite Mixture Modeling, Hierarchical Linear Modeling, Longitudinal Modeling, Survival Analysis, Bayesian Inference, Survey Sampling, Causal Inference, Missing Data, or Nonparametric Statistics. Students are recommended to receive approval from their Faculty Advisor prior to enrolling in, paying for, and completing the course.

**8060.20 Faculty Advisor and Ph.D. Advisory Committee Requirements**

Upon admission to the Ph.D. degree in Public Health programs, a student is assigned a Faculty Advisor from the SPH faculty. The Faculty Advisor serves as the primary advisor, and mentors the student throughout the program and assists the student in choosing courses, signing off on official documents, and chairing the student’s doctoral advisory committee (and dissertation).

**Annual Review of Ph.D. Students**

Ph.D. students will be given feedback from their Faculty Advisor on an annual basis. Students are required
1. Set up an appointment with the Faculty Advisor by June 1st each year.
2. One week prior to the scheduled appointment students must submit:
   - summary of the courses and grades taken since beginning the program,
   - a summary of professional scholarship in the last year,
   - a course paper/assignment or another product that demonstrates scientific writing skills, and proficiency with statistics.
   - a self-assessment of mastery of the doctoral competencies to date.

Faculty Advisors will use this portfolio to evaluate student progress in several areas: coursework progress and demonstrated mastery of doctoral competencies, professional scholarship, scientific writing including dissertation writing, statistical proficiency, and overall professionalism. Ph.D. milestones and goals for the next academic year should also be discussed.

If progress is unsatisfactory, the student will plan a course of action with their advisor and the Ph.D. Program Director to improve his/her progress. If the student demonstrates unsatisfactory progress on the plan, or during more than one annual review, the student may be scholastically excluded from the doctoral program.

8060.30 Continuous Enrollment Policy and Degree Completion for PhD

Students in all graduate programs, including doctoral programs, must maintain enrollment totaling six hours (or more) over three consecutive semesters, including summers. In other words, the total enrollment of the current term plus the two terms preceding it must add up to six hours or more. The status of all students will be checked by the midpoint of each term for compliance with the continuous enrollment requirement. Any student whose enrollment is noncompliant will receive a hold on their registration, which would prevent registering for all current and future classes. Those students will be notified by an e-mail message sent to their official Georgia State University e-mail account. To resume their programs, students with continuous holds on their enrollment must file for re-entry by the published deadline and must enroll at a level sufficient to satisfy the continuous enrollment criterion. That is, their enrollment in the re-entry term plus the two terms preceding it must total six hours or more. The maximum required enrollment level for the re-entry term is six hours. For more information on the re-entry process, contact the Office of Academic Assistance and Career Services.

8060.40 Grade Point Average and Course Grade Requirements for PhD Students

PhD students must maintain a 3.2 or better overall institutional grade point average (GPA) to progress from one semester to the next, and must receive a grade of “B” (3.0) or better for each School of Public Health based course (courses with prefix “PH” in front of the course number). Any PhD student earning a grade of B- or below must repeat the public health course or not count the course towards their PhD program of study. PhD students whose cumulative GPA falls below 3.2 at the end of a semester will receive a scholastic warning from the School. If at the end of the following six semester hours of enrollment, the student has not achieved a 3.2 cumulative GPA, the student will be scholastically excluded from the doctoral program. Any student who is scholastically excluded from the program may apply for readmission after a period of one year. Time Limitations for PhD Students (see section 8060.50) will still
Residency Requirements and Time Limitations for PhD Students

The purpose of requiring completion of all degree requirements within a fixed period is to ensure currency, continuity, and coherence in the academic experiences leading to the degree. Within nine (9) years of the student’s term of first matriculation, it is required that the student complete all degree requirements. Moreover, all requirements for doctoral candidacy (coursework, comprehensive examination, prospectus approval) must be completed within seven years (7) of the student’s first term of matriculation. No coursework completed more than seven years before admission to candidacy may be used to meet any doctoral degree requirement. Enrollment for a minimum of three semester hours of credit is required during at least two out of each three-term period following successful completion of the comprehensive examination until graduation. This enrollment must include a minimum of nine semester hours of dissertation (PH 9990) credit but may also include other coursework. The student must be enrolled in and successfully complete three semester hours of graduate credit (typically dissertation hours) during the final academic term in which all degree requirements are completed and the student graduates. Additional information about time limits and expected doctoral program completion milestones may be distributed by the Doctoral Program Coordinator, Department Chairs, or a designated faculty member to doctoral students in the School of Public Health Doctoral Student Handbooks. Doctoral students will be subject to all the doctoral program completion milestone requirements, details and policies distributed in the School of Public Health Doctoral Student Handbooks. Failure to meet any of these doctoral program completion milestones may result in scholastic dismissal from the doctoral program.

Doctoral Program of Study Form for PhD

The Doctoral Program of Study form must be submitted to OAA following successful completion of the comprehensive exam. The Program of Study must be approved by the Faculty Advisor (who will serve as the dissertation chair), and the Doctoral Program Director in order for the student to be successfully admitted to candidacy. OAA will use this form for degree-audit and final approval of the student’s academic evaluation before placing in the student’s file. The Doctoral Program of Study form must show all courses relevant to the doctoral program (including master-level prerequisite courses and any courses approved from other universities), in addition to Georgia State University courses satisfying the minimum doctoral degree requirements.

Transfer credits from another institution: A student may apply a maximum of nine (9) semester hours of approved course credit transferred from another sufficiently accredited institution toward fulfilling Ph.D. degree requirements. Transfer credits are processed by the School and must be approved by petition. Students requesting to petition for transfer of credits must work with the MPH Curriculum and Advisement Coordinator in the Office of Academic Assistance. Approval is at the discretion of the PhD Program Coordinator—approval is not guaranteed. The PhD Program Director may defer to the Department Chair in which the petitioned course is offered. All credits, including transfer credits, presented for the PhD degree must have been earned within nine calendar years of the date of degree conferral from a program or school accredited by CEPH at the time of completion. No previously taken course with a grade of “B-” or below may be transferred into the doctoral program. Courses transferred-in for the doctoral degree may not be used in fulfilling the PhD Public Health Core Courses requirements or the doctoral credit-hour residency requirement. OAA will update the student’s electronic PAWS program.
of study form at that time. With the exception of university-approved dual degree programs, if the course to be transferred in was used to satisfy another degree program either at Georgia State University or elsewhere, the PhD Program Director or department chair reserves the right to require the student to complete a different graduate-level course prescribed by the department chair. That course will be substituted into the student's PhD program, so that the student completes the sixty-two (62) unique total credit hours for their PhD degree.

**Credits earned at Georgia State University in either transient, non-degree, or other-Georgia State University-degree status:** A student may apply a maximum of nine (9) semester hours of applicable Georgia State University course credit earned prior to PhD program admission (while taking public health courses as either transient, non-degree, or other-Georgia State University-degree or program status) toward fulfilling PhD degree requirements. Credits are processed by the School—petition is not required, but students should confirm their previously completed Georgia State University courses are applicable. Students may work with the PhD Program Director and the MPH Curriculum and Advisement Coordinator in the Office of Academic Assistance to confirm applicability. Approval is at the discretion of the PhD Program Coordinator—approval is not guaranteed. The PhD Program Director may defer to the Department Chair in which the course is offered. All Georgia State University credits presented for the PhD degree must have been earned within nine calendar years of the date of public health doctoral degree conferral. Courses taken at Georgia State University that were applied to another Georgia State University graduate certificate degree or degree program may not be applied to the PhD degree; instead, a student should seek a doctoral course waiver for these courses already applied to another Georgia State University degree program.

**Doctoral Course Waivers:** Doctoral students may receive a course waiver for any doctoral course already completed as part of another Georgia State University graduate certificate or degree program (including the MPH degree program), or if the course content was already learned at another institution or training area, but was not eligible for transfer credit. Students are still expected to take the minimum number of credit hours expected for the Ph.D. degree at Georgia State University (sixty-two (62) credit hours), but when granted a course waiver, the student may complete a different graduate level course, substituted into their doctoral program in order to complete the total sixty-two (62) credit hour requirement of their doctoral degree.

No previously taken course with a grade of “B-” or below may be used for course waiver. Courses waived for the doctoral degree may not be used in fulfilling the PhD Public Health Core Course requirements or the doctoral credit-hour residency requirement.

Students hoping to waive a course and substitute it with another should provide a **Petition for Waiver** noting each doctoral course they hope to waive, and which course they would like to substitute in its place. The Petition for Waiver is a written statement, along with any evidentiary documentation, that assures the School that the doctoral student has mastered the course material in the course to be waived through another manner (i.e. MPH degree, another Georgia State University degree, etc.).

This Petition must be approved by the student’s Faculty Advisor and the PhD Program Director. The PhD Program Director may defer to the Department Chair in which the petitioned course is typically offered.

Upon approval by the student’s Faculty Advisor and the PhD Program Director (or Department Chair), the Petition is then forwarded to the Office of Academic Assistance and Career Services (OAA) for their
approval. OAA may request the input of the Senior Associate Dean for Academic and Strategic Initiatives and/or the Academic Affairs Committee Chair and/or members, but that is not required. Once the Director of OAA notes OAA’s approval, the student’s file and program of study is updated to note a waiver of the required course(s) and the substitution of another course taking its place. (MPH-Level Core Course prerequisite requirements for the doctoral program are exempt from this rule, since these prerequisite course do not count toward the sixty-two (62) credit hour minimum requirement for PhD programs).

8060.70 Doctoral Comprehensive Examination for PhD

Doctoral students must pass a comprehensive examination before being admitted to candidacy. The purpose of the comprehensive examination is to assess each student’s mastery of the doctoral program core curriculum and to determine the student’s readiness to proceed to the dissertation. To be eligible to take the comprehensive examination, the student must have completed all doctoral program prerequisites (MPH Core/Foundational Courses), all Ph.D. core courses (18 credit hours), and achieved a B (3.0) or better in all courses and 3.2 or greater cumulative grade-point average in the Ph.D. program of study. Any doctoral student earning a grade of B- or below must repeat the public health course or not count the course towards their doctoral program of study. Once approved to take the exam, the Ph.D. Director will provide a study guide for the exam.

Examination content and structure varies between concentrations, between students, and from year-to-year to ensure relevance to the student’s training and integrity in the testing procedure. Information about the comprehensive exam structure and requirements, evaluation and scoring, and the polices governing the testing procedures are in the PhD Handbook and distributed by the PhD Program Director or designated SPH faculty member to comprehensive exam eligible students immediately prior to their comprehensive examination date. Ph.D. students are subject to the comprehensive exam requirements and policies distributed at that time.

8060.80 Admission to Candidacy for PhD

Admission to candidacy for a PhD student is requested immediately after the successful completion of the comprehensive examination. The following is a complete list of requirements for admission to candidacy:

1. All prerequisites set as a condition to admission to candidacy have been satisfactorily completed.
2. The Doctoral Advisory Committee, the PhD Program Director, and OAA have approved the final program of study.
3. A GPA of 3.2 has been maintained for all graduate courses taken and for all completed courses on the program of study. A grade of “B” (3.0) or better for each School of Public Health based course (courses with prefix “PH” in front of the course number) must be earned, and no course with a grade below B- may be placed on the final program of study.
4. Written and oral comprehensive examinations have been passed and reported to the School.
5. The Doctoral Advisory Committee, including any necessary changes in the membership, is confirmed and all its members have been notified of their appointment.
6. The residency requirement has been met.

Application for Admission to Candidacy for PhD
This form must be submitted to OAA as soon as possible following the completion of the Admission to Candidacy requirements. Candidacy begins on the date the form is received by the School. After admission to candidacy, a student must register for at least nine (9) hours of dissertation credit during the completion of the degree program. Students planning to graduate the same semester they enter candidacy must be admitted by the published deadline for candidacy during that semester and register for nine (9) hours of dissertation credit. The student must also meet all other deadlines for graduation in that semester. A student must register for a minimum of three (3) dissertation credit hours in any semester when using University facilities, and/or faculty or staff time. The School shall not accept a dissertation if the student has not been admitted to candidacy for the degree.

Time Limit on Candidacy

All doctoral program degree requirements must be successfully completed within nine (9) years of a student’s first term of matriculation. The dissertation must be completed within four (4) years following admission to candidacy to qualify for graduation. If a doctoral student’s candidacy expires after the first week of classes in the final semester, the student is granted the remainder of the semester to complete degree requirements without special permission of the School. Additional information about time limits and expected dissertation completion milestones may be distributed by the Doctoral Program Coordinator, Department Chairs, or a designated faculty member to candidacy eligible students immediately prior to their admission to candidacy. Doctoral students will be subject to all the dissertation completion milestone requirements, policies and procedures distributed at that time. Failure to meet any of these dissertation completion milestones may result in scholastic dismissal from the doctoral program.

8060.90 Dissertation for PhD

Enrollment for dissertation credit (PHPB/PHPH 9990) is permitted only after successful completion of the comprehensive examination.

Doctoral Advisory Committee

It is most important that the persons who serve on the Doctoral Advisory Committee (occasionally referred to as the Doctoral Dissertation Committee), at the time the dissertation research is undertaken, be those faculty members most knowledgeable in the areas of the student’s research. Within the guidelines for committee membership, they should be selected regardless of their concentration affiliation. The Doctoral Advisory Committee consists of a minimum of three members: Two members must be within the School of Public Health and hold graduate faculty status. The third member may be from the School of Public Health or outside the School/Georgia State University, but he/she must have a Ph.D., MD, or other terminal degree and must have expertise in the content area or methodology used in the proposal that can be demonstrated upon review of a curriculum vita by the Doctoral Program Director or student’s Faculty Advisor.

Dissertation Planning

Students pursuing a Ph.D. must complete a dissertation on a subject connected with their major field of study/concentration. The dissertation must present original research, independent thinking, scholarly ability, and technical mastery of a field of study. Its conclusions must be logical, its literary form must be acceptable, and its contribution to the field of public health should merit publication.
The dissertation must provide the student with an educational experience that enables the student to make a significant contribution to the field of public health and to apply the doctoral program knowledge and skills that allow him or her to contribute to the theoretical, conceptual, empirical, or practice base in the field of public health. At a minimum, the dissertation should contribute to at least one of these knowledge bases, as related to the student’s concentration. These activities must take place under the direction of the student’s dissertation committee. The study must include all of the following:

- Identifying an appropriate theory to inform the study.
- Conceptualizing the research questions and hypotheses.
- Developing the research design.
- Applying the appropriate methodology.
- Interpreting the study results.

Note: These guidelines do allow for secondary data analysis.

The School of Public Health accepts either the traditional dissertation form or the European (manuscript) dissertation format. The European (manuscript) dissertation format contains a first chapter that consists of a thorough synthetic review of the literature for the content area of the student dissertation. The next chapters consist of copies of three (a) published papers, (b) manuscripts in press, (c) manuscripts submitted. Because the manuscripts may have been published, submitted, or targeted for different journals with different journal styles, the chapters may not all be formatted in the same style. As is found in published papers, each chapter would have an Introduction, Methods, Results, and Discussion section, unless one paper is a review paper, which may be approved as an option by the Doctoral Advisory Committee (dissertation committee). The final chapter should include a global perspective summary that ties together the findings in the three papers and concludes with the future directions for the student’s line of research. This final chapter is not a recapitulation of the middle chapters. This chapter offers the author the unique opportunity to speculate without the fetters that constrain typical research papers.

The School of Public Health requires that the student submitting the dissertation must be listed as the first author of each article used as a chapter. One first-author manuscript that is submitted prior to the dissertation proposal meeting (no more than 1 year in advance) and is linked to the overall theme of the dissertation can be included as one of the three chapters upon approval of the major advisor. The inclusion of any articles that are previously published or accepted for publication requires permission from the copyright holder. Articles not yet copyrighted by another party will be covered under the copyright of the dissertation.

Student dissertation progress will be reviewed as part of the annual evaluation procedures, beginning in the student’s third year of the doctoral program. If a student is not making expected progress on the dissertation, this will be noted on the faculty rated student annual evaluation form as not meeting expectations. Failure to make adequate progress on the dissertation in two consecutive annual evaluations will result in scholastic dismissal from the doctoral program.

**Dissertation Proposal/Prospectus and Meeting**

Prior to beginning the dissertation, the student must present a dissertation proposal (prospectus) to his/her Faculty Advisor. When the Faculty Advisor certifies that the written proposal for the dissertation is satisfactory, the student should schedule a meeting with the Doctoral Advisory committee to present the
proposal (prospectus meeting and defense) and receive approval from the committee before moving forward with dissertation development. Specifically:

1. The student will provide a complete copy of the proposal (printed hard-copy and electronic) to all members of the Doctoral Advisory committee at least two weeks before the prospectus meeting. The proposal must be formatted according to the APA Manual of Style (latest edition).

2. The proposal will include all elements of either the Traditional proposal or European (manuscript) Proposal (Note: Deviations from the chapter approach may be approved by the student’s Faculty Advisor and Doctoral Program Director):

   **Traditional Proposal**
   
   Chapter 1: Introduction and Statement of Purpose  
   Chapter 2: Review of the Literature  
   Chapter 3: Methods  
   Reference Section  
   Appendices Section

   **European (manuscript) proposal must include:**
   
   Chapter 1: Introduction and Statement of purpose  
   Chapter 2: Description and Outline of three studies that will be developed and submitted during the dissertation process. NOTE: if one study has already been developed and submitted, please include a copy of that study and describe how the next two studies will build on this work  
   Reference Section  
   Appendices Section

3. Approval of the proposal signifies that members of the Doctoral Advisory Committee believe that the student has proposed a satisfactory dissertation plan. Approval of the proposal requires the agreement of all members of the Doctoral Advisory Committee except one, as endorsed by their signatures on the appropriate form that, together with this approved prospectus, is filed with the MPH Curriculum and Advisement Coordinator in the Office of Academic Assistance and Career Services (OAA).

4. Before starting the data collection for the dissertation, the student must request approval from the Georgia State University Institutional Review Board (IRB) if human subjects are involved in the research project.

The Faculty Advisor has the primary responsibility for guiding research, but the student should consult all members of the Doctoral Advisory Committee to draw upon their expertise in relevant areas.

Note: Each concentration may have specific, additional requirements for the student during the dissertation process, including at the time of the dissertation proposal/prospectus meeting. This may include a Ph.D. core and concentration exam, such as faculty posing questions to the student at the dissertation proposal meeting that extend beyond the dissertation proposal itself and include assessing the students’ knowledge and skills related to Ph.D. core and concentration competencies, based on student Ph.D. core and concentration coursework and learning experiences. Please meet with your Faculty Advisor and/or Department Chair to discuss the specific expectations for your concentration’s proposal meeting, as well as the full dissertation process. This is simply to ensure that faculty are able to assess student mastery on all introductory public health learning objectives and concentration competencies, regardless of dissertation topic.
Dissertation Approval and Defense

When the Faculty Advisor is satisfied with the completed dissertation, the Faculty Advisor will certify that it has approval and is ready to be read by the other members of the Doctoral Advisory Committee. The Faculty Advisor will then distribute copies of the dissertation to the other members of the Doctoral Advisory Committee and will schedule a final oral defense and notify the SPH.

Subsequently, the SPH will announce the time and place of the defense of the dissertation to the University community. The committee members will have three weeks to read and evaluate the completed dissertation. Written assent of all committee members except one is required before a dissertation is approved as ready for a final defense. If the Doctoral Advisory Committee declines to approve the dissertation as ready for the final defense, the Faculty Advisor will notify the student and the School in writing and the defense date will be cancelled.

The Faculty Advisor will chair the dissertation defense. All members of the Doctoral Advisory Committee, except one, must approve the dissertation and the defense, and must certify their approval in writing. The SPH will only recommend the award of a doctoral degree when the student has demonstrated mastery of necessary theories, concepts and content, and demonstrated competence in the knowledge and skills defined in the competencies for the student’s chosen doctoral program concentration. The results of the defense of the dissertation must be reported to the School of Public Health at least two weeks prior to graduation—students should consult the MPH Curriculum and Advisement Coordinator for the absolute deadline in a given semester. The date (year) on the title page of the dissertation shall be the same as the date (year) on which the dissertation is approved by the School, following approval by the Doctoral Advisory Committee. The final dissertation document must conform to all format and content requirements specified by the School of Public Health.

8070 Doctor of Public Health

Harry J. Heiman
Professor and DrPH Program Director

Approved by the University System of Georgia Board of Regents in April 2018, the Doctor of Public Health (DrPH) degree in the School of Public Health is a doctoral degree designed to prepare public health professionals for positions in leadership, applied research, and other practice-based roles.

8070.10 DrPH Degree Requirements

The DrPH degree requires completion of a minimum of fifty-four (54) credit hours of coursework, including an applied practice experience and integrative learning experience or dissertation. The candidates must satisfy the course requirements and credit hours in the following areas:

Required Prerequisites – MPH Core Courses (3 – 13 hours):

All DrPH graduates are grounded in the following foundational public health knowledge learning objectives (and the course where the learning objective is assessed is noted in parenthesis):
1. **Profession & Science of Public Health**
   1. Explain public health history, philosophy and values. (PHPH 7010)
   2. Identify the core functions of public health and the 10 Essential Services. (PHPH 7010)
   3. Explain the role of quantitative and qualitative methods and sciences in describing and assessing a population’s health. (PHPH 7010)
   4. List major causes and trends of morbidity and mortality in the US or other community relevant to the school or program. (PHPH 7010)
   5. Discuss the science of primary, secondary and tertiary prevention in population health, including health promotion, screening, etc. (PHPH 7010)
   6. Explain the critical importance of evidence in advancing public health knowledge. (PHPH 7010)

2. **Factors Related to Human Health**
   7. Explain effects of environmental factors on a population’s health. (PHPH 7010)
   8. Explain biological and genetic factors that affect a population’s health. (PHPH 7010)
   9. Explain behavioral and psychological factors that affect a population’s health. (PHPH 7010)
  10. Explain the social, political and economic determinants of health and how they contribute to population health and health inequities. (PHPH 7010)
  11. Explain how globalization affects global burdens of disease. (PHPH 7010)
  12. Explain an ecological perspective on the connections among human health, animal health and ecosystem health (eg, One Health). (PHPH 7010)

For students admitted to the DrPH program who have not completed comparable courses as part of a CEPH-accredited MPH degree, the following courses will be required as prerequisite to the DrPH program:

- PHPH 7010 Foundations of Public Health (This course may be waived with a CEPH-accredited Bachelor’s degree)
- PHPH 7011 Epidemiology for Public Health or PHPH 7711 Epidemiologic Methods I (DrPH students are encouraged to complete PHPH 7711 if they have not already completed [PH 7011])
- PHPH 7150 Environmental Health

Two additional courses may be required upon review of the student’s completed graduate coursework and/or professional experience by the Admissions Committee, Program Director and/or Faculty Advisor.

- PHPH 7017 Fundamentals of Biostatistics I
- PHPB 7140 Health Promotion Planning, Administration, and Evaluation
- PHPB 7160 Fundamentals of Health Systems, Leadership, and Policy

Doctoral students may waive these MPH Core Courses if they:

- enter the DrPH program with a CEPH accredited MPH degree that included “B” (3.0) grades or better in their MPH courses related to the MPH Foundational Public Health Knowledge learning objectives and MPH Foundational Competencies, as documented by an official university transcript. Syllabi for courses may also be requested.
- and/or have successfully completed a comparable course(s) with a grade of “B” or better, as documented by an official university transcript. Syllabi for courses may be requested. Note: [PH 7010] Foundations of Public Health cannot be waived by employment or other training(s). PHPH 7010 Foundations of Public Health is only waived after the School verifies a students’ previous
completion of a CEPH-accredited bachelor’s degree in public health or MPH degree.

DrPH students who have not completed a CEPH-accredited MPH program must provide a Petition for Waiver form for each of the courses being requested for waiver. The Petition for Waiver is a written statement, along with any evidentiary documentation, that assures the School that the doctoral student has mastered one (or more) of the areas of core knowledge in public health through another manner (e.g. MPH degree, career experience, advanced or seminar coursework that included mastery of core knowledge in public health, etc.). This Petition must be approved by the DrPH Program Director.

Upon approval by the DrPH Program Director, the Petition is then forwarded to the Office of Academic Assistance and Career Services (OAA) for review and approval. OAA may request the input of the Assistant Dean for Academic Programs, the Senior Associate Dean for Academic and Strategic Initiatives, and/or the Academic Affairs Committee. Upon approval by OAA, the student’s file and program of study is updated to note satisfaction of the required doctoral program prerequisite(s). Doctoral students are responsible for ensuring their program of study is updated to note satisfaction of the required doctoral program prerequisite courses.

All DrPH graduates demonstrate the following DrPH foundational and concentration competencies (and the course where the competency is assessed is noted in parenthesis):

Data & Analysis

- DrPH 1. Explain qualitative, quantitative, mixed methods and policy analysis research and evaluation methods to address health issues at multiple (individual, group, organization, community and population) levels. (PHPB 9140)
- DrPH 2. Design a qualitative, quantitative, mixed methods, policy analysis or evaluation project to address a public health issue. (PHPB 9140)
- DrPH 3. Explain the use and limitations of surveillance systems and national surveys in assessing, monitoring and evaluating policies and programs and to address a population’s health. (PHPB 9140)

Leadership, Management & Governance

- DrPH 4. Propose strategies for health improvement and elimination of health inequities by organizing stakeholders, including researchers, practitioners, community leaders and other partners. (PHPB 9300)
- DrPH 5. Communicate public health science to diverse stakeholders, including individuals at all levels of health literacy, for purposes of influencing behavior and policies. (PHPB 9005)
- DrPH 6. Integrate knowledge, approaches, methods, values and potential contributions from multiple professions and systems in addressing public health problems. (PHPB 9010)
- DrPH 7. Create a strategic plan. (PHPB 9300)
- DrPH 8. Facilitate shared decision making through negotiation and consensus-building methods. (PHPB 9300)
- DrPH 9. Create organizational change strategies. (PHPB 9300)
- DrPH 10. Propose strategies to promote inclusion and equity within public health programs, policies and systems. (PHPB 9010)
- DrPH 11. Assess one’s own strengths and weaknesses in leadership capacities, including cultural proficiency. (PHPB 9300)
• DrPH 12. Propose human, fiscal and other resources to achieve a strategic goal. (PHPB 9310)
• DrPH 13. Cultivate new resources and revenue streams to achieve a strategic goal. (PHPB 9310)

**Policy & Programs**

• DrPH 14. Design a system-level intervention to address a public health issue. (PHPB 9130)
• DrPH 15. Integrate knowledge of cultural values and practices in the design of public health policies and programs. (PHPB 9130)
• DrPH 16. Integrate scientific information, legal and regulatory approaches, ethical frameworks and varied stakeholder interests in policy development and analysis. (PHPB 9005)
• DrPH 17. Propose interprofessional team approaches to improving public health. (PHPB 9310)

**Education & Workforce Development**

• DrPH 18. Assess an audience’s knowledge and learning needs. (PHPB 9320)
• DrPH 19. Deliver training or educational experiences that promote learning in academic, organizational or community settings. (PHPB 9320)
• DrPH 20. Use best practice modalities in pedagogical practices. (PHPB 9320)

**Georgia State University-Authored DrPH Competencies**

• DrPH 21. Critically review, synthesize, and evaluate the scientific literature and present appropriate implications for public health practice, public policy, and further research. (PHPH 8721)
• DrPH 22. Establish culturally appropriate goals, policies, and communication strategies — recognizing that cultural differences affect all aspects of health and health systems — and infuse them throughout public health planning, operations, and interventions. (PHPB 9010)
• DrPH 23. Develop expertise in research methods and the ethical conduct of research to address scientific questions regarding health promotion research and practice. (PHPB 9150)
• DrPH 24. Demonstrate proficiency in epidemiological research by: (1) formulating a research question and/or corresponding hypotheses, (2) developing the study design, (3) participating in data collection, (4) conducting statistical analyses, and (5) interpreting scientific results. (PHPH 8271)
• DrPH 25. Understand health effects of chemical, physical and biologic agents and the interrelationship of toxicity and dose in defining levels of risk. (PHPH 8310)

**Doctoral Degree Requirements (54 hours):**

• Required DrPH Foundational Core and Major Curriculum Courses (33 hours):

The following courses constitute the Public Health DrPH Degree Core:

• PHPH 8310 Environmental and Occupational Epidemiology (3)
• PHPH 8721 Epidemiologic Methods II (3)
• PHPB 9005 Doctoral Seminar: Public Health Policy, Analysis and Advocacy for Leaders (3)
• PHPB 9010 Doctoral Seminar: Urban Health, Diversity and Cultural Competency (3)
• PHPH 9017 Applied Statistical Methods in Public Health (3)
• PHPB 9130 Intervention and Evaluation of Health Promotion and Disease Prevention (3)
• PHPB 9140 Advanced Research Methods (3)
- PHPB 9150 Public Health Ethics (3)
- PHPB 9300 Public Health Leadership and Practice (3)
- PHPB 9310 Public Health Management and Finance (3)
- PHPB 9320 Public Health Education & Workforce Development (3)
- DrPH Applied Practice Experience (3 hours):
  - PHPB 9970: DrPH Applied Practice Experience (3)

- DrPH Approved Electives (9 hours):
  Select at least 3 courses from pre-approved list below:

  - PHPH 7265 Epidemiology & the Prevention of Violence (3)
  - PHPH 7275 Chronic Disease Epidemiology (3)
  - PHPH 7280 Infectious Disease Epidemiology (3)
  - PHPH 7290 Case Studies in Epidemiology (3)
  - PHPH 7365 Epidemiology of Adolescent and Young Adult Health Risk Behaviors (3)
  - PHPB 7535 Dissemination and Implementation Science (3)
  - PHPB 8250 Health Economics and Policy (3)
  - PHPB 8260 Spatial Population Health I (3)
  - PHPB 8261 Spatial Population Health II (3)
  - PHPB 8285 Social Determinants of Health (3)
  - PHPB 8290 Population Health Informatics (3)
  - PHPH 8320 Human Health and Global Environmental Change (3)
  - PHPH 8330 Environmental Factors in Maternal and Child Health (3)
  - PHPH 8340 Genetic Susceptibilities and Environmental Health (3)
  - PHPB 8410 Economic Evaluation (3)
  - PHPH 8690 Special Topics in Environmental Health (3)
  - PHPH 8790 Special Topics in Epidemiology (3)
  - PHPH 8830 Advanced Statistical Topics (3)
  - PHPH 8885 Fundamentals of Clinical Trials (3)
  - PHPH 8890 Special Topics in Biostatistics (3)
  - PHPB 9095 Measurement and Outcomes in Social and Behavioral Health (3)
  - PHPB 9120 Theory and Practice in Health and Prevention (3)
  - PHPB 9220 Principles of Health Service Research I: Thematic Background (3)
  - PHPB 9240 Principles of Health Service Research II: Basic Methods (3)
  - PHPH 9270 Environmental Exposure Analysis (3)
  - PHPH 9731 Epidemiologic Methods III (3)
  - PHPH 9741 Advanced Topics in Epidemiologic Methods (3)
  - PHPH 9810 Biostatistical Methods I (3)
  - PHPH 9820 Biostatistical Methods II (3)

Other appropriate DrPH elective courses may be approved by the Faculty Advisor or DrPH Program Director through the Petition for Waiver form found in the SPH Office of Academic Assistance and Career Services.

**Required DrPH Comprehensive Examination:**
Upon completion of the core DrPH curriculum, students will be required to pass a doctoral comprehensive exam where they demonstrate mastery of the DrPH foundational competencies and the ability to perform
high-level applied public health problem solving. Successful completion of the exam is required before moving forward with the integrated learning experience/dissertation. Additional information is provided in the DrPH Student Handbook. Please see the DrPH student handbook for more details about the doctoral comprehensive exam.

- Required DrPH Culminating Experience (9 hours):
  - PHPB 9980 DrPH Integrated Learning Experience/Dissertation (3)

8070.20 Faculty Advisor

As soon as possible after beginning the DrPH Program, students should schedule a meeting with the DrPH Program Director to receive guidance on selecting a Faculty Advisor from the SPH faculty as well as other potential mentors in and outside of GSU. The Faculty Advisor serves as the primary advisor, mentoring the student throughout the program and assisting the student in choosing courses, signing off on official documents, and with overall program and institutional navigation. In the majority of cases, the Faculty Advisor remains unchanged during the student’s entire doctoral program; however, changes in the Faculty Advisor are occasionally necessary and are accommodated on an individual basis by the DrPH Program Director. Usually the Faculty Advisor serves as the chair of the dissertation committee, but students may choose a different faculty member as dissertation chair, based on their subject matter expertise, when appropriate. More information may be found in the DrPH Student Handbook.

Annual Review of DrPH Students

DrPH students will meet with their Faculty Advisor for an annual evaluation, each year they are enrolled in the DrPH program. Faculty Advisors will use this evaluation to assess student progress in several areas: coursework progress and demonstrated mastery of doctoral competencies, professional scholarship, scientific writing, and overall professionalism. DrPH milestones and goals for the next academic year should also be discussed. More information about the annual evaluation process may be found in the DrPH Student Handbook.

8070.30 Continuous Enrollment Policy and Degree Completion

Students in all graduate programs, including doctoral programs, must maintain enrollment totaling six hours (or more) over three consecutive semesters, including summers. In other words, the total enrollment of the current term plus the two terms preceding it must add up to six hours or more. The status of all students will be checked by the midpoint of each term for compliance with the continuous enrollment requirement. Any student whose enrollment is noncompliant will receive a hold on their registration, which would prevent registering for all current and future classes. Those students will be notified by an e-mail message sent to their official Georgia State University e-mail account. To resume their programs, students with continuous holds on their enrollment must file for re-entry by the published deadline and must enroll at a level sufficient to satisfy the continuous enrollment criterion. That is, their enrollment in the re-entry term plus the two terms preceding it must total six hours or more. The maximum required enrollment level for the re-entry term is six hours. For more information on the re-entry process, contact the Office of Academic Assistance and Career Services.

8070.40 Grade Point Average and Course Grade Requirements for DrPH Students
DrPH students must maintain a 3.0 or better overall institutional grade point average (GPA) to progress from one semester to the next, and must receive a grade of “B” or better for each School of Public Health based course (courses with prefix “PH” in front of the course number). Any DrPH student earning a grade of B- or below must repeat the public health course or not count the course towards their doctoral program of study. Doctoral students whose cumulative GPA falls below 3.0 at the end of a semester will receive a scholastic warning from the School. If at the end of the following six semester hours of enrollment, the student has not achieved a 3.0 cumulative GPA, he or she will be scholastically excluded from the doctoral program. Any student who is scholastically excluded from the program may apply for readmission after a period of one year. Time Limitations for DrPH Students (see section 8070.50) will still apply.

8070.50 Residency Requirements and Time Limitations for DrPH Students

The purpose of requiring completion of all degree requirements within a fixed period is to ensure currency, continuity, and coherence in the academic experiences leading to the degree. Within nine (9) years of the student’s term of first matriculation, it is required that the student complete all degree requirements. Moreover, all requirements for doctoral candidacy (coursework, comprehensive examination, prospectus approval) must be completed within nine years (9) of the student’s first term of matriculation. No coursework completed more than seven years before admission to candidacy may be used to meet any doctoral degree requirement. Enrollment for a minimum of three semester hours of credit is required during at least two out of each three-term period following successful completion of the comprehensive examination until graduation. This enrollment must include a minimum of nine semester hours of dissertation (PHPB 9980) credit but may also include other coursework. The student must be enrolled in and successfully complete three semester hours of graduate credit (typically dissertation hours) during the final academic term in which all degree requirements are completed and the student graduates. Additional information about time limits and expected doctoral program completion milestones may be distributed by the DrPH Program Director, Department Chairs, or a designated faculty member to doctoral students in the School of Public Health DrPH Student Handbook. Doctoral students will be subject to all the doctoral program completion milestone requirements, details and policies distributed in the School of Public Health DrPH Student Handbooks. Failure to meet any of these doctoral program completion milestones may result in scholastic dismissal from the doctoral program.

8070.60 Doctoral Program of Study Form for DrPH

The final DrPH Program of Study form is completed following the successful completion of the comprehensive exam, and must be approved by the Faculty Advisor, and the DrPH Program Director and OAA when the student applies for admission to candidacy. OAA uses the form for degree-audit and final approval. The DrPH Program of Study form must show all courses relevant to the doctoral program (including master-level prerequisite courses and any courses approved as transfer credit from other universities), in addition to Georgia State University courses satisfying the minimum DrPH degree requirements. OAA notes the completed courses in the student’s electronic academic evaluation (in PAWS). Students may log in to PAWS, view, and confirm OAA’s to-date notations on their electronic program of study at any time.

Transfer credits from another institution: A student may apply a maximum of nine (9) semester hours of approved course credit transferred from another sufficiently accredited institution toward fulfilling DrPH degree requirements. Transfer credits are processed by the School and must be approved by petition. Students requesting to petition for transfer of credits must work with the MPH Curriculum and
Advisement Coordinator in the Office of Academic Assistance. Approval is at the discretion of the DrPH Program Director — approval is not guaranteed. The Doctoral Program Director may defer to the Department Chair in which the petitioned course is offered. All credits, including transfer credits, presented for the DrPH degree must have been earned within nine calendar years of the date of degree conferral from a program or school accredited by CEPH at the time of completion. No previously taken course with a grade of “B-” or below may be transferred into the doctoral program. Courses transferred-in for the doctoral degree may not be used in fulfilling the DrPH Public Health Core Courses requirements or the doctoral credit-hour residency requirement. OAA will update the student’s electronic PAWS program of study form at that time. With the exception of university-approved dual degree programs, if the course to be transferred in was used to satisfy another degree program either at GSU or elsewhere, the DrPH Program Director reserves the right to require the student to complete a different graduate-level course prescribed by the DrPH Program Director. That course will be substituted into the student’s DrPH program, so that the student completes the fifty-four (54) unique total credit hours for their DrPH degree.

Credits earned at Georgia State University in either transient, non-degree, or other-Georgia State University-degree status: A student may apply a maximum of nine (9) semester hours of applicable Georgia State University course credit earned prior to DrPH program admission (while taking public health courses as either transient, non-degree, or other-Georgia State University-degree or program status) toward fulfilling DrPH degree requirements. Credits are processed by the School — petition is not required, but students should confirm their previously completed Georgia State University courses are applicable. Students may work with the Doctoral Program Director and the MPH Curriculum and Advisement Coordinator in the Office of Academic Assistance to confirm applicability. Approval is at the discretion of the Doctoral Program Coordinator — approval is not guaranteed. The Doctoral Program Director may defer to the Department Chair in which the course is offered. All Georgia State University credits presented for the DrPH degree must have been earned within nine calendar years of the date of public health doctoral degree conferral. Courses taken at Georgia State University that were applied to another Georgia State University degree program may not be applied to the DrPH degree; instead, a student should seek a doctoral course waiver for these courses already applied to another Georgia State University degree program.

Doctoral Course Waivers: DrPH

students may receive a course waiver for any doctoral course already completed as part of another GSU degree program (including the MPH degree program), or if the course content was already learned at another institution or training area, but was not eligible for transfer credit. Students are still expected to take the minimum number of credit hours expected for the DrPH degree at GSU (fifty-four credit hours), but when granted a course waiver, the student may substitute a different graduate level course in order to complete the total fifty-four credit hour requirement of the DrPH program.

No previously taken course with a grade of “B-” or below may be used for course waiver. Courses waived for the doctoral degree may not be used in fulfilling the DrPH Public Health Core Course requirements or the doctoral credit-hour residency requirement.

Students hoping to waive a course and substitute it with another should provide a Petition for Waiver noting each doctoral course they hope to waive, and which course they would like to substitute in its place. The Petition for Waiver is a written statement, along with any evidentiary documentation, that assures the School that the doctoral student has mastered the course material in the course to be waived through
another manner (i.e. MPH degree, another GSU degree, etc.). This Petition must be approved by the student’s Faculty Advisor and the DrPH Program Director.

Upon approval by the student’s Faculty Advisor and the DrPH Program Division Director, the Petition is then forwarded to the OAA for their approval. OAA may request the input of the Assistant Dean for Academic Programs, the Senior Associate Dean for Academic and Strategic Initiatives, and/or the Academic Affairs Committee, but that is not required. Once the Director of OAA notes OAA’s approval, the student’s file and program of study is updated to note a waiver of the required course(s) and the substitution of another course taking its place. (MPH-Level Core Course prerequisite requirements for the doctoral program are exempt from this rule, since these prerequisite courses do not count toward the fifty-four (54) credit hour minimum requirement for the DrPH program).

8070.70 Doctoral Comprehensive Examination for DrPH

All DrPH students must take a comprehensive exam following successful completion of all foundational core courses with a minimum 3.0 cumulative grade point average. The purpose of the comprehensive exam is to demonstrate mastery of the DrPH foundational competencies delivered through the core curricular content and the ability to perform high-level applied public health problem solving. Successful completion of the exam is necessary before moving forward with the Integrated Learning Experience/Dissertation. More information about the DrPH comprehensive examination is in the DrPH Student Handbook, and will be provided by the DrPH Program Director. Students who do not pass the exam are subject to dismissal from the DrPH program.

8070.80 Admission to Candidacy for DrPH

Admission to candidacy for a DrPH student is possible after the successful completion of the comprehensive exam. The following is a complete list of requirements for admission to candidacy:

- The Faculty Advisor, the DrPH Program Director, and OAA have approved the final program of study.
- A GPA of 3.0 has been maintained for all graduate courses taken and for all completed courses on the program of study (no course with a grade below B- may be placed on the final program of study).
- The DrPH comprehensive exam has been passed, and passing scores have been reported to OAA.
- The Doctoral Dissertation Committee, including any necessary changes in the membership, is confirmed and all its members have been notified of their appointment.
- The residency requirement has been met.

Application for Admission to DrPH Candidacy

This form must be submitted to OAA as soon as possible following the completion of the Admission to Candidacy requirements. Candidacy begins on the date the form is received by the OAA. After admission to candidacy, a student must register for at least nine (9) hours of dissertation credit during the completion of the degree program. Students planning to graduate the same semester they enter candidacy must be admitted by the published deadline for candidacy during that semester and register for nine (9) hours of dissertation credit. The student must also meet all other deadlines for graduation in that semester. A student must register for a minimum of three (3) dissertation credit hours in any semester when using
University facilities, and/or faculty or staff time. The School shall not accept a dissertation if the student has not been admitted to candidacy for the degree.

Time Limit on DrPH Candidacy

All doctoral program degree requirements must be successfully completed within nine (9) years of a student’s first term of matriculation. The dissertation must be completed within four (4) years following admission to candidacy to qualify for graduation. If a doctoral student’s candidacy expires after the first week of classes in the final semester, the student is granted the remainder of the semester to complete degree requirements without special permission of the School. Additional information about time limits and expected dissertation completion milestones may be distributed by the DrPH Program Director, or a designated faculty member to candidacy eligible students immediately prior to their admission to candidacy. DrPH students will be subject to all the dissertation completion milestone requirements, details and policies distributed at that time. Failure to meet any of these dissertation completion milestones may result in scholastic dismissal from the doctoral program.

8070.90 DrPH Integrated Learning Experience (ILE)/Dissertation

The dissertation process is intended to engage the DrPH student in a project that will significantly contribute to the existing public health practice knowledge base. The dissertation must present independent thinking, scholarly ability, and a systematic approach to addressing a contemporary public health issue. While the dissertation format will be determined in large part by the nature of the public health problem being addressed, it should reflect the variety of perspectives and approaches needed to analyze and ameliorate major public health problems and include assessment of both policy and practice implications. The DrPH dissertation must demonstrate meaningful synthesis and application of DrPH foundational competencies. For full details about the dissertation processes and procedures, please see the DrPH Student Handbook. Enrollment for dissertation credit (PHPB 9980) is permitted only after successful completion of the comprehensive examination.

Doctoral Advisory Committee (or Doctoral Dissertation Committee)

DrPH students must establish a Doctoral Advisory Committee, usually referred to as the Doctoral Dissertation Committee (DDC) in the DrPH program, following the completion of their comprehensive exam, but some establish the committee earlier in their program of study. The Doctoral Dissertation Committee primarily aids the student in the dissertation process. Additional criteria for the dissertation committee membership may be found in the DrPH Student Handbook

Dissertation Planning

Students should see the DrPH Student Handbook for this information.

Dissertation Proposal/Prospectus and Meeting

Students should see the DrPH Student Handbook for this information.

Dissertation Approval and Defense
The final dissertation document must conform to all format and content requirements specified by the SPH. When the Dissertation Chair is satisfied with the completed dissertation, he or she will certify that it has his or her approval and is ready to be read by members of the Doctoral Dissertation Committee. The student will then distribute copies of the dissertation to the remaining members of the Doctoral Dissertation Committee and will schedule a final oral defense and notify the school. Scheduling of the oral presentation of the dissertation is by mutual agreement of the student and the Doctoral Dissertation Committee. Students should see the DrPH Student Handbook for more information.
Georgia State University's Perimeter College offers associate degrees in more than 30 guided pathways. Perimeter College comprises five campuses and an online program. Perimeter College does not offer any graduate-level degrees or courses. For more about Perimeter College's degree offerings, view the associate-level catalog at catalog.gsu.edu or visit perimeter.gsu.edu.
10000 College of the Arts

Graduate programs in the College of the Arts are described in detail in this chapter. See subsections for specific program information as well as policies and procedures.

10010 General Information

The College of the Arts consists of three schools and two centers. The college has approximately 2,500 undergraduate majors and 220 graduate students.

The liberal arts education offered by the College of the Arts prepares students for professional careers and provides the foundation for lifelong learning. Programs in the liberal arts promote the independent discovery of knowledge, an appreciation of the arts, and the ability to think critically and analytically.

Graduate programs offered by the College of the Arts prepare students for professional careers and provide them with the foundation for meeting the challenges of career development. For these purposes, the College of the Arts offers the Master of Arts, the Master of Music, the Master of Fine Arts, the Master of Teaching in Art Education, the Master of Art Education, and the Doctor of Philosophy degrees. Within the framework of the various degree offerings, specific programs have been designed for students who wish to pursue a career in teaching.

10020 Office of the Dean

55 Park Place Building, Suite 910
404-413-3151
thearts.gsu.edu/

Wade Weast, Dean
Maria Gindhart, Associate Dean

10020.10 Office of Academic Assistance

55 Park Place Building, Suite 990
404-413-5855
thearts.gsu.edu/college-of-the-arts/academics/about-student-advising/

Sekeia Harris, Director
Tony Davis, Assistant Director

The Office of Academic Assistance supports schools in providing academic advisement for students in the College of the Arts, primarily those who have earned 90 credit hours. Students with fewer than 90 credit hours are advised through the University Advisement Center (see advisement.gsu.edu). The Office of Academic Assistance prepares evaluations of transfer work done at other institutions as well as academic
program reviews for each major offered through the college. It also assists with course selections and schedule revisions and provides information concerning college and university policies. Students are advised by appointment or may walk-in for brief consultations. During the academic year, the office is open from 8:30 a.m. to 5:15 p.m. Monday through Friday. Students seeking a degree in the College of the Arts should become familiar with the academic regulations of the university.

Although the College of the Arts will endeavor to provide timely and accurate advisement, it is the responsibility of the student to know and to satisfy the degree requirements of their academic program. The College of the Arts encourages its majors to build relationships with the undergraduate support personnel in their major school. This position reflects the belief that a strong undergraduate program is possible only if there are frequent opportunities for students to discuss their academic work and career goals with one of their major professors. In a large urban institution such as Georgia State University, contact is essential if students are to receive individual attention and enjoy the full benefits of a liberal arts education.

10020.20 Academic Resources and Services

Creative Media Center (CMC)

460 Art and Humanities Building
404-413-5278
cmc.gsu.edu

The Ernest G. Welch School of Art & Design’s Creative Media Center (CMC) offers access to cutting-edge digital technology for students who are currently enrolled in courses within the school. The CMC offers an array of Macintosh computer workstations and functions as both a digital classroom and computer laboratory, offering Open Lab access during scheduled times. The CMC includes specialized input and output computer hardware for print, sound, and video, as well as many industry-standard design and imaging software packages.

Music Media Center

400 Haas Howell Building
404-413-5903

The School of Music’s Music Media Center provides students with a valuable resource for music study through the use of the Bobbie Bailey Technology Classroom, consisting of 18 workstations that facilitate the art of music composition, a multi-media seminar room, and the Charles Thomas Wurm Circulation area with access to 16 listening-keyboard computer workstations.

Visual Resource Center (VRC)

520 Art and Humanities Building
404-413-5233

The Ernest G. Welch School of Art & Design’s Visual Resource Center (VRC) has a large collection of print and digital media covering all phases of art history. The collection is used extensively for instruction
and learning by university faculty and students as well as visual arts professionals throughout the region. The university subscribes to Artstor Digital Library, a database of more than 1.4 million images in the arts, architecture, humanities, and sciences from outstanding museums, photo archives, photographers, scholars, and artists.

**10020.30 Centers**

**Center for Collaboration and Innovation in the Arts (CENCIA)**

Nickitas Demos, Director
cencia.gsu.edu/

Recognizing the unique power of the Arts to transform, enrich and inspire people and communities, the Center for Collaboration & Innovation in the Arts (CENCIA) provides meaningful opportunities for artists of diverse disciplines to collaborate and connect with local, national, and international communities through accessible arts programming. Through its energetic promotion of the Arts, CENCIA helps establish the College of the Arts at Georgia State University as a significant innovative center for artistic expression.

**Center for Educational Partnerships in Music**

Patrick K. Freer, Director
music.gsu.edu/centers/center-educational-partnerships-music/

The Center for Educational Partnerships (CEPM) unites music faculty and music students with the education community in a collaboration that advances the role of music in school, culture, and prepares strong leaders to teach in diverse and interdependent contexts. Drawing on Atlanta's unique community resources, the relationship created by the center fosters relevant and engaging music-making for learners throughout their lifespan.

**10030 Academic Programs**

The College of the Arts offers the following graduate degrees:

- Master of Art Education
- Master of Teaching in Education
- Master of Arts in Art History; Communication, with a concentration in Film, Video and Digital Imaging
- Master of Fine Arts in Studio Art, with concentrations in Ceramics, Drawing, Graphic Design, Interior Design, Painting, Printmaking, Photography, Sculpture, and Textiles
- Master of Music, with concentrations in Performance (Orchestral Instruments, Organ, Piano, and Voice), Instrumental Conducting, Composition, Choral Conducting, Piano Pedagogy, Jazz Studies, and Music Education
- Doctor of Philosophy in Communication, with a concentration in Moving Image Studies
Doctor of Education (Ed.D.) and Doctor of Philosophy (Ph.D.) Degrees

A Doctor of Education (Ed.D.) degree with a major in Curriculum and Instruction and a concentration in Art Education or Music Education is offered by the College of Education and Human Development in conjunction with the Ernest G. Welch School of Art & Design and the School of Music, respectively, in the College of the Arts.

A Doctor of Philosophy (Ph.D.) degree with a major in Teaching and Learning and a concentration in Music Education is offered by the College of Education and Human Development in conjunction with the School of Music in the College of the Arts.

Descriptions of admission and program requirements are outlined in the College of Education and Human Development section of this catalog.

Dual Degrees

The College of the Arts offers dual degree programs within the college. These programs enable approved undergraduate students to take specified graduate courses that may count toward graduate degree requirements if the student is accepted into the affiliated graduate degree program.

Certificate Programs

The College of the Arts offers a professional certificate in Music, in addition to traditional graduate degrees. This certificate is outlined in the school’s section of this catalog and on the School of Music’s website.

Applicants not currently in a degree program in the College of the Arts must apply according to the general application instructions. Currently active degree-seeking students who wish to add this certificate program to their academic curriculum must apply for the certificate but are exempt from the standard application fee.

10040 Admission Policies

A person seeking to pursue any of the programs of graduate study described in this section of this catalog must be admitted to Georgia State University through the College of the Arts. The requirements for admission stated in the following sections are those established by the University and the College. Additional requirements, if any, established by the separate schools can be found in the descriptions of their programs and on their respective websites.

There are four categories of admission to graduate study in the College of the Arts: Full Status, Special Status, Non-Degree Status, and Transient Status. A student must achieve Full Status in order to be eligible for a graduate degree. The category of Special Status is designed to accommodate, when practical, applicants with promise who may have certain limited deficiencies in admission requirements. Non-Degree Status is provided for non-degree seeking students who wish to take a limited number of graduate courses. Transient Status is available for graduate students in good standing attending another institution.
Application Completion Deadlines

The Office of Academic Assistance lists on its website the deadlines by which an application to degree programs must be completed. These are the dates that all materials required for admission must be collected in the Office of Graduate Programs. Schools have different application deadlines, especially for applicants wishing to receive financial assistance. Applicants should check the school to which they plan to apply for specific application instructions and deadlines.

International applicants must have all application materials submitted as early as possible in order to allow sufficient time for the application materials to be reviewed by the school and, if appropriate, for the preparation of necessary visa documents.

Application and Admission

The graduate admissions process is coordinated by the Office of Graduate Admissions. The College of the Arts will remain responsible for graduate admissions decisions for relevant degree seeking, non-degree, and transient graduate applicants.

The selection of applicants for admission to graduate study is competitive. Given limited university resources, even applicants with strong credentials may not gain admission to a specific graduate program. Admission is based upon a variety of factors among which is the quality of the applicant’s undergraduate record, achievement on required admissions tests, the degree of preparation for the specific academic program to be pursued, and available space in the program. In addition to these general criteria, individual schools may consider additional factors in making admission decisions. Applicants should be aware that exceptional performance in an undergraduate or a graduate program in one discipline does not guarantee acceptance into another graduate program.

A prospective student seeking admission must be a graduate of an accredited college with a four-year baccalaureate degree or the equivalent that reflects superior quality work at the undergraduate level. Each applicant must complete and submit the application for admission to graduate study, any required application materials, and the application fee. The College of the Arts requires all prospective students to submit applications and supporting documents electronically.

Application materials required for admission to graduate study include the following:

1. A copy of a transcript from each and every college or university, domestic or overseas, from which applicants received a degree, or where they were enrolled in a degree program for more than a single semester, will need to be uploaded by the applicant to the application. In addition, applicants should send transcripts from all institutions where they were enrolled in coursework relevant to the degree program for which they are applying. This may include courses taken in non-degree status, in transient status, or in post-baccalaureate status and is regardless of whether or not the courses led to a degree. Separate transcripts are not required for AP credit given for high school courses. As well, separate transcripts are not required for enrichment activities (e.g., summer abroad, summer internship, etc.) that did not involve enrollment in a degree program unless the work is relevant to the program for which they are applying. If offered admission, students are required to send one official transcript from each institution directly to the Office of Graduate Admissions. Transcripts should be received no later than the first day of the semester of entry. Admission will be conditioned
upon submission of official transcripts that confirm the information provided on unofficial transcripts during the application process.

2. For programs requiring it, the official records of scores on the General Test of the Graduate Record Examination (GRE), Georgia Assessments for the Certification of Educators (GACE), or the Miller Analogies Test (MAT) (see specific school requirements) must be directed specifically to Georgia State University from the relevant testing agency. Please note that applicants to the M.F.A. program in Art & Design, the Film and Media Production track of the M.A. in Communication, and to the Master of Music with concentrations in piano performance, organ performance, orchestral instrument performance, voice performance, choral conducting, instrumental conducting, piano pedagogy, and jazz studies are not required to submit national test scores.

3. Any supplemental materials required by the major school beyond transcripts and test scores must be submitted via the online graduate application. These materials may include but are not limited to a statement of purpose, writing sample, cv/resume, letters of recommendation, and creative portfolios. Required supplemental materials vary greatly by program.

Admission to the College of the Arts can only be granted by the Office of the Dean of the College of the Arts. Correspondence from individual schools, professors, or outside agents does not constitute official admission.

Special Status Admission

The use of Special Status admission is solely the prerogative of the school to which an application has been made. Special Status admission may be given to applicants who show promise but are not able to fulfill all the requirements for Full Status admission at the time they apply. Students admitted under the Special Status category are informed of expectations or conditions in the letter of admission. Students admitted to Special Status may be dismissed from their programs if their school feels that they are not making satisfactory progress toward promotion to Full Status.

A student must be in Full Status in order to earn a degree. At least 20 semester hours of graduate coursework must be completed after the student is admitted to Full Status to qualify for graduation.

Non-Degree Admission

Non-Degree Status is provided for students who wish to take a limited number of graduate courses (typically not more than two) that relate to their academic or professional backgrounds but do not lead to an advanced degree. A student seeking admission to Non-Degree Status should complete the online application form and submit the $50 application fee, transcripts from all colleges or universities attended, and a list of courses they wish to take.

A student is admitted to this status at the discretion of the school and when adequate resources are available. Applicants for the Non-Degree Status should consult the school director of graduate studies to learn about any additional requirements or policies that pertain to non-degree admission.

Admission to Non-Degree Status does not warrant or secure admission to any degree program. Some schools do not accept non-degree students. Please contact the school director of graduate studies for further information.
Transient Admission

An applicant seeking admission as a transient student must be a graduate student in good standing at another institution. Admission requirements include a complete application, application fee, a list of courses the applicant wishes to take, and a letter of good standing from either the graduate dean or the registrar of the student’s institution.

Admission to transient status is for one semester only on a space-available basis. A student who is not in good standing or who is ineligible to return to his or her institution will not be admitted. No guarantee is made that a transient student will be able to secure the courses desired. The reporting of grades earned to the student’s institution is the responsibility of the student.

The College of the Arts does not allow transient students to reenter. A complete application, application fee, list of courses, and a letter of good standing must be sent to the Office of Graduate Programs for every semester the transient student wishes to attend Georgia State University.

Deadlines for transient applications are as follows: Summer – May 15; Fall – June 15; Spring – December 1.

Changing Semester of Entry

Admission to a graduate program is valid only for the semester, degree, and major specified in the letter of acceptance. An applicant who is admitted and does not intend to enroll should notify the Office of Academic Assistance in the College of the Arts. If an accepted applicant wishes to defer entry within one year, the admitting school reserves the right to review the application materials again and decide if postponement is appropriate. Applicants wanting to change their date of matriculation must notify the school with this request.

Re-entry Students

Students of Georgia State University who are on Inactive Status, or who have received registration holds due to violation of the continuous enrollment policy, must complete a re-entry application and pay a $25 fee. All materials should be submitted by the appropriate deadline for the semester they wish to re-enter. Students who have attended other colleges and/or universities since last registering at Georgia State must have official transcripts of all coursework sent to the Office of Graduate Admissions, prior to the re-entry deadline for the appropriate semester. Degree programs must approve all reentry applications and may deny reentry for a variety of reasons such as a student’s previous academic performance, a student’s progress in the program, the length of time not enrolled, and availability of space in the program. Re-entry applications from students whose cumulative grade-point average is below 3.0 require a plan from the school’s director of graduate studies describing how the grade-point average can be improved to 3.0 or better within 18 hours of graded coursework over the next three consecutive terms.

Re-entering students are subject to the regulations of the Graduate Catalog and the degree program current at the time of re-entry.

Deadlines for re-entry applications are as follows: Summer – April 1; Fall – June 1; Spring – November 1.
10050 International Students

Georgia State University encourages the enrollment of students from other countries. Applicants needing a student visa are required to provide proof of financial support for at least the first year of their degree program. International students with a student visa are required to carry a full course of study during every semester except the summer semester. Applicants requesting a student visa may not be considered for Non-Degree Status.

In addition to meeting the regular admission requirements, prospective international applicants must demonstrate proficiency in the English language by taking either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). Applicants with a score under 550 on the paper-based TOEFL, 213 on the computer-based TOEFL, 80 on the internet-based TOEFL, or 6.5 on the IELTS cannot be considered for Full Graduate Status; they may, however, be considered for Special Status admission. See section 1110.05 for additional ways to demonstrate English proficiency.

Prior to registration for the first semester, all newly admitted international students are required to attend a special orientation, held by the Office of International Student and Scholar Services. At this orientation, all newly admitted international students must take the Georgia State Test of English Proficiency (GSTEP) offered by the Department of Applied Linguistics and English as a Second Language unless they have received a TOEFL score of 100 or higher or an IELTS score of 7.5 or higher. Students who miss the orientation should arrange with the department to take the GSTEP before classes begin or as soon as possible thereafter. Students with acceptable scores on the examination may proceed with their regular academic coursework. Students whose scores indicate a lack of English proficiency will be required to take ESL course or courses as a regular part of their graduate coursework. Any ESL courses required under this provision will be considered part of the student’s normal course load but will not count toward the total hours of coursework a student must take in order to obtain a degree.

GSTEP scores for each student will be sent by the Department of Applied Linguistics and English as a Second Language to the Office of Academic Assistance in the College of the Arts along with a recommendation regarding the additional language course(s) that the student should take. The recommendation will then be sent to the appropriate school director of graduate studies, who will ensure that the student takes the recommended ESL course(s).

Academic credentials must be original documents with authorized signatures, seals, stamps, etc. Whenever possible, these should be sent by the institution responsible for issuing such documents. In cases where it is impossible for an applicant to have these credentials sent from such institutions, the applicant should forward a duly “notarized” or “attested to” copy. The notarization should be done by the proper institutional official or by the Ministry of Education in the home country. Documents in a language other than English must be accompanied by translations. Translations should be made by the home country embassy or an appropriate official, and the original copies of the translations, acceptably notarized as described above, must be provided. As a general rule, documents translated by the Office of the American Friends of the Middle East (AFME), the Institute of International Education (IIE), the student’s home embassy, the American embassy, or the language faculty of a regionally accredited U.S. college or university will be acceptable. Students who already attend school in the U.S. can arrange to have their
institutions certify photocopies of original documents, and students in the Atlanta area can arrange for the Office of Graduate Admissions to certify photocopies of required foreign academic credentials.

10060 Graduate Teaching and Research Assistantships

Each school in the College of the Arts offers opportunities for qualified students who have been accepted into one of the graduate degree programs to work as an assistant. Graduate assistants work as tutors, aid faculty members in research projects, supervise laboratories, and teach undergraduate courses. Assistantships normally are awarded only to students enrolled full time in their degree programs. For the expected level of enrollment, see “Courses and Course Load” in section 10100 below. Students interested in graduate assistantships should contact the director of graduate studies in their school for specific information.

Students receiving assistantships as well as financial aid should be aware that receiving an assistantship can reduce the amount of financial aid awarded.

Graduate Assistantship Deadlines

Most schools have early deadlines for graduate assistantships. If you would like to be considered for an assistantship, please consult the appropriate school section of this catalog or school website to obtain the deadline for the program to which you plan to apply.

Graduate Study Funding

In addition to graduate assistantships, the college and university offer a variety of fellowships, scholarships, and other sources of financial support for graduate education.

10070 Calculation of Grade-Point Average

In schools where a new application is required from the master’s to the doctoral program, master’s and doctoral cumulative grade-point averages will be calculated separately. All credits earned while a student is in Non-Degree Status that are approved for, and used to fulfill requirements to, the master’s degree will be calculated into the cumulative master’s grade-point average. In order to qualify for graduation with a degree from the College of the Arts, a student must have a minimum grade-point average of 3.0.

10080 Scholastic Warning & Scholastic Termination

Scholastic Warning

Graduate students are personally responsible for knowing and maintaining school and college academic standards. A graduate student whose cumulative grade-point average falls below 3.0 at the end of a semester or who fails to maintain the level of academic performance required by the major school will be sent a letter of scholastic warning from the office of Academic Assistance in the College of the Arts. Some schools have additional requirements for academic performance and progress. In these instances,
the school's director of graduate studies will attempt to warn the student. However, the receipt or non-receipt of academic warning does not exempt the student from stated requirements. Students in Warning Status must achieve a 3.0 cumulative grade-point average within 18 hours of graded coursework over the next three consecutive terms.

Scholastic Termination

A graduate student is subject to scholastic termination from the degree program for the following reasons:

1. Failure to achieve a 3.0 cumulative grade-point average by the end of the next 18 semester hours of enrollment or next three consecutive terms in letter-graded courses after the grade-point average has fallen below a 3.0.
2. Failure to maintain the level of academic performance and progress required by the major school.
3. A second failure on the general examination in the M.A. or Ph.D. degree programs.

The student who may be subject to scholastic termination will be notified of termination by the College of the Arts.

10090 Foreign Language or Equivalent Research Skill Requirement

Some schools in the College of the Arts require students to demonstrate proficiency in a foreign language or in an alternative research skill. An alternative research skill is a proficiency obtained in an adjunct area that is ordinarily not a degree requirement in the student’s degree program. Students should consult their individual directors of graduate studies for specific school requirements.

An international student whose native language is not English and who demonstrates proficiency in English to the Department of Applied Linguistics and English as a Second Language may be exempted from the foreign language requirement. Exceptions to this policy may be allowed only with school approval and by means of approved substitutions of equivalent research skills. The English for Foreign Language Requirement Exam (EFLRE) requires students to perform satisfactorily on the GSTEP, including the oral interview.

International students who will be using English to satisfy the foreign language requirement will take the EFLRE, and the result will be sent to the student’s academic school. Because GSTEP results are considered by the Department of Applied Linguistics and English as a Second Language to be current for two years, students who wish to satisfy the foreign language requirement within the first two years of their arrival at Georgia State may use the GSTEP results already on file in the Department of Applied Linguistics and English as a Second Language if those results are satisfactory. If students were not required to take the oral interview section of the GSTEP when they arrived, they will need to contact the Department of Applied Linguistics and English as a Second Language to take it to fulfill the EFLRE requirement. Students who wait longer than the two year period will be required to take the complete EFLRE, which means retaking all sections of the GSTEP.

Courses taken to satisfy the foreign language requirement will not count toward the total hours of coursework a student must take in order to obtain a degree.
10100 Requirements and Time Limits

Program requirements are established based on the Graduate Catalog active at the time of the student's initial acceptance and matriculation (first registration). All credits presented for the master's degree must have been earned within seven calendar years of the date of the degree. All credits presented for the doctoral degree must have been earned within ten years of the date of the degree.

Continuous Enrollment

Students in all graduate programs must maintain enrollment totaling six hours (or more) over all consecutive three semester periods (including summers). In other words, the total enrollment of the current term plus the two terms preceding it must add to six hours or more at all times. The status of all students will be checked by the midpoint of each term for compliance with the continuous enrollment requirement. Any student whose enrollment is out of compliance will receive a registration hold preventing all current and future registration. Those students will be notified by an e-mail message sent to their official Georgia State University e-mail account.

To resume their programs, students with continuous enrollment holds must file for re-entry by the published deadline and must enroll at a level sufficient to satisfy the continuous enrollment criterion. That is, their enrollment in the re-entry term plus the two terms preceding it must total to six hours or more. The maximum required enrollment level for the re-entry term is six hours. For more information on the reentry process, see section 10040.

Limits to Financial Aid

For purposes of financial aid and compliance with federal regulations, graduate students may receive aid for a maximum of 90 hours unless they are receiving a graduate assistantship. Ph.D. students are exempted from the Satisfactory Academic Progress process. Students receiving financial aid and receiving graduate assistantships may be subject to reduced financial aid awards.

Students' Responsibility

Graduate students must assume full responsibility for knowledge of the rules and regulations of the college and university, as well as those school requirements concerning their individual curricula. Enrollment in a graduate program in the College of the Arts constitutes a student's acknowledgement that they are obligated to comply with all academic and administrative regulations and degree requirements.

Academic Advisement

It is the responsibility of the student to know and to satisfy any and all conditions that pertain to admission and to the satisfactory completion of degree requirements. Students may obtain advisement from the appropriate graduate faculty advisor or from the school director of graduate studies. Advisors are also available in the Office of Academic Assistance in the College of the Arts to assist with admissions and other administrative actions related to admission and graduation.
Courses and Course Load

Courses numbered 6000 and above are normally open only to graduate students (see exceptions below). Each graduate course will carry three credit hours of academic credit unless otherwise indicated. Twenty-five credit hours is the maximum student load per semester; eighteen credit hours is considered to be the normal load for graduate students with a graduate assistantship in the College of the Arts, while nine credit hours is the load for defining a full-residence semester for most financial aid and loans. Students who wish to register for more than twenty-five hours of coursework must obtain the approval of the school’s director of graduate studies.

Policy on Allowing Undergraduates to Take Graduate Courses

Under one of the following conditions, an undergraduate student may be permitted to take a graduate course:

1. **Dual Degree Enrollment**: The student has been formally accepted into an official university dual degree program that links an undergraduate degree program with a graduate degree program. Students in dual degree programs are granted permission to enroll in specified graduate courses when they reach a designated program milestone. Students who are accepted into the affiliated graduate program upon completion of the undergraduate degree may count specified coursework toward fulfillment of the graduate degree requirements.

2. **College Approval of Enrollment**: The Office of Academic Assistance of the College of the Arts will determine a student’s eligibility for admission into a graduate course. To be eligible, an undergraduate student must have a cumulative grade-point average of 3.5 or higher, be within 18 semester hours of graduation, and be enrolled in an undergraduate degree program. Eligibility does not guarantee permission to take a graduate level course. Once a student’s eligibility is determined, permission must be granted by the instructor for the course, the school’s director of graduate studies, the director of the school offering the course, and the Office of Academic Assistance of the College of the Arts. The request form is available in the Office of Academic Assistance. Please note, graduate courses taken by an undergraduate student cannot be applied toward fulfillment of graduate degree requirements unless the student has been formally accepted into an official university dual degree program.

(This approval process does not apply to postbaccalaureate students. Postbaccalaureate students wishing to take graduate courses must be admitted as non-degree seeking students.)

Transfer Credit

A maximum of six credit hours of approved graduate credit from other institutions may be accepted toward a master’s degree program, and a maximum of three credit hours of approved graduate credit from other institutions may be accepted toward a graduate certificate program. Transfer credit must be approved no later than the end of the second semester in Full Status. Transferred credits will be included in the time limitations placed on credits applicable to graduate degrees. For the policy concerning application of work taken at other institutions in the doctoral program, see the Doctor of Philosophy degree in Film, Media & Theatre.
Please note that the acceptance of transfer credit is not automatic; it must be approved and documented by the school director of graduate studies.

Responsible Conduct in Research

All undergraduates, graduate students, and post-docs involved in empirical research at Georgia State University are required to undertake Responsible Conduct in Research (RCR) education and training as part of their requirements for graduation or employment. As part of this educational requirement, web-based training through the Collaborative Institutional Training Initiative (CITI) has been made available to meet this requirement. More information on the university’s RCR training requirement can be found at ursa.research.gsu.edu/ursa/compliance/human-subjects/required-education-and-training/.

The College of the Arts currently has an RCR requirement waiver for all degree programs except the M.A.Ed. in Art Education and the M.Mus. in Music Education, although students in those programs who are not performing research that falls under RCR guidelines are also exempt from the RCR requirement.

10110 Degree Requirements

Candidates for graduation in a degree program offered by the College of the Arts must be officially registered for classes the semester of completing all academic requirements, including thesis/dissertation defense, performance, or gallery show. Schools may determine the extent and type of hours that must be taken by the candidate during the concluding semester. Every candidate for completion must apply at least two semesters in advance of expected graduation with the Graduation Office of Enrollment Services/Registrar’s Office. These regulations are explained in the general university-wide section of this catalog. The semester of completion is defined as extending until the last day of the semester on the academic calendar as published by Enrollment Services.

While the provisions set forth in this catalog will ordinarily be applied as stated, Georgia State University and the College of the Arts have the right to change any provision, including, but not limited to, academic requirements for graduation, without actual notice to individual students. Every effort will be made to advise students of any such changes. It is especially important that each student note that it is the individual student’s responsibility to keep apprised of current degree requirements for their particular program.

Graduation Requirement

All students must be enrolled in the term in which they complete the requirements for their degree. Normally, this is the term in which they will graduate. However, if the requirements are completed after the deadline for graduation in a term, but before the first day of classes in the subsequent term, then it is not necessary to enroll in the subsequent term. If the continuous enrollment criterion is not met in the term in which degree requirements are completed, then it must be met in the term of graduation.

Doctor of Philosophy

The Doctor of Philosophy degree in Communication Studies, concentration in Moving Image Studies, is awarded in recognition of the attainment of independent and comprehensive scholarship in film/media
studies. The Ph.D. emphasizes research in conjunction with the mastery of a substantial body of knowledge. Specific degree requirements may be tailored by the faculty to meet the needs of the individual student.

In order to qualify for the Doctor of Philosophy degree, the student must fulfill the following general requirements:

- **Residence:** Four semesters of residence are required, two of which must be consecutive; during all four semesters the student must register for at least six hours of coursework. A Doctor of Philosophy degree shall be conferred only on that student who holds a distinguished record of academic achievement and has maintained a cumulative grade-point average of at least 3.0 for a minimum period of three academic years of postbaccalaureate study. On the recommendation of the School of Film, Media & Theatre and with the approval of the Office of Academic Assistance in the College of the Arts, up to one-half of the residence requirement may be waived on the basis of competence obtained through coursework completed elsewhere.

- **Comprehensive Examination:** Students must pass a comprehensive examination administered by the School of Film, Media & Theatre. An Examination Committee shall be appointed by the director of the school. The committee shall consist of a minimum of three members, at least two of whom shall be on the faculty of the school. The comprehensive examination shall be both written and oral. The examination may be repeated once following a minimum interval of six months either with the original committee or a duly constituted new committee. The examination must be passed at least one academic year prior to the conferral of the degree. The student who fails the examination for the second time will be subject to termination.

- **Admission to Candidacy:** In order to be admitted to candidacy, the student must have passed the comprehensive examination, and must have a dissertation prospectus. Graduate students who have completed these requirements except for their dissertation and related defenses may be admitted into ABD (all but dissertation) status. This title will be based on the positive recommendation of the school’s director of graduate studies and following successful review and certification of other doctoral program requirements by the Office of Academic Assistance. This designation does not change any time limits or registration requirements for completion of the degree program.

- **Dissertation:** A dissertation is required of all candidates for the doctoral degree. A Dissertation Committee, of which the dissertation advisor shall be chair, shall pass on the acceptability of each dissertation. The committee shall be nominated by the student and appointed by the director of the school. If more than one member of the committee does not recommend that the dissertation be accepted, then the dissertation will not be accepted as a fulfillment of the degree requirements. Currently dissertations are uploaded to the university’s ScholarWorks database. The student, with the approval of their Graduate Director and Associate Dean, may stipulate that access to the dissertation may be delayed or limited. A student may choose to have the dissertation copyrighted. Each student must register for a minimum of 20 credit hours of dissertation research.

- **Dissertation Defense:** This examination shall be administered by the Dissertation Committee.

**Master of Arts**

The requirements stated below are the minimum requirements established by the College of the Arts for the awarding of the Master of Arts degree. In addition to any other school requirements, the student seeking a Master of Arts degree must fulfill the following general requirements.
• **Coursework:** A minimum of 27 semester hours of graduate coursework with a minimum cumulative grade-point average of 3.0 is required. At least 20 hours of graduate coursework must be completed after admission to Full Status. In addition, students taking the thesis option must successfully complete at least six credit hours of thesis in the major school. If desired, up to 6 semester hours of the 27-hour requirements may be taken in a related field or fields of study.

Foreign Language: Some schools require students to demonstrate a reading proficiency in a foreign language or an approved equivalent research skill.

• **General Examination:** Some schools require students to pass a school administered general examination.

• **Demonstration of Research Competence:**
  - **Thesis:** Ordinarily a thesis is required of all candidates for a master’s degree. Contact the school’s director of graduate studies for more information.
  - **Non-thesis:** A non-thesis option is available in some schools. In lieu of the thesis, research competence is generally demonstrated on the basis of a research paper or a creative project.

---

### 10120 Student Exception Procedure

The grievance and appeals procedures for students enrolled in courses or academic programs in the College of the Arts is available on the university website at enrollment.gsu.edu/assistance.

Students may request deviations from the regulations in the College of the Arts section of this catalog by applying for approval to the Academic Petitions Board. Students considering such a petition should consult the Office of Academic Assistance in the College of the Arts to determine procedures and to obtain appropriate forms. This petition procedure does not apply to school-based regulations.

---

### 10200 Art & Design

**Programs Offered:**

- Master of Arts in Art History
- Dual B.A. in Art (Art History Concentration) / M.A. in Art History
- Master of Art Education (M.A.Ed.)
- Master of Arts in Teaching, Art Education (M.A.T.)
- Master of Fine Arts
- Doctor of Education (Ed.D.) in Curriculum and Instruction with Concentration in Art Education (in cooperation with the College of Education and Human Development)

Ernest G. Welch School of Art & Design
117 Arts & Humanities Building
Atlanta, GA 30302-4107
404-413-5229
artdesign.gsu.edu
Email: artgrad@gsu.edu

Joseph Peragine, Director
The Master of Arts (M.A.) degree in Art History prepares candidates for professional activities in museums, galleries, and in the fields of historic preservation, conservation, and art criticism. The program also prepares students for graduate work at the doctoral level.

The Master of Art Education (M.A.Ed.) degree allows students who are certified with art teaching certification to strengthen art content while developing skill in the teaching of art at all levels. Students who hold degrees in either Art or Art Education and have obtained Tier 4 (T4) certification are encouraged to apply. Students seeking a teaching certification at the graduate level may apply to the Master of Arts in Teaching (M.A.T.) in Art Education. Candidates for the M.A.T. may be asked to complete additional coursework as advised by graduate faculty based on the portfolio review.

The Master of Art Education (M.A.Ed.) and Master of Arts in Teaching (M.A.T.) programs are taught to a cohort group of students who progress through coursework together. Both traditional masters students with teaching certification and graduate students seeking certification may be included in the cohort.

The Master of Fine Arts (M.F.A.) degree program in studio arts is divided into the following areas of specialization: Ceramics (CER), Drawing and Painting (DP), Graphic Design (GRD), Interior Design (ID), Photography (PHOT), Printmaking (PRT), Sculpture (SCU), and Textiles (TEXT). Each specialization requires coursework within the discipline. Students should stay in close contact with their faculty advisors to determine which particular classes are best suited for their development as artists and designers.

All degree programs of the Ernest G. Welch School of Art & Design are accredited by the National Association of Schools of Art and Design (NASAD).

Applicants may obtain additional information about the Ernest G. Welch School of Art & Design by contacting the school’s director of graduate studies at the addresses above.

Application Procedures

The Ernest G. Welch School of Art & Design admits students from a variety of undergraduate backgrounds who have a record of academic excellence and have demonstrated skill in a visual art discipline. The applicant must specify one of the above degrees and the area of concentration on the application. Applicants interested in an assistantship should fill out an assistantship form and submit it with their application. All accepted applicants are considered for scholarships—no form is necessary.

Applications for the Art History and Studio programs are reviewed once a year, in the spring, for fall admissions. Applications for the M.A.Ed. and M.A.T. programs are reviewed in the spring for fall admissions. Each applicant must satisfy the general requirements of the College of the Arts. Incomplete or improperly prepared applications and portfolios will not be reviewed.

Additional Admission Requirements

In addition to the general requirements of the College of the Arts, the Ernest G. Welch School of Art &
Design has the following requirements:

M.A. Degree

Applicants for the M.A. degree must submit the following items:

1. Three letters of recommendation. No form is required.
2. A one-to-two-page statement of purpose describing current academic interests, proposed area of specialization, and long-range career goals. The statement should also explain how the Art History graduate program at Georgia State University will serve those interests and goals.
3. A writing sample such as a term paper from an upper-level art history course.
4. General Record Examination (GRE) scores.
5. A current resume/CV outlining your skills, experience, and interest.
6. Transcripts. Unofficial transcripts for the application are acceptable and official transcripts required upon admission.

The statement and writing sample should be uploaded with the other application materials or sent to the Office of Graduate Programs.

Specific admission requirements for the M.A. degree in Art History include the following:

1. A high standard of overall undergraduate achievement.
2. Undergraduate coursework in art history. Applicants normally should have a minimum of five upper-level courses or the equivalent.

Applicants to the Art History graduate program are also encouraged to meet personally with a member of the art history faculty.

Please note: Deadlines are for completion of applications.

All materials must be in the Office of Graduate Programs by the deadline. Due to the volume of applications submitted each year, it is recommended that you submit all your materials a month in advance.

M.A.Ed. Degree (36 hours) and M.A.T. Degree (43 hours)

Applicants for the M.A.Ed. and M.A.T. degree must submit the following items:

1. Three letters of recommendation. No form is required.
2. Statement of Intent: A one-to-two-page statement of purpose describing current academic interests, proposed area of specialization, and long-range career goals. The statement should also explain how the graduate program at Georgia State University will serve those interests and goals. The letters of recommendation and the statement of intent should be uploaded with the other application materials, or sent to the Office of Graduate Programs.
3. Portfolio: A successful portfolio demonstrates creativity and commitment in a cohesive body of work. The portfolio should contain both two- and three-dimensional work. It should reflect basic skills in drawing and design and sufficient advanced skill in one area. A total of 20 images should be submitted if the applicant is not a practicing art educator. If the applicant is a practicing art teacher,
a minimum of ten images of personal studio work and up to ten images of student work are acceptable. Under no circumstances should more than 20 images be submitted. Examples of work by the applicant’s students should represent a variety of media and reflect quality in design, craftsmanship, originality, complexity, and historical or cultural content. Submission guidelines for the statement and portfolio preparation are the same as the M.F.A. degree (listed below).

4. A current resume/CV outlining your skills, experience, and interest.
5. Transcript. Unofficial transcripts for the application are acceptable and official transcripts required upon admission.

Specific admission requirements for the M.A.Ed. degree include the following:

1. An undergraduate major appropriate to the intended major at Georgia State University.
2. A high standard of overall undergraduate achievement, usually a grade-point average of 3.0 or higher.
3. Proof of Tier 4 teaching certification (from Georgia or other state).

Specific admission requirements for the M.A.T. degree include the following:

1. An undergraduate major appropriate to the intended major at Georgia State University, preferably in the field of art.
2. Students should have completed at least 15 hours in studio art at the undergraduate level with introductory classes in the following areas: Drawing and Painting, Ceramics, Printmaking, Photography and Sculpture. If these course requirements have not been met in the undergraduate program additional credits may be required.
3. A high standard of overall undergraduate achievement, earned a 2.5 overall cumulative grade-point average and a grade-point average of 3.0 or higher in all art content courses.
4. Passing scores on GACE Program Admission Assessment
5. Ethics (Program Entry test)
6. Once students are admitted to the M.A.T. program art education faculty will assist students in understanding certification requirements which, include Tort Liability coverage, and criminal background checks.

Applicants to the M.A.Ed. and M.A.T. degree program who would like to supplement their portfolios before making officially applying are encouraged to enroll in the Ernest G. Welch School of Art & Design as a post baccalaureate or non-degree graduate students. Applications for post baccalaureate status may be requested from the Undergraduate Admissions Office at Georgia State University. Application for non-degree graduate status maybe completed online through the traditional graduate application. Applicants are encouraged to meet personally with a member of the art education faculty to familiarize themselves with requirements of the program before application.

Please note: Deadlines are for completion of applications.

All materials must be in the Office of Graduate Programs by the deadline. It is recommended that you submit all your materials a month in advance.

M.F.A. Degree:
Applicants for the M.F.A. degree must submit the following items:

1. Three letters of recommendation. No form is required.
2. A one-to-two-page statement of purpose describing current academic interests, proposed area of specialization, and long-range career goals. The statement should also explain how the graduate program at Georgia State University would serve those interests and goals.
3. Portfolio: A successful portfolio demonstrates creativity and commitment in a cohesive body of work. Portfolios should be submitted via the online application and can include still images, video files, audio files, or any combination. A numbered “List of Works” should be uploaded in the art portfolio submission page. Please use the following format for your list:
   - Title, medium, dimensions in height x width x depth (if applicable) and time (if applicable), date of completion. Include a digital portfolio of 20 high resolution jpeg images of recent work, including details if necessary at 2MB per file. Video or audio files may be included as part of the 20 work examples. (Note: URL’s may not be uploaded, but may be included on the “List of Works” for time-based works.) Applicants may show work in diverse media as long as all of the work demonstrates the pursuit of cohesive ideas. Please format to 150 dpi, 1500 pixels on the greatest dimension. Please limit each video or audio link to no more than 5 minutes. If the video or audio link requires a password, be sure to list it. Example: https://vimeo.com/1234567_password: My Application2018. Do not send original work.
4. A current resume/CV outlining your skills, experience, and interest.
5. Transcripts. Unofficial transcripts for the application are acceptable and official transcripts required upon admission.
6. A one-page artist statement that describes your current body of artwork and your studio practice.

Please note: Deadlines are for completion of applications.

All materials must be in the Office of Graduate Programs by the deadline. It is recommended that you submit all your materials a month in advance.

Still image submissions:
Label all materials with name and area of study. Include no more than 20 images. Be sure to include the title of the work, date, medium, and dimensions as part of your file and metadata. Include 20 images in JPEG format (150 DPI, 1500 pixels on greatest dimension).

Moving image/sound submissions:
Label all materials with name and area of study. Include no more than six minutes of audio-visual material. Work must be accompanied by a list with the title of the work, date, full running time, and the student’s role (e.g., director, actor, etc.) in each work and must be submitted in the appropriate file format for the medium.

If an applicant wishes to include a mixture of stills, sound, or moving images, then the materials will be divided evenly. For example, if still and moving images are submitted, 10 stills and three minutes of motion are allowed.

Program Financial Information
Lab fees will be assessed automatically for students who register for certain courses. For more information, please feel free to contact the school, review PAWs or catalog course listings to determine if a course includes a lab fee.

Degree Requirements

Master of Arts in Art History (36 hours)

The Master of Arts in Art History offers two tracks: a thesis track and a non-thesis track. Students declare which track they intend to pursue after completing 18 hours of coursework, with the art history faculty who will then determine whether or not they may continue in their chosen track. Students who do not have a grade-point average of at least 3.7 (A-) will generally not be allowed to continue in the program, and students who have not demonstrated sufficiently strong research and writing skills will not be allowed to pursue the thesis track. Students who plan to continue graduate work after the Master of Arts in Art History at Georgia State University are urged to pursue the thesis-track option.

Each student will be assigned an advisor upon acceptance into the program, but may change advisors contingent upon acceptance by the subsequent advisor. Students are responsible for making appointments with their advisors and for being familiar with the requirements for the degree. Students must work closely with their advisors to determine the best distribution of art history courses and the most pertinent electives, as well as to make sure that they correctly progress towards the degree.

All candidates for the Master of Arts degree in Art History must demonstrate a reading knowledge of either French or German. The language requirement should be fulfilled no later than the end of the first year (or 18 hours) of graduate work. This requirement may be adjusted by petition of the student if his/her major area of research requires learning a language other than French or German. The foreign language reading requirement may be satisfied by:

1. Completing or providing evidence of completion of two years of college coursework in the requisite language.
2. Passing a reading examination administered by the Department of World Languages and Cultures. The reading tests, offered once a semester, emphasize translation ability. Students are permitted to take the exam more than once, if necessary.
3. Receiving a B or better in FREN 7151 French for Reading, GRMN 7151 German for Reading, or, with permission, SPAN 7151 Spanish for Reading.

Courses taken to satisfy the foreign language requirement will not count toward the total hours of coursework a student must take in order to obtain a degree. Graduate-level language courses can be taken as electives, and FREN 7151, GRMN 7151, or SPAN 7151 can be taken as an elective once the student has already fulfilled the foreign language reading requirement in another language.

Thesis Track (33 hours):

1. 18 hours of coursework consisting of 6 art history lecture courses or seminars with a minimum of three seminars (AH 6000 or AH 8000 level).
2. Three hours of AH 8010 Methodology and Historiography of Art.
3. Six hours of electives in related areas
4. Thesis proposal approved by the thesis committee.
5. Six hours of AH 8999 Thesis Research.
6. Thesis approved by the thesis committee.

(In regard to 4, 5, and 6, students should consult the latest art history thesis guidelines.)

Students should take at least one course in three of four general areas of study. These areas are:

- Ancient and Medieval Art
- Early Modern Art
- Modern and Contemporary Art
- Global South

Non-Thesis Track (36 hours):

1. 27 hours of coursework consisting of nine art history lecture courses or seminars with a minimum of four seminars (AH 6000 or AH 8000 level).
2. Three hours of AH 8010 Methodology and Historiography of Art.
3. Six hours of electives in related areas.

Students should take at least one course in three of four general areas of study. These areas are:

- Ancient and Medieval Art
- Early Modern Art
- Modern and Contemporary Art
- Global South

Dual B.A. in Art (Art History Concentration) / M.A. in Art History

The school offers a dual Bachelor of Arts with an Art History concentration and Master of Arts in Art History. The dual degree opportunity enables qualified students to enroll in graduate courses late in their undergraduate program and apply the coursework toward both the bachelor’s and master’s programs.

Students must be formally accepted into the Dual Degree program by the school and the College of the Arts to be able to take graduate courses as an undergraduate. Additionally, acceptance into the Dual Degree program does not constitute admission to the master’s program. Students must fulfill regular graduate admissions requirements and apply for the master’s program following college processes, although GRE scores are not required. All students accepted into the master’s program via the Dual Degree Program are only allowed to pursue the non-thesis track.

Master of Art Education (M.A.Ed) (36 hours)

Course of Study

1. Three hours of coursework in non-western:
   - AE 8980 Teaching Asian Art in K-12 Classroom (3)
2. Studio Art requirement: nine hours of coursework in a studio concentration:
   - ART 6980 Directed Study (3) (may be taken more than once)
3. Required Art Education coursework:
   - Nine hours of AE 8000-level coursework

4. Psychology of Learning requirement:
   - Select one:
     - *EPY 7080 The Psychology of Learning and Learners (3)
     - EPY 7090 The Psychology of Learning and Learners: The Young Child (3)

5. Philosophical and Social Foundations of Education requirement:
   - Select one:
     - EPSF 7100 Critical Pedagogy (3)
     - EPSF 7110 Multicultural Education (3)
     - *EPSF 7120 Social and Cultural Foundations of Education (3)

6. Research Methodology requirement:
   - Select one:
     - *EPRS 7900 Methods of Research in Education (3)
     - EPRS 7910 Action Research (3) (preferred)
     - EPRS 7920 Classroom Testing, Grading, and Assessment (3)

7. Thesis Research:
   - AE 8999 Thesis Research (6)

*These specific education courses are offered on-line and are aligned with the low-residency M.A.Ed. cohort program structure. M.A.Ed. students should earn at least a B in all coursework in order to graduate with a M.A.Ed. degree.

The thesis in art education may concentrate solely on an art education issue, or explore a studio or art history oriented problem that is tied to an art education issue.

Research in art education may focus on action research in the candidate's own classroom as well as other research methodologies. Thesis research that includes a thesis exhibition is also acceptable.

Master of Arts in Teaching, Art Education M.A.T. (43 hours)

Course of Study

1. Three hours of coursework in non-western:
   - AE 8980 Teaching Asian Art in K-12 Classroom (3)

2. Studio Art requirement: nine hours of coursework in a studio concentration:
   - ART 6980 Directed Study (3) (may be taken more than once)
   - DP 6980 Directed Study (3)

3. Art Education requirement: nine hours of 8000 level art education coursework
   - Select three:
     - AE 8000 Introduction to Research in Art Education (3)
     - AE 8010 Philosophy and Curriculum in Art Education (3)
     - AE 8020 Learning Theories (3)
     - AE 8050 Computer Imaging and Instructional Technology (3)
     - AE 8200 Histories and Communities in Art Education (3)
     - AE 8400 Aesthetics and Critical Theory (3)
4. Art Education Methods Certification required coursework:
   - EXC 4020 Characteristics and Instructional Strategies for Students with Disabilities (3)
   - AE 6200 Art for Preschool through Fifth Grade (3)
   - AE 6300 Art for Middle and Secondary Schools (3)
   - AE 6400 Media, Technology, and Visual Presentation (3)
   - AE 6600 Art Education Practicum (4)
   - Opening School Experience (non credit 2 week observation)
   - Select one:
     - AE 6750 Student Teaching Coursework (6)
     - AE 6785 Internship I (6)

M.A.T. students should earn at least a B in all coursework in order to graduate with a M.A.T. degree.

The Georgia Professional Standards Commission (GaPSC) requires a passing score on edTPA (the GaPSC-approved content pedagogy assessment), the GACE Art Content Assessment and Ethics (Program Exit) test for certification eligibility.

Master of Fine Arts, M.F.A., Studio (72 hours)

M.F.A. with Concentrations in Ceramics (CER), Drawing and Painting (DP), Graphic Design (GRD), Interior Design (ID), Printmaking (PRT), Photography (PHOT), Sculpture (SCUL), and Textiles (TEXT)

In general, the requirements for an M.F.A. are as follows:

<table>
<thead>
<tr>
<th>Category of Work</th>
<th>Units Required</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Studio-Specific Courses</td>
<td>30</td>
<td>Graduate Studio/Design Seminars and Graduate Studio/Design Practice</td>
</tr>
<tr>
<td>Electives</td>
<td>6</td>
<td>Variable – must be outside area of specialization, can be outside School of Art &amp; Design</td>
</tr>
<tr>
<td>Art History</td>
<td>12</td>
<td>Graduate-level courses in Art History</td>
</tr>
<tr>
<td>Thesis</td>
<td>12</td>
<td>Intensive work with a thesis committee to prepare your written thesis and exit show, lecture, presentation, or screening</td>
</tr>
</tbody>
</table>

Total 72

All M.F.A. candidates in CER, DP, PHOT, PRT, SCUL, and TEXT must complete a written thesis and an exit exhibition. Normally, ID and GRD students will also complete a written thesis and exit show, though there may be exceptions for those fields of study.
While there may be some variations, the M.F.A. in the Ernest G. Welch School of Art & Design is a three-year degree. A typical three-year course of study will proceed as follows:

**Fall, Year 1**

<table>
<thead>
<tr>

**10300 Film and Media**

Programs Offered:

- Master of Arts in Communication, Concentration in Film, Video, and Digital Imaging
- Dual B.A. in Film and Video/ M.A. in Communication, Film/Video Concentration
- Doctor of Philosophy in Communication Studies, Concentration in Moving Image Studies

School of Film, Media & Theatre
10th Floor, 25 Park Place Building
Atlanta, GA 30303

Greg Smith, Director
Ethan Tussey, Graduate Director

The School of Film, Media and Theatre offers a Master of Arts degree in Communication with a concentration in Film, Video, and Digital Imaging. This program offers an emphasis either in Moving Image Studies or Film and Media Production. The Moving Image Studies track is designed for students who want advanced credentials in film and media studies, as a stepping stone to the doctoral program or into a career in the media sector.

The Film and Media Production track builds the student’s technical expertise in all areas of digital production including editing, cinematography, sound design, and new media programming. While at the same time encouraging students to use this technical expertise to develop a strong and original aesthetic voice.

The School of Film, Media and Theatre also offers a Ph.D. in Communication Studies with a concentration in Moving Image Studies. Drawing theoretical perspectives from film, television, new media, and performance studies, the Moving Image Studies Ph.D. program prepares students to investigate how moving images are constructed and perceived, how they impact the culture, and how the visual and performing arts are being transformed in the digital age.

Additional Admission Requirements
In addition to the general requirements of the College of the Arts, the School of Film, Media & Theatre has the following requirements:

1. All applicants to the M.A. program must submit:
   - A statement of educational or career goals.
   - Two letters of recommendation from individuals who can evaluate the applicant’s potential to do graduate work in Film, Video, and Digital Imaging.
   - An above-average undergraduate grade-point average (a minimally qualified applicant typically will achieve at least a 3.0).

2. All applicants to the M.A. in the Moving Image Studies Track must also submit:
   - Sufficiently high score on the verbal portion of the Graduate Records Examination prior to consideration for acceptance into the graduate degree program.

3. Applicants to the Ph.D. program must submit:
   - A statement of educational or career goals.
   - Three letters of recommendation from individuals who can evaluate the applicant’s potential to do graduate work in Moving Image Studies.
   - An above average undergraduate and master’s grade point average.
   - Satisfactory scores on the General Test of the GRE (International students, the TOEFL Examination).
   - A writing sample that demonstrates their ability to conduct and effectively present academic research.

NOTE: All applicants for the Moving Image Studies Ph.D. program must have earned a master’s degree before entering the program.

Applicants for the Moving Image Production emphasis of the M.A. program and Ph.D. applicants will be admitted in the fall only. Applications for the Moving Image Studies emphasis of the M.A. program will be accepted for both fall and spring semesters. Deadline for application for fall admission is February 10 for Ph.D applicants and March 15 for M.A. applicants. Deadline for application for the spring semester (for the Moving Image Studies emphasis of the M.A. program only) is November 15. The school will not consider requests for Special Graduate Status admission.

Program Financial Information

Lab fees will be assessed automatically for students who register for certain courses. For more information, please feel free to contact the school or review the GoSolar or catalog course listings to determine if a course includes a lab fee.

Degree Requirements

Students must earn a grade of “B” or better in all required coursework.

Master of Arts (Research Thesis option: minimum 36 hours)

1. Seven hours of core courses: FLME 6020 and FLME 6155.
2. Seventeen to twenty-three hours of courses in Film and Media at the graduate level.
3. Up to six hours of coursework can be in related fields.
4. Proficiency in a foreign language or approved research skill.
5. Six hours of FLME 6990, Thesis Research.
6. A successful prospectus defense.
8. A successful research thesis defense.

Master of Arts (Creative thesis option: minimum 36 hours)

1. Seven hours of core courses: FLME 6020 and FLME 6155.
2. Seventeen to twenty-six hours in Film and Media at the graduate level.
3. Up to nine hours of coursework in related fields.
4. Proficiency in a foreign language or approved research skill.
5. Three hours of FLME 6995, Thesis Production.
6. A successful prospectus defense.
7. A creative thesis project.

Master of Arts (Course-Intensive option: minimum 36 hours)

1. Seven hours of core courses: FLME 6020 and FLME 6155.
2. Twenty to twenty-nine additional hours in Film and Media at the graduate level.
3. Up to nine hours of coursework in related fields.
4. Proficiency in a foreign language or approved research skill.
5. Submission of an approved writing sample in consultation with the graduate director.

Doctor of Philosophy in Communication Studies Concentration in Moving Image Studies (Minimum of 68 hours beyond the master's degree)

1. Required courses (5)
   - FLME 8111 Introduction to Graduate Studies (2)
   - FLME 8035 Doctoral Colloquium in Communication Pedagogy (3)
2. An additional thirty-three hours in area of concentration.
3. At least nine hours of research tools (approved courses that fall within the general categories of research methodologies).
4. Twenty-one hours of FLME 9999 Dissertation Research.
5. A written and oral comprehensive examination.
6. A successful Prospectus defense.

Dual B.A. in Film and Video / M.A. in Communication, Film/Video Concentration

The school offers a dual B.A. in Film and Video/M.A. in Communication with a concentration in Film, Video and Digital Imaging. The dual degree opportunity enables qualified students to enroll in graduate courses late in their undergraduate program and count the coursework toward both the bachelor’s and master’s programs.
Students must be formally accepted into the dual degree program by the school and the College of the Arts to be able to take graduate courses as an undergraduate. Admission to the Dual Degree program occurs during the fall and spring semesters. Additionally, acceptance into the dual program does not constitute admission to the master’s program. Students must apply for the master’s program following college processes, although GRE scores are not required.

10400 Music

Programs Offered:

- **Master of Music**
  - Concentration in Choral Conducting
  - Concentration in Composition
  - Concentration in Guitar Performance
  - Concentration in Jazz Studies
  - Concentration in Music Education
  - Concentration in Orchestral Conducting
  - Concentration in Orchestral Instrument Performance
  - Concentration in Organ Performance
  - Concentration in Piano Pedagogy
  - Concentration in Piano Performance
  - Concentration in Wind Band Conducting
  - Concentration in Voice Performance

- **Artist Certificate in Music**
  - Concentration in Choral Conducting
  - Concentration in Piano Performance
  - Concentration in Orchestral Instrument Performance
  - Concentration in Orchestral Conducting
  - Concentration in Voice Performance
  - Concentration in Wind Band

- **Dual B.Mu./M.Mu. Program**
- **Doctor of Education (Ed.D) in Curriculum and Instruction with Concentration in Music Education (in cooperation with the College of Education and Human Development)**
- **Doctor of Philosophy (Ph.D) in Teaching and Learning with Concentration in Music Education (in cooperation with the College of Education and Human Development)**

School of Music
5th floor Haas Howell Building

Email: somadmissions@gsu.edu
Nick Demos, Director  
Jan Baker, Director of Graduate Studies

The mission of the School of Music is to provide a comprehensive, rigorous, and innovative academic program that is consistent with the urban context and mission of Georgia State University, and that serves the pursuit of artistic, professional, and scholarly excellence.

The School of Music offers a Master of Music degree that prepares students for careers in music and for further specialized study in music at the doctoral level. The graduate degree includes specializations in performance (keyboard instruments, orchestral instruments, and voice), composition, choral conducting, instrumental conducting, piano pedagogy, jazz studies, and music education. Complete descriptions of these programs may be obtained by contacting the School of Music, or visiting the School of Music website. In addition to courses and degree programs, the School of Music offers concerts, recitals, lectures, and workshops that are open to all students and to the community. The School of Music is an accredited institutional member of the National Association of Schools of Music.

The School of Music is located in the historic Fairlie Poplar District in downtown Atlanta. The four buildings which comprise the Music Complex are all located in the same block. They are the Haas-Howell Building at 75 Poplar Street, the Rialto Center for the Performing Arts at 80 Forsyth Street, the Standard Building at 92 Luckie Street, and the Aderhold Learning Center. Some classes are held in the Art and Humanities Building at 10 Peachtree Center Avenue. Chamber music concerts and faculty and student recitals are presented in the Florence Kopleff Recital Hall in the Art and Humanities Building while large ensembles perform in the newly renovated Rialto Center Theater, a state-of-the-art performance venue seating 950. The administrative offices are on the fifth floor of the Haas-Howell Building.

A Ph.D. in Teaching and Learning with a concentration in music education and a Doctor of Education in Curriculum and Instruction with a concentration in music education is offered by the College of Education and Human Development in conjunction with the School of Music. General admission and program requirements are outlined in the College of Education and Human Development chapter of this catalog and at www.music.gsu.edu.

Applicants may obtain additional information about the School of Music by contacting the Director of Graduate Studies at the addresses above.

Additional Admission Requirements

In addition to the general requirements of the College of the Arts, the School of Music has the following requirements:

1. Applicants must have an undergraduate degree or concentration in music, or the equivalent.
2. Applicants in music education must submit either GRE scores or Miller Analogies Test (MAT) scores.
3. Applicants in some programs must audition and/or submit a portfolio (see below).
4. Applicants are required to take placement examinations in music history and music theory before registering for coursework. Those applicants whose examination scores reveal deficiencies will be required to take appropriate additional coursework, which will not be applied to the graduate degree.

933
**Master of Music: Concentration in Choral Conducting**

Additional Admissions Requirements

Applicants must submit the following materials: an audio or video recording of a recent choral concert; at least three printed programs of concerts or church services that have been performed within the last four years; a repertory list of choral music conducted and sung and of music performed in applied areas.

**Master of Music: Concentration in Composition**

Additional Admissions Requirements

Applicants must submit a portfolio of original music scores, and recordings of composed works.

**Master of Music: Concentration in Guitar Performance**

Additional Admissions Requirements

Applicants for the Master of Music (Guitar Performance) must audition and complete the audition form located on the School of Music website: music.gsu.edu.

Applicants may contact the Music School of Music directly at 404-413-5900 with questions regarding audition dates and appointments. Applicants are advised to audition on one of the School’s regularly scheduled audition days. Individual appointments may be permitted in certain cases. Decisions for admittance are made after all required application materials and audition results are on file.

**Master of Music: Concentration in Jazz Studies**

Additional Admissions Requirements

Admission to the concentration in jazz studies is based on examination of one or more of the following: original compositions, arrangements, scholarly papers, audition, and professional experience.

An audition is required. The applicant must have had prior experience in improvisation. At the audition the applicant must demonstrate an acceptable level of proficiency in the styles of swing, bebop, funk, and contemporary jazz.

**Master of Music: Concentration in Music Education**

Additional Admissions Requirements

Each applicant should (1) have either a teaching certificate in music from the state of Georgia or an equivalent certificate, or be eligible to receive such certification, and (2) have concurrent or prior teaching experience of at least one year. Applicants to this concentration must submit acceptable scores from either the Graduate Record Examination or from the Miller Analogies Test.

**Master of Music: Concentrations in Orchestral and Wind Band Conducting**
Additional Admissions Requirements

Applicants must submit the following: a video of a rehearsal and an audiotape or videotape of one or more recent performances by an ensemble that they have conducted; a list of works that they have conducted in the past three years; a list of works performed on their major instrument at the undergraduate level; evidence of current employment as an instrumental conductor or access to an appropriate instrumental ensemble; applicants should expect to demonstrate their conducting and rehearsal techniques in a live performance with their own ensemble or a university ensemble.

Master of Music: Concentrations in Performance

Additional Admissions Requirements

In order to be admitted to these concentrations, applicants must demonstrate outstanding performance ability in an audition before a faculty committee. Auditions should be arranged in accordance with the schedule available from the School of Music. Applicants for a concentration in performance should contact the School of Music for details concerning audition requirements and to obtain an audition appointment.

Master of Music: Concentration in Piano Pedagogy

Additional Admissions Requirements:

Applicants to this concentration are required to play an audition including works from four historical periods. All works must be performed from memory.

Artist Certificate in Music

To be admitted into the Artist Certificate program, students must have either a master’s degree in music or equivalent professional experience.

Artist Certificate in Music: Concentrations in Performance (Orchestral Instrument, Piano, Voice)

Additional Admissions Requirements

In order to be admitted to these concentrations, applicants must demonstrate outstanding performance ability in an audition before a faculty committee. Applicants may contact the Music Admissions and Enrollment office directly at 404-413-5955 with questions regarding audition dates and appointments.

Artist Certificate in Music: Concentrations in Conducting (Choral Conducting, Orchestral Conducting, Wind Band Conducting)

Additional Admissions Requirements

In order to be admitted to these concentrations, applicants must demonstrate outstanding performance ability in an audition before a faculty committee. Applicants may contact the Music Admissions and Enrollment office directly at 404-413-5955 with questions regarding audition dates and appointments.
Degree Requirements

Students must achieve a B- or better in all required courses for the Master of Music degree in order to have courses count for degree completion.

Master of Music (36 hours)

Concentration in Choral Conducting

Degree Requirements

1. Required Courses:
   - Select one (2) (two semesters):
     - APVC 6000 Applied Voice I (1)
     - APPF 6000 Applied Piano I (1)
   - MUS 6450 Advanced Tonal Analysis (3)
   - MUS 6470 Graduate Choral Conducting Recital (0)
   - MUS 6480 Choral Conducting (2)
   - MUS 6640 Choral Literature I (3)
   - MUS 6641 Choral Literature II (3)
   - MUS 7080 Ensemble (1) (four semesters)
   - MUS 7220 Workshop Seminar in Choral Conducting and Performance (2) (three semesters)
   - MUS 7430 Choral Methods and Materials (3)
   - MUS 8000 Introduction to Graduate Studies (2)
   - Two 8000-level course in music history (3) (two semesters)
   - MUS 8680 Seminar in Instrument Conducting (2)

2. Comprehensive examination:
   By the midpoint of the final semester of study, the student will schedule an oral and/or written examination. The committee should include at least three faculty members (including the applied instructor or area coordinator, one theory faculty member, and one history faculty member). The examinations will assess the student's knowledge regarding repertoire, pedagogy, music theory, and music history. The student will be expected to synthesize his/her knowledge and demonstrate a high level of musical understanding. Preparation should include a detailed review of all graduate courses taken and a review of the music that has been studied and performed as part of the master's program. Each area will determine the proficiency requirements for the Comprehensive Exam for the Major Area. The appropriate area will administer the Major Area portion of the comprehensive exam and students will be required to demonstrate proficiency as determined by their major professor and/or area coordinator. These exams may consist of paper, an oral exam, program notes for recital, a short lecture to be presented in conjunction with a recital, etc. Each foundation studies member will determine appropriate comprehensive examination questions based on the coursework the student has completed at Georgia State University in their appropriate field, and will administer the exam as they see fit. This can be an oral exam, written exam, papers, etc. It will be the student's responsibility to complete all portions of these comprehensive exams and collect appropriate approval signatures from their major area, music history, and music theory and turn their final comprehensive exam form into the graduate director. Students planning to graduate in the Fall or Spring must complete the comprehensive examination by the end of the twelfth week of classes. Students planning to graduate in the Summer must complete the comprehensive examination by the
end of the fourth week of classes.

Concentration in Composition

Degree Requirements

1. Required Courses:
   - APCP 8001 Applied Composition I (3)
   - APCP 8002 Applied Composition II (3)
   - APCP 8003 Applied Composition III (3)
   - APCP 8004 Applied Composition IV (3)
   - MUS 6210 Composition Seminar (2) (four semesters)
   - MUS 6460 Analysis of Post-Tonal Music (3)
   - MUS 8000 Introduction to Graduate Studies (2)
   - MUS 8870 Twentieth Century Music (3)
   - MUS 8890 Composition Recital (3)
   - MUS 8910 Final Project in Composition (2)

2. Up to (3) credit hours of electives. The following electives are encouraged:
   - MUS 6110 Orchestration and Instrumentation (3)
   - MUS 6450 Advanced Tonal Analysis (3)
   - MUS 6480 Choral Conducting (2)
   - MUS 6500 Historical Counterpoint (3)
   - MUS 6971 Survey of Electroacoustic Music (3) (Prerequisite: MUS 6730 or equivalent)
   - MUS 6980 Electroacoustic Music Composition (3)
   - MUS 6981 Computer Music (3) (Prerequisite: MUS 6030 or equivalent)
   - MUS 6982 Adv. Topics in Computer Music (3) (Prerequisite: MUS 6981 or equivalent)
   - MUS 8430 Special Topics in Music Theory (3)
   - MUS 8680 Seminar in Instrumental Conducting (2)

3. A piano proficiency examination to be taken after the second semester of enrollment or 20 hours of study.

4. Comprehensive examination:
   By the midpoint of the final semester of study, the student will schedule an oral and/or written examination. The committee should include at least three faculty members (including the applied instructor or area coordinator, one theory faculty member, and one history faculty member). The examinations will assess the student’s knowledge regarding repertoire, pedagogy, music theory, and music history. The student will be expected to synthesize his/her knowledge and demonstrate a high level of musical understanding. Preparation should include a detailed review of all graduate courses taken and a review of the music that has been studied and performed as part of the master’s program. Each area will determine the proficiency requirements for the Comprehensive Exam for the Major Area. The appropriate area will administer the Major Area portion of the comprehensive exam and students will be required to demonstrate proficiency as determined by their major professor and/or area coordinator. These exams may consist of paper, an oral exam, program notes for recital, a short lecture to be presented in conjunction with a recital, etc. Each foundation studies member will determine appropriate comprehensive examination questions based on the coursework the student has completed at Georgia State University in their appropriate field, and will administer the exam as they see fit. This can be an oral exam, written exam, papers, etc. It will be the student’s responsibility to complete all portions of these comprehensive exams and collect appropriate
approval signatures from their major area, music history, and music theory and turn their final comprehensive exam form into the graduate director. Students planning to graduate in the Fall or Spring must complete the comprehensive examination by the end of the twelfth week of classes. Students planning to graduate in the Summer must complete the comprehensive examination by the end of the fourth week of classes.

Concentration in Guitar Performance

Degree Requirements: Guitar Concentration

1. Required Courses:
   - APGT 8001 Applied Guitar I (3)
   - APGT 8002 Applied Guitar II (3)
   - APGT 8003 Applied Guitar III (3)
   - APGT 8004 Applied Guitar IV (3)
   - MUS 6010 Performance Laboratory (0) (four semesters)
   - Select one (3):
     - MUS 6910 Chamber Literature (3)
     - MUS 6940 Orchestral Literature (3)
   - Select (4) credit hours:
     - MUS 7060 Wind Ensemble (1) (four semesters)
     - MUS 7070 Orchestra (1) (four semesters)
     - MUS 7080 Men’s Chorus (1) (four semesters) or
     - any graduate level elective (4)
   - MUS 7150 Guitar Ensemble (0.5) (four semesters)
   - MUS 8000 Introduction to Graduate Studies (2)
   - MUS 8490 Chamber Recital (1)
   - MUS 8590 Solo Recital (1)

2. One 8000-level course in music history (3)

3. One graduate-level course in music theory (3)
   - MUS 6450 Advanced Tonal Analysis (3)
   - MUS 6500 Historical Counterpoint (3)
   - MUS 6460 Analysis of Post-Tonal Music (3)

4. Five credit hours of graduate-level electives in music

5. Comprehensive examination:
   By the midpoint of the final semester of study, the student will schedule an oral and/or written examination. The committee should include at least three faculty members (including the applied instructor or area coordinator, one theory faculty member, and one history faculty member). The examinations will assess the student’s knowledge regarding repertoire, pedagogy, music theory, and music history. The student will be expected to synthesize his/her knowledge and demonstrate a high level of musical understanding. Preparation should include a detailed review of all graduate courses taken and a review of the music that has been studied and performed as part of the master’s program. Each area will determine the proficiency requirements for the Comprehensive Exam for the Major Area. The appropriate area will administer the Major Area portion of the comprehensive exam and students will be required to demonstrate proficiency as determined by their major professor and/or area coordinator. These exams may consist of paper, an oral exam, program notes for recital, a short lecture to be presented in conjunction with a recital, etc. Each foundation studies
member will determine appropriate comprehensive examination questions based on the coursework the student has completed at Georgia State University in their appropriate field, and will administer the exam as they see fit. This can be an oral exam, written exam, papers, etc. It will be the student’s responsibility to complete all portions of these comprehensive exams and collect appropriate approval signatures from their major area, music history, and music theory and turn their final comprehensive exam form into the graduate director. Students planning to graduate in the Fall or Spring must complete the comprehensive examination by the end of the twelfth week of classes. Students planning to graduate in the Summer must complete the comprehensive examination by the end of the fourth week of classes.

Concentration in Jazz Studies

Degree Requirements

1. Required Courses:
   - APXX 8000 Applied Instruction (3) (four semesters)
   - MUS 6170 Jazz Arranging (2)
   - MUS 6230 Jazz Composition (2)
   - MUS 6792 Jazz Theory (2)
   - MUS 7090 Jazz Band (1) [four semesters]
   - MUS 7160 Jazz Combo (.5) [four semesters]
   - MUS 8000 Introduction to Graduate Studies (2)
   - MUS 8220 Jazz Pedagogy (2)
   - MUS 8230 Jazz Program Administration (2)

2. One 8000-level course in music history (3)

3. One graduate-level course in music theory (3)
   - MUS 6450 Advanced Tonal Analysis (3)
   - MUS 6500 Historical Counterpoint (3)
   - MUS 6460 Analysis of Post-Tonal Music (3)
   - MUS 8430 Special Topics in Music Theory (3)

4. A final project consisting of a public performance.

5. Comprehensive examination:
   By the midpoint of the final semester of study, the student will schedule an oral and/or written examination. The committee should include at least three faculty members (including the applied instructor or area coordinator, one theory faculty member, and one history faculty member). The examinations will assess the student’s knowledge regarding repertoire, pedagogy, music theory, and music history. The student will be expected to synthesize his/her knowledge and demonstrate a high level of musical understanding. Preparation should include a detailed review of all graduate courses taken and a review of the music that has been studied and performed as part of the master’s program. Each area will determine the proficiency requirements for the Comprehensive Exam for the Major Area. The appropriate area will administer the Major Area portion of the comprehensive exam and students will be required to demonstrate proficiency as determined by their major professor and/or area coordinator. These exams may consist of paper, an oral exam, program notes for recital, a short lecture to be presented in conjunction with a recital, etc. Each foundation studies member will determine appropriate comprehensive examination questions based on the coursework the student has completed at Georgia State University in their appropriate field, and will administer the exam as they see fit. responsibility to complete all portions of these comprehensive exams and collect appropriate approval signatures from their major area, music history, and music theory and turn their final comprehensive exam form into the graduate director. Students planning to graduate in the Fall or Spring must complete the comprehensive examination by the end of the twelfth week of classes. Students planning to graduate in the Summer must complete the comprehensive examination by the end of the fourth week of classes.

Concentration in Music Education

Degree Requirements

1. Required Courses: *Select twelve hours from:
   - EPRS 7900 Methods of Research in Education (3)
   - EPSF 7120 Social and Cultural Foundations of Education (3)
   - EPY 7080 Psychology of Learning and the Learner (3)
   - MUS 7400 Foundations of Music Education (3)
   - MUS 7590 Seminar in Music Teaching and Learning (3)
   - MUS 8240 Research in Music Education (3)
   - MUS 8260 Curriculum and Assessment in Music Education (3)

2. *Select three hours from:
   - MUS 7200 Principles and Strategies of General Music Instruction (3)
   - MUS 7250 Music in the Education of Special Needs Children (3)
   - MUS 7430 Choral Methods and Techniques (3)
   - MUS 7560 Winds: Organization and Development of Instrumental Music (3)
   - MUS 7570 Strings: String Literature and Materials (3)

3. *Select three hours from:
   - MUS 7230 Special Topics in Music Education (3)
   - MUS 7700 Psychology of Music Learning (3)
   - MUS 8210 Arts, Education, and the Community (3)
   - MUS 8400 Contemporary Issues and Philosophies in Music Education (3)
   - MUS 8580 Leadership and Supervision of Music Education (3)

4. *Select three additional hours from:
   - MUS 7200 Principles and Strategies of General Music Instruction (3)
   - MUS 7250 Music in the Education of Special Needs Children (3)
   - MUS 7430 Choral Methods and Techniques (3)
   - MUS 7560 Winds: Organization and Development of Instrumental Music (3)
   - MUS 7570 Strings: String Literature and Materials (3)
   - MUS 7700 Psychology of Music Learning (3)
   - MUS 8400 Contemporary Issues and Philosophies in Music Education (3)

5. One 8000-level course in music history (3)
6. One graduate-level course in music theory (3)
   - MUS 6450 Advanced Tonal Analysis (3)
   - MUS 6500 Historical Counterpoint (3)
   - MUS 6460 Analysis of Post-Tonal Music (3)
   - MUS 8430 Special Topics in Music Theory (3)

7. MUS 6730 Computer Applications in Music (2) or substitute course
8. One graduate-level elective course in music (3)
9. *Research or Pedagogy Project in Music Education (4).* These four credits are to be taken concurrently. Research projects (MUS 7300) must be focused on the application of research in music education. The practicum option (MUS 8950) is open only to those currently employed as music teachers. Formal presentation of the project or analysis of the practicum (MUS 8900) may take a number of forms, including a paper, a presentation, or a workshop for teachers.

- MUS 8900 Non-Thesis Research in Music (1) and MUS 7300 Directed Study in Music Education (3) OR
- MUS 8900 Non-Thesis Research in Music (1) and MUS 8950 Practicum in Music Education (3)

10. Comprehensive examination: The comprehensive examination in Music Education will take the form of a cumulative paper and portfolio.

- CUMULATIVE PAPER AND PORTFOLIO: Students are required to fulfill two parameters during the final semester of coursework toward the M.Mu.in Music Education. These comprise the presentation of a cumulative paper and cumulative portfolio.
- CUMULATIVE PAPER: The cumulative paper will be a research paper of substantial scope and length. The cumulative paper will be developed with faculty guidance throughout a student’s tenure at GSU. The paper may (or may not) involve a research project overseen by the university’s Institutional Review Board. The cumulative paper will be presented to the review committee in written form one month prior to an oral defense. The defense will consist of a research poster presentation, a PowerPoint-based overview of the content, and responses to questions from the review committee.
- CUMULATIVE PORTFOLIO: The portfolio will be evaluated by the review committee at the time of the cumulative paper presentation. The portfolio should consist of at least seven sections: one section of each of the four core courses (MUS 7400, MUS 7590, MUS 8240, and MUS 8260), one section for the primary methods course, one section for the Research or Pedagogy Project, and one section for the courses in Musical Studies. Each section should include at least one paper (or substantive project not limited to print form) that demonstrates substantial learning. The opening pages of the portfolio should include the student’s current resume, a list of professional development activities undertaken during the course of study (conferences attended, workshops given, articles written, etc.), and a 1500 word (minimum) statement about how the specific contents of the portfolio demonstrate both the breadth and depth of learning during the course of study.

*Note: Courses under 1, 2, 3, 4, and 9 require B or better.*

### Concentrations in Orchestral Conducting

#### Degree Requirements

1. Required Courses:
   - APCD 8001 Applied Instrumental Conducting I (3)
   - APCD 8002 Applied Instrumental Conducting II (3)
   - APCD 8003 Applied Instrumental Conducting III (3)
2. One 8000-level course in music history (3)
3. One graduate-level course in music theory (3)
   - MUS 6450 Advanced Tonal Analysis (3)
   - MUS 6500 Historical Counterpoint (3)
   - MUS 6460 Analysis of Post-Tonal Music (3)
   - MUS 8430 Model Composition (3)
4. Seven credit hours of graduate-level electives in music
5. Comprehensive examination:
   By the midpoint of the final semester of study, the student will schedule an oral and/or written examination. The committee should include at least three faculty members (including the applied instructor or area coordinator, one theory faculty member, and one history faculty member). The examinations will assess the student’s knowledge regarding repertoire, pedagogy, music theory, and music history. The student will be expected to synthesize his/her knowledge and demonstrate a high level of musical understanding. Preparation should include a detailed review of all graduate courses taken and a review of the music that has been studied and performed as part of the master’s program. Each area will determine the proficiency requirements for the Comprehensive Exam for the Major Area. The appropriate area will administer the Major Area portion of the comprehensive exam and students will be required to demonstrate proficiency as determined by their major professor and/or area coordinator. These exams may consist of paper, an oral exam, program notes for recital, a short lecture to be presented in conjunction with a recital, etc. Each foundation studies member will determine appropriate comprehensive examination questions based on the coursework the student has completed at Georgia State University in their appropriate field, and will administer the exam as they see fit. This can be an oral exam, written exam, papers, etc. It will be the student’s responsibility to complete all portions of these comprehensive exams and collect appropriate approval signatures from their major area, music history, and music theory and turn their final comprehensive exam form into the graduate director. Students planning to graduate in the Fall or Spring must complete the comprehensive examination by the end of the twelfth week of classes. Students planning to graduate in the Summer must complete the comprehensive examination by the end of the fourth week of classes.

Concentrations in Performance

Degree Requirements: Orchestral Instrument

1. Required Courses:
   - APXX 8001 Applied Music I (3)
   - APXX 8002 Applied Music II (3)
   - APXX 8003 Applied Music III (3)
   - APXX 8004 Applied Music IV (3)
Select one (3):
- MUS 6910 Chamber Literature (3)
- MUS 6940 Orchestral Literature (3)
- MUS 6941 Orchestral Literature II (3)
- MUS 7060, 7070 Large Ensembles (1) (four semesters)
- MUS 7110-7150 Chamber Ensembles (0.5) (four semesters)
- MUS 8000 Introduction to Graduate Studies (2)
- MUS 8490 Chamber Recital (1)
- MUS 8590 Solo Recital (1)

2. One 8000-level course in music history (3)
3. One graduate-level course in music theory (3)
   - MUS 6450 Advanced Tonal Analysis (3)
   - MUS 6500 Historical Counterpoint (3)
   - MUS 6460 Analysis of Post-Tonal Music (3)
   - MUS 8430 Special Topics in Music Theory (3)

4. Five credit hours of graduate-level electives in music
5. Comprehensive examination:
   By the midpoint of the final semester of study, the student will schedule an oral and/or written examination. The committee should include at least three faculty members (including the applied instructor or area coordinator, one theory faculty member, and one history faculty member). The examinations will assess the student's knowledge regarding repertoire, pedagogy, music theory, and music history. The student will be expected to synthesize his/her knowledge and demonstrate a high level of musical understanding. Preparation should include a detailed review of all graduate courses taken and a review of the music that has been studied and performed as part of the master's program. Each area will determine the proficiency requirements for the Comprehensive Exam for the Major Area. The appropriate area will administer the Major Area portion of the comprehensive exam and students will be required to demonstrate proficiency as determined by their major professor and/or area coordinator. These exams may consist of paper, an oral exam, program notes for recital, a short lecture to be presented in conjunction with a recital, etc. Each foundation studies member will determine appropriate comprehensive examination questions based on the coursework the student has completed at Georgia State University in their appropriate field, and will administer the exam as they see fit. This can be an oral exam, written exam, papers, etc. It will be the student's responsibility to complete all portions of these comprehensive exams and collect appropriate approval signatures from their major area, music history, and music theory and turn their final comprehensive exam form into the graduate director. Students planning to graduate in the Fall or Spring must complete the comprehensive examination by the end of the twelfth week of classes. Students planning to graduate in the Summer must complete the comprehensive examination by the end of the fourth week of classes.

Degree Requirements: Organ

1. Required Courses:
   - APHC 6000 Applied Harpsichord/Continuo (1)
   - APOR 6500 Applied Service Playing/Improvisation (1) (four semesters)
   - APOR 8001 Applied Organ I (3)
   - APOR 8002 Applied Organ II (3)
   - APOR 8003 Applied Organ III (3)
2. One 8000-level course in music history (3)
3. One graduate-level course in music theory (3)
   - MUS 6450 Advanced Tonal Analysis (3)
   - MUS 6500 Historical Counterpoint (3)
   - MUS 6460 Analysis of Post-Tonal Music (3)
   - MUS 8430 Special Topics in Music Theory (3)
4. Three credit hours of graduate-level electives in music hour (3)
5. Comprehensive examination:
   By the midpoint of the final semester of study, the student will schedule an oral and/or written examination. The committee should include at least three faculty members (including the applied instructor or area coordinator, one theory faculty member, and one history faculty member). The examinations will assess the student’s knowledge regarding repertoire, pedagogy, music theory, and music history. The student will be expected to synthesize his/her knowledge and demonstrate a high level of musical understanding. Preparation should include a detailed review of all graduate courses taken and a review of the music that has been studied and performed as part of the master’s program. Each area will determine the proficiency requirements for the Comprehensive Exam for the Major Area. The appropriate area will administer the Major Area portion of the comprehensive exam and students will be required to demonstrate proficiency as determined by their major professor and/or area coordinator. These exams may consist of paper, an oral exam, program notes for recital, a short lecture to be presented in conjunction with a recital, etc. Each foundation studies member will determine appropriate comprehensive examination questions based on the coursework the student has completed at Georgia State University in their appropriate field, and will administer the exam as they see fit. Students planning to graduate in the Fall or Spring must complete the comprehensive examination by the end of the twelfth week of classes. Students planning to graduate in the Summer must complete the comprehensive examination by the end of the fourth week of classes.

Degree Requirements: Piano

1. Required Courses:
   - APPF 8001 Applied Piano I (3)
   - APPF 8002 Applied Piano II (3)
   - APPF 8003 Applied Piano III (3)
   - APPF 8004 Applied Piano IV (3)
   - MUS 6010 Performance Laboratory (0) (four semesters)
   - Select one (3):
     - MUS 6410 Piano Pedagogy I (3)
2. One 8000-level course in music history (3)
3. One graduate-level course in music theory (3)
   o MUS 6450 Advanced Tonal Analysis (3)
   o MUS 6500 Historical Counterpoint (3)
   o MUS 6460 Analysis of Post-Tonal Music (3)
   o MUS 8430 Special Topics in Music Theory (3)
4. Six credit hours of graduate-level electives chosen from the following:
   o MUS 6360 Advanced Keyboard Skills (2)
   o MUS 6500 Historical Counterpoint (3)
   o MUS 6620 Solo Song Literature I (3)
   o MUS 6680 The Piano: It’s Historical Development, Construction and Technology (2)
   o MUS 6730 Computer Applications in Music (2)
   o MUS 6750 Group Instruction in Jazz Keyboard (1)
   o MUS 6792 Jazz Theory (2)
   o MUS 6910 Chamber Literature (3)
   o MUS 6940 Orchestral Literature (3)
   o MUS 6941 Orchestral Literature II (3)
5. A piano proficiency examination to be taken after the second semester of enrollment or 20 hours of study, or successful completion of MUS 6360 Advanced Keyboard Skills.
6. Comprehensive examination:
   By the midpoint of the final semester of study, the student will schedule an oral and/or written examination. The committee should include at least three faculty members (including the applied instructor or area coordinator, one theory faculty member, and one history faculty member). The examinations will assess the student’s knowledge regarding repertoire, pedagogy, music theory, and music history. The student will be expected to synthesize his/her knowledge and demonstrate a high level of musical understanding. Preparation should include a detailed review of all graduate courses taken and a review of the music that has been studied and performed as part of the master’s program. Each area will determine the proficiency requirements for the Comprehensive Exam for the Major Area. The appropriate area will administer the Major Area portion of the comprehensive exam and students will be required to demonstrate proficiency as determined by their major professor and/or area coordinator. These exams may consist of paper, an oral exam, program notes for recital, a short lecture to be presented in conjunction with a recital, etc. Each foundation studies member will determine appropriate comprehensive examination questions based on the coursework the student has completed at Georgia State University in their appropriate field, and will administer the exam as they see fit. This can be an oral exam, written exam, papers, etc. It will be the student’s responsibility to complete all portions of these comprehensive exams and collect appropriate approval signatures from their major area, music history, and music theory and turn their final comprehensive exam form into the graduate director. Students planning to graduate in the Fall or Spring must complete the comprehensive examination by the end of the twelfth week of classes. Students planning to graduate in the Summer must complete the comprehensive examination by the
end of the fourth week of classes.

Degree Requirements: Voice

1. Required Courses:
   - APVC 8001 Applied Voice I (3)
   - APVC 8002 Applied Voice II (3)
   - APVC 8003 Applied Voice III (3)
   - APVC 8004 Applied Voice IV (3)
   - MUS 6010 Performance Laboratory (0) (four semesters)
   - MUS 6620 Solo Song Lit I (2)
   - MUS 6621 Solo Song Lit II (2)
   - Select one (2) (two semesters):
     - MUS 7080 Men’s Chorus (1)
     - MUS 7080A University Singers (1)
     - MUS 7081 Choral Union (1)
     - MUS 7083 Master Singers (1)
   - MUS 8000 Introduction to Graduate Studies (2)
   - MUS 8590 Solo Recital (1)
   - MUS 8620 Opera Theatre Workshop (5 credit over any number of semesters)
   - MUS 8625 Opera Production (3)

2. One 8000-level course in music history or MUS 6660 Dramatic Music (3)

3. One graduate-level course in music theory (3)
   - MUS 6450 Advanced Tonal Analysis (3)
   - MUS 6500 Historical Counterpoint (3)
   - MUS 6460 Analysis of Post-Tonal Music (3)
   - MUS 8430 Special Topics in Music Theory (3)

4. One credit hour graduate-level music elective

5. Comprehensive examination:
   By the midpoint of the final semester of study, the student will schedule an oral and/or written examination. The committee should include at least three faculty members (including the applied instructor or area coordinator, one theory faculty member, and one history faculty member). The examinations will assess the student’s knowledge regarding repertoire, pedagogy, music theory, and music history. The student will be expected to synthesize his/her knowledge and demonstrate a high level of musical understanding. Preparation should include a detailed review of all graduate courses taken and a review of the music that has been studied and performed as part of the master’s program. Each area will determine the proficiency requirements for the Comprehensive Exam for the Major Area. The appropriate area will administer the Major Area portion of the comprehensive exam and students will be required to demonstrate proficiency as determined by their major professor and/or area coordinator. These exams may consist of paper, an oral exam, program notes for recital, a short lecture to be presented in conjunction with a recital, etc. Each foundation studies member will determine appropriate comprehensive examination questions based on the coursework the student has completed at Georgia State University in their appropriate field, and will administer the exam as they see fit. This can be an oral exam, written exam, papers, etc. It will be the student’s responsibility to complete all portions of these comprehensive exams and collect appropriate approval signatures from their major area, music history, and music theory and turn their final comprehensive exam form into the graduate director. Students planning to graduate in the Fall or
Spring must complete the comprehensive examination by the end of the twelfth week of classes. Students planning to graduate in the Summer must complete the comprehensive examination by the end of the fourth week of classes.

6. Proficiency in Italian, German, French, and English diction.

Concentration in Piano Pedagogy

Degree Requirements:

1. Required Courses:
   - APPF 8001 Applied Piano I (3)
   - APPF 8002 Applied Piano II (3)
   - APPF 8003 Applied Piano III (3)
   - MUS 6010 Performance Laboratory (0) (three semesters)
   - MUS 6080 Practicum in Piano Pedagogy (2)
   - MUS 6410 Piano Pedagogy I (3)
   - MUS 6411 Piano Pedagogy II (3)
   - MUS 6530 Accompanying (1) (one semester)
   - MUS 6610 Piano Literature (3)
   - MUS 7970 Piano Pedagogy III (2)
   - MUS 8000 Introduction to Graduate Studies (2)
   - MUS 8420 Degree Recital (1)

2. One 8000-level course in music history (3)

3. One graduate-level course in music theory (3)
   - MUS 6450 Advanced Tonal Analysis (3)
   - MUS 6500 Historical Counterpoint (3)
   - MUS 6460 Analysis of Post-Tonal Music (3)
   - MUS 8430 Special Topics in Music Theory (3)

4. Four credit hours chosen from the following:
   - MUS 6360 Advanced Keyboard Skills
   - MUS 6500 Historical Counterpoint (3)
   - MUS 6620 Solo Song Literature I (3)
   - MUS 6680 The Piano: Historical Development, Construction and Technology (2)
   - MUS 6730 Computer Applications in Music (2)
   - MUS 6792 Jazz Theory (2)
   - MUS 6910 Chamber Music Literature (3)
   - MUS 6940 Orchestral Literature (3)
   - MUS 6941 Orchestral Literature II (3)

5. Piano proficiency examination to be taken after the second semester of enrollment or 20 hours of study, or successful completion of MUS 6360 Advanced Keyboard Skills.

6. Teaching in the Piano Pedagogy Laboratory Program.

7. Comprehensive examination:
   By the midpoint of the final semester of study, the student will schedule an oral and/or written examination. The committee should include at least three faculty members (including the applied instructor or area coordinator, one theory faculty member, and one history faculty member). The examinations will assess the student’s knowledge regarding repertoire, pedagogy, music theory, and music history. The student will be expected to synthesize his/her knowledge and demonstrate a high
level of musical understanding. Preparation should include a detailed review of all graduate courses taken and a review of the music that has been studied and performed as part of the master’s program. Each area will determine the proficiency requirements for the Comprehensive Exam for the Major Area. The appropriate area will administer the Major Area portion of the comprehensive exam and students will be required to demonstrate proficiency as determined by their major professor and/or area coordinator. These exams may consist of paper, an oral exam, program notes for recital, a short lecture to be presented in conjunction with a recital, etc. Each foundation studies member will determine appropriate comprehensive examination questions based on the coursework the student has completed at Georgia State University in their appropriate field, and will administer the exam as they see fit. This can be an oral exam, written exam, papers, etc. It will be the student’s responsibility to complete all portions of these comprehensive exams and collect appropriate approval signatures from their major area, music history, and music theory and turn their final comprehensive exam form into the graduate director. Students planning to graduate in the Fall or Spring must complete the comprehensive examination by the end of the twelfth week of classes. Students planning to graduate in the Summer must complete the comprehensive examination by the end of the fourth week of classes.

Concentrations in Wind Band Conducting

Degree Requirements

1. Required Courses:
   - APCD 8001 Applied Instrumental Conducting I (3)
   - APCD 8002 Applied Instrumental Conducting II (3)
   - APCD 8003 Applied Instrumental Conducting III (3)
   - APCD 8004 Applied Instrumental Conducting IV (3)
   - MUS 8000 Introduction to Graduate Studies (2)
   - MUS 8680 Seminar in Instrumental Conducting (2) (four semesters)
   - MUS 8800 Wind Band Literature (3)
   - MUS 8970 Instrumental Conducting Project (3)

2. One 8000-level course in music history (3)

3. One graduate-level course in music theory (3)
   - MUS 6450 Advanced Tonal Analysis (3)
   - MUS 6500 Historical Counterpoint (3)
   - MUS 6460 Analysis of Post-Tonal Music (3)
   - MUS 8430 Special Topics in Music Theory (3)

4. Two credit hours of graduate-level electives in music

5. Comprehensive examination:
   By the midpoint of the final semester of study, the student will schedule an oral and/or written examination. The committee should include at least three faculty members (including the applied instructor or area coordinator, one theory faculty member, and one history faculty member). The examinations will assess the student’s knowledge regarding repertoire, pedagogy, music theory, and music history. The student will be expected to synthesize his/her knowledge and demonstrate a high level of musical understanding. Preparation should include a detailed review of all graduate courses taken and a review of the music that has been studied and performed as part of the master’s program. Each area will determine the proficiency requirements for the Comprehensive Exam for the Major Area. The appropriate area will administer the Major Area portion of the comprehensive
exam and students will be required to demonstrate proficiency as determined by their major
professor and/or area coordinator. These exams may consist of paper, an oral exam, program notes
for recital, a short lecture to be presented in conjunction with a recital, etc. Each foundation studies
member will determine appropriate comprehensive examination questions based on the coursework
the student has completed at Georgia State University in their appropriate field, and will administer
the exam as they see fit. This can be an oral exam, written exam, papers, etc. It will be the student’s
responsibility to complete all portions of these comprehensive exams and collect appropriate
approval signatures from their major area, music history, and music theory and turn their final
comprehensive exam form into the graduate director. Students planning to graduate in the Fall or
Spring must complete the comprehensive examination by the end of the twelfth week of classes.
Students planning to graduate in the Summer must complete the comprehensive examination by the
end of the fourth week of classes.

Applied Music Levels

Applied music at the 6000 (1 credit) and 8000 (3 credits) levels is available for students who have been
admitted to a degree program in the School of Music in Full or Special Graduate Status. Applied music
levels carrying one or three hours of credit are assigned to individuals by the School of Music, and lessons
are arranged by the student and the assigned instructor. Students should consult the School of Music office
for the appropriate course and computer number. The 6000 level is generally for secondary study or for
students in programs that do not require applied music lessons. The 8000 level is for a one-hour lesson in
performance, jazz and pedagogy programs. There is an applied music fee of $350 per semester for a one-
hour lesson and $200 per semester for a half-hour lesson.

Dual B.Mu./M.Mu. Program

The school offers a dual Bachelor of Music and Master of Music program. The dual degree opportunity
enables qualified students to enroll in graduate courses late in their undergraduate program and apply the
coursework toward both the bachelor’s and master’s programs.

Students must be formally accepted into the dual degree program by the school and the College of the Arts
to be able to take graduate courses as an undergraduate. Additionally, acceptance into the dual program
does not constitute admission to the master’s program. Students must fulfill regular graduate admissions
requirements and apply for the master’s program following college processes.

Artist Certificate in Music

Students must achieve a B- or better in all required courses for the Artist Certificate in Music in order to
have courses count for degree completion.

Concentrations in Performance (Orchestral Instrument, Piano, Voice)

Concentration in Orchestral Instrument Performance (18 hours)

1. Required Courses:
   - APXX 8001 Applied Music (3)
   - APXX 8002 Applied Music (3)
Select one (2) (two semesters):
- MUS 7060 Wind Ensemble (1)
- MUS 7070 Orchestra (1)

Select one (1) (two semesters):
- MUS 7110 Brass Ensemble (0.5)
- MUS 7120 Chamber Music for Strings (0.5)
- MUS 7130 Chamber Music for Woodwinds (0.5)
- MUS 7140 Percussion Ensemble (0.5)
- MUS 8590 Solo Recital (1)
- Graduate Level Electives (8)

Concentration in Piano Performance (18 hours)

1. Required Courses:
   - APPF 8001 Applied Piano I (3)
   - APPF 8002 Applied Piano II (3)
   - MUS 6010 Performance Laboratory (0) (two semesters)
   - MUS 7071 Collaborative Piano (1) (two semesters)
   - MUS 8590 Solo Recital (1)
   - Graduate Level Electives (9)

Concentration in Voice Performance (18 hours)

1. Required Courses:
   - APVC 8001 Applied Voice I (3)
   - APVC 8002 Applied Voice II (3)
   - MUS 6010 Performance Laboratory (0) (two semesters)
   - MUS 8620 Opera Theatre Workshop (2) (two semesters)
   - MUS 8590 Solo Recital (1)
   - Graduate Level Electives (7)

Concentrations in Conducting (Choral Conducting, Orchestral Conducting, Wind Band Conducting)

Concentration in Choral Conducting (18 hours)

1. Required Courses:
   - APCD 8001 Applied Conducting I (3)
   - APCD 8002 Applied Conducting II (3)
   - MUS 7080A University Singers (1) (two semesters)
   - MUS 7220 Workshop Seminar in Choral Conducting (2) (two semesters)
   - MUS 8690 Choral Conducting Project (3)
   - Graduate Level Electives (3)

Concentration in Orchestral Conducting (18 hours)

1. Required Courses:
- APCD 8001 Applied Conducting I (3)
- APCD 8002 Applied Conducting II (3)
- MUS 7070 Orchestra (1) (two semesters)
- MUS 8680 Seminar in Instrumental Conducting (2) (two semesters)
- MUS 8970 Instrumental Conducting Project (3)
- Graduate Level Electives (3)

Wind Band Conducting (18 hours)

1. Required Courses:

   APCD 8001 Applied Conducting I (3)
   APCD 8002 Applied Conducting (3)
   MUS 7060 Wind Ensemble (1) (two semesters)
   MUS 8680 Seminar in Instrumental Conducting (2) (two semesters)
   MUS 8970 Instrumental Conducting Project (3)
   Graduate Level Electives (3)
11000 Institute for Biomedical Sciences

This chapter outlines graduate program information for the Institute for Biomedical Sciences in detail. See subsections for specific program information as well as policies and procedures. Information about the Bachelor of Interdisciplinary Studies (B.I.S.) in Biomedical Science and Enterprise program can be found in the undergraduate catalog.

11000.10 Office of the Director

Petit Science Center, Suite 716
404-413-3578
biomedical.gsu.edu

Jian-Dong Li, Director
Timothy L. Denning, Assistant Director & Director of Graduate Programs

11000.20 About the Institute for Biomedical Sciences

The Institute for Biomedical Sciences (IBMS) was established in January 2014 as part of Georgia State University’s strategic plan that recommended enhanced contributions to the sciences, health, and medical education. The Institute is dedicated to advancing fundamental and innovative biomedical research that improves human health, as well as educating and training future generations of leading biomedical scientists that are poised to enter the workforce and support cutting-edge discoveries. The launch of the Institute represents the most recent progress toward establishing Georgia State University as a premier urban research university.

Mission: The Institute for Biomedical Sciences (IBMS) is a leading multidisciplinary research and education (degree-granting) institute dedicated to advancing fundamental and innovative biomedical research that improves human health as well as educating and training future generations of leading biomedical scientists and health (non-M.D.) professionals.

Background: Despite tremendous advances in biological and medical research, significant gaps still exist between basic laboratory research and its clinical applications. Now more than ever there is an urgent need for bridging basic research to clinical management strategies. To meet this significant challenge and promote translational research from bench to bedside, the interface between the biomedical science disciplines has emerged as one of the most exciting interdisciplinary research fields in science. To significantly and rapidly accelerate Georgia State University as a recognized leader in this area, the Institute was established to expand contributions and efforts to research and education in these areas. The Institute’s key assets include the University’s existing strengths in inflammation, immunity and infection, microbial pathogenesis, molecular and translational medicine, translational immunology, oncology, and therapeutics and diagnostics, which align with the its strategic priorities, Georgia’s commitment to be the nation’s hub for biomedical research and federal/non-federal funding priorities. Moreover, the institute provides a world-class interdisciplinary training environment for the preparation of technically skilled students that are capable of filling the diverse workforce needs in the biomedical sciences.

Philosophy (Success Through Synergy): The institute is not only building a strong research presence in
biomedical sciences, but also fosters a unique environment to promote synergistic and interdisciplinary collaboration with units internal to the University, other Georgia and non-Georgia research institutions, major medical centers, private sector (e.g., biopharmaceutical, biotech) companies, and organizations/ foundations to develop world-class multidisciplinary research and education programs.

Goals:

1. Pursue excellence in fundamental and innovative research in the basic biomedical sciences.
2. Advance diagnostic, therapeutic, and preventive measures for major diseases, with an initial emphasis on inflammatory, immunological, infectious, metabolic and cardiovascular, and neoplastic diseases.
3. Accelerate translation and commercialization outcomes by collaborating and interacting with partner institutions, hospitals and biopharmaceuticals.
4. Provide an environment for preparing students to meet future challenges and workforce needs in biomedical research and health professions.

11000.30 Faculty

Faculty: Ritu Aneja, Christopher Basler, Cynthia Cornelissen, Patricia Denning, Timothy Denning, Andrew Gewirtz, Leszek Ignatowicz, Sang-Moo Kang, Chunying Li, Jian-Dong Li, Didier Merlin, Richard Plemper, Hongyu Qiu, Ping Song, Baozhong Wang, Zhonglin Xie and Ming-Hui Zou

Research Faculty: Pallavi Garg, Kensei Komatsu, Yi-Yun Lee, Priya Luthra, Teena Mohan, Imoh Okon, Ping Song, Tshidi Tsibane, JoAnne Turfariello, Emilie Viennois and JeongJoong Yoon

11000.40 Research Centers

Areas of Research Focus

The institute promotes interdisciplinary research that drives advances in biomedical sciences through synergistic collaboration, ultimately leading to better patient care. The focus is on understanding the mechanistic basis for a variety of important human diseases, such as inflammatory, immunologic, infectious, metabolic and cardiovascular diseases, and developing innovative approaches to prevention, diagnosis and treatment. Areas of research focus for the institute are:

- Immunology (molecular and cellular immunology, inflammation, immunity, chemical immunology, tumor immunology, systems and computational immunology)
- Translational Immunology
- Microbiology (molecular and cellular microbiology, host-pathogen interactions, microbiota, translational microbiology, systems and computational microbiology)
- Microbial Pathogenesis
- Infectious Diseases
- Metabolic and Cardiovascular Diseases
- Molecular, Cellular and Translational Medicine
- Translational Systems Biology and Bioinformatics
- Translational Diagnostics and Therapeutics
Vaccinology

Center for Inflammation, Immunity & Infection

The mission of the Center for Inflammation, Immunity & Infection is to better understand the molecular basis of inflammatory diseases and further develop novel therapeutic strategies. Inflammation is one of the body’s primary defense mechanisms in response to infection or injury. Still, when it is uncontrolled, it causes inflammatory diseases such as chronic obstructive pulmonary disorder, asthma, rheumatoid arthritis, inflammatory bowel disease, otitis media and cancer.

Center for Microbial Pathogenesis

The Center for Microbial Pathogenesis is focused on studying such viruses as influenza virus, hepatitis C, dengue, Ebola, Marburg, Crimean-Congo hemorrhagic fever, cytomegalovirus, and several other negative-stranded RNA viruses. Studies are directed at understanding how the innate immune system of the infected host is counteracted by components of these viruses and how the interferon signaling system works on a molecular level. Researchers use this knowledge to develop new vaccines against these viruses and work to identify small molecular weight compounds for use as antivirals.

Center for Translational Immunology

The Center for Translational Immunology is focused on translating basic science immunological discoveries into improvements in the treatment of immune-mediated diseases. Current studies are directed at understanding the function of T cells in autoimmune diseases.

11000.50 Graduate Degrees Offered

The Institute for Biomedical Sciences currently offers the following graduate programs:

- Master of Interdisciplinary Studies with a concentration in Biomedical Enterprise
- Doctor of Philosophy in Translational Biomedical Sciences

Please visit the Institute for Biomedical Sciences Academics website at biomedical.gsu.edu/admissions for updates on our degree offerings.

11000.60 Academic Resources and Services

IBMS Office of Academic Assistance
Courtland North, 4th Floor
106 Courtland Street SE
404-413-3650
biomedgrad@gsu.edu

Contact:
T’Keyah Johnson, Graduate Program Coordinator
The Office of Academic Assistance (OAA) provides prospective and current students with comprehensive student support services to ensure academic success.

Advising and Academic Assistance

For students enrolled in the Master of Interdisciplinary Studies (MIS) program with a concentration in Biomedical Enterprise, academic advisement is provided using a two-pronged approach. The Graduate Program Coordinator in the OAA provides guidance on administrative matters such as program of study advisement, degree petition process, thesis/capstone registration, graduation, and referral to other on-campus student support services. The Director of Graduate Programs provides guidance on academic and career-related matters such as determining which course electives make sense for future career goals, exploring research interests and opportunities, developing professional networks, and serving on thesis or capstone committees.

MIS students are not assigned a faculty advisor but are instead encouraged to develop multiple mentoring relationships with institute faculty as well as faculty in the College of Law and Robinson College of Business.

Doctoral students are matched with a faculty advisor upon admission and will also form a doctoral advisory committee following the completion of qualifying exams. Students are also encouraged to develop multiple mentoring relationships with other institute faculty, the Doctoral Program Director, and even the OAA Graduate Program Coordinator as they navigate through doctoral program administrative matters.

11000.70 Student Organizations

Biomedical Student Association (BMSA)

The Biomedical Student Association (BMSA) is the student organization of the Institute for Biomedical Sciences at Georgia State University. BMSA seeks to develop well-rounded biomedical professionals and promote meaningful interactions between students, faculty and staff, and health professionals. Throughout the school year, BMSA will organize social events, professional development opportunities, and public service events for students, faculty, and staff.

11010 Graduate Admissions

The Institute for Biomedical Sciences accepts students into the Doctor of Philosophy (Ph.D.) in Translational Biomedical Sciences program and the Master of Interdisciplinary Studies (M.I.S) in Biomedical Enterprise program for the Fall semester only. The application deadlines are as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>Fall</th>
<th>Spring</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.I.S.</td>
<td>Priority: January 15</td>
<td>N/A</td>
<td>N/A</td>
</tr>
<tr>
<td></td>
<td>Final: May 31</td>
<td>N/A</td>
<td>N/A</td>
</tr>
</tbody>
</table>
11010.10 General Admissions Information

Retention of Records: All documents and other materials submitted by or for persons in connection with their consideration for admission become the property of this institution and cannot be returned at any time. It is the responsibility of each application to follow the application procedures completely and correctly and to be certain that all materials have been submitted to the Office of Graduate Admissions by the application deadline.

If an applicant does not complete enrollment for the semester in which admission is sought, the applicant must reapply. Incomplete application files are retained for a maximum of one year.

Graduate Admissions Committee: The Graduate Admissions Committee for graduate degree programs is composed of 4-6 graduate faculty members from the Institute. The charge of this admissions committee is to review and make admissions decisions on the completed applicant files for a particular graduate program.

Admission decisions are competitive. Each applicant is evaluated individually and among the current group of candidates. In this evaluation, consideration is given to the applicant’s academic record, scores on the entrance exam(s), educational background, educational objectives, research interests and experience, narrative information, work experience, professional activities, and character. These elements together must indicate a favorable prospect of success in graduate study for an offer of admission to be made. In making the decision, the committee must consider at all times the optimum number of students in the program. This could result in the denial or deferral of otherwise qualified applicants. Please see the Georgia State General Admissions statement in section 1100 of the Graduate Catalog.

Provisional Status: At the discretion of the Graduate Admissions Committee, some applicants may be admitted to provisional status in the M.I.S. program. Relevant work experience, recommendation letters, and the applicant’s statement of professional and/or academic objectives will weigh heavily in these admission decisions. A student who is admitted in such status must earn a grade of “B” or better in each of the courses specified by the Graduate Admissions Committee and/or complete all other requirements specified by the Graduate Admissions Committee, in order to be admitted to full status. Students who are admitted in provisional status will receive an outline of these requirements as part of their admission decision letter.

Provisional status is not available for doctoral applicants.

11010.20 Master of Interdisciplinary Studies (M.I.S.) in Biomedical Enterprise Application Requirements

For complete application instructions, please view the M.I.S. How to Apply page.
The following materials are required for admission to the M.I.S. in Biomedical Enterprise program. All application materials are submitted through the online Graduate Application.

1. Online Graduate Application
2. $50.00 non-refundable application fee
3. Unofficial transcripts from each college and/or university attended (including Georgia State University)
   - Transcripts are required regardless of the length of stay or if the grades are listed on another school's transcript.
   - Applicants must have a bachelor's degree or its equivalent at the time of enrollment from a regionally accredited institution.
   - Applicants must be able to provide official transcripts prior to the start of Fall courses
4. Three letters of recommendation from individuals familiar with the applicant's intellectual achievement and potential. Academic and/or professional recommendations are strongly encouraged.
5. Personal Statement
6. A Resume or Curriculum Vitae
7. Proof of English proficiency for non-native English speakers. See section 11010.40 International Student Admissions for more information.
8. A Certificate of Immunization, after acceptance
9. Verification of lawful presence may be required if accepted. See section 1110 and 1120 for more information.

11010.30 Doctor of Philosophy (Ph.D.) in Translational Biomedical Sciences Application Requirements

For complete application instructions, please visit the Ph.D. How to Apply page.

The following materials are required for admission to the Ph.D. in Translational Biomedical Sciences program. All application materials are submitted through the online Graduate Application.

1. Online Graduate Application
2. $50.00 non-refundable application fee
3. Unofficial transcripts from each college and/or university attended (including Georgia State University)
   - Transcripts are required regardless of the length of stay or if the grades are listed on another school's transcript.
   - Applicants must have a bachelor's degree or its equivalent at the time of enrollment from a regionally accredited institution.
   - Applicants must be able to provide official transcripts prior to the start of Fall courses
4. Three letters of recommendation from individuals familiar with the applicant's intellectual achievement and potential. Academic and/or professional recommendations are strongly encouraged.
5. Personal Statement
6. A Resume or Curriculum Vitae
7. Proof of English proficiency for non-native English speakers. See section 11010.40 International
8. A Certificate of Immunization, after acceptance
9. Verification of lawful presence may be required if accepted. See section 1110 and 1120 for more information.

Top doctoral candidates may be required to interview with the Graduate Admissions Committee to evaluate the applicant’s understanding of what it means to be a researcher, passion for research, commitment to complete the degree and potential to excel in a translational biomedical sciences-related career path.

11010.40 International Student Admission

It is the policy of Georgia State University to encourage the enrollment of students from other countries. The University subscribes to the principles of international education and to the basic concept that only through education and understanding can mutual respect, appreciation and tolerance of others be accomplished. The recognition of the values of cultural exchange is inherent in our philosophy of education and is predicated on an awareness of the need to foster better cooperation, friendship, and understanding among the peoples of the world. In this regard, we welcome international students to our campus because we believe in a cultural exchange program that will be beneficial to our own student body, to the international students involved and to metropolitan Atlanta.

**English Proficiency:** In addition to meeting all other applicable requirements for admission, non-native English speakers of English must demonstrate sufficient English language proficiency. Proof of English proficiency can be demonstrated through one of the following:

1. Proof of baccalaureate or graduate degree completion inside (from an accredited institution) or outside the U.S. where English is the language of instruction – see list of countries here
2. TOEFL scores (paper or Internet-based)
3. IELTS scores
4. Completion of a University System of Georgia approved ESL program

Scores must not be more than two years old, on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). Official scores must be reported from the Educational Testing Service to the institute prior to the application deadline. TOEFL information can be found at www.ets.org/toefl. IELTS information can be found at www.ielts.org/. Additional information on University System of Georgia approved ESL programs can be found at www.usg.edu/international_education/esl_programs.

**Financial Resources:** Applicants who have been accepted and plan to attend Georgia State University on an F-1 or J-1 visa must submit a Financial Statement showing the financial support necessary for the cost associated with the first year of study. This verification does not need to be submitted with your application but will be required before you can enroll if you are accepted.

**Course Load:** An international student with a student visa is required to carry a full course of study in the fall and spring semesters. A full course of study for graduate students at Georgia State University is at least 9 credit hours in the fall and spring semesters and at least 6 credit hours in the summer semester.
International students cannot be admitted as non-degree students.

For additional information pertaining to international applicants and students at Georgia State University, please refer to the Office of International Student and Scholar Services.

### 11010.50 Transient Student Admission

For complete application instructions, visit the How to Apply page.

A student enrolled in a graduate program at another institution may seek admission as a transient (or visiting) student in the Institute for Biomedical Sciences. Approval of transient status is granted on a case-to-case basis and is not guaranteed.

The application deadlines are as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>Fall</th>
<th>Spring</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Transient Student</td>
<td>July 15</td>
<td>December 1</td>
<td>N/A</td>
</tr>
</tbody>
</table>

To be admitted to the Institute as a transient student, applicants must submit:

1. Online Graduate Application
2. $50 non-refundable application fee
3. Transient Letter
   - This letter, from your home institution, must state that you are in good academic standing and that you have permission to attend Georgia State University. It should also contain a list of the courses you are required/planning to take.
4. Certificate of Immunization, after acceptance
5. Verification of lawful presence may be required if accepted. See section 1110 and 1120 for more information.

All requested documents should be uploaded to the online application. Please do not submit an incomplete application. It will not be reviewed.

Admission to transient status is normally for one semester only. A transient student who wishes to enroll for a subsequent semester at Georgia State University must submit an Application for Reentry to the institute Office of Academic Assistance (additional details available in section 11010.70 Reentry Student Admissions) in order to continue as a transient student at the University.

Transient students who are not in good academic standing or who are ineligible to return to their home institution will not be admitted to transient status. No guarantee is made that a transient student will be able to secure the courses desired. The reporting of grades earned to the student’s institution is the responsibility of the student.

Students who wish to change from transient-status enrollment to graduate degree-seeking status must go
through the full admissions process as outlined in sections 11010.20 and 11010.30.

11010.60 Non-Degree Student Admission

The Institute for Biomedical Sciences accepts non-degree students based on course availability. Admission to non-degree status is granted on a case-by-case basis and is not guaranteed. Non-degree applicants can and usually include members of the workforce who wish to further develop or upgrade their biomedical science knowledge and skills.

Application deadlines are as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>Fall</th>
<th>Spring</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-Degree Student</td>
<td>July 15</td>
<td>December 1</td>
<td>N/A</td>
</tr>
</tbody>
</table>

For complete application instructions, visit the How to Apply page.

To apply for non-degree status, applicants must complete and submit the following:

1. Online Graduate Application
2. $50 non-refundable application fee.
3. Unofficial transcripts from each college/university attended
   - Transcripts are required regardless of the length of stay or if the grades are listed on another school's transcript.
   - Applicants must have a bachelor’s degree or its equivalent at the time of enrollment from a regionally accredited institution.
   - Applicants must be able to provide official transcripts prior to the start of Fall courses
4. A resume or curriculum vitae
5. Certificate of Immunization, after acceptance
6. Verification of lawful presence may be required if accepted. See section 1110 and 1120 for more information.

All requested documents should be uploaded to the online application. Please do not submit an incomplete application. It will not be reviewed.

11010.70 Re-entry Students

A re-entry student is a student who has been enrolled at Georgia State University and who:

1. Has not maintained an enrollment totaling 6 hours (or more) of degree-applicable courses over three consecutive semesters (including summer) until degree completion; or
2. Attended any semester as a transient student and wishes to attend an additional semester as a transient student.

Re-entry is approved by application and is not guaranteed. The application deadlines are as follows:
To apply for reentry, applicants must complete and submit the following:

1. Online Application for Graduate Study
2. $25 non-refundable application fee.
3. Unofficial transcripts for any coursework completed since you were last enrolled at Georgia State University, if applicable
4. Certificate of Immunization, after acceptance
5. Verification of lawful presence may be required if accepted. See section 1110 and 1120 for more information.

All requested documents should be uploaded to the online application. Please do not submit an incomplete application. It will not be reviewed.

Graduate students previously enrolled with the Institute for Biomedical Sciences may only re-enter the same graduate program or status in which they were last enrolled and they may be required to satisfy the degree requirements of the graduate catalog in effect at the time of re-entry. The Office of Academic Assistance will notify the student of their requirements and update their program of study. Students will be required to change to the graduate catalog in effect at the time of reentry when they re-enter the university after a period of two or more consecutive years in which they have earned no academic credit at Georgia State University. Students must be approved for re-entry through the institute, and approval is not guaranteed.

11010.80 Graduate Research Assistantships

Graduate students in the institute are eligible to apply for Graduate Research Assistantships (GRAs). All students who receive an assistantship appointment also receive a full tuition waiver.

Master’s Students
Graduate Research Assistantships (GRAs) for master’s students are merit-based and limited in number. Prospects that submit a completed application for admission will automatically be considered for a GRA appointment. Notification of an award will be included in the admissions decision letter.

Doctoral Students
Accepted doctoral students in the institute are automatically awarded a Graduate Research Assistantship (GRAs) as a part of their program. For first-year students, the historical award has been at least a $30,000 stipend plus a tuition waiver.

Almost all doctoral students requesting it receives some type of financial assistance. Notification of an award will be included in the admissions decision letter.

Second-year students and beyond are also eligible for GRAs. The institute will generally continue to fund
students who are demonstrating progress in the program at a level of support equal to or greater than what they received during the first year.

Students hired as graduate research assistants work with faculty members in the institute on research projects in their area of interest.

11020 Graduate Enrollment

Graduate degree-seeking students in the Institute for Biomedical Sciences are responsible for knowledge of all regulations and procedures of the program and the university. Enrollment in a program constitutes a student’s acknowledgment that they are obligated to comply with all academic and administrative regulations and degree requirements. Students are encouraged to carefully read all regulations related to the M.I.S. Biomedical Enterprise program.

Summary of Georgia State University Policy on Responsible Conduct Research Training: Georgia State University is committed to promoting research ethics within the University community and modeling integrity across all disciplines and areas of empirical research. As research has become more complex, collaborative, and costly, issues of research ethics similarly have become complex, extensive and important. The federally mandated training of all levels of research students at Georgia State University in the Responsible Conduct of Research (RCR) must prepare them to face these issues in their professional lives. The Scholarship and Research Integrity (SARI) program at Georgia State University, developed in response to the America Competes Act requirements, is designed to offer students enrolled in undergraduate research, research graduate degree programs, and post-doctoral research programs comprehensive training in the RCR in a manner that is tailored to address the issues faced by students in their respective programs. As part of the commitment and policy, graduate research students and post-doctoral research fellows will be required to complete an online RCR training program provided by the Collaborative Institutional Training Initiative (CITI).

ursa.research.gsu.edu/ursa/responsible-conduct-in-research/

The institute has devised an RCR education program plan to be in compliance with Georgia State University’s RCR policy and to ensure institute students graduating from our M.I.S. and Ph.D. programs complete the required CITI RCR training program.

11020.05 Time Limit for Completion of Degree/Graduate Certificates

Before deciding to enroll in a graduate program of this school, students must examine seriously and realistically their abilities to adjust their personal and professional schedules to accommodate the challenge of graduate study.

The maximum time limits set by the Director of Graduate Programs are as follows:

- Three years from the first semester of admission for the M.I.S. program
- Seven years from the first semester of admission for the doctoral program
Students or applicants with questions about the commitment needed to complete the graduate programs should schedule an appointment with the Institute’s Office of Academic Assistance.

11020.10 Catalog Editions

Normally, students will be permitted to graduate under the provisions of the graduate catalog in effect at the time of first enrollment. Students may choose to graduate under the provisions of a subsequent graduate catalog; that is, they may choose to change their “catalog edition.” Students who choose to do this must meet all provisions of the subsequent graduate catalog.

Students are required to change to the current catalog edition when they change programs/statuses or after certain absences from the program, as explained below in section 11020.15.

11020.15 Continuous Enrollment Requirement and Requests to Reenter

Students in graduate degree programs must maintain an enrollment totaling at least six (6) credit hours of degree-applicable courses over any consecutive three (3) semester period (including summers) until degree completion. In other words, the total enrollment of the current term plus the two terms preceding it must add to six (6) hours or more at all times.

The status of all students will be checked by the midpoint of each term for compliance with the Continuous Enrollment Requirement. Any student whose enrollment is out of compliance will receive a continuous enrollment registration hold preventing all current and future registration. Those students will be notified by an e-mail message sent to their official Georgia State University e-mail account.

To resume their programs of study, students with continuous enrollment registration holds must apply for reentry admission by the published deadline (see section 11010.70 Reentry Student Admissions), must be granted re-entry admission and must enroll at a credit hour level sufficient to satisfy the continuous enrollment requirement. For more information on the reentry process, see section 11010.70 or contact the Institute for Biomedical Sciences Office of Academic Assistance (OAA).

Students who do not enroll during the semester for which reentry was originally approved must apply for reentry for subsequent semesters.

All students who wish to reenter one of the graduate-level programs or non-degree status after an absence of one year must meet the degree requirements and academic regulations of the graduate catalog current upon return, along with other reentry provisions that may be in effect.

All students who are approved for reentry will be eligible to retain all Georgia State course credit (and already approved transfer credit, if any) earned previously if their program can be completed within the time limit that was applicable to their program before the absence. The cumulative graduate GPA calculations will include all attempts in all courses at Georgia State University. Time limits would apply.

Students who plan not to register for a particular semester but who intend to continue the program at some later semester should discuss such plans with the Graduate Program Coordinator and Director of Graduate Programs in order to facilitate reentry at a subsequent time. Failure to comply with this request may
complicate reentry in the semester preferred. An absence from the program, whether planned or unplanned, does not exempt students from the requirement to complete the program within the appropriate time limit.

11020.20 Enrollment in Approved Courses

Students must enroll for courses that are part of the approved curriculum for the program to which they have been accepted. Students who do otherwise are subject to loss of credit and/or loss of eligibility to continue to register. Failure to register for degree-applicable courses over the course of three consecutive semesters will result in unsatisfactory progress and the rules of Continuous Enrollment Requirement will apply.

11020.25 Course Load

The course load of a graduate student may vary with the circumstances of the individual student each semester. A full-time course of study for graduate students at Georgia State University is nine (9) credit hours in Fall and Spring semesters, and six (6) credit hours in Summer semesters.

A graduate student may enroll in 1 to 25 credit hours. In determining each semester’s course load, a student must balance other time constraints (work, family, civic, and other responsibilities) with the need to make reasonable and timely progress toward completion of the program.

11020.30 Policy on Allowing Undergraduates to Take Graduate Courses

The Institute for Biomedical Sciences Office of Academic Assistance will determine a student’s eligibility for admission into a graduate course. Eligibility does not guarantee permission to take a graduate-level course. Once a student’s eligibility is determined by the Office of Academic Assistance, permission must be granted by the instructor for the course and the institute Director of Graduate Studies. Please send an email to biomedundergrad@gsu.edu for approval process instructions.

11020.35 Policy on Transfer Credit

Due to the unique nature of the courses included in the M.I.S. program curriculum, transfer credit will not be accepted for this program.

Transfer of credit for the Ph.D. program will be approved under the following conditions:

- The course must have been completed at an institution recognized by a regional accrediting body as degree-granting for higher education at the time the course was taken.
- A grade of B or higher must have been received in the course.
- The course must be restricted to graduate students only.
- The content of the course must correspond to that of a Georgia State University course required or permitted in the student’s program.
- Degree credit completed before enrollment in the current Georgia State program will be considered if it will not be more than six years old at the time the student graduates.
- Credit completed elsewhere after enrollment in the current Georgia State program will be
considered for transfer credit if it is within the time limit allowed for completion of the current program.

A request for transfer credit form must be completed. The request must indicate the specific course(s) for which transfer credit is sought. A copy of the other institution’s catalog must be submitted to verify that the course was limited to graduate students only. The Office of Academic Assistance must have an official transcript on file showing course completion for the course being requested. Requests for transfer of graduate credit cannot be processed until all necessary information has been received.

11020.40 Grade Point Average and Course Grade Requirements

Each student admitted into a graduate program in the institute must maintain an overall institutional grade point average (GPA) of 3.0 or better to receive their respective degree. Students who fall below the 3.00 GPA requirement for all required course attempts will be reviewed for continuation in the M.I.S. or Ph.D. program, and students may receive a scholastic warning or be scholastically dismissed from their respective graduate program (see 11020.50 Scholastic Warning, Exclusion and Suspension for additional details).

For M.I.S. students, no final course grade below a C will be accepted toward the degree.

For doctoral students, all required coursework must be completed with a grade of C or better, and any student earning a grade of C- or below must repeat the course.

11020.45 Final Course Grades

The following course grades will be given as final grade options in courses taught by institute faculty members. Any deviations—including the availability of plus/minus grading—will be at the discretion of the individual faculty member and specifically stated in their syllabus.

<table>
<thead>
<tr>
<th>Final Course Letter Grade</th>
<th>Point Values</th>

</tbody>
</table>

11020.50 Scholastic Warning, Exclusion and Suspension

Each student admitted into a graduate program in the Institute for Biomedical Sciences must maintain a minimum cumulative grade point average of 3.00. A student whose cumulative institutional grade point average falls below 3.00 at the end of a semester will be placed on Scholastic Warning. The student will be notified of this standing by the Office of Academic Assistance. If a 3.00 cumulative grade point average is
not achieved by the end of the next twelve credit hours or two semesters, whichever is longer, of completed course work approved by institute faculty, the student may be subject to scholastic suspension.

Transient students must maintain a 3.00 cumulative grade point average in order to continue in that status. Transient students who do not maintain a 3.00 cumulative grade point average may be subject to scholastic exclusion.

A student may apply for reinstatement after one semester as a suspended student. Application for reinstatement must be made no later than the deadlines outlined for reentry. Please see section 11020.70 Reentry Student Admissions for more information.

11020.55 Application for Graduation

All candidates for the M.I.S. in Biomedical Enterprise and Ph.D. in Translational Biomedical Sciences programs must file a formal application for graduation with the University’s Graduation Office at least two semesters in advance of the expected semester of graduation. Deadlines are published on the Georgia State University Registrar’s website. The Graduation Office will inform the Institute when the student files the application. The Institute for Biomedical Sciences will then conduct an audit and inform the student of any remaining requirements — these items will include any graduation clearance requirements. A degree will be awarded only to a student who meets the university academic, residence, and graduation clearance requirements as well as the standards of performance and academic requirements for the graduate degree.

11030 Student Appeals Procedures

The appeals procedure for graduate students in the Institute for Biomedical Sciences will follow different paths, depending on the nature of the student’s appeal. The various types of situations and the appropriate appeals avenues are as follows:

11030.10 Admissions Appeals

At the graduate level, a person who wishes to appeal an admission decision must first discuss the matter with the Director of Graduate Programs within 5 working days of the date of the denial.

If the appeal is not settled there, a written appeal must be submitted to the Director of Graduate Programs within 20 working days of the date of the denial or the date of the denial discussion.

Please see section 1115 Graduate Admissions Appeals for more information.

11030.20 Petitions for Policy Waivers and Variances, and Appeals, and Student Complaints, Concerns, or Grievances

The petitions for policy waivers and variances and appeals procedure for students will follow different courses depending on the nature of the student’s appeal. Please refer to University Information Section 1050.80 under Polices and Disclosures in this catalog or visit the Georgia State University Enrollment Services website or the Student Code of Conduct online for details.
Student Complaints, Concerns, or Grievances

Similarly, the student complaints, concerns, or grievance procedure for students will follow different courses depending on the nature of the student’s appeal. Please refer to University Information Section 1050.80 under Polices and Disclosures in this catalog or visit the Georgia State University Enrollment Services website.

11030.30 Appeal of Exclusions, Dismissals and Terminations

Terminated, dismissed or excluded graduate students with questions about their status should first discuss their situation with the Director of Graduate Programs. Following this discussion, students who believe they have extenuating circumstances may submit a written appeal of their termination or exclusion. The director will review the information submitted in support of the appeal and the student’s total record. The director will then make a recommendation to the associate dean for academic affairs who will make the decision regarding acceptance or denial of the appeal. The student will receive a written response from the school normally within 10 workdays of the date the appeal is received. (Workdays are counted as Monday through Friday except for university staff holidays.)

Requests for such consideration must be submitted, in writing, to the Director of Graduate Programs within 10 workdays (defined as Monday through Friday except for university holidays). Students should write their appeals completely, but concisely, and include all facts germane to their case. Documentation should be provided, where possible, to substantiate statements made. Specific dates such as the beginning and end of particular problems should be included. Only circumstances described in the written and signed appeal as initially submitted will be accepted from the student; oral appeals are not permitted, nor are requests to submit additional information after the appeal has been reviewed. Appeals must be dated, signed, and include the student’s home address and telephone numbers (work and home).

Having been enrolled in too many courses relative to job requirements or other responsibilities or having continued to enroll while experiencing personal, work, or health-related problems very rarely constitutes such extenuating circumstances.

11040 Master Degree Programs

Master of Interdisciplinary Studies (M.I.S.) in Biomedical Enterprise

Contacts:

Timothy L. Denning, Director of Graduate Programs
T’Keyah Johnson, Graduate Program Coordinator

11040.10 Program Goals and Objectives

Given today’s complex challenges and the need for creative solutions, graduates with an M.I.S. degree need to be able to adopt and use information derived from various traditional disciplines, to think logically and critically about information and new ideas, to be flexible and creative, and to work effectively with individuals from diverse backgrounds. Through interdisciplinary course work, including basic research and
team-based projects, as well as experiential learning in a capstone project, graduates from our proposed program will develop the knowledge areas, skills, and strategic approaches that are necessary to make links between critical fields. Graduates will be positioned to enter or to return to the workforce with increased capacity to multi-task within the workplace and to interface effectively with various stakeholders.

Thus, the goals listed below are the main focus of the M.I.S. in Biomedical Enterprise Program.

- Enable recognition of how successful work across disciplines advances knowledge and solves problems, and develop the ability to conduct interdisciplinary work
- Enhance critical thinking skills with regard to cross-cutting problems, proposed interdisciplinary solutions, and their applications
- Increase knowledge of techniques used to enhance creativity
- Develop strengths in communication, from verbal, written, and presentation skills, through ethical conduct and professional dispositions in all settings
- Encourage sensitivity, understanding, teamwork, and leadership among collaborators from diverse backgrounds
- Promote high-level student and faculty engagement in emerging interdisciplinary topics
- Create job-ready graduates with professional dispositions appropriate for a smooth interface between relevant fields

To meet the interdisciplinary goals of the M.I.S., the Biomedical Enterprise concentration will be offered jointly by the Institute for Biomedical Sciences (IBMS), Robinson College of Business and the College of Law using a cohort model. Each participating entity will be recognized at the university for its instructional and administrative efforts.

**Program Goals in Professional Preparation**

- Create a new cadre of specialized scientists and practitioners ideally trained to enter or return to the state, national, and international biotechnology workforce.
- Provide an environment for preparing students and professionals to participate in a broad-based and evolving economy in biotechnology, including pharmaceuticals, diagnostics, medical devices, and preclinical or clinical research.
- Develop strengths in communication, from verbal, written, and presentation skills, through ethical conduct and professional dispositions in all settings.
- Promote creativity, teamwork, and leadership through interactive courses and real-world experience.
- Increase the number of individuals from diverse backgrounds who excel at the intersection of biotechnology, entrepreneurship, and law.

**11040.20 Program Academic Regulations**

The maximum time limit for completing the M.I.S. in Biomedical Enterprise is three years from the first semester of admission.

A cumulative GPA of 3.0 or higher is required for graduate courses taken while a student at Georgia State University. No grade below a C will be accepted towards the degree.
Students should refer to additional program requirements outlined in section 11020 Graduate Enrollment, especially subsections 11020.15 Continuous Enrollment Requirement and Requests to Reenter, 11020.25 Course Load, 11020.40 Grade Point Average and Course Grade Requirements, 11020.50 Scholastic Warning, Exclusion and Suspension and 11020.55 Application for Graduation.

11040.30 Degree Requirements

The Master of Interdisciplinary Studies (M.I.S.) in Biomedical Enterprise program requires the completion of at least 36 credit hours of study at the master’s level beyond the bachelor’s degree.

1. Required Core Courses (23 credit hours):
   - BMSC 6010 Experimental Approaches in Biomedical Research
   - BMSC 6020 Internship Seminar I
   - BMSC 6030 Internship Seminar II
   - BMSC 6100 Disease Models in Biomedical Research
   - BMSC 8030 Project Management & Compliance
   - BMSC 8050 Business Aspects of Translational Medicine
   - BUSA 7090 Survey of Business Principles
   - ENI 8000 Organizational Entrepreneurship
   - ENI 8101 Improving the Customer Experience
   - ENI 8102 Innovating Customer Value
   - [LAW 7270] Intellectual Property Survey

2. Elective Courses (10 credit hours)
   - The selection of elective courses will depend on a student’s needs in terms of academic and career goals and must be made in consultation with and approved by the Director of Graduate Studies via an approved program form.

3. Capstone Experience (3)
   - BMSC 6040 Biomedical Enterprise Capstone

11040.40 Standards of Performance

The Director of Graduate Programs may require that a student withdraws from a particular course or courses, from the master’s program, or from the college because of unsatisfactory academic work or for other adequate reason. To continue in a master’s program, a student must make reasonable and timely progress in terms of grades and courses toward the degree or certificate concerned. The student’s progress may be reviewed each semester.

As a result of this review, any student whose scholastic performance does not indicate appropriate progress may be required to reduce the course load or may be required to withdraw from the program.

11050 Doctoral Degree Programs

Doctor of Philosophy (Ph.D.) in Translational Biomedical Sciences
11050.05 Program Goals and Objectives

Now, more than ever, there is an urgent need for translating advances in basic biomedical sciences from the laboratory into new clinical therapies for human diseases. To meet this challenge, the Translational Biomedical Sciences (TBMS) Ph.D. program will educate a new cadre of biomedical scientists that will be ideally trained to enter the state, national, and international workforce. The TBMS Ph.D. program will create a unique educational experience that promotes synergistic and multidisciplinary educational training opportunities. These opportunities address unmet needs in advancing fundamental and innovative biomedical research that is translated into improvements in human health. Due to their multidisciplinary education and training in translational biomedical sciences graduates of the TBMS Ph.D. program will be poised to become societal leaders that contribute to the cutting-edge knowledge base and fuel a growing and rapidly evolving economy in Georgia and the nation.

Thus, the goals listed below are the main focus of the Doctor of Philosophy (Ph.D.) in Translational Biomedical Sciences Program:

- Pursue excellence in fundamental and innovative education in the basic biomedical sciences in order to promote the future competitiveness of Georgia and the United States in this area.
- Provide an environment for preparing students to participate in a broad-based and evolving economy in biomedical research and health professions.
- Increase the number of students from diverse backgrounds who excel in biomedical sciences and become leaders in a wide variety of biomedical careers in industry, research, education, and medicine.

The faculty and staff of the Institute for Biomedical Sciences are committed to providing a supportive academic environment that promotes the growth and progress of students engaged in graduate studies.

11050.10 Program Academic Regulations

The maximum time limit for completing the Ph.D. in Translational Biomedical Sciences program is seven years from the first semester of admission.

A cumulative GPA of 3.0 or higher is required for graduate courses taken while a student at Georgia State University. All required coursework must be completed with a grade of C or better, and any student earning a grade of C- or below must repeat the course.

Students should refer to additional program requirements outlined in section 11020 Graduate Enrollment, especially subsections 11020.15 Continuous Enrollment Requirement and Requests to Reenter, 11020.25 Course Load, 11020.40 Grade Point Average and Course Grade Requirements, 11020.50 Scholastic Warning, Exclusion and Suspension and 11020.55 Application for Graduation.
11050.15 Degree Requirements

The Doctor of Philosophy (Ph.D.) in Translational Biomedical Sciences requires the completion of the following:

- At least 110 credit hours of required graduate coursework and research hours
- Proficiency in translational biomedical science experimentation and project management
- Translational biomedical science research
- A qualifying examination
- A dissertation
- A final oral presentation, directed primarily to the defense of the dissertation

11050.20 Curriculum

The Ph.D. core curriculum will provide students with a fundamental knowledge of cutting-edge biomedical science combined with how to practically apply this knowledge to research as well as how to apply this knowledge to the business world.

1. Required Core Courses (28 credit hours)
   - BMSC 6010 Experimental Approaches in Biomedical Research (2)
   - BMSC 7900 Cell and Molecular Dynamics (3)
   - BMSC 8000 Translational Immunology (4)
   - BMSC 8010 Host-Microbial Interactions in Health and Disease (4)
   - BMSC 8030 Project Management & Compliance (2)
   - BMSC 8050 Business Aspects of Translational Medicine (2)
   - BMSC 8060 Effective Science Communication (3)
   - BMSC 8675 Molecular Virology (4)
   - BMSC 8100 Molecular Medicine of Disease (4)

2. Required Elective Courses (12 credit hours)
   - BMSC 6100 Disease Models in Biomedical Research (3)
   - BMSC 8710 Advanced Topics in Translational Biomedical Science* (3)
   - Students have the opportunity to select additional elective options in consultation with and approval by the Director of Graduate Studies.

2. Required Research (70+ credit hours)
   - BMSC 8800 Ph.D. Research
   - BMSC 8810 Supervised Research
     - At least 36 credit hours of required research hours must be taken in BMSC 8810

Advanced topics courses marked with an asterisk (*) can be repeated for credit only if the section subtopic is not also repeated.

11050.25 Faculty

Faculty directly involved with the TBMS Ph.D. program include:
11050.30 Faculty Advisor and Doctoral Advisory Committee Requirements

During the Ph.D. admissions process, each student will be matched with a faculty advisor from institute faculty. The faculty advisor will serve as the primary student advisor and mentors the student throughout the program by assisting with research focus, signing off on official documents, etc.

11050.35 Annual Review of Doctoral Students

Ph.D. students will be given feedback from their Faculty Advisor on an annual basis. Faculty Advisors will evaluate student progress in several areas:

- Knowledge of core concepts in translational biomedical sciences.
- Knowledge of core concepts in translational biomedical science experimentation and project management.
- Ability to communicate innovations in translational biomedical science as well as business applications to a specialist and general audience.
- Advanced knowledge in the area of specialization within translational biomedical sciences.

If progress is unsatisfactory, the student will plan a course of action with their advisor and the Director of Graduate Programs to improve his/her progress. If the student demonstrates unsatisfactory progress on the plan, or during more than one annual review, he or she may be scholastically excluded from the doctoral program.

11050.40 Individual Development Plan

Ph.D. students will meet with the Director of Graduate Studies and Graduate Program Coordinator annually to check-in with students regarding their progress in the program, future career plans, the steps they have made towards accomplishing goals prior to graduation and more.

In this meeting, students will self-evaluate themselves in various areas related to professional development and put together an Individual Development Plan to strengthen these areas. The Graduate Program Coordinator is available to provide on and off-campus resources in relation to each student's specific goals.

11050.45 Doctoral Qualifying Examination

Students pursuing a Ph.D. in TBMS must take their first Qualifying Examination at the end of their second year and must pass this examination no later than the end of their third year. This qualifying examination will include a written component, a proposal, and an oral component, a presentation describing the proposal. The qualifying exam committee will assesses the mastery of knowledge in an area of specialization at the interface of translational biomedical sciences and business.

Specific qualifying exam guidelines can be obtained from the Institute for Biomedical Sciences Office of
11050.50 Admission to Candidacy

Admission to candidacy for a doctoral student is requested immediately after the successful completion of the comprehensive examination. The following is a complete list of requirements for admission to candidacy:

1. All prerequisites set as a condition to admission to candidacy have been satisfactorily completed.
2. A cumulative GPA of 3.0 has been maintained for all graduate coursework completed as a part of the program of study.
3. The residency requirement has been met.
4. Written and oral comprehensive qualifying examinations have been passed and reported to the OAA.
5. The doctoral advisory committee, including any necessary changes in the membership, is confirmed and all its members have been notified of and agree to accept their appointment.
6. The dissertation proposal has been approved by the student’s doctoral advisory committee.

Students must be recommended for admission to candidacy within four calendar years of their admission to the doctoral program unless an extension has been granted by the Director of Graduate Studies.

11050.55 Dissertation

Students pursuing a Ph.D. must complete a dissertation on a subject connected with their major field of study/concentration. The dissertation must present original research, independent thinking, scholarly ability, and technical mastery of a field of study. Its conclusions must be logical, its literary form must be acceptable, and its contribution to the field of biomedical sciences should merit publication.

Student dissertation progress will be reviewed periodically as a part of the student’s doctoral advisory committee, beginning in the student’s third year of doctoral study. If a student is not making expected progress on the dissertation, this will be noted on the doctoral advisory committee meeting notes as not meeting expectations.

At the dissertation defense, the doctoral advisory committee will complete written evaluations of each student’s written and oral communication skills at the doctoral dissertation defense. Overall performance will be evaluated based on an assessment of whether each student exceeds, meets or does not meet expectations.

Specific doctoral dissertation guidelines can be obtained from the Institute for Biomedical Sciences Office of Academic Assistance. Guidelines are subject to change.
Appendix I Course Descriptions

Graduate courses offered by Georgia State University are listed in this section in alphabetical prefix order and course name.

Course Subjects

AAS African-American Studies
ACCT Accounting
AE Art Education
AH Art History
AL Applied Linguistics

Computer Skills Prerequisites (CSP)

Some courses offered by the Robinson College of Business require any student who enrolls in that course to be proficient with certain computer skills. For a complete description of CSP requirements, please refer to the “J. Mack Robinson College of Business” chapter of this catalog (see section 7000).

Corequisites

A corequisite identifies another course or courses that should be taken concurrently with the listed course. A student who enrolls in a listed course with corequisites must also enroll in those corequisite courses. A
student who has previously completed a corequisite course may not need to repeat it; he or she should consult with an academic adviser before registering to determine specific requirements.

**Course Credit Hours**

The total semester hours of credit for each course are shown in parentheses immediately following the course title.

**Prerequisites**

A prerequisite identifies a course or other requirements that a student must have completed successfully before enrolling in the listed course. Any student who has not met prerequisites for a course may be administratively withdrawn from that course at the discretion of the instructor. It is the policy of some university departments to withdraw automatically any student who enrolls in a course without first meeting its prerequisites.
### ACCT ACCOUNTING

**ACCT 8005**  
**Current Issues in Accounting**  
**CREDIT HOURS** 1.0 - 3.0  
**PREREQUISITES** None  
**DESCRIPTION**  
This course will cover current issues in accounting. Issues will be drawn from a wide range of current issues that do not necessarily require or allow an entire semester of study and will pertain to assorted accounting areas, e.g., financial reporting and analysis, internal auditing, forensic accounting, government and not-for-profit accounting, assurance services, cost measurement and control, taxation, performance measurement and control, and governance. May be repeated for credit.

**ACCT 8010**  
**Financial Accounting 1**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Graduate or Undergraduate degree in bus other than AC  
**DESCRIPTION**  
ACCT 2101 or MBA 8025 and, ACCT 2102 or MBA 8115. Students will learn the financial reporting environment, the conceptual framework, the financial accounting process, preparation of financial statements, income measurement, and asset valuation.

**ACCT 8020**  
**Financial Accounting II**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** ACCT 8010  
**DESCRIPTION**  
Students will learn the valuation of liabilities and investments, reporting of stockholders’ equity, accounting for income taxes, postemployment benefits, leases, changes and errors, and preparation of statement of cash flows with complex transactions.

**ACCT 8030**  
**Managerial and Accounting Information Systems**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Graduate or Undergraduate degree in bus other than AC  
**DESCRIPTION**  
ACCT 2101 or MBA 8025, and ACCT 2102 or MBA 8115. This course examines a wide range of fundamental managerial techniques used by companies for tracking and reporting internal operations. In particular, it focuses on techniques for costing and evaluating products, services, programs, projects, departments and other operational units. The primary emphasis is on developing the needed understanding, insights and skills for capturing, analyzing and applying internal accounting data in order to make optimum managerial-level, cost-related decisions and appropriate managerial performance evaluations. In addition, students are expected to develop analytical skills necessary for evaluating alternative designs of control systems.

**ACCT 8040**  
**Topics in Federal Taxation**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** ACCT 8020, with grade of C- or higher  
**DESCRIPTION**  
This course introduces students to the federal tax concepts applicable to individuals, sole proprietorships, partnerships, corporations, estates, and trusts. In particular, it focuses on developing a professional level of problem-solving skills and critical thinking as well as oral and written communications. Emphasis is placed on differences between tax and financial accounting concepts. In addition, students are exposed to accounting periods and methods, deferred compensation, tax planning, ethical practices, and tax research.
ACCT 8050  Assurance and Information Systems Control
COMM HOURS 3.0
PREREQUISITES ACCT 8020, with a minimum grade of C-
DESCRIPTION This course develops students knowledge of Accounting Information Systems (AIS) and auditing the AIS focusing on both the processes of the AIS and the evaluation of accounting information. Topics include choosing, extracting and analyzing information to solve business problems, the ethical responsibilities the accountants, evidence accumulation and evaluation, materiality, risk assessment and control of the processes, and legal responsibilities. The course emphasizes the utilization of technology tools in business environments.

ACCT 8060  Financial Accounting in Governmental and Nonprofit Organizations
COMM HOURS 3.0
PREREQUISITES ACCT 4113, with a minimum grade of C-
DESCRIPTION This course provides an indepth study of financial reporting principles and theory used by governmental and nonprofit organizations. Analysis and interpretation of these organizations financial statements is an integral part of the course.

ACCT 8090  International Accounting Practices
COMM HOURS 3.0
PREREQUISITES ACCT 4113, with a minimum grade of C-
DESCRIPTION This course provides a detailed examination of International Financial Reporting Standards (IFRS) and their application. It identifies differences between IFRS and Generally Accepted Accounting Principles and analyzes the implications of those differences. It also offers a framework for identifying and analyzing national differences in the applications of IFRS.

ACCT 8120  Advanced Federal Taxation
COMM HOURS 3.0
PREREQUISITES ACCT 4510 or ACCT 8040, with a Requirement minimum grade of C-
DESCRIPTION Students may not receive credit for both TX 8020 and ACCT 8120. This course provides an in-depth study of the fundamentals of federal taxation of corporations and partnerships.

ACCT 8130  Advanced Accounting Topics
COMM HOURS 3.0
PREREQUISITES ACCT 4113 or ACCT 8020, with a minimum grade of C-
DESCRIPTION This course provides a study of accounting topics related to business mergers and acquisitions, international accounting and foreign currency issues, and other current topics of financial reporting.

ACCT 8310  Advanced Management Accounting Systems
COMM HOURS 3.0
PREREQUISITES ACCT 4210 or ACCT 8030; or MBA 8025 or MBA 8115; or CIS 3260, CIS 3300 and CIS 3730
DESCRIPTION This course demonstrates how management accounting and control systems help managers make effective operating and strategy decisions in the firm. In particular, this course demonstrates how cost, planning, and performance measurement systems help managers increase the effectiveness of small and large firms within their current and future operating environments. To advance the skills necessary for evaluating and utilizing alternative control systems, this course also introduces economic and behavioral theories as well as current and emerging information technology and data analysis tools.
ACCT 8389  Directed Readings in Accounting
CREDIT HOURS  1.0 - 3.0
PREREQUISITES  Consent of the instructor, good academic standing
DESCRIPTION

ACCT 8391  Field Study in Accounting
CREDIT HOURS  3.0
PREREQUISITES  MPA or MBA student with a 2.7 or higher GPA, accounting internship, consent of instructor
REQUIREMENTS  (May be repeated once.)
DESCRIPTION  Students are required to submit weekly journals describing their internship experience and a paper at the end of the semester. The topic for the paper has to be approved by the instructor. Students can register for this class only with the consent of the instructor.

ACCT 8420  Special Topics in Financial Accounting
CREDIT HOURS  3.0
PREREQUISITES  ACCT 4113 or ACCT 8020, with a minimum grade of C-
DESCRIPTION  This course will cover advanced financial accounting issues such as those related to off-balance-sheet financing, segment and interim reporting, foreign currency transactions, translation of foreign currency financial statements, operation of the SEC, issues related to the adoption of IFRS in the US, accounting for reorganizations and liquidations, and accounting for estates and trusts. The course will also cover why and how managers manage earnings and critically examine a recently passed or proposed financial accounting standard.

ACCT 8610  Advanced Topics in Assurance Services
CREDIT HOURS  3.0
PREREQUISITES  ACCT 4310, ACCT 4610, both with a minimum grades of C-
DESCRIPTION  This course covers auditing and assurance topics in depth from professional and research perspectives. The topics include audit judgment research, substantive testing research, fraud, going concern judgments, attestation engagements, international auditing, professional ethics, and litigation issues. Topics of current interest, especially those related to assurance services in an e-business environment and the development of international auditing standards, are also covered.

ACCT 8630  Information Technology Auditing
CREDIT HOURS  3.0
PREREQUISITES  ACCT 4610 or CIS 8000 or MBA 8125
DESCRIPTION  This course focuses on the knowledge and skills required for practice of IT auditing in the post-Sarbanes-Oxley world in which internal control is assessed in financial audits. The course covers assessment of internal control in technology-intensive settings, continuous monitoring and auditing of applications, and auditing of system development. Students work through audit simulations to develop IT audit expertise.

<th>Credit Hours</th>
<th>Prerequisites</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 8660</td>
<td>Study Abroad: International Accounting</td>
<td>3.0</td>
<td>None; Consent of instructor</td>
<td>This course analyzes the impact of cultural, economic, and other factors on the practice of accounting and taxation. Concepts and practices of business strategy, asset allocation, transfer pricing, business valuation, and other concerns are examined as they relate to the U.S. and host countries. This is accomplished in part through classroom or web discussions of the various issues. The main portion of the learning process is completed through travel with faculty members to the host countries. The students interview and consult with business managers, accounting professionals, academicians, and tax officials in that country.</td>
</tr>
<tr>
<td>ACCT 8680</td>
<td>Security and Privacy of Information and Information Systems</td>
<td>3.0</td>
<td>None</td>
<td>(Same as CIS 8080). This course is designed to develop knowledge and skills for the management and assurance of security of information and information systems in technology-enabled environments. It focuses on concepts and methods associated with planning, designing, implementing, managing, and auditing security at all levels on different platforms, including worldwide networks for e-business. The course presents techniques for assessing risk associated with accidental and intentional breaches of security and covers the associated issues of ethical uses of information and privacy considerations.</td>
</tr>
<tr>
<td>ACCT 8700</td>
<td>Financial Statement and Business Analysis</td>
<td>3.0</td>
<td>ACCT 4113 or ACCT 8020</td>
<td>This course provides in-depth use of methods for performing financial statement analyses to evaluate a company's profitability, liquidity, solvency, and market value. It demonstrates how these analyses can be used to diagnose a company's past performance and to set operational and financial targets in traditional and e-business environments.</td>
</tr>
<tr>
<td>ACCT 8710</td>
<td>Forensic Accounting</td>
<td>3.0</td>
<td>ACCT 4610</td>
<td>This course introduces the advanced accounting student to the forensic accounting profession. The specific focus is on the three primary areas involved in forensic accounting, namely, conflict resolution, fraud detection and forensic auditing. The important theories underpinning the study of fraudulent behavior, damage theories and auditing are thoroughly discussed along with the practical aspects of the profession including the tools, techniques and expectations.</td>
</tr>
</tbody>
</table>
Seminar on Internal Auditing

**ACCT 8740**

**CREDIT HOURS** 3.0

**PREREQUISITES** ACCT 4610 or ACCT 8050

**DESCRIPTION** In this course students are introduced to the current theory and practices of internal auditing viewed as a component of organizational governance. Students will learn to evaluate the effectiveness of various internal controls and make recommendations for improving corporate governance. Important auditing-related theories including risk management will be discussed along with practical implications of internal management controls and the monitoring required for improving their effectiveness. The course will include cases and also expose students to the ethical, independence, and technological issues that internal auditors deal with.

Seminar in Auditing Research

**ACCT 9200**

**CREDIT HOURS** 3.0

**PREREQUISITES** Consent of instructor

**DESCRIPTION** This course covers topics, theories, and methodologies relevant to research in auditing research. In addition to studying existing literature, students complete a research project in some area of auditing. The project should extend existing research or propose a new idea.

Seminar in Critical Analysis of Accounting Research

**ACCT 9100**

**CREDIT HOURS** 1.0 - 3.0

**PREREQUISITES** Consent of instructor

**DESCRIPTION** This course develops students' ability to analyze accounting research papers with respect to design issues such as the choice of research issues, the development of theoretical underpinnings, the appropriateness of research methods, the effectiveness of methods' application, and the cogency of the presented results. The research issues addressed span the subspecialties in accounting and expose students to current research. Students take this course continuously through at least the third year in the doctoral program and engage in oral and written critiques of accounting research papers.

Seminar in Managerial Accounting Prerequisite: Consent of the instructor

**ACCT 9300**

**CREDIT HOURS** 3.0

**DESCRIPTION** This course covers the topics, theories, and methodologies relevant to research in managerial accounting. In addition to studying existing literature, students prepare research proposals in managerial accounting.

Seminar in Financial Accounting Research

**ACCT 9400**

**CREDIT HOURS** 3.0

**PREREQUISITES** Consent of the instructor

**DESCRIPTION** This course exposes the student to scientific inquiry and methodology as it applies to theory construction and verification in financial accounting. An emphasis is placed on critical evaluation of recent developments in empirical accounting research. Topics include controversial issues in the field and an examination of significant research projects undertaken toward resolution of these issues.

Reading Seminar in Accounting

**ACCT 9900**

**CREDIT HOURS** 3.0

**PREREQUISITES** Consent of the instructor

<tr>
<td>AS 8340</td>
<td>Life Contingencies</td>
<td>3.0</td>
<td>None</td>
<td>This course is an introduction to life contingencies as applied in actuarial practice. Topics include present value random variables for contingent annuities and insurance, their distributions and actuarial present values, equivalence principle, and other principles for determining premiums.</td>
</tr>
<tr>
<td>AS 8350</td>
<td>Insurance Mathematics</td>
<td>3.0</td>
<td>AS 8340</td>
<td>This course consists of life insurance as well as non-life insurance mathematics. Topics include insurance and annuity reserves, characterization of discrete and continuous multiple decrement models, paid and incurred loss development, loss reporting and settlement delay.</td>
</tr>
<tr>
<td>AS 8360</td>
<td>Insurance Ratemaking</td>
<td>3.0</td>
<td>AS 8350</td>
<td>This new course exposes the students to the principles and techniques involved in insurance ratemaking across various product lines (life insurance, health insurance and Property &amp; Casualty insurance). Insurance ratemaking (or pricing) is a key function performed by actuaries and is fundamental to the financial viability of an insurance company. The course will incorporate policy and claims experience, pricing assumptions, profitability targets, and capital requirements in developing premium rates.</td>
</tr>
<tr>

### MSA ANALYTICS

#### MSA 7001  
**Basic Math for Analytics**

**CREDIT HOURS**: 1.5.0  
**PREREQUISITES**: None

**DESCRIPTION**: This is an introductory and review course on Calculus I, which provides the mathematical preparations for MSA students as well as others who are interested in sharpening their math skills. The course covers a variety of topics including functions, derivatives, integrals, differential equations and, infinite sequences and series. Content will be linked to various topics in courses such as statistics, machine learning, and econometrics.

#### MSA 7003  
**Foundations for Programming**

**CREDIT HOURS**: 1.5.0  
**PREREQUISITES**: None

**DESCRIPTION**: Prerequisites: None. This is an introductory and review course on data structures and algorithms, which provide the programming preparations for MSA students as well as others who are interested in sharpening their programming skills. The course covers a variety of topics including algorithmic complexity, object oriented programming, lists, hash tables, recursion, binary trees, heaps, sorting algorithms, and graphs. Content will be linked to various topics in MSA courses.

#### MSA 8000  
**Consumer and Managerial Decision Making**

**CREDIT HOURS**: 3.0  
**PREREQUISITES**: ECON 2105 AND ECON 2106 or MBA 7035

**DESCRIPTION**: Prequisites: ECON 2105 AND ECON 2106 or MBA 7035. This course presents a microeconomic framework of consumer and managerial decisions from which analytically informed strategies can be developed. The first part presents a model of consumer preferences and how individuals make purchasing choices for products or services. Topics include preferences and utility theory, demand analysis, and the impact uncertainty and incomplete information have on consumer decisions. The second part extends the theory of individual choice to corporate managerial decision-making. Topics covered include risk and return analysis, cost of capital, project selection, and capital budgeting techniques. Illustrative applications using large data will be included as necessary.

#### MSA 8005  
**Mathematical Foundations for Analytics**

**CREDIT HOURS**: 1.0 - 3.0  
** REQUIREMENTS**: Permission from instructor

**DESCRIPTION**: This is an introductory and review course on calculus, linear algebra, and probability foundations, which provides the mathematical basics for MSA students. The course covers a variety of topics including functions, limits, derivatives, integrals with single and multiple variables, and some probability foundations such as measures, expectations, and the central limit theorem. Content will be linked to various topics in other analytics courses such as machine learning, statistics, operations research, and econometrics.
### MSA 8010 Data Programming for Analytics

**CREDIT HOURS** 3.0  
**PREREQUISITES** MRM 8000  
**DESCRIPTION** This course builds upon the student's foundation of programming principles through the introduction of application programming for data analysis. Major areas covered include inheritance and polymorphism, common programming data structures, and file and database access. Students will implement data analysis applications, which will be evaluated according to advanced programming principles. The programming language will be noted in the course listing for each semester.

### MSA 8020 Data Visualization

**CREDIT HOURS** 1.5.0  
**PREREQUISITES** None  
**DESCRIPTION** This course introduces students to basic visualization tools as well as data exploration and data presentation skills. The course mainly covers 3 parts: visualization in R using ggplot2; visualization in Tableau; and advanced visualization tools including interactive visualization, spatial visualization and dimension reduction.

### MSA 8040 Data Management for Analytics

**CREDIT HOURS** 3.0  
**PREREQUISITES** None  
**DESCRIPTION** It covers a variety of topics including relational data modeling, logical and physical database design, structured query language, capturing, cleaning and merging unstructured data, and analysis techniques, such as classification, sentiment analysis, clustering and information retrieval. The methods and techniques discussed will be linked to other topics, such as machine learning, and applied to practical analytics problems.

### MSA 8050 Scalable Data Analytics

**CREDIT HOURS** 3.0  
**DESCRIPTION** This course covers essential concepts and tools for large scale data analytics. Topics include 1) functional and parallel programming paradigms and languages, 2) core components of large scale platforms, 3) scalable machine learning algorithms, and 4) real-time data analysis. Programming projects demonstrate design and implementation of large scale analytics pipelines for structured and un-structured data.

### MSA 8100 Optimization Methods in Analytics

**CREDIT HOURS** 1.5.0  
**PREREQUISITES** None  
**DESCRIPTION** This course introduces students to the theory, algorithms, and applications of optimization in analytics. The optimization methodologies include linear programming, nonlinear programming and advanced optimization. Examples and applications in analytics, statistics and machine learning will be discussed.

### MSA 8150 Machine Learning for Analytic

**CREDIT HOURS** 3.0  
**PREREQUISITES** MSA 8010  
**DESCRIPTION** The course will cover theory, methods, and tools for automated inference from data. This introductory course will include (1) supervised learning, (2) unsupervised learning methods, (3) graphical structure models, and (4) deep learning. The course will prepare students in the fundamentals of machine learning, as well as provide practical skills in applying current software tools to machine inference from large data sets.

<tr>
<td>MSA 8190</td>
<td>Statistical Foundations for Analytics</td>
<td>3.0</td>
<td>None</td>
<td>The course covers basic probability and mathematical statistical theory, and provides a basic introduction to linear models, with an eye on application. The course starts with a primer on linear algebra, discussing the solution of linear equation systems, the rank of a matrix, determinants, eigenanalysis, and diagonalization; and basic probability theory, including probability spaces, dependence, random variables, (conditional) expectations, and sampling. It continues with the introduction of discrete and continuous distributions, and basic statistical theory of estimation and inference. Topics include consistency, unbiasedness, efficiency, maximum likelihood estimation, central limit theorem, confidence intervals, and hypothesis testing.</td>
</tr>
<tr>
<td>MSA 8200</td>
<td>Econometric Predictive Analytics</td>
<td>3.0</td>
<td>MSA 8190 or consent of the instructor</td>
<td>This course introduces students to different predictive models with a focus on real-world applications and datasets. The course covers three primary topics: the analysis of time series data, including estimation and inference for ARIMA models; the set of skills required to analyze real world data, including data pre-processing, data type identification, and different types of models for panel and cross-sectional data; the students will also have hands on experience of working with real world data.</td>
</tr>
<tr>
<td>MSA 8300</td>
<td>Value Through Analytics: Model Deployment and Life Cycle Mgmt</td>
<td>3.0</td>
<td>MGS 8040</td>
<td>This course serves as a practicum to apply aspects of the life cycle of a predictive model with real data. Students review all phases of the cycle to identify the need for models based on the business situation, define the appropriate inputs to the model, identify sources of data, and prepare data for modeling. They develop and validate the model, and discuss strategies for deployment. They develop and put in place processes for testing and monitoring the quality of the models to ensure optimal performance. Champion/challenger strategies and standardized as well as custom monitoring reports are discussed. As models degrade over time, strategies for updating and replacing models and assessing the business benefit over time will be addressed to complete the model life cycle.</td>
</tr>
<tr>
<td>MSA 8350</td>
<td>Legal Analytics</td>
<td>3.0</td>
<td>None</td>
<td>Cross listed with LAW 7675. This course introduces students to the emerging field of legal analytics, which employs computational and statistical modeling, analysis, and visualization of legal data to accomplish both descriptive and predictive goals. For analytics students, the course provides an introduction to the U.S. legal system and legal reasoning, legal materials, and the problems and questions present in the law. For law students, the course offers an introduction to basic coding, as well as to the theory and applications of text mining, natural language processing, machine learning and other methods for managing and analyzing unstructured data such as that found in legal documents.</td>

<td>ANTH 6020</td>
<td>Anthropological Theory</td>
<td>3.0</td>
<td>ANTH 2020 or consent of instructor</td>
<td>Historical treatment of the major theoretical trends in anthropology.</td>
</tr>
<tr>
<td>ANTH 6040</td>
<td>Race, Class, and Gender in Global Perspective</td>
<td>3.0</td>
<td>ANTH 2020 or consent of instructor</td>
<td>Exploration of the various ways that perceptions and designations of race, class, and gender intersect with each other and shape the human experience. This includes an analysis how categories of class, ethnicity, and gender affect daily life for people in multiethnic, stratified societies, particularly in terms of how inequities of access to wealth, power, and resources have emerged on global and local levels. Structural violence is an important theme of many of the readings in the class. The idea of race as a social construct rather than a biological phenomenon is another key topic. We will examine how gender identity and gender roles are shaped by culture. Globalization and immigration, and their relationship to gender, race, and class, are foci of the latter part of the course.</td>
</tr>
<tr>
<td>ANTH 6060</td>
<td>Environmental Anthropology</td>
<td>3.0</td>
<td>ANTH 1102, ANTH 2010, ANTH 2020, or ANTH 2030 with grade of C or higher, or consent of instructor</td>
<td>During this course we will examine how humans interact with and are influenced by environmental resources, as well as how our actions impact natural resources and ecological systems. Human populations and cultural groups are therefore (re)situated in nature. To explore environmental anthropology as a subfield, the course is structured as a survey of the discipline, examining topics such as historical ecology, population ecology, cultural constructions of &quot;nature,&quot; the anthropology of environmentalism, political ecology, and global environmental issues.</td>
</tr>
<tr>
<td>ANTH 6080</td>
<td>Consumption and Material Culture</td>
<td>3.0</td>
<td>ANTH 2020 or consent of instructor</td>
<td>This course examines anthropological approaches to material culture and consumption: the practices, relations, and rituals through which things from food and clothing to shell valuables or money become meaningful and are used in the organization of social life. Readings include classic works of anthropology and social theory as well as recent ethnographies of western capitalist, colonial/postcolonial and postsocialist settings.</td>

</tbody>
</table>
ANTH 6560  Advanced Field School in Anthropology
CREDIT HOURS  4.0 - 8.0
PREREQUISITES  ANTH 4550 or consent of instructor
DESCRIPTION  Advanced anthropological field methods. Students expand upon the ethnographic, archaeological, linguistic, and/or biological methods learned in ANTH 6550 through supervised development and completion of their own professional research project.

ANTH 6590  Archaeological Methods
CREDIT HOURS  4.0
PREREQUISITES  ANTH 2030 or consent of the instructor
DESCRIPTION  Data recovery techniques, analytic methods, and theoretical concepts. Experience with archaeological materials.

ANTH 6600  Archaeological Theory
CREDIT HOURS  4.0
PREREQUISITES  ANTH 2030 with grade of C or higher or consent of instructor
DESCRIPTION  Review of the history of theory in anthropological archaeology, followed by a comprehensive overview of the state of contemporary theory and new theoretical directions in the discipline.

ANTH 6670  Research Methods in Sociocultural Anthropology
CREDIT HOURS  3.0
PREREQUISITES  ANTH 2020 with grade of C or higher
DESCRIPTION  Examines various research approaches that constitute sociocultural anthropology. This course dissolved the divisions between qualitative and quantitative research to form an inclusive research methodology. Topics covered include qualitative and quantitative approaches, history of research methodology, defining a population, coding, modeling, social impact analysis, and linguistic and cognitive research.

ANTH 6700  Cultures of Display: Archaeology, Museums and Nationalism
CREDIT HOURS  3.0
DESCRIPTION  This course examines the ways in which archaeology and public museums were placed in the service of emerging nationalism in "the long 19th century" (1789-1920), specifically in Italy, Greece, Egypt and Turkey.

ANTH 6740  Cultural History of Sexuality: From Plato to Foucault
CREDIT HOURS  3.0
DESCRIPTION  This course explores the relationship between Greek reflections on eros (in tragedy and philosophy) and modern theories of sex and sexuality grounded in these same texts (Freud and Foucault). The goal is an understanding of the modern culture of "sexuality."

ANTH 6750  Film Culture, Morality and Modernity
CREDIT HOURS  3.0
DESCRIPTION  This course begins with an analysis of the technological revolutions that made modern film culture possible, as well as the shift in perceptions of objectivity and subjectivity in storytelling occasioned by these startling innovations.

ANTH 6760  Archaeology of the Olympics
CREDIT HOURS  3.0
DESCRIPTION  This course offers a comparative study of the ancient and modern Olympic Games, which will concentrate on the cultural and religious meaning of ritualized athletic activity. It also provides a case study of Neohellenic revival, a significant cultural force, globally speaking, in the last two hundred years.

</table>
| ANTH 8070  | Museum Experience                 | 3.0          | *Prerequisites:* Consent of instructor  
This course will provide students with a critical understanding of museum exhibits and/or museum collections through fieldwork, data collection or observations and may involve collections housed at Georgia State University or elsewhere to provide hands-on experience, anthropological insights and professional skills concerning the reproduction of knowledge for public education. |
| ANTH 8220  | Refugees and Forced Migration      | 3.0          | Provides an understanding of forced migration processes (the complex causes, characteristics, and consequences of displacement) and of the "refugee problem" (how international policymakers and scholars have constructed displacement as an object for analysis and action and some of the consequences of this construction). (Same as GLOS 8220.). |
| ANTH 8240  | Public Archaeology                | 3.0          | *Prerequisites:* consent of the instructor  
Laws and regulations governing cultural resource protection and preservation, the conduct of archaeology in a contract format, and mechanisms for public education. |
| ANTH 8900  | Directed Study                    | 3.0 - 9.0    | Independent Study.                                                                                                                          |
| ANTH 8910  | Internship                         | 1.0 - 9.0    | Academic training and professional experience through short-term internships at public or private agencies.  
May be taken more than once, but only three credits may be applied toward graduate requirements. |
| ANTH 8990  | Research Practicum                | 3.0          | For non-thesis students only.  
This course serves as a research practicum in lieu of a thesis for the M.A. degree. May be retaken but only three credit hours can count toward the M.A. |
<p>| ANTH 8999  | Thesis Research                   | 1.0 - 9.0    |                                                                                                                                            |</p>

</tbody>
</table>
AL 8410  International Internship

CREDIT HOURS  1.0 - 6.0

PREREQUISITES  One full semester of graduate work in the Department of Applied Linguistics and approval from a faculty member

DESCRIPTION  This course provides an opportunity for graduate students in applied linguistics to participate in international activities under the supervision of a GSU faculty member. Students will gain occupational skills through hands-on experience and apply second language acquisition theory and pedagogical training to real-world situations. Students will also learn experientially about intercultural communication. These credit hours are in addition to other requirements of the MA Degree.

AL 8450  Approaches to Teaching Second/Foreign Languages

CREDIT HOURS  3.0

DESCRIPTION  An overview, description, and analysis of methods and approaches to second language teaching. Focus on theoretical perspectives, major issues, and current controversies. Examination of the historical and theoretical foundations. Particular attention to long-term development of language teachers as decision-makers and problem-solvers.

AL 8460  English Grammar for ESL/EFL Teachers

CREDIT HOURS  3.0

DESCRIPTION  Investigation of the characteristics of the English language with emphasis on form and meaning in discourse. Discussion and applications to the teaching of ESL/EFL, especially the development and modification of language-teaching curricula, lessons, and materials.

AL 8470  Sociolinguistics

CREDIT HOURS  3.0

DESCRIPTION  The fundamental concepts of sociolinguistics: the study of the interplay of linguistic, social, and cultural factors in human communication. Relation of those concepts to the concerns of language teaching, particularly the teaching of English as a second or foreign language.

AL 8480  Classroom Practices in Teaching English as a Second or Foreign Language

CREDIT HOURS  3.0

DESCRIPTION  Emphasis on practical needs of prospective English language teachers and complement to the department's required AL 8450 course. Focus specifically on classroom techniques, instructional procedures, and teacher/learner behaviors. Familiarization with instructional procedures consistent with established theoretical principles of second language teaching/learning.

AL 8520  Psycholinguistics

CREDIT HOURS  3.0

DESCRIPTION  A broad introduction to psycholinguistics at the graduate level, covering general methodology for the study of psycholinguistics, the nature of language, biological bases of language, language and the brain, animal communication systems, language comprehension, discourse processing, speech perception and production, and first and second language development.

</thead>
<tbody>
<tr>
<td>AL 8530</td>
<td>Issues in Second Language Writing</td>
<td>3.0</td>
<td>(Same as ENGL 8530.) Theories and practices underlying the teaching and learning of second language writing. Emphasis on developing the background necessary for graduate students to examine and refine their own pedagogical positions on the teaching of writing.</td>
</tr>
<tr>
<td>AL 8550</td>
<td>Second Language Evaluation and Assessment</td>
<td>3.0</td>
<td>An overview of language testing with a focus on the development of teacher-generated tests to measure student's achievement in a second language.</td>
</tr>
<tr>
<td>AL 8570</td>
<td>Second Language Reading-Writing Relationships</td>
<td>3.0</td>
<td>Examination of evolving theories of reading and writing as interconnected sociocognitive processes and of the changing nature of these processes in the transition from print to electronic literacies. Exploration of pedagogical implications of the new multiliteracies for second language classrooms.</td>
</tr>
<tr>
<td>AL 8620</td>
<td>Technology and Language Teaching</td>
<td>3.0</td>
<td>This course provides an overview of computer-based or technology-enhanced language learning and teaching through exploring a working theory of technology and language learning environments, using and discussing existing and potential applications of computer and corpus tools and approaches in the language classroom, and creating projects to use and test knowledge gained through reading, discussion, and hands-on experience.</td>
</tr>
<tr>
<td>AL 8630</td>
<td>English for Specific Purposes (ESP)</td>
<td>3.0</td>
<td>Refers to that branch of ESL teaching and research in which the course content and teaching methods are derived from an analysis of a specific language use situation, such as English for business, English for tour guides, English for English teaching, or English for air traffic control. The course focuses on two aspects of ESP teaching and research that may be said to distinguish them from more general purpose English: authenticity of task and the interaction between language knowledge and specific purpose content knowledge.</td>
</tr>
<tr>
<td>AL 8710</td>
<td>Research Methods in Applied Linguistics</td>
<td>3.0</td>
<td>Fundamental concepts of qualitative and quantitative research methods. Focus is on understanding the main research paradigms in applied linguistics, critically evaluating published research articles, and interpreting basic descriptive and inferential statistics.</td>
</tr>
<tr>
<td>AL 8760</td>
<td>Corpus Linguistics</td>
<td>3.0</td>
<td>Review of the literature on corpus linguistics with a focus on both the conceptual and methodological underpinnings of the field. Analysis of a selection of corpora of English. Development of corpora. Use of concordancing software in corpus analysis.</td>
</tr>
</tbody>
</table>
AL 8765  Phraseology  
CREDIT HOURS 3.0  
DESCRIPTION Analysis of patterns of lexis in text and underlying phrase patterns characteristic of various discourse types with applications to issues in applied linguistics.

AL 8820  Psycholinguistics  
CREDIT HOURS 3.0  
PREREQUISITES PhD student status or permission of the instructor  
DESCRIPTION A broad introduction to psycholinguistics at the graduate level, covering general methodology for the study of psycholinguistics, the nature of language, biological bases of language, language and the brain, animal communication systems, language comprehension, discourse processing, speech perception and production, and first and second language development.

AL 8850  Second Language Evaluation and Assessment  
CREDIT HOURS 3.0  
PREREQUISITES PhD student status or permission of the instructor  
DESCRIPTION An overview of language testing with a focus on the development of teacher-generated tests to measure student’s achievement in a second language.

AL 8860  English Grammar for ESL/EFL Teachers  
CREDIT HOURS 3.0  
PREREQUISITES Ph.D. student status or permission of the instructor  
DESCRIPTION Investigation of the characteristics of the English language with emphasis on form and meaning in discourse. Discussion and applications to the teaching of ESL/EFL, especially the development and modification of language-teaching curricula, lessons, and materials.

AL 8870  Sociolinguistics  
CREDIT HOURS 3.0  
PREREQUISITES PhD student status or permission of the instructor  
DESCRIPTION This course focuses on the fundamental concepts of sociolinguistics: the study of the interplay of linguistic, social, and cultural factors in human communication. Relation of those concepts to the concerns of language teaching, particularly the teaching of English as a second or foreign language, will also be addressed.

AL 8900  Practicum in Teaching English to Speakers of Other Languages  
CREDIT HOURS 3.0  
DESCRIPTION Practical teaching experience for pre-service teachers of English as a second language. Enrollment limited to AL/ESL graduate students whose schedules permit them to observe and participate in the practicum supervisor’s ESL course.

AL 8910  Directed Individual Study  
CREDIT HOURS 1.0 - 3.0  
DESCRIPTION Exploration of a particular area of interest in department. Study is based on plan submitted by the student. Permission of adviser required.

AL 8920  Research Apprenticeship for Graduate Research Assistants  
CREDIT HOURS 3.0  
DESCRIPTION Supervised research as an assistant to a faculty member. Required of all GRA’s in the department. Does not count toward degree requirements.

AL 8930  Apprenticeship for Graduate Laboratory Assistants  
CREDIT HOURS 3.0  
DESCRIPTION Supervised work as a graduate laboratory assistant. Required of all GLA’s in the department. Does not count toward degree.

AL 8987  Seminar in Second Language Reading, Writing, and Literacy
CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
DESCRIPTION  In-depth investigation of a topic related to reading, writing, or literacy in a second or foreign language. May be repeated if topics vary. Course is for doctoral and advanced MA students.

AL 8990  Current Issues in Preparation of Second Language Teachers
CREDIT HOURS  3.0
PREREQUISITES  AL 8450 or consent of instructor or PhD student status
DESCRIPTION  For prospective educators of ESL and EFL teachers. Focuses on theory, processes, and research options teacher educators may explore to prepare language teachers to work in diverse cultural, linguistic, and social contexts. Expands awareness of social, cultural, professional, and institutional considerations that combine to influence the process of serving as an educator of ESL/EFL teachers, especially of those teachers who work in English for Academic Purposes (EAP) settings with adult learners. Research project focused on L2 teacher learning and/or teacher development required. Course is for doctoral and advanced MA students.

AL 8991  Seminar in Second and Foreign Language Pedagogy
CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
DESCRIPTION  In-depth investigation of a topic related to second and/or foreign language pedagogy, such as task-based language learning and assessment, L2 pronunciation, or critical pedagogy. May be repeated if topics vary. Course is for doctoral and advanced MA students.

AL 8992  Seminar in Second Language Teacher Development
CREDIT HOURS  3.0
PREREQUISITES  AL 8990 or consent of instructor
DESCRIPTION  Designed for prospective educators of ESL and EFL teachers. Surveys current research and theory in second language (L2) teacher learning and professional development of L2 teachers. Participants will complete a research project focused on L2 teacher learning and/or teacher development as part of course requirements. Course may be repeated if topic varies. Course is for doctoral and advanced MA students.

AL 8994  Seminar in Language and Technology
CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
DESCRIPTION  In-depth investigation of a topic related to language and technology. May be repeated if topics vary. Course is for doctoral and advanced MA students.

AL 8995  Seminar in Second Language Assessment and Evaluation
CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
DESCRIPTION  In-depth investigation of a topic in assessment. May be repeated if topics vary. Course is for doctoral and advanced MA students.

AL 9800  Selected Topics
CREDIT HOURS  3.0
DESCRIPTION  Study of current theory and research in variable topics in Applied Linguistics. Course may be repeated if topic varies.

ART 6100 Pedagogy for Teaching Assistants
CREDIT HOURS 3.0
DESCRIPTION For graduate students in the Welch School of Art and Design only. Develop teaching philosophy, syllabus construction, teaching methods, and creation of a teaching portfolio. Must be taken before a graduate student is eligible to teach in the department. Not for degree credit.

ART 6200 Teaching Practicum in Art and Design
CREDIT HOURS 3.0
PREREQUISITES ART 6100
DESCRIPTION Practical experience in teaching art and design classes by shadowing experienced faculty members.

ART 6300 Research Practicum in Art
CREDIT HOURS 3.0
DESCRIPTION Not for degree credit. Supervised research as an assistant to a faculty member.

ART 6400 Laboratory Practicum in Art
CREDIT HOURS 3.0
DESCRIPTION Not for degree credit. Supervised work as a studio laboratory assistant to an art discipline.

ART 6500 Professional Practices in Art and Design
CREDIT HOURS 3.0
PREREQUISITES Open to graduate students in Art and Design only
DESCRIPTION This course introduces students to both the applied and theoretical aspects of professional practices in the arts.

ART 6600 Thesis Writing in Art and Design
CREDIT HOURS 3.0
PREREQUISITES Graduate status in the School of Art and Design
DESCRIPTION This course introduces graduate students in the School of Art and Design to the mechanics of graduate-level research and writing for M.F.A. and M.A. theses.

ART 6780 Internship
CREDIT HOURS 3.0
DESCRIPTION Practicum in Art and Design classes. Observing, teaching, coordinating, and directing art experiences under the guidance of supervising professor. Required for GTAs.

ART 6850 Visiting Artist Seminar
CREDIT HOURS 3.0
PREREQUISITES M.F.A. status, or permission of area coordinator
DESCRIPTION Specialized graduate course devoted to topics related to the Ernest G. Welch Visiting Artist. The Visiting Artist will be distinguished in his or her area of expertise and will teach on campus during his or her semester of residency.

ART 6980 Directed Study
CREDIT HOURS 1.0 - 6.0
PREREQUISITES Consent of instructor and School director
DESCRIPTION Independent studies initiated by the student.

ART 8700 Graduate Research
CREDIT HOURS 1.0 - 18.0
DESCRIPTION Conceptual Development using a variety of traditional and experimental approaches to studio art, graphic design, art education, interior design or art history. May be repeated for a maximum of 80 credits.

AH 6300 Modern Architecture
CREDIT HOURS 3.0
DESCRIPTION Critical history of Western architecture from the eighteenth through twenty-first centuries.

AH 6610 Twentieth-Century European and American Modernism
CREDIT HOURS 3.0
DESCRIPTION Emphasizes analysis of social, economic, and political forces as they influence art in diverse media.

AH 6620 African-American Art
CREDIT HOURS 3.0
DESCRIPTION (Same as AAS 6082.) Aesthetic expression of African-American artists from colonial times to present. Social, cultural, and creative history of Black America. Diverse contributions made by artists of African descent to the development of American culture. Artists, art movements, the relationship of art to politics, and the formation of racial/cultural identity.

AH 6630 Pre-Colombian Art
CREDIT HOURS 3.0
DESCRIPTION Introduction to the visual culture of the Andes and Mesoamerica before Columbus.

AH 6650 American Art
CREDIT HOURS 3.0
DESCRIPTION American painting, sculpture, photography, and architecture from the Revolutionary War to World War II.

ASTR ASTRONOMY

ASTR 6100 Astronomical Techniques and Instrumentation
CREDIT HOURS 3.0
DESCRIPTION Three lecture hours a week. Fundamentals and practical application of photography, spectroscopy, photometry, astrometry, interferometry, and current developments in detector technology and telescope design.

ASTR 6200 Astronomical Data Analytics
CREDIT HOURS 3.0
DESCRIPTION This course presents an overview of modern astrophysical phenomena with an introduction to astronomical databases, plotting tools, data manipulation and visualization, and numerical analysis techniques. The course will emphasize data-driven problem solving, hands-on computational skills, and critical thinking. Three lecture hours a week.

ASTR 6300 Teaching Astronomy
CREDIT HOURS 2.0
DESCRIPTION Course provides a theoretical and practical foundation for science teaching. Topics include univocal and dialogic discourse, questioning strategies, Bloom’s taxonomy, mental models, formative assessment and bridging, the resource framework, motivation and cooperative learning, argumentation, metacognition, nature of science, and qualities of effective teachers. Two lecture hours per week.

ASTR 6310 Teaching Astronomy Lab Practicum
CREDIT HOURS 1.0
DESCRIPTION Students will practice teaching astronomy lessons and apply science teaching theories and methods learned in ASTR 6300. One and one half hours per week.

ASTR 6510 Astrophysics of Stars and Planets
CREDIT HOURS 3.0
DESCRIPTION First of a two-semester sequence forming an introduction to the modern science of astronomy and astrophysics. Topics will include a survey of astronomical tools and methods, the physics of radiation and matter interactions, the Earth-Moon System, Solar System structure, formation, and membership, exoplanets, and the properties of the Sun and stars. To teach this course, the instructor use calculus-based physics to explain the motions and properties of celestial objects.

ASTR 6520 Galactic and Extragalactic Astrophysics
CREDIT HOURS 3.0
DESCRIPTION Second of a two-semester sequence forming an introduction to the modern science of astronomy and astrophysics. Topics will include the structure and properties of stellar atmospheres and interiors, star formation, stellar evolution, the Milky Way galaxy, properties of galaxies, large scale structure of the Universe, and cosmology. To teach this course, the instructor will use calculus-based physics to explain the motions and properties of celestial objects.

ASTR 7010 Astronomy for Teachers I
CREDIT HOURS 4.0
DESCRIPTION Designed to give teachers a basic understanding of introductory astronomy, including celestial motions of the stars, sun, moon, and planets; historical development of our understanding of gravitation and orbital motion. Electromagnetic radiation and basic light emitting processes. Telescopes and astronomical instrumentation. Physical nature of the earth, moon, and terrestrial and Jovian planets. Information on teaching resources in astronomy will be available.
ASTR 7020  Astronomy for Teachers II  
**CREDIT HOURS** 4.0  
**PREREQUISITES** ASTR 7010 with grade of C or higher  
**DESCRIPTION** Designed to extend a teacher's understanding of our observations of the sun and stars with the derivation of their fundamental properties, including the conditions and fusion reactions below their surfaces. Matter between stars and stellar birth; old-age; and death, including neutron stars and black holes. Our Milky Way and other galaxies; quasars and peculiar galaxies; evidence for and interpretation of an expanding universe. Information on teaching resources will be available.

ASTR 7910  Directed Study in Astronomy for Teachers  
**CREDIT HOURS** 1.0 - 4.0  
**DESCRIPTION** Areas of study and credit to be determined by the department.

ASTR 8000  Stellar Atmospheres and Spectroscopy  
**CREDIT HOURS** 4.0  
**DESCRIPTION** Physics of radiative transfer in stellar atmospheres and the formation of continuous and line spectra with particular emphasis on the spectroscopic analysis of stellar photospheres. Topics include extended atmospheres, deviations from local thermodynamical equilibrium, determination of chemical abundances in stars, and the analysis of atmospheric motions. Four lecture hours a week.

ASTR 8100  Stellar Structure and Evolution  
**CREDIT HOURS** 4.0  
**DESCRIPTION** The concepts of thermodynamics, hydrostatics, energy transport, and nuclear energy generation are developed to understand the structures of stars. Time-dependent versions of these relations are then used to understand star formation, stellar evolution, red giants, white dwarfs, and supernovae. Four lecture hours a week.

ASTR 8120  Plasma Physics and Magnetohydrodynamics  
**CREDIT HOURS** 3.0  
**PREREQUISITES** PHYS 8100 and PHYS 8110 with grades of B- or higher  
**DESCRIPTION** This course provides an introduction to the physics of plasmas, with an emphasis on developing a physical understanding of the non-intuitive nature of plasmas, and acquiring the basic techniques required for carrying out research in plasma physics.

ASTR 8130  Introduction to Fluid Dynamics with Astrophysical Applications  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Fluid dynamics including viscosity, diffusion, vorticity, turbulence, convection, and instabilities. Applications to chemically reactive flows, boundary layers, relativistic flows, particle-fluid interactions, and shocks and astrophysical settings such as stellar oscillations and galactic dynamics using numerical methods and computational frameworks.

</table>
**BIOL 6010**  Mathematical Biology  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  MATH 2212 or MATH 1220  
**DESCRIPTION**  (Same as MATH 6010.) This course provides an introduction to the use of continuous and discrete differential equations in the biological sciences. Biological topics will include single species and interacting population dynamics, modeling infectious and dynamic diseases, regulation of cell function, molecular interactions and receptor-ligand binding, biological oscillators, and an introduction to biological pattern formation. There will also be discussions of current topics of interest such as Tumor Growth and Angiogenesis, HIV and AIDS, and Control of the Mitotic Clock. Mathematical tools such as phase portraits, bifurcation diagrams, perturbation theory, and parameter estimation techniques that are necessary to analyze and interpret biological models will also be covered.

**BIOL 6011**  Principles of Paleontology  
**CREDIT HOURS**  4.0  
**PREREQUISITES**  Geol 1122K, or consent of instructor  
**DESCRIPTION**  (Same as Geol 6011.) Three lecture and three laboratory hours a week. An introduction to the principles of paleontology including taphonomy, taxonomy, evolution, and extinction by examination of the fossil record. Study of commonly preserved organisms and their use in paleoecology, paleoenvironmental reconstruction, biostratigraphic correlation, and conservation paleobiology will be stressed as well.

**BIOL 6014K**  Invertebrate Biology  
**CREDIT HOURS**  4.0  
**PREREQUISITES**  BIOL 3840 and BIOL 3850, or equivalent course work  
**DESCRIPTION**  Three lecture and three laboratory hours a week. Structure, function, distribution, and taxonomic relationship of invertebrate animals.

**BIOL 6015**  Vertebrate Biology  
**CREDIT HOURS**  4.0  
**PREREQUISITES**  BIOL 3840 and BIOL 3850, or equivalent course work  
**DESCRIPTION**  Three lecture and three laboratory hours a week. Diversity, taxonomy, structure, function, distribution, and ecology of living and extinct vertebrates.

**BIOL 6040**  Neuroethology  
**CREDIT HOURS**  4.0  
**PREREQUISITES**  NEUR 3000 or BIOL 4102, or equivalent, with a grade of C or higher  
**DESCRIPTION**  Four lecture hours per week. (Same as NEUR 6040). The neural basis of behavior from an ethological perspective. The course will cover discoveries, techniques, and concepts underlying neuroethological research. Developmental, evolutionary, and comparative approaches are emphasized. 4.00 credit hours.

**BIOL 6045K**  General Ecology  
**CREDIT HOURS**  4.0  
**PREREQUISITES**  Either BIOL 3820, BIOL 3840, BIOL 4050K, BIOL 6050K, BIOL 7820, BIOL 7840, or equivalent with a C or higher; or permission of instructor  
**DESCRIPTION**  Principles governing distribution and abundance of organisms and their interaction. Three lecture and three laboratory hours a week. Includes a $50 lab fee.
**BIOL 6050**  The Natural Environment of Georgia  
**CREDIT HOURS**  4.0  
**PREREQUISITES**  BIOL 1104K or BIOL 2108K with grade of C or higher, and Geog 1113 or equivalent, or consent of instructor  
**DESCRIPTION**  (Same as Geog 6050.) Three lecture hours a week with a one day weekend lab every other weekend. Georgia is a state with great a diversity of natural communities, in large part because of the many different landscapes present in the state. Through readings, discussions, tests, field outings, projects and in-class exercises, students will become familiar with the principles involved in the structure and function of Georgia's dwindling, but diverse, ecosystems. There will be an emphasis on plant communities and the physical environment, but animal communities and landscape management strategies will also be covered. Locations, diversity, and plant indicator species (especially trees) will be examined in the classroom and in the field, and experiential learning is emphasized.

**BIOL 6055K**  Experimental Methods in Field Ecology  
**CREDIT HOURS**  4.0  
**PREREQUISITES**  Either BIOL 1104K (or BIOL 1104 and BIOL 1104L), BIOL 2108K (or BIOL 2108 and BIOL 2108L), GEOG 1112K (or GEOG 1112 and GEOG 1112L), or GEOG 1113K (or GEOG 1113 and GEOG 1113L); and approval of instructor  
**DESCRIPTION**  Three week intensive field methods course (5 hours/day, 5 days/week, with possible evening or weekend training). Students will learn basic field and lab techniques to assess environmental variables (i.e., vegetation analysis, stream health, soil quality and macroinvertebrates, and social impact. They will collect and analyze data, design projects, and present results at the end of the course. Includes a lab fee.

**BIOL 6070**  Sensory Neuroscience  
**CREDIT HOURS**  3.0  
**DESCRIPTION**  The course will cover the neural basis of sensation and perception, from neural coding in the sense organs to central representation leading to perception. The neurobiology of vision, audition, somatosensation (touch and pain), and chemosensation (taste and smell) will be covered.

**BIOL 6074**  Developmental Biology  
**CREDIT HOURS**  4.0  
**PREREQUISITES**  BIOL 3800, BIOL 7800, or equivalent with a C or higher  
**DESCRIPTION**  Four lecture hours a week. An introduction to developmental biology emphasizing cellular, genetic, and molecular aspects and mechanisms of animal development.

**BIOL 6076**  Evolutionary Developmental Biology  
**CREDIT HOURS**  4.0  
**PREREQUISITES**  Either BIOL 3440, BIOL 3800, BIOL 4074, BIOL 6074, BIOL 6440, BIOL 7800, or equivalent with a C or higher; or permission of instructor  
**DESCRIPTION**  This course will investigate the synthesis of developmental biology and evolutionary thought. Topics include how the development of insects and vertebrates have evolved over time, how evo-devo can generate and maintain organismal diversity, and how evo-devo provides insight into human evolution. Four lecture hours a week.
BIOL 6080  Clinical Neuroscience  
CREDIT HOURS  4.0  
DESCRIPTION  This course will examine the neurobiological basis of mental disorders such as depression and schizophrenia as well as the neurodegenerative conditions of Parkinson’s and Alzheimer’s Diseases. Additional topics include psychoneuroimmunology, stress and coping, the role of genetics and epigenetics in neurological and neuropsychiatric disorders, and the role of gut microbes in health and disease.

BIOL 6094  Developmental Neurobiology  
CREDIT HOURS  4.0  
PREREQUISITES  BIOL 3800 or equivalent  
DESCRIPTION  (Same as NEUR 6100.) Four lecture hours per week. Introduction to the development of the nervous system. Covers the field of developmental neurobiology from neural induction to the modification of neuronal connections in the adult nervous system and uses a variety of model organisms to demonstrate the rules by which nervous systems develop.

BIOL 6100  Cellular and Molecular Neuroscience  
CREDIT HOURS  4.0  
DESCRIPTION  Advanced exploration of cellular and molecular function in neurons and glia. Topics include excitable membranes and cells, ion channels and receptors, synaptic transmission and plasticity, neural development, and molecular bases of neurological diseases.

BIOL 6102  Neurobiology  
CREDIT HOURS  4.0  
PREREQUISITES  BIOL 3800 and BIOL 3840, or equivalents  
DESCRIPTION  (Same as NEUR 6010.) Comprehensive basis for understanding brain research, major discoveries in neuroscience, and the methods employed for those achievements. Topics include the neural basis of learning and memory, sensory perception, motor control, neurological diseases, drug action, and behavior.

BIOL 6104  Zoo Biology  
CREDIT HOURS  4.0  
PREREQUISITES  BIOL 3840 or equivalent  
DESCRIPTION  Four lecture hours a week. Historical background as well as current issues and developments in zoos. Topics include conservation, SSPs (Species Survival Plans), behavioral enrichment, studbook management, and planning/economics of major exhibits. Course instruction will be on-site at Zoo Atlanta. Students will work directly with animal curators and keepers.

BIOL 6105  Medical Neuroanatomy  
CREDIT HOURS  4.0  
PREREQUISITES  BIOL 3840 or equivalent  
DESCRIPTION  Four lecture hours per week. Human brain and spinal cord functional neuroanatomy and associated pathologies. Master's students only.

BIOL 6106  Neuroscience of Memory  
CREDIT HOURS  3.0  
DESCRIPTION  An examination of how the nervous system generates motivation and emotional states in diverse species, including humans. Topics include neural mechanisms of thirst and hunger, defense and fear, and social behavior, as well as disorders of emotion and motivation.

BIOL 6440  Practica In Biotechnology
CREDIT HOURS  5.0
PREREQUISITES  consent of instructor and biotechnology committe
DESCRIPTION  Ten laboratory hours a week. A series of intensive laboratory exercises designed to provide working knowledge and experience in selected areas current interest/ importance in biotechnology. Hands-on experience will be integrated with theory and current best practices.

BIOL 6451  Aquatic Pollution and Toxicology
CREDIT HOURS  4.0
PREREQUISITES  BIOL 2108K, CHEM 1212K
DESCRIPTION  CHEM 2400 recommended. Four lecture hours per week. Comprehensive introduction to water pollution (including relevant methods and techniques) and its relationship to public health.

BIOL 6458  Microbial Ecology and Metabolism
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3880 and CHEM 2400, or equivalent course work
DESCRIPTION  Four lecture hours a week. Application of ecological principles to the microbial world. Topics include biogeochemical cycling, biogradation, bacterial communication and the ecology of disease.

BIOL 6460  Parasitology
CREDIT HOURS  4.0
DESCRIPTION  A survey of the important parasites of humans and domestic animals. Emphasis will be placed on medically important parasitic protozoa, helminthes, and arthropods; clinical effects of infection, epidemiology, methods for detection and identification as well as global impact of parasitic diseases in today's world.

BIOL 6480  Principles of Toxicology
CREDIT HOURS  4.0
PREREQUISITES  BIOL 2108K or equivalent
DESCRIPTION  CHEM 4600 is recommended. Four lecture hours a week. Studies of the absorption, distribution and excretion of toxicants; their detoxication, and bioactivation; their adverse effects.

BIOL 6484  Laboratory Techniques in Applied and Environmental Microbiology
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3880, BIOL 3890, or equivalent; BIOL 4438 and BIOL 4458
DESCRIPTION  One lecture and six laboratory hours a week. Techniques and procedures for isolation, characterization and identification of microorganisms of practical significance; model ecosystems and biofilms; sampling and enumeration of microorganisms; metabolism; and analysis of microbial growth. Includes a $50 lab fee.

BIOL 6500  Human Genetics
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3900 or equivalent
DESCRIPTION  Four lecture hours a week. Principles of human heredity, with emphasis on the molecular basis of heredity, detection and treatment of genetic diseases, and genetic counseling.

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 6545</td>
<td>Bioethics and Biotechnology</td>
<td>4.0</td>
<td>BIOL 3900 with a C or higher, or equivalent</td>
<td>Four lecture hours a week. Ethical issues raised by recent advances in biotechnology, genomics, and other areas of molecular genetics and cell biology. Specific topics include: eugenics; molecular, cellular and organismal cloning; personalized medicine; stem cell research; the genetics of behavior; and the role of epigenetics in the nature vs. nurture debate.</td>
</tr>
<tr>
<td>BIOL 6564</td>
<td>Advanced Genetics</td>
<td>4.0</td>
<td>BIOL 3900 or equivalent</td>
<td>Four lecture hours a week. Advanced topics and techniques in prokaryotic and eukaryotic genetic systems, including gene mapping, molecular techniques, regulation of gene expression, genomics, and population genetics.</td>
</tr>
<tr>
<td>BIOL 6565</td>
<td>General Oncology</td>
<td>4.0</td>
<td>BIOL 3900</td>

</tr>
<tr>
<td>BIOL 6575</td>
<td>Virology</td>
<td>4.0</td>
<td>BIOL 3880 and BIOL 3900, or equivalent course work</td>
<td>Four lecture hours a week. Introduction to viruses. Topics covered include structure and replication of viruses; virus isolation and classification; and pathogenesis and epidemiology of virus disease.</td>
</tr>
<tr>
<td>BIOL 6576</td>
<td>Neurovirology</td>
<td>4.0</td>
<td></td>
<td>Following an introduction to basic neuroanatomy and neuroimmunology, individual lectures will focus on the diagnosis, treatment, and pathogenesis of several neurologic diseases of virus origin. These include encephalitis, meningitis, chronic inflammatory and demyelinating diseases, HIV/AIDS-associated dementia, peripheral neuropathies, retinitis, and transmissible spongiform encephalopathies caused by prions. The concept of virus latency within the nervous system will be emphasized, as will the possible contributions of viruses or prions toward the onset of Alzheimer's disease.</td>
</tr>
<tr>
<td>BIOL 6580</td>
<td>Microbial Pathogenesis</td>
<td>4.0</td>
<td>BIOL 3880 and BIOL 3900, or equivalent course work</td>
<td>Four lecture hours a week. This course integrates material from pathogenic microbiology, molecular biology and immunology into an overview of bacterium-host interactions including bacterial attributes, virulence factors and several paradigms of bacterial-host interactions focusing on molecular and genetic approaches.</td>
</tr>
<tr>
<td>BIOL 6630</td>
<td>Enzymology</td>
<td>3.0</td>
<td></td>
<td>One year of organic chemistry (CHEM 2410) and one semester of biochemistry (CHEM 6600)</td>
</tr>
</tbody>
</table>
BIOL 6640  Fundamentals of Bioinformatics
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3800 or written approval of instructor
DESCRIPTION  (Same as CHEM 6640, CSC 6640, and NEUR 6320.) Four lecture hours per week. A "hands-on" approach to bioinformatics using PCs, the internet, and computer graphics to analyze, correlate, and extract information from biological databases, emphasizing sequence and structure databases for proteins and nucleic acids, and introducing the computing skills necessary for bioinformatics. Topics include: sequences and three-dimensional structures of proteins and nucleic acids, the major databases, algorithms for sequence comparison, data mining, and prediction of structure and function.

BIOL 6648  Biogeography
CREDIT HOURS  4.0
PREREQUISITES  Geog 1112, BIOL 1104K, or BIOL 2108K with grade of B or higher, or consent of instructor
DESCRIPTION  (Same as Geog 6648.) Spatial variations, processes, and environmental constraints influencing distribution of life.

BIOL 6670  Principles and Techniques of Practical Biochemistry
CREDIT HOURS  3.0
PREREQUISITES  One semester of biochemistry (CHEM 4600/6600) with grade of B or higher, or equivalents
DESCRIPTION  (Same as CHEM 4670). A comprehensive and integrated review of principles and modern techniques found in day-to-day biochemical research laboratories. Topics include, but are not limited to: general principles of biochemical investigations, molecular biology and basic techniques, molecular cloning and gene analysis, protein structure, purification and characterization, biomolecular interactions, basic enzyme analysis, spectroscopic techniques, mass spectrometric techniques, centrifugation, electrophoretic, chromatographic, radioisotope and electrochemical techniques.

BIOL 6680  Microscopy and Imaging
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3800 and PHYS 1112K or PHYS 2212K, or equivalents
DESCRIPTION  Four lecture hours per week. An introduction to the theory of microscopy and various types of microscopes and their applications to biological research. Topics include: microscopes, basic specimen preparation, and staining techniques.

BIOL 6685  Functional Histology
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3800 and BIOL 3240 or equivalent
DESCRIPTION  Topics include preparation and basic staining of tissues, special stains, identification of tissue features and classification. The course will correlate tissue form and function by incorporating concepts of cell, tissue, and organ physiology. Includes a $75 lab fee.
BIOL 6686  Pathophysiology
CREDIT HOURS 4.0
PREREQUISITES BIOL 3800 and BIOL 3240, or consent of instructor
DESCRIPTION Clinical case studies will be used to teach the principles and processes behind adult and childhood diseases. Students will learn basic diagnostic skills in hematology and blood chemistry, histopathology, ECG, spirometry, radiology, and urology.

BIOL 6687  Surgical Anatomy
CREDIT HOURS 4.0
PREREQUISITES BIOL 4687 or consent of instructor
DESCRIPTION Detailed examination of human anatomy via dissections and radiology. Cross-listed with BIOL 4687. Includes a $275 lab fee.

BIOL 6694  Biosafety: Principles and Practice
CREDIT HOURS 4.0
PREREQUISITES BIOL 3800 or consent of instructor
DESCRIPTION Four lecture hours per week. The discussion of pathogenic agents and their associated occupational and public health risks. Topics include emerging biosafety issues such as bioterrorism, human gene therapy, and federal and state regulations guiding use of pathogenic organisms.

BIOL 6696  Laboratory in Molecular Biological Techniques
CREDIT HOURS 4.0
PREREQUISITES BIOL 3900 or equivalent
DESCRIPTION CHEM 4600 recommended. One lecture and six laboratory hours a week. CHEM 4600 recommended. Isolation and characterization of nucleic acids and proteins. Topics include molecular cloning, isolation, characterization and sequence analysis of chromosomal and plasmid DNA, PCR mediated gene amplification and protein purification. Includes a $50 lab fee.

BIOL 6744  Biostatistics
CREDIT HOURS 3.0
PREREQUISITES MATH 2211 and BIOL 2108K, or equivalents
DESCRIPTION (Same as MATH 6544.) Three lecture hours a week. Principles and methods of statistics as applied to biology and medicine.

BIOL 6800  Principles of Cellular Biology
CREDIT HOURS 4.0
PREREQUISITES BIOL 3800, BIOL 3900, and CHEM 1211K, or consent of instructor
DESCRIPTION Four lecture hours a week. Survey of cellular components and processes in different cell types as they relate to the function of the cell. Includes signal transduction, photoreceptors, neurons, muscle, blood cells, cells of the immune system, and cell biology of infection.

BIOL 6801  Survival Skills in Academia
CREDIT HOURS 3.0
DESCRIPTION (Same as NEUR 6600 and PSYC 6801.) Guidance and direction for graduate students on how to accomplish many of the day-to-day tasks encountered by researchers and instructors throughout their careers in academia. Topics covered include how to write and publish scientific papers, grantsmanship, scientific ethics, posters and oral presentations, mentoring, and job interviewing.

BIOL 6900  Directed Laboratory Study
CREDIT HOURS 2.0
COREQUISITES BIOL 8800, BIOL 8999, BIOL 9999, or equivalent
DESCRIPTION One lecture hour and one discussion hour per week. Student learning of scientific communication skills, experimental strategies and procedures through laboratory group meetings and individual discussion with faculty laboratory director.
BIOL 6905 Theme-Based Biology Laboratory
CREDIT HOURS 2.0 - 4.0
PREREQUISITES Permission of instructor
DESCRIPTION Students will work in small groups to develop specific biological hypotheses, design and carry out experiments to test these hypotheses, and analyze the results they obtain. May be repeated for credit if topic is different. Includes a $50 per hour lab fee.

BIOL 6913 Georgia Aquarium Internship I
CREDIT HOURS 2.0
PREREQUISITES BIOL 3020 with grade of B or higher, or equivalent, or consent of instructor
DESCRIPTION Students will participate in the education programs at the Georgia Aquarium one morning a week for about three hours, depending on Aquarium requirements, and under the supervision of Aquarium staff. The primary goal is to train interns to be able to deliver education programs at the Georgia Aquarium. Includes a $50 lab fee.

BIOL 6914 Georgia Aquarium Internship II
CREDIT HOURS 2.0
PREREQUISITES BIOL 4913 or BIOL 6913 with grade of S and consent of instructor
DESCRIPTION This is the second part of the Georgia Aquarium internship program. Students will participate in the education programs at the Georgia Aquarium one morning a week for about three hours, depending on Aquarium requirements, and under the supervision of Aquarium staff. The interns will deliver education programs to visiting student groups and train interns in first part of the Intern program (BIOL 4913 or BIOL 6913).

BIOL 6915 Collaborative Internships in Biology
CREDIT HOURS 2.0
PREREQUISITES consent of instructor
DESCRIPTION Students engage in off-campus internship training arranged through collaboration with biology faculty members. May be taken for credit a maximum of two times.

BIOL 6916 Internships in Biology
CREDIT HOURS 2.0
PREREQUISITES consent of instructor
DESCRIPTION Students receive hands-on experience in activities that require knowledge and skills related to the field of biology. Specific topics available each semester will vary. May be taken for credit a maximum of two times.

BIOL 6930 Topics in Biology
CREDIT HOURS 3.0 - 4.0
PREREQUISITES consent of the instructor
DESCRIPTION Four lecture hours a week. Detailed examination of a selected area in biological science. May be repeated for credit if topics are different.

BIOL 6960 Biology Careers Seminar
CREDIT HOURS 1.0
PREREQUISITES Either BIOL 3800, BIOL 7800, or equivalent with a C or higher
DESCRIPTION Speakers from different biology-related fields will discuss their jobs from the perspective of helping Biology majors with their career planning. Topics will include graduate training at GSU, health and teaching-related careers, other biology-related careers, and job search strategies. May be repeated for credit a maximum of one time.
**BIOL 6970**  
**Biology Seminar**  
**CREDIT HOURS** 1.0  
**DESCRIPTION** Current research topics in biology. This course may be repeated for credit a maximum of one time. May not be taken for more than one hour in the same term.

**BIOL 6990**  
**Independent Readings**  
**CREDIT HOURS** 2.0  
**PREREQUISITES** consent of instructor  
**DESCRIPTION** Students will read and review primary literature in the field of biology. Students will discuss the readings with the instructor and/or write papers. Topics may vary. Course may be repeated for credit a maximum of two times.

**BIOL 7020**  
**Introduction to Marine Biology**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** BIOL 1104K, BIOL 1108K, or BIOL 2108K with grade of B or higher, or equivalent  
**DESCRIPTION** A comprehensive overview of the marine environment, including the characteristics of marine organisms and their distinctive communities, such as coral reefs, kelp forests, seagrass beds, and the deep ocean.

**BIOL 7021**  
**Infectious Disease and Society**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** A consideration of the role played by infectious diseases in shaping civilization and society. The focus will be on HIV/AIDS, but sexually transmitted infections such as syphilis, gonorrhea, genital herpes, and genital warts will be discussed as well. HIV/AIDS will also be compared with other infectious diseases of historical importance including the Black Death, leprosy, smallpox, tuberculosis, influenza, and poliomyelitis.

**BIOL 7240**  
**Applied Medical Physiology**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** BIOL 2108K and CHEM 1212K with grades of C or higher  
**DESCRIPTION** Three lecture hours per week plus recitation. Integrative physiology of all major organ systems will be taught using clinical case studies. Topics include radiology, angiograms, hematology, blood chemistry, urinalysis, ECG, and spirometry.

**BIOL 7250**  
**Human Physiology Laboratory**  
**CREDIT HOURS** 1.0  
**PREREQUISITES** BIOL 7240 or concurrently  
**DESCRIPTION** Three laboratory hours a week. Exercises dealing with the physiology of the major organ systems. Includes a $50 lab fee.

**BIOL 7430**  
**Biotechnology**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** BIOL 2108K and CHEM 1212K with grades of C or higher  
**DESCRIPTION** Three lecture hours a week. Fundamentals principles of biotechnology. Topics include genetic engineering of bacteria, plants and animals; molecular and cellular cloning; the human genome project; forensics and DNA typing; cloning of organisms; and gene therapy. Bioethical implications are also considered. This course is recommended for pre-service and in-service teachers.

**BIOL 7440**  
**Fundamentals of Evolution**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** BIOL 2108K with grade of C or higher  
**DESCRIPTION** Three lecture hours a week. Mechanisms of evolution, from the molecular to the population level. Topics include population genetics, adaptation, natural selection, speciation, systematics, coevolution, history of life, the geological record, and evolution of humans. This course is also recommended for middle and high school biology teachers.
BIOL 7800  Molecular Cell Biology
CREDIT HOURS 3.0
PREREQUISITES BIOL 2108K or BIOL 2800; and CHEM 1212K, or equivalents
DESCRIPTION Three lecture hours a week. A survey of biochemistry, molecular genetics, and cell biology including cell structure and chemistry, macromolecular structure and synthesis, protein trafficking, cell motility, signaling, and division.

BIOL 7801  Effective Mentoring Skills
CREDIT HOURS 1.0 - 3.0
PREREQUISITES consent of instructor
DESCRIPTION Graduate students will receive training in the teaching methods that produce effective mentors, tutors and instructors.

BIOL 7802  Instructional Methods
CREDIT HOURS 1.0 - 3.0
PREREQUISITES consent of instructor
DESCRIPTION One-two hours a week for discussion sections with laboratory supervisors and/or one-two hours a week for laboratory and workshop participation. Principles of undergraduate laboratory instruction, including instructional theory, laboratory policies, and academic honesty.

BIOL 7810  Molecular Cell Biology Laboratory
CREDIT HOURS 3.0
PREREQUISITES BIOL 7800 or concurrently
DESCRIPTION Experiments demonstrating techniques and concepts in molecular cell biology with an emphasis on learning critical thinking through writing. Includes a $75 lab fee.

BIOL 7820  Plant Biology
CREDIT HOURS 3.0
PREREQUISITES BIOL 2108K (or BIOL 2108 and BIOL 2108L) or equivalent with a C or higher
DESCRIPTION Dynamic aspects of plant function, structure, and growth. Three lecture hours a week.

BIOL 7840  Animal Biology
CREDIT HOURS 3.0
PREREQUISITES BIOL 2108K (or BIOL 2108 and BIOL 2108L) or equivalent with a C or higher
DESCRIPTION Comparative analysis of the behavior, physiology, anatomy, phylogeny, evolution, and ecology of animals. Three lecture hours per week.

BIOL 7850  Animal Biology Laboratory
CREDIT HOURS 1.0
PREREQUISITES BIOL 7840 with a C or higher or taken concurrently
DESCRIPTION Comparative structure and function of representative animal types. Three laboratory hours a week. Includes a $75 lab fee.

BIOL 7880  Microbiology
CREDIT HOURS 3.0
PREREQUISITES BIOL 2108K and BIOL 3800/7800, or equivalents
DESCRIPTION Three lecture hours a week. Functional anatomy, metabolism, cultivation, growth, and control of microorganisms with emphasis on the procaryotes; relationships of these organisms to their environment.
BIOL 7890  Microbiology Laboratory
CREDIT HOURS  1.0
PREREQUISITES  BIOL 3880 or BIOL 7880 with a C or higher or taken concurrently
DESCRIPTION  Techniques of cultivation, quantitations, isolation, and identification of microorganisms with emphasis on bacteria; effects of physical and chemical agents. Three laboratory hours a week. Includes a $150 lab fee.

BIOL 7900  Genetics
CREDIT HOURS  3.0
PREREQUISITES  BIOL 2108K and BIOL 3800/7800 or equivalents
DESCRIPTION  CHEM 2400 recommended. Three lecture hours per week. Introduction to classical and molecular genetics including Mendelian genetics, gene mapping, and molecular biology.

BIOL 7910  Genetics Laboratory
CREDIT HOURS  1.0
PREREQUISITES  BIOL 3900 or BIOL 7900 with a C or higher or taken concurrently
DESCRIPTION  Experiments demonstrating concepts in genetics. Three laboratory hours a week. Includes a $150 lab fee.

BIOL 7955  Introduction to the Center for Behavioral Neuroscience
CREDIT HOURS  1.0
PREREQUISITES  consent of instructor
DESCRIPTION  Orientation to the research conducted at the Center for Behavioral Neuroscience (CBN). It is intended for members of CBN. Permission of instructor is required.

BIOL 8010  Cellular, Molecular, and Developmental Neuroscience
CREDIT HOURS  3.0
PREREQUISITES  BIOL 4102 or BIOL 6102 with grade of B or higher, or equivalent, or consent of instructor
DESCRIPTION  Three lecture hours a week. Advanced analysis of central concepts in cellular, molecular, and developmental neuroscience. Topics include: physiology, development and differentiation, signaling and synaptic transmission, synaptic plasticity, construction and modulation or circuits, neurogenesis/repair/regeneration, molecular bases of behavior, and neurodevelopmental and degenerative disease. (Same as NEUR 8010 and PSYC 8616.)

BIOL 8020  Systems Neuroscience
CREDIT HOURS  3.0
PREREQUISITES  BIOL 8010 with grade of B or higher, or equivalent, or consent of the instructor
DESCRIPTION  (Same as NEUR 8020 and PSYC 8617.) Advanced analysis of how neurons are organized into systems that control behavior. Topics include functional neuroanatomy, sensory and motor systems, and the neural basis of motor learning.

BIOL 8041  Research Design and Analysis in Neuroscience
CREDIT HOURS  4.0
DESCRIPTION  This course will train doctoral students in the design of neuroscience experiments and the statistical methodologies appropriate for analyzing these data. Topics include experimental design, parametric and non-parametric statistical analysis, as well as applied problem sets using neurobiobehavioral data. Concurrent laboratory component will cover data entry and analysis using SPSS. (Same as NEUR 8040).

</table>
BIOL 8696  Advanced Biotechniques Lab
CREDIT HOURS  4.0
PREREQUISITES  Consent of instructor
DESCRIPTION  One lecture and six laboratory hours a week. Topics include gene cloning and expression, genomic sequencing and analysis, protein purification by AKTA FPLC, PCR and real-time quantitative PCR, transcriptome analysis by DNA microarrays, immunoblot, and proteomics.

BIOL 8700  Biology Seminar
CREDIT HOURS  2.0
DESCRIPTION  Current research topics in biology.

BIOL 8710  Concepts in Molecular Genetics
CREDIT HOURS  2.0
PREREQUISITES  consent of instructor
DESCRIPTION  Two lecture hours a week. Lectures and discussions dealing with contemporary topics in molecular genetics.

BIOL 8800  Research
CREDIT HOURS  1.0 - 25.0
DESCRIPTION  Repeatable course.

BIOL 8888  Non-Thesis Master’s Research
CREDIT HOURS  4.0
PREREQUISITES  consent of instructor
DESCRIPTION  Investigation, review, and critical evaluation of topics in biological science.

BIOL 8900  Topics in Microbiology
CREDIT HOURS  1.0
DESCRIPTION  May be repeated if topics vary.

BIOL 8970  Topics in Molecular Biological Sciences
CREDIT HOURS  1.0
DESCRIPTION  (Same as CHEM 8970.) May be repeated if topics vary.

BIOL 8999  Thesis Research
CREDIT HOURS  1.0 - 25.0
DESCRIPTION

BIOL 9991  Doctoral Research Proposal
CREDIT HOURS  2.0
PREREQUISITES  consent of instructor
DESCRIPTION  Students write and defend a research proposal as a prerequisite for admission to candidacy. Students receive a grade (A-F) based on their written and oral presentations. Restricted to doctoral students in specific disciplines based on programmatic considerations.

BIOL 9992  Doctoral Research Proposal
CREDIT HOURS  2.0
PREREQUISITES  consent of instructor
DESCRIPTION  Students write and defend a research proposal as a prerequisite for admission to candidacy. Students are evaluated on their written and oral presentations on a S/U basis. Restricted to doctoral students in specific disciplines based on programmatic considerations.

BIOL 9999  Doctoral Dissertation Research
CREDIT HOURS  1.0 - 25.0
PREREQUISITES  consent of the instructor

BMSC 8050  Business Aspects of Translational Medicine  
CREDIT HOURS  2.0  
DESCRIPTION  This course will utilize guest speaker presentations to teach students how to translate a biomedical research discovery into a commercial product by utilizing the multidisciplinary curriculum in clinical, health and business. Topics include market and industry analyses, development and integration of business and commercialization strategies in the setting of biomedical sciences/translational medicine.

BMSC 8060  Effective Science Communication  
CREDIT HOURS  3.0  
DESCRIPTION  This course is designed to help students develop strong oral presentation skills using powerpoint slides. Preparing and delivering effective scientific presentations is an important skill for all graduate students in the biological science.

BMSC 8070  Viral Immunology  
CREDIT HOURS  2.0  
DESCRIPTION  This course consists of lectures, student paper presentation and discussions concerning one of the fastest growing fields in modern biology - Viral Immunology. Course topics will include: virology principles, viral pathogenesis, virus-host interaction, host defense to viral pathogens and critical immunological methods.

BMSC 8080  Advanced Immunotechnology  
CREDIT HOURS  2.0  
PREREQUISITES  Any one of the following courses: BIOL 3880/7880, BIOL 3800/7800, CHEM 4600/6600, BIOL 4575/6575, BIOL 4278/6278 or equivalent, or consent of instructor  
DESCRIPTION  This course consists of weekly lectures and student paper presentations concerning the principles of immunology and the related technology and application. Course topics will include: immune system, antibody engineering, immune manipulation, and more.

BMSC 8090  Progress in Virology Research  
CREDIT HOURS  2.0  
PREREQUISITES  BIOL 3800/7800, BIOL 4278/6278, CHEM 4600/6600 or equivalent, and consent of instructor - original research project required  
DESCRIPTION  This course consists of weekly seminars in current topics in virology, placing particular emphasis on discussing the structural organization and pathogenesis of clinically significant RNA viruses (i.e. members of the paramyxo-, pneumo-, orthomyxo-, filo-, and flavivirus families) and evaluating current approaches towards prevention and management of human infection by these pathogens.

BMSC 8100  Molecular Medicine of Disease  
CREDIT HOURS  4.0  
PREREQUISITES  CHEM 4600, BIOL 2800 and BIOL 3800 or by permission of instructor  
DESCRIPTION  This course will utilize discussion-oriented lectures to provide a solid introduction to graduate-level cell biology with an emphasis on how key pathways contribute to human disease. Topics will include key concepts in cell biology with each concept linked to specific diseases caused by dysregulation of the relevant pathways.
**BMSC 8500**  
**Systems Biology**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Grade of C or higher in MATH 6010, MATH 6275 or equivalent, or consent of instructor  
**DESCRIPTION** Cross-listed with [MATH 8500]. This course provides an introduction to systems biology from a mathematical modeling point of view. Biological topics will include: gene systems, protein systems, metabolic systems and signaling systems. Mathematical tools will include: basic modeling concepts, approximation, static networks, linear vs. nonlinear systems and how to linearize nonlinear systems, and parameter estimation and optimization. Specific case studies will include: integrative analysis of genome, protein and metabolite data, systems biology in medicine and drug development, and synthetic biology.

**BMSC 8675**  
**Molecular Virology**  
**CREDIT HOURS** 4.0  
**DESCRIPTION** BIOL 3880, BIOL 3890, BIOL 4575, and CHEM 4600, or equivalents. Four lecture hours a week. This course will survey students' current understanding of selected eukaryotic viruses, most of which are human pathogens, on the molecular level. The course material will mainly focus on the biochemistry, molecular biology and host interactions of selected viruses, but the clinical diseases caused by these viruses, as well as, antiviral strategies to combat them will also be discussed.

**BMSC 8710**  
**Advanced Topics in Biomedical Science**  
**CREDIT HOURS** 1.0 - 3.0  
**DESCRIPTION** Two lecture hours a week. Lectures and discussions dealing with contemporary topics in biomedical science.

**BMSC 8800**  
**Ph.D. Research**  
**CREDIT HOURS** 1.0 - 25.0  
**PREREQUISITES** Official enrollment in the Translational Biomedical Sciences doctoral program  
**DESCRIPTION** Repeatable course. Doctoral students who have not yet passed their qualifying examinations must register for this course to satisfy continuous registration requirements. A grade of S or U will be assigned based on attendance and participation in departmental research activities.
Responsible Conduct in Research

This course is Part 2 of the Scholarship and Research Integrity (SARI) program at GSU, developed in response to the America Competes Act requirements. The SARI program is designed to offer students enrolled in undergraduate research, graduate degree programs, and post doctoral programs comprehensive training in the responsible conduct of research in a manner that is tailored to address the issues faced by students in their respective programs. The SARI program includes two parts: Part 1, CITI online-training, and Part 2, a 5 hours discussion-based course in responsible conduct of research. This course fulfills the latter requirement and covers universal and discipline-specific material regarding how research should be conducted responsibly and ethically.

Doctoral Research

Doctoral students who have not yet passed the preliminary examination and are not registered for nine or more semester hours of course work on their program of study must register for this course to satisfy the continuous registration requirement. A grade of S or U will be assigned based on attendance and participation in departmental research activities.

Seminar in University Teaching

The seminar is concerned with problems relating to teaching and research in business administration. Various teaching methods including lecture, case and incident methods, sociodrama techniques, and tutorial procedures are examined. The problems of particular subject fields, of different levels of classes of students, and of the function of the examination process are considered.

Theory Development

Students understand how to develop theory and surface a theoretical contribution. They understand the distinction between identifying a business problem and a scientific problem, and the approaches to achieve rigor and relevance. They learn about the elements of a theory and the approaches to build theory. They understand the distinction between process and variance models, and the importance of achieving correspondence between theoretical arguments and model specification. They develop an understanding about how to leverage context and time in building theory, and about multi-dimensional constructs and multi-level models. Cumulatively, they develop the skills and understanding to formulate a research question, synthesize the literature, build a theory, and specify a model.

Quantitative Research Methods in Business

This course develops skills in designing, evaluating, and understanding quantitative methods and methodologies for research in the social science paradigm. Students also acquire skills in developing research proposals, supporting methodological choices, and understanding how to successfully publish their work. The course is intended for students across the business disciplines.
BA 9300 Qualitative Research Methods in Business

CREDIT HOURS 3.0

DESCRIPTION This course helps develop knowledge and skills in the application and use of qualitative research techniques. The course provides a survey of the methodological literature on qualitative research methods paired with appropriate article-length exemplars in the disparate business disciplines. This course covers a variety of different research strategies including case study, ethnography, grounded theory, and action research. In addition, students acquire skills in developing a research design, and qualitative data collection and analysis techniques, and authoring research manuscripts.

BA 9320 Managerial Decision Making

CREDIT HOURS 3.0

DESCRIPTION This course introduces students to the subject of managerial decision-making. Decision-making is obviously a very important part of what managers do. Research into managerial decision-making is highly relevant to a wide variety of business school disciplines including: accounting, marketing, managerial sciences, information systems, risk management and insurance, and real estate. Drawing on relevant theories and academic journal articles, the student is introduced to bounded rationality, cognitive biases, bounded awareness and ethicality, framing effects, escalation of commitment, whistle blowing, negotiator cognition, and emotional influences on decision making.

BA 9500 Dissertation Research

CREDIT HOURS 1.0 - 18.0

PREREQUISITES completion of preliminary examination

DESCRIPTION Doctoral students who have passed the preliminary examination must register for this course each term (excluding summer term) until graduation to satisfy the continuous registration requirement. A grade of IP (indicating that satisfactory progress was made on the dissertation) or U (indicating lack of satisfactory progress) is assigned each term. At the end of the term during which the dissertation is completed/defended, a grade of S (satisfactory) or U (unsatisfactory) is assigned to the student.

<tr>
<td>BUSA 6090</td>
<td>Principles of Entrepreneurship</td>
<td>3.0</td>
<td>None</td>
<td>Must meet RCB upper division course requirements minimum GPA of 2.8 and 45 credit hours</td>
<td>The purpose of this course is to familiarize the non-business student with the terminology, key principles, concepts, and methods of contemporary entrepreneurship and supporting business disciplines. The course is not intended to replace more in-depth studies in these disciplines, but rather to jump-start such studies for students with little or no background in business. For practicality, the course is designed around a process-driven perspective of entrepreneurship: 1) discover profitable opportunities, 2) evaluate the viability of an opportunity, 3) develop strategies to exploit an opportunity, and 4) plan for successful execution. This course prepares non-business students to take other available courses at the Robinson College of Business and well as its entrepreneurship courses.</td>
</tr>

<td>Graduate Students. Cross listed with BUSA 3090. BUSA7090 is designed to familiarize the non-business graduate student quickly with key business principles, concepts and terminology. This is a survey course that touches on key areas of business management including marketing, operations, accounting, finance, strategy, ethics, economics and entrepreneurship. The course is not intended to replace more in-depth studies of each of these business disciplines but rather to jump start such studies. The course is specifically designed for non-business students interested in starting their own entrepreneurial ventures. This course will prepare such students to take additional entrepreneurship courses and to participate in various entrepreneurship activities within the university.</td>

BCOM 7255  Communication Skills for Business

CREDIT HOURS  3.0

PREREQUISITES  None

DESCRIPTION  Communication Skills for Business helps improve the proficiency and fluency of graduate students who write and speak English as a secondary language (or English speaking students who need remedial work) to develop their written, conversational and presentation skills. The course focuses on the elements of written and spoken communication that are vital in a graduate business program and the US workplace. Students will acquire the necessary skills to complete correct and effective business documents in English and to demonstrate cultural awareness and spoken expertise in conversations and presentations. Students will take this course based on TOEFL, GMAT, and/or GRE scores and an interview assessment or upon recommendation of the student's professor.

BCOM 8250  Effective Executive Communication

CREDIT HOURS  3.0

PREREQUISITES  None

DESCRIPTION  Managers face a wide range of demanding communication tasks every day. They must communicate vision, negotiate for resources, lead meetings, provide performance feedback, and manage new communication technologies, all in an increasingly international workplace. This course prepares students to communicate effectively as managers. Students practice the strategies and techniques in a wide range of written and spoken performance situations. They work individually and in groups on cases and make several presentations during the course.
CPI CENTER PROCESS INNOVATION

CPI 8389  Directed Reading in Electronic Commerce
CREDIT HOURS  3.0
PREREQUISITES  Consent of the instructor, good academic

CPI 9200  Action Research in Business Studies
CREDIT HOURS  3.0
PREREQUISITES  Students are admitted into one of RCB’s PhD programs
DESCRIPTION  Action research offers unique opportunities to study business practices through projects that are planned, and often executed, in close collaboration with firms and stakeholders. Students critique exemplar action research studies across different business disciplines and they study the roots and contemporary foundation for designing and executing rigorous action research in business studies. The students learn how to organize and present action research projects including: area of concern, theoretical framing, practical problem solving, data collection and analysis, and research contributions. Also, they develop an understanding of how action research can be combined with other research methods and practical problem solving methods to conduct and present business studies.

CPI 9389  Directed Readings in Process Innovation
CREDIT HOURS  1.0 - 3.0
DESCRIPTION  This course will be taught at a level equivalent to a doctoral seminar and thus limited to doctoral students in Process Innovation and related disciplines. Students may take this course multiple times for course credit as different topics are offered.

CHEM 6000  Fundamentals of Chemical Analysis  
**CREDIT HOURS**: 3.0  
**PREREQUISITES**: CHEM 3410 and MATH 2212 with grades of C or higher  
**DESCRIPTION**: Two lecture and four laboratory hours a week. Chemical equilibria of acid-base systems, metal ion complexes and solubility, and their relationship to chemical analysis, using manual and semiautomatic methods of data collection.

CHEM 6005  Instrumental Analysis  
**CREDIT HOURS**: 3.0  
**DESCRIPTION**: Extensive data analysis, report writing and revisions in addition to the laboratory contacts. Contents: signal/noise and electronics; chemical separation; spectroscopic analysis; electrochemistry; mass spectrometry and others. The lab section requires operation of research instruments, multiple team projects, comprehensive data analysis and scientific report writing.

CHEM 6010  Instrumental Methods I: Chromatography  
**CREDIT HOURS**: 3.0  
**PREREQUISITES**: CHEM 6000 with grade of B or higher  
**COREQUISITES**: CHEM 6110  
**DESCRIPTION**: Two lecture and three laboratory hours a week. Modern methods, e.g., gas, liquid, thin layer, column, and ion exclusion chromatographic techniques, used to demonstrate the principles of chromatography.

CHEM 6015  Separation in Biosciences  
**CREDIT HOURS**: 3.0  
**PREREQUISITES**: CHEM 6000 and CHEM 6010 with grades of B or higher, or equivalent  
**DESCRIPTION**: Two lecture and three laboratory hours per week. Analytical chemistry applications of electrophoresis, gel chromatography precipitation, and ultracentrifugation to molecular recognition and separations in biological systems.

CHEM 6050  Introduction to Fourier-Transform NMR Spectroscopy  
**CREDIT HOURS**: 2.0  
**PREREQUISITES**: demonstrated research need and approval of the departmental chair  
**DESCRIPTION**: Introduction to techniques of Fourier-Transform Nuclear Magnetic Resonance Spectroscopy.

CHEM 6110  Chemical Thermodynamics and Kinetics  
**CREDIT HOURS**: 3.0  
**DESCRIPTION**: Principles of thermodynamics, transport, and kinetics, and how they serve as a basis for interpreting and interrelating the properties of matter.

CHEM 6120  Quantum Chemistry  
**CREDIT HOURS**: 3.0  
**DESCRIPTION**: Principles of quantum mechanics and statistical mechanics, and how they serve as a basis for interpreting and interrelating the properties of matter.

CHEM 6330  Advanced Synthesis
CREDIT HOURS  3.0
PREREQUISITES  one year organic chemistry with laboratory (CHEM 3110) with grade of B or higher, or equivalent
DESCRIPTION  Two lecture and four laboratory hours a week. Synthesis and characterization of inorganic and organic compounds by modern methodology.

CHEM 6400  Mechanistic Organic Chemistry
CREDIT HOURS  3.0
PREREQUISITES  one year of organic chemistry (CHEM 3410) with grade of B or higher
DESCRIPTION  Experimental approaches to determining the mechanisms of chemical reactions in organic chemistry.

CHEM 6410  Bioorganic Chemistry
CREDIT HOURS  3.0
PREREQUISITES  one year of organic chemistry (CHEM 3410) or a course in biochemistry with grade of C or higher
DESCRIPTION  Strategies for designing pharmaceutical agents to inhibit enzymes. This is a writing intensive course.

CHEM 6420  Drug Discovery: Theory and Practice
CREDIT HOURS  3.0
PREREQUISITES  CHEM 6600 with a B or higher, or consent of instructor
DESCRIPTION  Study of the principles of drug design, drug design methods, and tools commonly used in the pharmaceutical industry, and general strategies and common pitfalls in drug discovery. Three lecture hours a week.

CHEM 6430  Advanced Synthesis & Mechanism in Organic Chemistry
CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
DESCRIPTION  This course focuses on advanced synthetic methodologies and reactions mechanisms.

CHEM 6440  Practicum in Biotechnology
CREDIT HOURS  5.0
PREREQUISITES  consent of instructor and the Biotechnology Committee
DESCRIPTION  Laboratory training and experience related to Biotechnology. Both technique and project-based rotations will be offered. May be repeated up to three times if projects or rotations change.

CHEM 6450  Molecular Modeling Methods
CREDIT HOURS  3.0
PREREQUISITES  CHEM 3410 and CHEM 6110 with grades of B or higher, or equivalent, and consent of instructor
DESCRIPTION  Molecular mechanics/dynamics methods to solve structural problems in organic, bioorganic, and biophysical chemistry. May be repeated if topics are different.

CHEM 6470  Fundamentals of Photophysics, Photochemistry, and Photobiology
CREDIT HOURS  3.0
DESCRIPTION  This course will discuss events occurring in molecular systems following the absorption of light. Students will be introduced to background concepts, electronic and nuclear changes accompanying light absorption (photophysics and photochemistry), and light-induced processes in biological systems such as proteins and DNA (photobiology).
CHEM 6490  Special Topics in Organic Chemistry  
CREDIT HOURS: 3.0  
PREREQUISITES: CHEM 3410 with grade of B or higher, or equivalent  
DESCRIPTION: May be repeated if topics are different. Advanced topics in organic chemistry as may fit the needs and interests of the students and faculty. Such topics might be stereoisomerism, heterocycles, alkaloids, organic mechanisms, structure-activity relationships.

CHEM 6590  Special Topics in Physical Chemistry  
CREDIT HOURS: 3.0  
PREREQUISITES: CHEM 6120 with grade of B or higher, or equivalent  
DESCRIPTION: May be repeated if topics are different. Advanced topics in physical chemistry as may fit the needs and interests of the students and faculty. Such topics might be chemical kinetics, statistical mechanics, quantum mechanics, molecular spectra, phase equilibrium.

CHEM 6600  Biochemistry I  
CREDIT HOURS: 5.0  
PREREQUISITES: CHEM 3410 with grade of C or higher, or equivalent  
DESCRIPTION: Five lecture hours a week. Introduction to biochemical phenomena: proteins, enzymes, vitamins, carbohydrates, lipids, nucleic acids, DNA, RNA, and metabolism.

CHEM 6610  Biochemistry II  
CREDIT HOURS: 3.0  
PREREQUISITES: CHEM 3410 with grade of B or higher  
DESCRIPTION: Three lecture hours a week. Introduction to biochemical phenomena: proteins, enzymes, vitamins, carbohydrates, lipids, nucleic acids, DNA, RNA, and metabolism.

CHEM 6630  Enzymology  
CREDIT HOURS: 3.0  
PREREQUISITES: one year of organic chemistry (CHEM 3410) with grade of C or higher and one semester of biochemistry (CHEM 6600) with grade of B or higher, or equivalents  
DESCRIPTION: (Same as BIOL 6630.) Introduction to enzyme catalysis, with emphasis on the general concepts of enzyme kinetics and the common tools for studying enzymes.

CHEM 6640  Fundamentals of Bioinformatics  
CREDIT HOURS: 4.0  
PREREQUISITES: BIOL 3800 with grade of C or higher, or equivalent, or written approval of instructor  
DESCRIPTION: (Same as BIOL 6640 and CSC 6640.) Four lecture hours per week. A "hands-on" approach to bioinformatics using PCs, the internet, and computer graphics to analyze, correlate, and extract information from biological databases, emphasizing sequence and structure databases for proteins and nucleic acids, and introducing the computing skills necessary for bioinformatics. Topics include: sequences and three-dimensional structures of proteins and nucleic acids, the major databases, algorithms for sequence comparison, data mining, and prediction of structure and function.

CHEM 6650  Nucleic Acid Synthesis and Drug Design  
CREDIT HOURS: 3.0  
PREREQUISITES: consent of instructor  
DESCRIPTION: Lectures on nucleic acid synthesis, mechanism, therapeutics, and detection. Course may be repeated.
**CHEM 6670**  
**Principles and Techniques of Practical Biochemistry**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** One semester of biochemistry (CHEM 4600/6600) with grade of B or higher, or equivalent  
**DESCRIPTION** This course is cross listed with BIOL 4670/6670. A comprehensive and integrated review of principles and modern techniques found in day-to-day biochemical research laboratories. Topics include, but are not limited to: general principles of biochemical investigations, molecular biology and basic techniques, molecular cloning and gene analysis, protein structure, purification and characterization, biomolecular interactions, basic enzyme analysis, spectroscopic techniques, mass spectrometric techniques, centrifugation, electrophoretic, chromatographic, radioisotope and electrochemical techniques.

**CHEM 6850**  
**Bioanalytical Chemistry I**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CHEM 6190 with grade of B or higher, or consent of instructor  
**DESCRIPTION** Basic concepts of analytical chemistry as applied to biologically-oriented problems.

**CHEM 6860**  
**Bioanalytical Chemistry II**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CHEM 6850 with grade of B or higher, or equivalent or consent of instructor  
**DESCRIPTION** Basic principles underlying instrumentation, automation, and laboratory computers used in solving bioanalysis problems.

**CHEM 6871**  
**Electrochemical Methods**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CHEM 4110 with grade of B or higher, or equivalent  
**DESCRIPTION** Three lecture hours a week. Fundamentals of electrochemistry and application to chemical problems. Special emphasis on electrode reaction mechanisms and interpretation of electrochemical results for organic, inorganic, and biological systems.

**CHEM 6890**  
**Responsible Conduct of Research in Chemistry**  
**CREDIT HOURS** 2.0  
**DESCRIPTION** Two lecture hours a week. Responsible conduct of research in chemistry with emphasis on ethics of conducting research, data analysis, conformance to federal and community guidelines, and safety in the chemistry laboratory.

**CHEM 6900**  
**Advanced Research Methods**  
**CREDIT HOURS** 2.0  
**COREQUISITES** concurrent enrollment in CHEM 8910, CHEM 8999, or CHEM 9999  
**DESCRIPTION** Two lecture hours a week. Student learning of interdisciplinary experimental strategies and laboratory procedures in chemistry.

**CHEM 7000**  
**Essentials of General Chemistry**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Three lecture hours a week. Essentials of mass relationships, solutions, gas laws, calorimetry, atomic structure, oxidation/reduction, and chemical nomenclature. For secondary school science teachers not teaching chemistry.

<td>3.0</td>
<td>CHEM 7010 with grade of B or higher, or equivalent</td>
<td>Three lecture hours a week. Principles of chemical equilibrium, thermochemistry, acid/base theories, and electro-chemistry. For secondary school chemistry teachers. Cannot be used for a graduate degree in chemistry.</td>
</tr>
<tr>
<td>CHEM 7900</td>
<td>Directed Study in Chemistry</td>
<td>1.0 - 5.0</td>
<td>consent of instructor and advisor</td>
<td>Laboratory and recitations to be arranged. Directed study in areas of special interest to teachers or teacher candidates. May be repeated if topics vary.</td>
</tr>
<tr>
<td>CHEM 7910</td>
<td>Directed Research in Chemical Education</td>
<td>1.0 - 5.0</td>
<td></td>
<td>Combined credit received for CHEM 7900 and CHEM 7910 must not exceed fourteen hours. May be repeated if topics vary.</td>
</tr>
<tr>
<td>CHEM 8360</td>
<td>Protein Structure and Function</td>
<td>3.0</td>
<td>CHEM 6610 with grade of B or higher, or consent of instructor</td>
<td>(Same as NEUR 8200.) Discussion of the structure and function of proteins and of enzyme mechanisms. Topics include protein folding and motions, descriptions of enzyme catalysis at a molecular level, consideration of the energetics of biological processes, and enzyme kinetics.</td>
</tr>
<tr>
<td>CHEM 8370</td>
<td>Nucleic Acid Structure and Function</td>
<td>3.0</td>
<td>CHEM 6610 with grade of B or higher, or consent of instructor</td>
<td>(Same as BIOL 8637 and NEUR 8210.) Topics include the structure of nucleic acids, mechanism and control of DNA and RNA synthesis, and interaction of proteins and drugs with nucleic acids.</td>
</tr>
<tr>
<td>CHEM 8400</td>
<td>Medicinal Chemistry</td>
<td>3.0</td>
<td>consent of instructor</td>
<td>Study of the isolation, characterization, and elucidation of structure and synthesis of medicinally important compounds. The relationship between chemical structure and biological activity of selected drugs, vitamins, hormones, and proteins is reviewed.</td>
</tr>
<tr>
<td>CHEM 8450</td>
<td>NMR Spectroscopy</td>
<td>4.0</td>
<td>CHEM 6050 or consent of the instructor</td>
<td>Theory and application of NMR spectroscopy for the characterization and elucidation of organic and biological molecules.</td>
</tr>

<td>CNHP 6000</td>
<td>Research for the Health Professions</td>
<td>3.0</td>
<td></td>
<td>This course provides an introduction to the methods of scientific research. Emphasis will be placed on the principles, materials, and statistical techniques utilized in modern research in the health sciences.</td>
</tr>
<tr>
<td>CNHP 6010</td>
<td>Medical Terminology</td>
<td>3.0</td>
<td></td>
<td>This course covers medical terminology as it pertains to the body with an emphasis on developing an understanding of the pathological terminology used in the individual medical specialties. Areas within health professional fields of respiratory therapy, physical therapy, nutrition, pathology, radiology, anesthesia, pharmacology, and others will be covered. This is an on-line course and is open to all graduate students.</td>
</tr>
<tr>
<td>CNHP 6200</td>
<td>Interprofessional Seminar</td>
<td>1.0</td>
<td>Admission to one of the Lewis College professional programs</td>
<td>This course will include first-year students admitted to one of the graduate-level health disciplines in the Lewis College. Case studies will be discussed as interprofessionals with students from two or more professions in health and social care learn together during all or part of their professional training with the objective of cultivating collaborative practice for providing client.</td>
</tr>
<tr>
<td>CNHP 6400</td>
<td>Spanish for the Health Care Professional</td>
<td>3.0</td>
<td></td>
<td>The purpose of this course is to establish communication skills that can be used by health and human service practitioners in culturally diverse settings to assist Spanish speaking clients. This course is designed for non-Spanish speaking students.</td>
</tr>
<tr>
<td>CNHP 6900</td>
<td>EKG Interpretation</td>
<td>3.0</td>
<td>SNHP 2010, 3010 or 6010 preferred</td>
<td>This course presents a study of electrocardiograms. The course will provide the student with the opportunity to understand basic and advanced EKG waveform morphology, normal physiology of cardiac conduction, and basic dysrhythmias. Appropriate case studies will be used to illustrate clinical significance.</td>
</tr>
<tr>
<td>CNHP 7000</td>
<td>Introduction to Health Informatics</td>
<td>1.0</td>
<td>Entrance into Graduate Certificate in Health Informatics program or permission of instructor</td>
<td>Through class discussion, visits from practitioners, and faculty lectures, students are introduced to the present and projected roles of clinical health informatics professionals.</td>
</tr>
</tbody>
</table>
**CNHP 7100 Concepts in Health Informatics**

**CREDIT HOURS** 3.0

**DESCRIPTION** Prequisites: Entrance into Graduate Certificate in Health Informatics program or permission of instructor. This course will cover the history of Informatics from a medical, nursing and healthcare perspective. It will incorporate inter-professional collaboration, professionalism, ethics, HIT drivers and legislation. It will cover concepts such as ROI/RFP/RFQ and Due Diligence, as well as vendor selection and assessment strategies.

**CNHP 7109 Body Composition Assessment**

**CREDIT HOURS** 3.0

**PREREQUISITES** Graduate student in BFLSONHP or consent of instructor

**DESCRIPTION** Assessment of body weight, body dimensions, and body composition is of considerable interest to those working in the health professions, as the information derived from these assessments is associated with health risks. In addition, the health professional’s ability to accurately plot changes in body composition over time is important for determining whether the patient/client is changing in a way that reduces or increases health risk. There are numerous strategies for assessing body dimensions and composition, ranging from weight/height growth charts used with children, to skinfolds, and to more sophisticated analysis techniques that involve bioelectrical impedance and dual-energy x-ray absorptiometry. This course will review both the historical and new methods available to health professionals for the assessment of body dimensions and body composition, with special emphasis on the strengths and weaknesses of each technique and how these techniques may be appropriately used with the client/patient.

**CNHP 7130 Tai Chi-A Therapeutic Exercise**

**CREDIT HOURS** 3.0

**DESCRIPTION** This course introduces Tai Chi as a therapeutic exercise. The course addresses the benefits of Tai Chi exercise, Tai Chi’s origin, philosophy and development. Scientific evidence of Tai Chi’s benefits to health is discussed. The course introduces all the styles and forms of Tai Chi and the applications of Tai Chi to self-defense, exercise, rehabilitation and meditation. Application of the principles and practices of Tai Chi to various physical impairments and disabilities is discussed.

**CNHP 7150 Database Systems in Healthcare**

**CREDIT HOURS** 3.0

**PREREQUISITES** Entrance into Graduate Health Informatics program or permission of instructor

**DESCRIPTION** This course will provide a basic understanding of database design and structure, including relational databases and database types, data management, including modeling, reporting and data correction and data analysis. It will also provide an introduction to data analytics software using LinkedInLearning.com. This course will also cover Database connectivity, web technology and management security.

**CNHP 7200 Health and the Older Adult**

**CREDIT HOURS** 3.0

**DESCRIPTION** This course provides an introduction to physiological aging and the health status of older people and is designed for nonhealth professionals who work with older adults. Normal aging processes, age-related changes, and associated health promotion activities will be discussed. Information on the assessment and implications of alterations in functional health states, drug use, and referral sources are included.
CNHP 7250  Health Data Analytics
CREDIT HOURS  3.0
PREREQUISITES  Entrance into Graduate Certificate in Health Informatics program or permission of instructor
DESCRIPTION  This course will provide a basic understanding of database structure, including relational databases and database types, data management, including querying, reporting and data correction, and data analysis, including dashboarding and predictive analytics. The use of data visualization tools to interpret and apply healthcare data analysis will be explored. This course will also cover data security and encryption, as well as privacy and confidentiality.

CNHP 7270  Introduction to Healthcare Project Management
CREDIT HOURS  3.0
PREREQUISITES  Entrance into Graduate Certificate in Health Informatics program or permission of instructor and SNHP 7000 and SNHP 7100
DESCRIPTION  This course will cover the basic Project Management concepts, providing students with an understanding of the Project Management Life Cycle, System Development Life Cycle, Change management and control, and knowledge of the Project Management Professional (PMP) certification requirements and information.

CNHP 7300  Quality Improvement in Healthcare Environments
CREDIT HOURS  3.0
PREREQUISITES  Entrance into Graduate Certificate in Health Informatics program or permission of instructor and SNHP 7000 and SNHP 7100
DESCRIPTION  This course will provide an understanding of quality and process improvement strategies, including six sigma/lean, as well as strategies for process improvement. It will also cover past/current/future regulations and requirements (MU/HIPAA/HITECH/MACRA) regulating quality improvement functionality in HIT. Patient Safety and Heuristic evaluation principles in system and software design will also be covered.

CNHP 7500  Health Communication
CREDIT HOURS  3.0
DESCRIPTION  This course will examine theories of interpersonal, organizational, and mass communication relevant to the health field. Students will review strategies of persuasion the relationship between attitude and behavior, and the changing nature of health and health delivery in the United States. Successful and unsuccessful health information campaigns will be evaluated.

CNHP 7550  Healthcare Information Technology
CREDIT HOURS  3.0
PREREQUISITES  Entrance into Graduate Health Informatics program or permission of instructor
DESCRIPTION  This course will cover IT hardware, software, networking, as well as full HIT and HIM systems. It will cover concepts for hardware and software assessments, gap analyses, workflow analyses, and ergonomic assessments. It will cover network structure and functions. (Course Fee).

<tbody>
<tr>
<td>CNHP 7560</td>
<td>Health Information Security</td>
<td>3.0</td>
<td>Entrance into Graduate Health Informatics program or permission of instructor</td>
<td>This course is designed to discuss the methods and tools for achieving health information security. It will discuss current security trends in healthcare, risk assessments and evaluation, the role of security policies and procedures through a non-technical security approach.</td>
</tr>
<tr>
<td>CNHP 7600</td>
<td>Graduate Health Informatics Capstone</td>
<td>3.0</td>
<td>SNHP 7000, 7100, 7270, and 7300</td>
<td>This course will provide hands-on, real-life experience in Health IT. Students can tailor the residency experience to meet certification requirements. Different certifications require different numbers of residency experience hours. Students can choose between 150-300 hours (3-6 credit hours) depending on the certification they desire to achieve. 50 hours of residency per credit hour. A final, residency-based project presentation, incorporating concepts learned during the program, will be required (capstone).</td>
</tr>
<tr>
<td>CNHP 7610</td>
<td>Health Informatics Enterprises</td>
<td>3.0</td>
<td>Entrance into Graduate Health Informatics program or permission of instructor</td>
<td>This course is designed to discuss the concepts, theories, methods and tools for innovation and entrepreneurship within the Health IT industry. The course will deal with the application of a strategic entrepreneurship approach to dynamic business growth called demand creation in healthcare. A final project presentation incorporating concepts learned in the course will be required.</td>
</tr>
<tr>
<td>CNHP 7800</td>
<td>Interprofessional Collaboration for Advanced Practice</td>
<td>1.0 - 3.0</td>
<td>Admission to a graduate program in the Lewis School</td>
<td>This course is designed to provide students in health care relate programs with introductory knowledge of interprofessional principles pertaining to team building skills, effective communication, and collaboration of care with individuals with multiple chronic conditions. Philosophical and theoretical foundations pertinent to interprofessional collaboration will be explored. Collaborative interprofessional learning experiences will provide the opportunity to increase knowledge and understanding of each profession’s contribution to health care.</td>
</tr>
<tr>
<td>CNHP 7810</td>
<td>Interpretation of Clinical Laboratory Values for Health Professionals</td>
<td>3.0</td>
<td>Inorganic chemistry with lab, organic chemistry with lab, AND EITHER human physiology OR biochemistry</td>
<td>The course will provide the student with the opportunity to understand the interrelationships between clinical laboratory test results and the disease process occurring in the patient. Laboratory values from hematology, clinical chemistry and urinalysis, and microbiology/immunology will be interpreted for infectious diseases, liver diseases, kidney diseases, hematologic disorders, and metabolic disorders. Appropriate case studies will be used to illustrate clinical significance.</td>

<td>Leadership and Ethics in Healthcare</td>
<td>3.0</td>
<td></td>
<td>The course will describe and discuss major leadership philosophies and theories as well as ethical dilemmas. Through online and in class discussion and activities participants will explore these philosophies and theories to enhance their leadership potential. At the conclusion of this course each participant will have identified a leadership style(s) to use and grow within the healthcare industry.</td>
</tr>
</tbody>
</table>
CNHP 8020  Neurobiology of Sleep  
CREDIT HOURS  3.0  
PREREQUISITES  Acceptance into a graduate program at Georgia State University  
DESCRIPTION  Participants in this course will gain knowledge of contemporary theories regarding why humans need to sleep and the neural mechanisms contributing to the states of sleep and wakefulness. An emphasis will be placed upon the analysis of perturbations within specific neurotransmitter systems may manifest as sleep related disorders. The application and evaluation of pharmacological interventions used to normalize activity within those neural pathways will be covered.

CNHP 8050  Selected Topics Nursing and Health Professions  
CREDIT HOURS  1.0 - 3.0  
DESCRIPTION  This course provides an in-depth exploration of health and/or human service topics, research, and current issues. May be repeated up to six hours if topic varies.

CNHP 8100  Grant Writing  
CREDIT HOURS  3.0  
DESCRIPTION  This course offers applied grant writing techniques within the governmental, corporate, and private sectors of grant making. Students will learn how to successfully compete for funding to support academic research and community-based service projects.

CNHP 8200  Instrument Evaluation and Construction  
CREDIT HOURS  3.0  
COREQUISITES  one graduate level research course  
DESCRIPTION  This course presents the processes involved in designing, testing, and/or selecting instruments for measuring variables relevant to clinical and educational research and practice. Attention will be given to qualitative and quantitative approaches to measurement.

CNHP 8500  Systematic Review and Meta-Analysis  
CREDIT HOURS  3.0  
PREREQUISITES  Entrance into doctoral program  
DESCRIPTION  This combination of systematic review and meta-analysis, the statistical process for combining data from multiple studies, is the basis for evidence-based practice in health sciences, social sciences, and a host of other fields. Clinicians use it to determine the most effective course of treatment. Researchers use it to plan new studies, to justify these studies (in grant applications) and to put these studies in context (in the introductory section of published papers). The objective of this course is for the student to become proficient in conducting a systematic review and meta-analysis in the health sciences. Topics will include publication bias, effect size calculation, forest plots, moderator variables, and meta-regression.

CNHP 8550  Basics of Financial Management in Health Care Organizations  
CREDIT HOURS  3.0  
PREREQUISITES  Admission to the DNP program  
DESCRIPTION  This course focuses on application of finance principles and concepts to healthcare organizations. It will provide tools to promote fiscal accountability.

</table>
COMM 6158  New Media Production
CREDIT HOURS  4.0
PREREQUISITES  COMM 6155
DESCRIPTION  An exploration of the production visual and audio assets for Internet transmission and interactive media experience, using techniques and forms that best utilize the evolving aesthetics of the digital and interactive media cultures of the moment. New concepts of interactive storytelling in documentary and/or fiction, and for the visualization of characters and their settings will blend cinematic aesthetics with other aesthetic systems.

COMM 6160  Special Topics
CREDIT HOURS  3.0 - 4.0
PREREQUISITES  consent of instructor
DESCRIPTION  Graduate faculty and specific tools for this course will change according to the specialized expertise of participating faculty.

COMM 6165  Special Production Topics
CREDIT HOURS  3.0 - 4.0
PREREQUISITES  Consent of instructor
DESCRIPTION  Graduate faculty and specific tools for this course will change according to the specialized expertise of participating faculty.

COMM 6185  Editorial and Critical Writing
CREDIT HOURS  3.0
DESCRIPTION  Analysis of editorials and persuasive writing; writing of editorials on national, state, and local issues. Analysis of leading critical periodicals; writing of criticism of films, television, books, plays, and other arts. This course is hybridized with both in-class and online learning components.

COMM 6240  Documentary Film
CREDIT HOURS  3.0
DESCRIPTION  The history of non-fiction film and production.

COMM 6250  Producing for Television and Film
CREDIT HOURS  3.0
DESCRIPTION  Role of the producer in film, broadcasting, and theatre. Refinement of skills in developing program ideas, supervising, and financing productions.

COMM 6361  Sound Design
CREDIT HOURS  4.0
PREREQUISITES  COMM 6155
DESCRIPTION  The expressive aesthetics of motion picture sound, its technology and methods of production will provide students the foundations for creating soundtracks for their own films in progress, or for films already completed. Extensive lab time is required. Students must be able to work collaboratively to produce studio and field recordings.

COMM 6400  Development of Communication and Language Across the Lifespan
CREDIT HOURS  3.0
DESCRIPTION  Theories, nature, basic behavioral aspects and constraints of typical communication and language development across the lifespan.

COMM 6430  Media Industries
CREDIT HOURS  3.0
DESCRIPTION  Examines the historical, technological, economic, political, and social forces shaping the media industries and explores the range of established and emerging theoretical and methodological approaches employed in media industry analysis. 3.0 credit hours.

COMM 6450  Rhetorical Theory and Criticism
CREDIT HOURS  3.0
DESCRIPTION  Development of critical skills useful for evaluating public discourse, with an emphasis on classical and modern theories of rhetoric.

<td>Nonverbal Communication</td>
<td>3.0</td>
<td>Analysis of nonverbal behaviors as human communication messages. Topics include contexts and channels of nonverbal communication, such as physical appearance, time, space, and vocalics.</td>
</tr>
<tr>
<td>COMM 6475</td>
<td>Communication and Aging</td>
<td>3.0</td>
<td>(Same as GER0 6475.) A broad overview of the ways in which communication affects, and is affected by, the aging process. Lifespan development and the theory and research in the area of communication and aging.</td>
</tr>
<tr>
<td>COMM 6480</td>
<td>Political Campaign Communication</td>
<td>3.0</td>
<td>Principles, theories and practices of communication in political campaign contexts.</td>
</tr>
<tr>
<td>COMM 6485</td>
<td>Health Communication</td>
<td>3.0</td>
<td>Provides a comprehensive overview of the major issues, topics, theories and research prevalent in the field of health communication. Topics include interpersonal influence (social support and social network), persuasive message design, and the role of organizations, media, and new communication technology in influencing health attitudes, behaviors, and policy.</td>
</tr>
<tr>
<td>COMM 6490</td>
<td>Communication and Gender</td>
<td>3.0</td>
<td>The influence of gender (social definitions of maleness and femaleness) on public, interpersonal, and mass communication.</td>
</tr>
<tr>
<td>COMM 6500</td>
<td>Visual Communication</td>
<td>3.0</td>
<td>Examination of communication theories that help explain how visual images symbolically interact with audiences. The manifest and latent persuasive functions of visual messages will be explored in a variety of contexts, from the mass media to human interactions.</td>
</tr>
<tr>
<td>COMM 6510</td>
<td>Media and Politics</td>
<td>3.0</td>
<td>Examination of the symbiotic relationship among the media, the political process and the public. Emphasis on how the media's structures and conventions help identify and frame issues and provide interpretative frameworks for analyzing political messages.</td>
</tr>
<tr>
<td>COMM 6515</td>
<td>Entertainment-Education</td>
<td>3.0</td>
<td>Entertainment-Education is the use of drama, suspense, humor, music, etc. to teach viewers about topics such as health, environment, safety, human rights, and social and work skills. This course provides an overview of the major issues, topics, theories and research prevalent in entertainment.</td>
</tr>
<tr>
<td>COMM 6520</td>
<td>Speechwriting</td>
<td>3.0</td>
<td>(Formerly COMM 8500.) Principles and practices in writing manuscript speeches for a variety of contexts, including corporate, organizational, and political. Emphasis on exposition, argumentation, persuasion, and special occasions.</td>
</tr>
</tbody>
</table>
COMM 6570  Social Media Strategies  
CREDIT HOURS 3.0  
DESCRIPTION Covers a variety of topics related to social media theories, strategies and platforms while exposing students to the current best practices within the industry. Authentic learning experiences provide students with multiple opportunities to create content for a variety of audiences and reinforce multiplatform communication skills.

COMM 6610  Applied Graphic Communication  
CREDIT HOURS 3.0  
DESCRIPTION Introduction to the principles and techniques of visual journalism with focus on writing, designing and producing a variety of printed collateral and web graphics for target audiences.

COMM 6620  Problems in Public Relations  
CREDIT HOURS 3.0  
DESCRIPTION Explores, critically assesses, and applies theory and research in the analysis of recurring problems in public relations practice, including theories that dominate the field, formative research as applied to planning and implementing campaigns and programs, and evaluative research as applied to measuring public relations effectiveness.

COMM 6630  Public Relations Writing  
CREDIT HOURS 3.0  
DESCRIPTION (Formerly COMM 8670.) Experience in constructing and/or analyzing such materials as annual reports, brochures, news releases, position papers, employee publications, and special purpose letters.

COMM 6650  International Communication  
CREDIT HOURS 3.0  
DESCRIPTION Critical and comparative approaches to the study of communication systems and journalism at the national, regional, and global levels. Analysis of issues and implications of the globalization of mass media, information systems, and culture. Strategies for international communication research.

COMM 6660  Corporate Communication  
CREDIT HOURS 3.0  
DESCRIPTION Structures, functions and outcomes of corporate communication policies and behaviors; corporate missions, business plans and the design of strategic communication plans to accomplish goals in contexts of corporate cultures, budget audiences, and environmental issues.

COMM 6670  Communication Consulting  
CREDIT HOURS 3.0  
DESCRIPTION (Formerly COMM 8110.) Methods utilized in providing individuals and organizations with assistance in developing communication skills. Assessment of client needs and implementation of various programs.

COMM 6710  TV News Magazine  
CREDIT HOURS 3.0  
PREREQUISITES COMM 6009  
DESCRIPTION This is a skills-based, project course. Working in teams, students will conceive, plan and execute multimedia news projects for online delivery. Emphasis is on developing professional journalistic and public relations practices applicable to multi-platform delivery systems. 3.000 Credit hours.

<tr>
<td>COMM 8100</td>
<td>Publics and Politics</td>
<td>3.0</td>
<td>Many terms try to clarify agents of collective action, including publics, movements, parties, classes, crowds, swarms, and others. How do these terms explain social and historical change. How do mediating technologies alter political possibilities and constraints. The course explores accounts of publicity, including the rhetorical and mass communication traditions, American pragmatism, the Frankfurt School, post-Marxism, and others.</td>
<td></td>
</tr>
<tr>
<td>COMM 8111</td>
<td>Introduction to Graduate Studies</td>
<td>2.0</td>
<td>Introduction to the academic processes, the requirements of the doctoral prospectus and dissertation, and professional opportunities and expectations of the communication discipline.</td>
<td></td>
</tr>
<tr>
<td>COMM 8120</td>
<td>Media, Individuals and Society</td>
<td>3.0</td>
<td>A doctoral seminar on theoretical foundations and new developments that address the linkages among mediated communication, individuals, and society. Examines media-related issues at the individual and interpersonal/intergroup levels. Begins with a historical overview and introduction to key issues in the field. Focuses on three broad approaches: media uses and effects, public campaigns and persuasion, and cultural studies.</td>
<td></td>
</tr>
<tr>
<td>COMM 8130</td>
<td>Communication in a Global Context</td>
<td>3.0</td>
<td>consent of instructor</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Description</td>
<td></td>
<td>Three lecture hours per week. Examination of theoretical debates, communication processes and practices, regulatory mechanisms, conflict, cultural identities in the global space, and the consequent relation of our social environment and self-perceptions to a global scale.</td>
<td></td>
</tr>
<tr>
<td>COMM 8140</td>
<td>Communication Campaigns</td>
<td>3.0</td>
<td>Discussed major theories and principles of persuasion and attitude change, message design and dissemination strategies as they relate to communication campaigns. Provides knowledge and skills required to create and evaluate persuasive campaigns in many domains, such as health, politics, social issues, and the environment.</td>
<td></td>
</tr>
<tr>
<td>COMM 8160</td>
<td>Style and Narrative Analysis</td>
<td>3.0</td>
<td>Methods of qualitative analysis for studying the style and narration of film, television, and/or new media texts. An emphasis on close readings of the formal properties of texts. May be repeated once if content varies.</td>
<td></td>
</tr>
<tr>
<td>COMM 8385</td>
<td>Critical Visual Culture Theory</td>
<td>3.0</td>
<td>Examine some of the major strands in Critical Theory that have contributed to institute the interdisciplinary field of Visual Culture Studies and the various theories of the image emerging from this field.</td>
<td></td>
</tr>
<tr>
<td>Course Code</td>
<td>Course Title</td>
<td>Credit Hours</td>

</tr>
<tr>
<td>-------------</td>
<td>--------------------------------------------------</td>
<td>--------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td></td>
</tr>
<tr>
<td>COMM 8410</td>
<td>Qualitative Methods</td>
<td>3.0</td>
<td>Philosophy and practice of qualitative methods in communication; problems and projects.</td>
<td></td>
</tr>
<tr>
<td>COMM 8420</td>
<td>Media Historiography</td>
<td>3.0</td>
<td>Examination of theoretical and methodological approaches to researching media history.</td>
<td></td>
</tr>
<tr>
<td>COMM 8515</td>
<td>Entertainment-Education</td>
<td>3.0</td>
<td>Entertainment-Education is the use of drama, suspense, humor, music, etc. to teach viewers about topics such as health, environment, safety, human rights, and social and work skills. This course provides an overview of the major issues, topics, theories and research prevalent in entertainment-education.</td>
<td></td>
</tr>
<tr>
<td>COMM 8530</td>
<td>Advanced Rhetorical Theory: From the Ancients to the Enlightenment</td>
<td>3.0</td>
<td>The mechanisms of persuasion and the relationship between public speech and politics attracted interest from a range of thinkers from antiquity to the Enlightenment. The course seeks to better understand these historical resources of rhetorical invention and recovery to build interpretive tools for analyzing contemporary phenomena.</td>
<td></td>
</tr>
<tr>
<td>COMM 8535</td>
<td>Advanced Rhetorical Theory II: Contemporary Rhetorical Turns</td>
<td>3.0</td>
<td>Influential twentieth century thinkers repeatedly turned to the rhetorical tradition as a resource to understand the relationship between speech, power, violence and identity by studying the representative functions of language and the limits of language and logic. The course focuses on the way these thinkers understood rhetoric's connection to social change, subject formation, and performance.</td>
<td></td>
</tr>
<tr>
<td>COMM 8540</td>
<td>Rhetorical Criticism I</td>
<td>3.0</td>
<td>Introduction to the practice of rhetorical criticism and to the grammars associated with the analysis of various types of text.</td>
<td></td>
</tr>
<tr>
<td>COMM 8545</td>
<td>Rhetorical Criticism II</td>
<td>3.0</td>
<td>Review of rhetorical criticism in major debates and controversies.</td>
<td></td>
</tr>
<tr>
<td>COMM 8560</td>
<td>Television Studies</td>
<td>3.0</td>
<td>Course traces development of television studies. Also looks at recent work in the field as a means of assessing the changing nature of television and of television studies as an area of inquiry. Readings explore range of industrial, sociocultural, textual and audience analyses, approaches and issues.</td>
<td></td>
</tr>
</tbody>
</table>
COMM 8690 Media and Cultural Studies
CREDIT HOURS 3.0
DESCRIPTION Examination of the relationship between culture and power. Readings include both founding theoretical texts (the Marxist tradition, the Frankfurt School, the Birmingham School) and current applied scholarship. The class addresses a range of popular media, including film, television, music, new media, and others. Multiple, intersecting structures of power are interrogated, including class, gender, and race.

COMM 8720 Media Stereotyping
CREDIT HOURS 3.0
DESCRIPTION This seminar takes psychological and sociological perspectives to examine media stereotyping and its processes and effects on individuals and society. Taking "group identity" into account, it overviews key theories, relevant research, and discusses some of the current issues observed in mediated communication contexts.

COMM 8730 Seminar in International Media and Culture
CREDIT HOURS 3.0
PREREQUISITES COMM 6650
DESCRIPTION In-depth examination of issues, trends, and culture pertaining to mass communication within and among nations of sub-Saharan Africa or of the Arab nations of the Middle East and North Africa. Specialized areas of study will rotate from year to year.

COMM 8750 e-Health
CREDIT HOURS 3.0
DESCRIPTION e-Health refers to the use of advanced communication technologies (e.g., internet, SMS, online gaming) to improve people's health decisions and health care services. This seminar discusses some of the major issues, topics, theories, and relevant literature of e-Health.

COMM 8780 Directed Research in Communication
CREDIT HOURS 1.0 - 20.0
DESCRIPTION

COMM 8900 Internship
CREDIT HOURS 1.0 - 3.0
PREREQUISITES Eligibility criteria may be obtained from the Department of Communication Internship Coordinator
DESCRIPTION Professional field experience with an organization in the student's area of concentration. Only Ph.D. students may enroll.

COMM 8980 Special Topics
CREDIT HOURS 3.0
PREREQUISITES consent of instructor
DESCRIPTION Course focuses on a variety of topics.

COMM 9999 Doctoral Dissertation Research
CREDIT HOURS 1.0 - 20.0
PREREQUISITES consent of instructor

<tbody>
<tr>
<td>CSD 6320</td>
<td>Introduction to Language Disorders</td>
<td>3.0</td>
<td></td>
<td>This course provides an introduction to language disorders across the life span. Emphasis is placed on describing the characteristics and causes of language disorders in children and adults. General procedures for assessing language disorders and principles of remediation are described. (Laboratory participating required).</td>
</tr>
<tr>
<td>CSD 6360</td>
<td>Anatomy and Physiology for Communication</td>
<td>3.0</td>
<td></td>
<td>This course is designed to examine the anatomy and physiology of the speech and hearing mechanisms and to provide an overview of the nervous system as related to speech, language, and hearing. The course prepares students for further course work in communication disorders.</td>
</tr>
<tr>
<td>CSD 6480</td>
<td>Hearing Science and Disorders</td>
<td>3.0</td>
<td>CSD 4480 or CSD 6480 with a minimum grade of &quot;C&quot; or consent of instructor</td>
<td>This course focuses on the application of the principles of hearing science and audiology. Students study acoustics, anatomy and physiology, and disorders of the auditory system. Attention is given to the administration and interpretation of pure tone and speech audiometry.</td>
</tr>
<tr>
<td>CSD 6490</td>
<td>Audiologic Rehabilitation</td>
<td>3.0</td>
<td>CSD 4480 or CSD 6480 with a minimum grade of &quot;C&quot; or consent of instructor</td>
<td>A minimum grade of &quot;B&quot; is required for this course.</td>
</tr>
<tr>
<td>CSD 6490</td>
<td>Language Disorders in Young Children</td>
<td>3.0</td>
<td>CSD 4480 or CSD 6480 with a minimum grade of &quot;C&quot; or consent of instructor</td>
<td>This course focuses on language disorders in school age children from kindergarten through adolescence. Emphasis is placed on language assessment and intervention principles in school settings, including the relationship between language impairments and reading disorders with specific attention to the impact of these disorders on academic achievement.</td>
</tr>
<tr>
<td>CSD 7455</td>
<td>Language Disorders in School Age Children</td>
<td>3.0</td>
<td></td>
<td>This course focuses on language disorders in school age children from kindergarten through adolescence. Emphasis is placed on language assessment and intervention principles in school settings, including the relationship between language impairments and reading disorders with specific attention to the impact of these disorders on academic achievement.</td>

<td>Neuroscience for Communication</td>
<td>3.0</td>
<td>A minimum grade of &quot;B&quot; is required for this course</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>DESCRIPTION</strong></td>
<td></td>
<td>This course provides in-depth study of the anatomy and physiology of the nervous system. Particular emphasis is paid to the neural bases of speech, hearing, and language and to the behavioral effects of nervous system damage.</td>
<td></td>
</tr>
<tr>
<td>CSD 7520</td>
<td>Speech Sound Disorders</td>
<td>3.0</td>
<td>A minimum grade of &quot;B&quot; is required for this course</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>DESCRIPTION</strong></td>
<td></td>
<td>Students examine normal and disordered speech sound production. Emphasis is placed on speech sound development, evaluation of speech sound disorders, and design of intervention programs. Articulation and phonological treatment approaches are covered, and current techniques are emphasized.</td>
<td></td>
</tr>
<tr>
<td>CSD 7530</td>
<td>Voice Disorders</td>
<td>3.0</td>
<td>A minimum grade of &quot;B&quot; is required for this course</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>DESCRIPTION</strong></td>
<td></td>
<td>This course provides concentrated study of normal vocal anatomy and physiology, the parameters of resonation and phonation, and the nature of voice disorders. Emphasis is placed on the assessment, rehabilitation, and management of organic and nonorganic voice disorders including the application of advanced technologies in the measurement of resonation and phonation. Laboratory participation required.</td>
<td></td>
</tr>
<tr>
<td>CSD 7540</td>
<td>Fluency Disorders</td>
<td>3.0</td>
<td>Restricted to students majoring in communication sciences and disorders</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>DESCRIPTION</strong></td>
<td></td>
<td>This course provides current perspectives on the nature and treatment of fluency disorders including stuttering and cluttering. Primary emphasis is given to identifying the procedures for differential diagnosis and appropriate clinical management.</td>
<td></td>
</tr>
<tr>
<td>CSD 7550</td>
<td>Acquired Aphasia</td>
<td>3.0</td>
<td>A minimum grade of &quot;B&quot; is required for this course</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>DESCRIPTION</strong></td>
<td></td>
<td>Students examine the neuropathology, assessment, and treatment of aphasia in adults. Topics include neuroanatomy of language, neuropathology of aphasia, description of the aphasias, and contemporary methods for the evaluation and rehabilitation of aphasia.</td>
<td></td>
</tr>
<tr>
<td>CSD 7560</td>
<td>Diagnostic Methods of Speech and Language Disorders</td>
<td>3.0</td>
<td>A minimum grade of &quot;B&quot; is required for this course</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>DESCRIPTION</strong></td>
<td></td>
<td>Students examine standardized and nonstandardized procedures for evaluating individuals with speech and language disorders. Principles of differential diagnosis, interviewing techniques, and report writing are emphasized.</td>
<td></td>

<tr>
<td>CSD 7570</td>
<td>Advanced Audiological Assessment</td>
<td>3.0</td>
<td>A minimum grade of &quot;B&quot; is required for this course</td>
<td>Students examine advanced audiological assessment principles and procedures for use with children and adults including otoscopic inspection, acoustic immittance, and electrophysiological testing. Emphasis is placed on the selection of appropriate evaluation tools and interpretation of test results. Laboratory participation required.</td>
</tr>
<tr>
<td>CSD 7600</td>
<td>Swallowing Disorders</td>
<td>3.0</td>
<td>A minimum grade of &quot;B&quot; is required for this course</td>
<td>Study focuses on the mechanism of normal and disordered swallowing in adults and children. Strategies for the assessment, treatment, and management of swallowing disorders in a variety of clinical settings are emphasized. Observations in various clinical environments are required.</td>
</tr>
<tr>
<td>CSD 7610</td>
<td>Motor Speech Disorders</td>
<td>3.0</td>
<td>A minimum grade of &quot;B&quot; is required for this course</td>
<td>Study focuses on the assessment, management, and treatment of motor speech disorders in adults and children. Emphasis is placed on methods of evaluation and differential diagnosis of the dysarthrias and apraxia of speech as well as approaches to rehabilitation and management of these disorders.</td>
</tr>
<tr>
<td>CSD 7630</td>
<td>Foundations of Clinical Practice in CSD</td>
<td>3.0</td>
<td>Restricted to students majoring in Communication Sciences and Disorders</td>
<td>This course introduces students to policies and procedures used in clinical practice in communication disorders. Through observation, lecture, and discussion, students examine the implementation of speech-language pathology service in a variety of settings. Emphasis is placed on developing case reviews, writing goals, collecting data, and writing progress notes and reports. Supervision issues, treatment issues, behavior management, and reimbursement policies are discussed. Laboratory participation required.</td>
</tr>
<tr>
<td>CSD 7700</td>
<td>Observational Experiences in Communication Disorders</td>
<td>1.0 - 2.0</td>
<td>Consent of instructor</td>
<td>This course is designed to provide students with opportunities to observe speech-language pathologists in a variety of clinical, medical, and educational settings as they evaluate and treat clients with communication disorders. Emphasis will be on developing observational and reporting skills. This experience will prepare students for their clinical practicum experiences. (Repeatable).</td>
</tr>
<tr>
<td>CSD 7840</td>
<td>Research Methods in Communication Disorders</td>
<td>3.0</td>
<td>A minimum Grade of &quot;B&quot; is required for this course</td>
<td>This course focuses on historical, current, and future research directions in Speech and Language Pathology, as well as research methodology. Emphasis will be placed on translation of research into clinical practice.</td>
</tr>
</tbody>
</table>
**CSD 7910  Clinical Practicum in Communication Disorders**

**CREDIT HOURS** 1.0 - 3.0  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** During this practicum, students provide speech and language services to a variety of clients in the university's Speech-Language-Hearing Clinic. Emphasis is placed on the application of course work to the evaluation and treatment of individuals with communication disorders. (Repeatable).

**CSD 7950  Communication Disorders Medical Internship**

**CREDIT HOURS** 3.0 - 9.0  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** In this intensive, full-time practicum experience, the student evaluates and treats individuals with communication disorders in a medical setting such as a hospital, rehabilitation center, or health care facility. (Repeatable).

**CSD 7951  Communication Disorders School Internship**

**CREDIT HOURS** 3.0 - 9.0  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** In this intensive, full-time practicum experience, the student evaluates and treats individuals with communication disorders in a school setting. (Repeatable).

**CSD 7975  Seminar for Graduate Assistants**

**CREDIT HOURS** 3.0 - 18.0  
**REQUIREMENTS** A minimum grade of "S" is required for this course  
**DESCRIPTION** This course is designed to inform students of policies and procedures to complete an assistantship. Professional ethics associated with teaching, research planning, management, and accounting procedures are reviewed. The course focuses on the teaching and research being conducted in order to further the understanding of all students involved in teaching and research. Course is graded as satisfactory/unsatisfactory. (Repeatable).

**CSD 7990  Master's Thesis**

**CREDIT HOURS** 1.0 - 6.0  
**PREREQUISITES** Communication Sciences and Disorders major  
**DESCRIPTION** Students earn credit for supervised development and preparation of the project or thesis for the M.S. degree with a major in communication sciences and disorders.

**CSD 8310  Advanced Studies in Language Development**

**CREDIT HOURS** 3.0  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This course provides an in-depth study of language development for school age children. Emphasis is placed on current research and application of information to classroom and therapeutic settings.
CSD 8330  
**Acquired Neurocognitive-Communication Disorders**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Students obtain knowledge about cognitive and communication disorders related to traumatic brain injury, dementia, and right brain damage. Topics include attention, memory, executive function, underlying neuropathologies, and contemporary methods for the evaluation and treatment of these disorders.

CSD 8800  
**Global Perspectives in Communication Disorders**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** consent of instructor  
**DESCRIPTION** This course prepares graduate students to provide services to individuals with communication disorders in a global context. Students gain multicultural experiences as a result of travel to another country. Students develop skills to support the learning of individuals from diverse racial, cultural, ethnic, and socioeconomic backgrounds. Students will develop global perspectives and comparative knowledge of educational, clinical and medical systems in other counties. (Repeatable).

CSD 8810  
**Directed Readings in Communication Sciences and Disorders**  
**CREDIT HOURS** 1.0 - 3.0  
**PREREQUISITES** Consent of Instructor  
**DESCRIPTION** This course is designed for individual projects or readings. Students intensively study and/or apply knowledge in selected areas of communication sciences and disorders through focused readings or special projects. The goal of the course is to give students opportunities to acquire knowledge and understanding of specific topics complementing required and elective courses in their planned programs of study. (Repeatable).

CSD 8850  
**Independent Study in Communication Sciences and Disorders**  
**CREDIT HOURS** 1.0 - 3.0  
**PREREQUISITES** Consent of Instructor  
**DESCRIPTION** This course is highly personalized to meet the needs and career interests of the student. Students intensively study and/or apply knowledge in selected areas of communication sciences and disorders through focused readings, special projects, or research. The goal of the course is to give students opportunities to acquire knowledge and understanding of specific topics complementing required and elective courses in their planned programs of study. (Repeatable).

CSD 8970  
**Research Seminar in Communication Sciences and Disorders**  
**CREDIT HOURS** 1.0  
**PREREQUISITES** Consent of Instructor  
**DESCRIPTION** Students discuss selected topics in Communication Sciences and Disorders. (Repeatable).

CSD 9930  
**Grant Writing in the Social and Behavioral Sciences**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Consent of Instructor  
**DESCRIPTION** Students will become familiar with federal agencies and basics of writing a fundable proposal. Students will prepare a grant proposal of quality for submission to federal agencies supporting research in the behavioral and health sciences.
CSD 9990  
Dissertation  

**CREDIT HOURS**  
1.0 - 18.0  

**PREREQUISITES**  
Consent of Instructor  

**DESCRIPTION**  
This course involves the research and writing of a doctoral dissertation. The dissertation and defense are the culminating activities in the student’s doctoral program, demonstrating high levels of scholarly and intellectual activity. The dissertation is an original contribution to knowledge in the field of study through disciplined inquiry.  
(Repeatable).

<td>CIS 8000</td>
<td>Information Technology Project Management</td>
<td>3.0</td>
<td>None</td>
<td>This course examines the defining characteristics of IT projects and introduces the student to a variety of project management techniques that can be applied in an IT project context. Managing scope, time, cost, and quality will be explored. The course will cover management issues associated with packaged software implementation (e.g., ERP systems), in-house developed systems, and outsourced projects.</td>
</tr>
<tr>
<td>CIS 8005</td>
<td>Data Programming for Analytics</td>
<td>3.0</td>
<td>Prerequisites, MRM 8000</td>
<td>This course builds upon the student's foundation of programming principles through the introduction of application programming for data analysis. Major areas covered include inheritance and polymorphism, common programming data structures, and file and database access. Students will implement data analysis applications, which will be evaluated according to advanced programming principles. The programming language will be noted in the course listing for each semester.</td>
</tr>
<tr>
<td>CIS 8010</td>
<td>Process Innovation</td>
<td>3.0</td>
<td>Prerequisites: None</td>
<td>This course examines the design of an organization's structure and business processes. The course primarily focuses on the application of information technologies to transform organization and improve their performance. Methods of introducing and implementing information technologies to enable organizational change are examined.</td>
</tr>
<tr>
<td>CIS 8025</td>
<td>Mobile Application Development</td>
<td>3.0</td>
<td>CIS 3270 or equivalent</td>
<td>This course introduces students to the design and implementation of Android and iOS applications for mobile devices. Students learn how to set up development environments for both platforms and will develop an app for both platforms. In addition, web application development related to mobile apps will be discussed. This course covers object-oriented programming concepts as well as programming languages used for Android and iOS application development.</td>
</tr>

<tr>
<td>CIS 8040</td>
<td>Fundamentals of Database Management Systems</td>
<td>3.0</td>
<td>CIS 3210 or CIS 3260</td>
<td>Developing and managing efficient and effective database applications requires understanding the fundamentals of database management systems, techniques for the design of databases, and principles of database administration. This course emphasized database concepts, developments, use and management in three main sections: database concepts, practice, and emerging trends. Relational database systems are the main focus, but other types, including object-oriented databases, are studied. Practical design of databases and developing database applications using modern software tools will be emphasized.</td>

<td>Students develop the ability to conceptualize, design, and implement supply chains aligned with product, market, and customer characteristics. Business competition is now between supply networks rather than individual corporations. Managing the flow of products, information, and revenue across supply chains differentiates the ability of supply networks to fulfill customer needs. Students develop the ability to evaluate how information flows can substitute for the stock of physical resources, such as inventory, and why such systems succeed or fail. They assess how internet technologies, dynamic markets and globalization are impacting supply chain strategies and practices, including logistics, digital coordination of decisions and resources, inventory and risk management, procurement and supply contracting, product and process design, and revenue management.</td>
</tr>
<tr>
<td>CIS 8045</td>
<td>Unstructured Data Management</td>
<td>3.0</td>
<td>CIS 8040</td>
<td>This course addresses the unstructured data management skills needed for modern data analysis including those salient to big data and real-time data environments. The focus is on unstructured data and its environment. Unstructured data includes web data (blogs, text), user generated content, social media, location-aware data, and digital media among others. Topics covered include extraction methods for real time audio and video data, data capture, cleaning, representation, storage, queries, manipulation, and real-time data management. Also included as they apply to unstructured data environment are data security, governance, and visualization. Students will learn natural language processing and geo-spatial analytical tools.</td>
</tr>

</table>
CIS 8070  Mobile Health: Technologies and Applications  
CREDIT HOURS: 3.0  
PREREQUISITES: None  
DESCRIPTION: This course provides an in-depth coverage of mobile health and related technologies. This will include the emerging mobile health applications, health monitoring, medication adherence, independent living and the elderly, and smart health technologies in various healthcare settings.

CIS 8080  Information Systems Security and Privacy  
CREDIT HOURS: 3.0  
PREREQUISITES: None  
DESCRIPTION: This course is designed to develop knowledge and skills for security of information and information systems within organizations. It focuses on concepts and methods associated with planning, designing, implementing, managing, and auditing security at all levels and on all systems platforms, including worldwide networks. The course presents techniques for assessing risk associated with accidental and intentional breaches of security. It covers the associated issues of ethical uses of information and privacy considerations.

CIS 8085  Information and Information Systems Security Risk Management  
CREDIT HOURS: 3.0  
PREREQUISITES: None  
DESCRIPTION: This course develops knowledge and skills in risk based information security management geared toward preventive management and assurance of security of information and information systems in technology-enabled environments. It focuses on risk assessments, risk mitigation strategies, risk profiling and sensitivity, quantitative and qualitative models of calculating risk exposures, security controls and services, threat and vulnerability management, financing the cost of security risks, and return on investment for information security initiatives. The course presents several risk assessment models with an ultimate goal of identifying and realizing the unique and acceptable level of information risk for an organization.

CIS 8086  Protecting Information Assets  
CREDIT HOURS: 3.0  
PREREQUISITES: None  
DESCRIPTION: Topics include security, integrity, and availability of information systems. The course will allow the student to establish the scope, control environments and identify risks associated with information assets. It will also cover the protection of assets involving state-of-the-art technologies such as virtualization and cloud computing. Students will understand how assessing risk is an important first step in undertaking the proper examination of an organization's IT processes and technologies. Further, the course will cover latest standards and frameworks related to the auditing of information assets.
CIS 8087  
**Cloud Computing and Security**  
CREDIT HOURS 1.0 - 3.0  
PREREQUISITES CIS 8080 or permission of the instructor  
DESCRIPTION This course allows for in-depth study of emerging or advanced topics in cloud computing with specific emphasis on issues related to cybersecurity. Emphasis will be placed on recent advances in the field of cloud computing concepts, risks, and benefits. Also, issues relating to cloud data, infrastructure and operations security as well as legal and compliance issues related to cloud computing will be covered. The course will rely on readings from professional literature, lectures, case studies and projects.

CIS 8088  
**Network Security and Hacking**  
CREDIT HOURS 3.0  
PREREQUISITES CIS 8080 or approval of the program director  
DESCRIPTION This course focuses on three specific aspects of data communication networks: 1) the technological underpinnings of data transmission over computer networks; 2) the known approaches to compromise and/or damage the networks; and 3) skills and methods necessary to prevent, detect and recover from network-based attacks. This course presents both theory and practice of network attack and defense and discusses contemporary tools, techniques and methodologies of attackers and defenders alike.

CIS 8090  
**Enterprise Architecture**  
CREDIT HOURS 3.0  
PREREQUISITES CIS 8030  
DESCRIPTION This course will explore the concepts, principles, and state of the art methods in enterprise architectures, including architectural styles, architecture description languages (ADL), software connectors, dynamism in architectures, and architecture based testing and analysis. The course will help understand the role of architecture in software engineering, specifically during requirements analysis, design (including object oriented design and related notations, such as UML), and implementation. The course will also cover practical applicability of architectures in software reuse and component interoperability platforms (such as CORBA, Enterprise JavaBeans, COM/ DCOM, and NET).

CIS 8100  
**Management of Information Services**  
CREDIT HOURS 3.0  
PREREQUISITES None  
DESCRIPTION This course addresses the many management issues unique to the information services function within organizations. Coverage includes information systems planning, managing the information infrastructure, justifying information technology investments, the costing of services and networks evaluating information system performance, alternative information service delivery modes, managing distributed and end user computing, project and operations management, systems security, and the management of information technology professionals.

<tbody>
<tr>
<td>CIS 8125</td>
<td>Information Technology Management</td>
<td>3.0</td>
<td>None</td>
<td>This course examines the use of information technology to position company operations to be effective, efficient and adaptable in the rapidly changing global economy while handing associated challenges, ethical concerns, and risks. Students will examine the role of information technology in contemporary business with respect to leadership, strategy, and digital content. The hands-on component will provide students with an opportunities to carry out related assignments on: data analytics; IT innovation; societal impacts; web analytics; social media; web analytics; and global sourcing.</td>
</tr>
<tr>
<td>CIS 8150</td>
<td>Machine Learning for Analytics</td>
<td>3.0</td>
<td>None</td>
<td>The course will cover theory, methods, and tools for automated inference from data. This introductory course will include (1) supervised learning, (2) unsupervised learning methods, (3) graphical structure models, and (4) deep learning. The course will prepare students in the fundamentals of machine learning, as well as provide practical skills in apply current software tools to machine inference from large data sets.</td>
</tr>
<tr>
<td>CIS 8210</td>
<td>Global Systems Sourcing</td>
<td>3.0</td>
<td>None</td>
<td>This course is designed to assist students in developing the knowledge and skills needed to work with systems integration vendors and processes. It focuses on the concepts and methods associated with designing, planning, contracting for and overseeing information technology infrastructure and applications. The course familiarizes students with the legal issues related to preparing, distributing, and evaluating requests for proposal (RFP) and subsequent integration contracting matters. Students will prepare and evaluate systems proposals for various sourcing and managing third party relations.</td>
</tr>
<tr>
<td>CIS 8220</td>
<td>International Information Technology Issues and Policy</td>
<td>3.0</td>
<td>None</td>
<td>This course examines the role of technology as an integral and key factor in the delivery and support of information and communication technologies in the global economy for both traditional and electronic businesses, and the related technical and managerial issues. The first half of the course is grounded in business strategy and information technology fit, culture and national policy theory. The second half examines business in practice in the different world regions. Illustrative case studies coupled with readings of current press, class discussion, and practitioners from the international business community who provide real-world insight and used to bridge concepts and practice. In a major project, students access the attractiveness of a particular country for a real company.</td>
</tr>

CIS 8300  
Software Quality Management  
3.0  
PREREQUISITES  
CIS 8030  
DESCRIPTION  
The course will cover methods and tools for achieving software quality assurance at various levels of a software system including at the module, subsystem, and system levels. State of the art tools and techniques including inspections, version control and configuration management will be covered. Also, the role of standards, policies, and procedures will be discussed. The course will prepare students to develop a software quality assurance program in structured, organized ways. This course should provide practical knowledge of a variety of quality assurance techniques, and an understanding of some of the tradeoffs between techniques.

CIS 8388  
Capstone Project for MSISAC Program  
1.0 - 3.0  
PREREQUISITES  
Department approval  
DESCRIPTION  
This project provides an opportunity for students to apply the knowledge and skills acquired from all courses in the MS ISAC program. The project will be designed to perform work on any of the topics like IT Audit, IT Security, IT Risk Assurance and IT Governance. The student is expected to work on a project for a client organization (external or internal). Students will, individually or in teams, develop a project plan with milestones like project charter, deliverables etc. for the client.

CIS 8389  
Directed Readings in Information Systems  
1.0 - 3.0  
PREREQUISITES  
Consent of the instructor, good academic standing  
DESCRIPTION  
Open to CIS majors only. Required for MS/CIS thesis option.

CIS 8391  
Field Study in Computer Information Systems  
1.0 - 6.0  
PREREQUISITES  
Department Approval and a GPA 3.3 or greater  
DESCRIPTION  
This course is designed to provide the senior level under graduate student or Master's student with an opportunity to apply the business skills learned at the Robinson College of Business (RCB) in an approved site off or on campus. The course immerses students in the planning and execution of complex activities involved in both large and small businesses.

CIS 8392  
Advanced Topics in Big Data Analytics  
1.0 - 3.0  
REQUIREMENTS  
Permission of instructor  
DESCRIPTION  
This course allows for in-depth study of emerging or advanced topics in big data management and analytics. Examples of topics that could be covered include new applications of analytics in specific domains such as health and IT Audit, as well as new technologies for big data management and analytics. Emphasis will be placed on readings from professional literature, lectures, case studies and projects. The specific topic may vary from term to term as may the associated course prerequisites. This course may be repeated for credit in different topics.

This project provides an opportunity for students to apply the knowledge and skills acquired from all courses in the Cybersecurity concentration in the MSIS program. The project will be designed to perform work on specific topics relevant to the concentration. Students, individually or in teams, will develop a project plan with milestones like project charter, deliverables etc. Upon completion of the course, students will present both oral and written reports on their project.

CIS 8630  
Business Computer Forensics and Incident Response  
CREDIT HOURS 3.0  
PREREQUISITES ACCT 8680 or CIS 8080  
DESCRIPTION This course provides a strategic exploration into the prevention and response to intentional abuse of business information systems. This abuse frequently leads to diversion of resources, interruptions of service and corruption of data that develop into a variety of losses that can seriously impair an organization's performance. Students will be prepared to plan and manage organizational incident and forensics preparedness, including information security policies, information controls, information practices, incident response plans, forensic readiness, and preservation of evidence in the form of electronically stored information. The course includes experiments in the use of forensics tools for investigation of organizational policy violations.

CIS 8635  
IT Auditing  
CREDIT HOURS 3.0  
PREREQUISITES CIS 8000  
DESCRIPTION Crosslisting ACCT 8630. This course focuses on the knowledge and skills required for practice of IT auditing in the post-Sarbanes-Oxley world in which internal control is assessed in financial audits. The course covers assessment of internal control in technology-intensive settings, continuous monitoring and auditing of applications, and auditing of system development. Students work through audit simulations to develop IT audit expertise.

CIS 8640  
IT Services Management and Governance  
CREDIT HOURS 3.0  
PREREQUISITES Permission of the program director  
DESCRIPTION The course will cover topics such as Service/Help Desk, Configuration Management, Incident Management, Problem Management, Release Management, and Change Management, IT Security, Service Level management, Capacity planning, Business Continuity Management, Availability and IT Financial Management.
CIS 8670
Enterprise Resource Planning Systems: Implementation and Management
CREDIT HOURS 3.0
DESCRIPTION
This course will explore the concepts, principles, and state of the art methods in successfully integrating Enterprise Resource Planning (ERP) systems into extant enterprise architectures. The course will help both functional area and IT managers understand the respective role of users, enterprise architects, developers and managers in the selection, preparation, implementation and management of large and complex enterprise applications. This is NOT a hands on ERP tool based course, rather it is a precursor to deeper involvement in ERP management, implementation and, if desired, administration. As such the course will be of value to students in both technical and managerial programs.

CIS 8672
Integrated Process Platforms for Innovation
CREDIT HOURS 3.0
PREREQUISITES None
DESCRIPTION
Understanding and executing digital innovation through a process platform is critical for success in today's dynamic environment. This course will explore the concepts of organizational structure, master and transactional data, business scenarios and processes, and business process integration. The use of process platforms for the integration and transformation of various business processes such as Record to Report (Financial Accounting), Order to Cash (Sales and Distribution), Procure to Pay (Materials Management: Procurement, Inventory, and Warehouse Management), Manufacturing (Production Planning), and Hire to Retire (Human Capital Management) will be covered.

CIS 8674
Customizing Enterprise Systems Platforms
CREDIT HOURS 3.0
PREREQUISITES Permission of program director; CIS 8672
DESCRIPTION
This course will explore the concepts and tools for configuration and customization of the Enterprise Systems platforms to meet the enterprise's business requirements. Configuration and customization allows the enterprise to ensure the enterprise system platform's end state design properly reflects the enterprise's organizational structure, master data and business process requirements. For example, in the fulfillment scenario configuration is used to create and maintain the organizational, master data and business processes which leverages the standard functionality. When the business requirements cannot be met by the standard functionality of the platform, additional customization may be required with application development.

CIS 8676
Innovating with Emerging Technologies, and Systems Security and Privacy
CREDIT HOURS 3.0
PREREQUISITES None
DESCRIPTION
This course details the technical underpinnings of various emerging technologies as well as their potential uses by organizations. The course teaches students to identify a business opportunity based on an emerging technology, develop the opportunity into a viable business idea, and to present the idea to potential project sponsors, strategic partners, and customers. The specific technologies covered in this course will vary since the emerging technology landscape is rapidly and continuously evolving.
CIS 8678  Platform Strategies for Digital Innovation
CREDIT HOURS  3.0
PREREQUISITES  None
DESCRIPTION  This course will introduce students to the many ways platform based innovations are transforming the economy and to the strategies that may be used for designing and launching a digital platform. This course will cover the fundamentals of digital transformation and will discuss how platform based innovations outperform product and services based organizations. The course will examine how organizations can launch and grow a digital platform and strategies for the governance of the platform, and will provide an overview of digital transformation and innovation across industries.

CIS 8690  Advanced Topics in Information Systems
CREDIT HOURS  3.0
PREREQUISITES  CIS 8000 and others depending on the topic
DESCRIPTION  This course addresses emerging or advanced topics in information systems and services such as IT operations management, IT sourcing, cloud computing, and other emerging technology concepts. The specific topic may vary from term to term as may the associated course prerequisites. The specific topic may vary from term to term as may the associated course prerequisites. This course is repeatable for different topics.

CIS 8694  AI for Decision Making
CREDIT HOURS  3.0
PREREQUISITES  CIS 8005
DESCRIPTION  Artificial Intelligence (AI) is inspired by human intelligence, made powerful by data generated by humans and artifacts, and is most useful when it positively affects the human experience. This course provides an introduction to harnessing the power of AI so that it is beneficial to decision makers in organizations. It will cover a number of topics including agency and initiative, AI and ethics, bias and transparency, confidence and errors, human augmentation and amplification, trust and explainability, mixed-initiative systems, and programming by example. These topics will be explored via projects in dialog and speech-controlled systems, speech recognition, computer vision, data science, recommender systems, text summarization, learning science, UI personalization and visualization.

CIS 8695  Managing Big Data for Analytics
CREDIT HOURS  3.0
PREREQUISITES  Permission of the program director
DESCRIPTION  Prerequisite. Permission of the program director. The course introduces techniques for the management and use of big data for a data-rich business environment. The course covers the tools for collecting and managing large volumes of structured and unstructured data from organizational and external systems to successfully design, build, evaluate and implement decision aids for a variety of practical business applications. The course will also use a variety of state-of-the-art software for the collection, organization, analysis, and visualization of large structured and unstructured databases.
CIS 8795  IT Infrastructure for Big Data
CREDIT HOURS  3.0
PREREQUISITES  CIS 3270 or equivalent
DESCRIPTION  This course covers IT infrastructure needed to manage Big Data including distributed data infrastructure design and usage, and parallel processing large-scale data over computing grids. Managerial and strategic concerns of big data grids will be introduced. Students will design and implement distributed data storage and processing schemes, and demonstrate their effectiveness with Big Data applications.

CIS 8990  MS-CIS Thesis Research
CREDIT HOURS  0.0 - 6.0
PREREQUISITES  CIS 8000 and CIS 8010 and CIS 8020 and CIS 8030 and CIS 8040 and CIS 8050 and CIS 8389; and consent of instructor
DESCRIPTION  Master of Science students approved for the thesis option must continuously enroll in this research course each semester until the thesis is completed and presented.

CIS 9200  Topics in Information Systems Technology
CREDIT HOURS  3.0
PREREQUISITES  None
DESCRIPTION  This is a research seminar that focuses on research issues and methods in one or more areas having to do with the technology of information systems. Topics include software engineering, communication systems, and database/knowledge based systems. The focus of the course is announced in advance and the course syllabus is made available for students to review.

CIS 9240  Topics in Information Systems Development
CREDIT HOURS  3.0
PREREQUISITES  None
DESCRIPTION  In this course, theories and models applicable to the analysis of systems structure and the processes of systems analysis and design are studied. Emphasis is on the applicability of the material covered to information systems in particular. The focus of the course is announced in advance and the course syllabus is made available for students to review.

CIS 9260  Topics in Information Systems Management
CREDIT HOURS  3.0
PREREQUISITES  None
DESCRIPTION  This course covers various topics in information systems management or the management of information systems. Topics covered vary depending upon the research interest of the department. Students acquire skills for developing a research proposal. The focus of the course is announced in advance and the course syllabus is made available for students to review.

CIS 9320  Design Research Methods in Information Systems
CREDIT HOURS  3.0
PREREQUISITES  RCB doctoral standing or consent of instructor
DESCRIPTION  The course develops skills needed for conducting research whose aim is to invent methods and techniques for designing information systems that are effective and efficient. Students also acquire skills in developing research proposals that follow the design research paradigm and learn how to public such research.
Advanced Seminar in Information Technologies and Systems

This course addresses emerging or advanced topics in information technologies, such as wireless and mobile networks, mobile networks, such as outsourcing, entrepreneurship, project management, and mobile commerce. In addition to providing an in-depth understanding of the topic, the focus of the course will be on research problems, diverse research methodologies, modeling and performance evaluation, and architectural solutions. The course will prepare students to pursue doctoral research in the covered topic. The specific topics may vary from semester to semester and will be announced in advance.

### CSC 6223 Privacy
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 2720 and MATH 3030  
**DESCRIPTION** This course will study privacy in a few settings where rigorous definitions and enforcement mechanisms are being developed, including statistical disclosure limitation, semantics and logical specification of privacy policies that constrain information flow and use, principled audit and accountability mechanisms for enforcing privacy policies, anonymous communication protocols, and other settings in which privacy concerns have prompted much research, such as in social networks, location privacy and Web privacy.

### CSC 6224 Ethical Hacking
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 2720 (Data Structures) and CSC 3320 (System Level Programming)  
**DESCRIPTION** Introduction to the methods and techniques used by computer hackers for malicious activity and by penetration testers for defensive measures. Understanding of the techniques used by intruders will lead to the design of countermeasures for secure computer systems. Students will implement hands-on experiments to learn identification of vulnerabilities in servers, websites, wireless networks, and cryptologic systems.

### CSC 6225 Internetwork Programming
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 4220  
**DESCRIPTION** This course provides students with an understanding of the Internet and details regarding the protocols used in the Internet. The students will also learn key components of network programming using the most-widely used application program interface, sockets. Topics to be covered include: Internet Protocol (IP), Transport Layer Protocol - Transmission Control Protocol (TCP), Transport Layer Protocol - User Datagram Protocol (UDP), and Unix/Linux Network Programming.

### CSC 6226 Software Security
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 2720 Data Structure and CSC 3320 System Level Programming  
**DESCRIPTION** This course is a study of the foundation of software security. Students will learn the characteristics of secure software, the role of security in the development lifecycle, designing secure software, best security programming practices, security for web applications, static analysis techniques, and software security testing.

<tbody>
<tr>
<td>CSC 6250</td>
<td>Malware Analysis and Defense</td>
<td>4.0</td>
<td>CSC 2720 (Data Structures) and CSC 3320 (System Level Programming)</td>
<td>This course will introduce students to the fundamentals of malware analysis and defense techniques. Using hands-on-experience students will attain an understanding of identifying the functionalities and behaviors of malicious software. Students will use a disassembler to decompose, execute, and trace each line of a program. They will also learn how to patch the executable file and modify its behavior for a more secure outcome. Students will also have the chance to examine the effects of different types of malicious software that run either natively on a Windows or a Linux platforms. Students will learn how to defend a system by tracing back the infection and identifying the vulnerability used to exploit and implant the malicious software within the system.</td>

<td>CSC 6260</td>
<td>Digital Image Processing</td>
<td>4.0</td>
<td>CSC 2720</td>
<td>Fundamentals of image processing, including image digitization, description, enhancement, segmentation, image transforms, filtering, restoration, coding, and retrieval. Concepts are illustrated by laboratory sessions in which these techniques are applied to practical situations, including examples from industrial and biomedical image processing.</td>
</tr>
<tr>
<td>CSC 6251</td>
<td>Computer Forensics</td>
<td>4.0</td>
<td>CSC 2720 (Data Structures) and CSC 3320 (System Level Programming)</td>
<td>This course teaches how to obtain and analyze digital information for possible use as evidence in civil, criminal or administrative cases. The course covers the recovery and analysis of digital evidence, addressing legal and technical issues. Topics include applications of hardware and software to computer forensics, computer forensics law, volume and file system analysis, computer forensics investigations, and computer forensics in the laboratory.</td>
</tr>
<tr>
<td>CSC 6270</td>
<td>Digital Signal Processing</td>
<td>4.0</td>
<td>CSC 4210 or CSC 6210</td>
<td>This course covers the nature of information, signals, transforms, and applications. Topics include analog to digital and digital to analog conversion, data storage (such as the audio format MP3), data transforms, and filters. Applications include noise reduction, signal analysis, volume control (e.g., audio signals), and compression. We will be using computer programs to handle mathematical modeling and calculations.</td>
</tr>
<tr>
<td>CSC 6310</td>
<td>Parallel and Distributed Computing</td>
<td>4.0</td>

CSC 6320  Operating Systems  
CREDIT HOURS  4.0  
PREREQUISITES  CSC 3320  
DESCRIPTION  Introduction to operating systems concepts. Topics may include multiprogramming, resources allocation and management, and their implementation.

CSC 6330  Programming Language Concepts  
CREDIT HOURS  4.0  
PREREQUISITES  CSC 3210 and CSC 3410  
DESCRIPTION  Fundamental programming language concepts, including syntax versus semantics, binding time, scopes, and storage management.

CSC 6340  Compilers  
CREDIT HOURS  4.0  
PREREQUISITES  CSC 4330 or CSC 6330  
DESCRIPTION  Survey of topics related to compiler design, including parsing, table processing, code generation, and optimization.

CSC 6350  Software Engineering  
CREDIT HOURS  4.0  
PREREQUISITES  CSC 2720  
DESCRIPTION  Techniques used in large scale scientific or technical software development, including requirements analysis, specification, systems design, implementation, testing, validation, verification, and maintenance.

CSC 6360  Mobile Application Development  
CREDIT HOURS  4.0  
PREREQUISITES  CSC 2720  
DESCRIPTION  This course will cover the technologies, tools, frameworks and languages that are most commonly used in developing mobile applications for multiple mobile platforms. Topics include mobile application design, user interfaces, mobile application demographic and platform delivery, mobile networking, hosting infrastructure, and mobile security. Crosslisted with CSC 4360.

CSC 6370  Web Programming  
CREDIT HOURS  4.0  
PREREQUISITES  CSC 1302  
DESCRIPTION  The course introduces the student to programming techniques required to develop Web applications. Topics include: HTML forms, JavaScript, Servlets and Java Server pages, PHP and MySQL, Web access to Oracle databases, and XML.

CSC 6380  Windowing Systems Programming  
CREDIT HOURS  4.0  
PREREQUISITES  CSC 1302  
DESCRIPTION  Development of application software within windowed environments. Concepts of programming including graphical user interfaces, event-driven architectures, and object- oriented language programming with an application programming interface.

CSC 6510  Automata  
CREDIT HOURS  4.0  
PREREQUISITES  CSC 2510  
DESCRIPTION  Theory of computing devices and the languages they recognize.

Topics include: data exploration, pre-processing and visualization; analytics base table (ABT) generation; basic supervised learning algorithms (i.e. information-based learning, similarity-based learning, and error-based learning), and comparative evaluation of these algorithms.</td>
</tr>
</tbody>
</table>
CSC 6810  Artificial Intelligence
CREDIT HOURS  4.0
PREREQUISITES  CSC 2720 and either CSC 4330 or CSC 6330
DESCRIPTION  An overview of techniques and methodologies in the field of artificial intelligence. Topics may include search strategies, problem solving, natural language processing, logic and deduction, memory models, learning, expert systems, knowledge representation, and robotics.

CSC 6820  Interactive Computer Graphics
CREDIT HOURS  4.0
PREREQUISITES  CSC 3320 with a C or higher
DESCRIPTION  This course will introduce students to 3D computer graphics and game programming. Students will learn how to develop 3D games and interactive computer graphics applications (such as virtual reality) using game engines. The topics include rendering, lighting, camera, sound, character control, animation, and physics.

CSC 6821  Fundamentals of Game Design
CREDIT HOURS  4.0
PREREQUISITES  CSC 1302
DESCRIPTION  Covers major aspects of game design such as challenges, gameplay, actions, core mechanics, worlds, characters, game balancing, user interfaces, and game genres.

CSC 6840  Advanced Computer Graphics Programming
CREDIT HOURS  4.0
PREREQUISITES  CSC 3320 with a C or higher
DESCRIPTION  Students will learn advanced 3D graphics and game programming. The topics will include rendering, lighting, camera, animation, user interaction, physics simulation, game AI, and GPU.

CSC 6841  Computer Animation
CREDIT HOURS  4.0
DESCRIPTION  The basics of three-dimensional computer animation including 3D modeling, lighting, texture mapping, key framing, character animation, rigid and soft body dynamics, particles, cloth, hair, fluid, etc.

CSC 6850  Machine Learning
CREDIT HOURS  4.0
PREREQUISITES  CSC 4520 or CSC 6520 Design and Analysis of Algorithm with a grade of C or higher
DESCRIPTION  This course is intended to provide a general introduction to machine learning. This course will cover the fundamental concepts and principles of supervised learning, unsupervised learning, semi-supervised learning and reinforcement learning. Students will understand the basic knowledge of machine learning, be familiar with classic machine learning algorithms, and gain experience of designing and implementing methods in real scenario. 4.000 Credit hours.

CSC 6880  Topics in Computer Science
CREDIT HOURS  4.0
PREREQUISITES  Consent of Instructor
DESCRIPTION  Selected topics in Computer Science will be covered. Topics include the latest advances in computing.

CSC 7003  Programming for Data Science
CREDIT HOURS  1.5.0
DESCRIPTION  This introductory course provides an overview of data science programming. It will provide programming preparations for Master of Science in Analytics students and others who are interested in sharpening their programming skills. The course covers a variety of topics including algorithmic complexity, object oriented programming, lists, hash tables, recursion, binary trees, heaps, sorting algorithms, and graphs. Content will be linked to various topics in MSA courses.

</tr>
<tr>
<td>CSC 8220</td>
<td>Advanced Computer Networks</td>
<td>4.0</td>
<td>Prerequisite: CSC 4220/6220, or consent of the instructor</td>
<td>Basics of queueing theory, network simulation, analysis methods, current network protocols, their implementation, potential extensions and improvements. Survey of current literature on performance analysis.</td>
</tr>
<tr>
<td>CSC 8221</td>
<td>Optical and Wireless Networks</td>
<td>4.0</td>
<td>Prerequisite: CSC 4220/6220</td>
<td>Topics may include various optical and wireless networks, enabling technologies, multiplexing techniques, WDM, broadcast networks, wavelength-routed networks, network architectures, protocols, personal communication service (PCS) networks, location management, network algorithms, and optimization problems.</td>
</tr>
</tbody>
</table>
CSC 8222  
**Network Security**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 4220 or CSC 6220  
**DESCRIPTION** This course provides students with a detailed understanding of the fundamentals of network security. Significant focus will be placed on the five phases of network attacks: reconnaissance, scanning, gaining access/denial of service, maintaining access, and covering tracks. Topics to be covered include: Web security, Security standards—SSL/TLS and SET, Intruders and viruses, PGP and S/MIME for electronic mail security, Firewalls, IDS Secret Key and Public/Private Key Cryptography Cryptographic Hashes and Message Digests, Authentication Systems (Kerberos), Digital signatures and certificates, Kerberos and X.509v3 digital certificates. Also, current network security publications will be surveyed.

CSC 8223  
**Internet of Things**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 4220 or CSC 6220  
**DESCRIPTION** The course will cover fundamental concepts, principles and applications of Internet of Things (IoT). The topics include architectures, sensing and identification technologies, communication protocols, synchronization, localization and positioning, security and privacy, data management. Students will become familiar with wireless networks of sensor motes, gain experiences of design and implementation of IoT applications on embedded/mobile devices, data processing in IoT applications.

CSC 8224  
**Cryptography**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 4250/6250 Design and Analysis of Algorithms with grade of C or higher  
**DESCRIPTION** This course is intended to provide a general introduction to cryptography. This introductory course will cover a number of fundamental concepts and schemes in cryptography, including symmetric cryptography, stream ciphers, block ciphers, data encryption standard (DES), advanced encryption standard (AES), public-key cryptography, RSA cryptosystem, elliptic curve cryptosystems, digital signatures, hash functions, message authentication codes (MACs), and key establishment. Through the lectures, students will understand the basic knowledge of cryptography, be familiar with various cryptosystems, have sufficient foundation to learn advanced techniques of security, gain experience of implementing cryptosystems, and develop abilities to conduct research in security and privacy.

CSC 8228  
**Privacy Aware Computing**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 4250/6250 Design and Analysis of Algorithm  
**DESCRIPTION** This course is intended to provide a general introduction to privacy aware computing. This course will cover the fundamental concepts and principles of differential privacy, data perturbation, data anonymization, randomized responses, privacy-preserving data mining, private information retrieval, location privacy, and social network privacy, etc. Students will understand the basic knowledge of privacy aware computing, be familiar with various privacy preserving method, gain experience of designing and implementing methods to defense the privacy leaking with different scenario, and develop abilities of conducting research in privacy aware computing.

<tr>
<td>CSC 8250</td>
<td>Advanced Digital Signal Processing</td>
<td>4.0</td>
<td>CSC 4220 or CSC 6220</td>
<td>This course covers the state-of-art network architectures, protocols, and algorithms. It starts with reviewing issues associated with the network design principles, protocol mechanisms, and implementation techniques. The challenges related to implementing efficient and reliable protocols are then discussed and illustrated through several representative techniques and algorithms such as MPLS and RSVP. In addition, the course introduces fault-management and traffic grooming technologies for emerging networks including dynamic optical, radio and overlay networks. Topics related to service classes and network convergences, as well as interactions among diverse networking paradigms are also covered.</td>
</tr>
<tr>
<td>CSC 8251</td>
<td>Sensor Web Architecture and Protocols</td>
<td>4.0</td>
<td>CSC 4220/6220</td>
<td>This course surveys the emerging field of sensor web system and its applications. The course will cover a broad range of topics, including system architectures, operating systems, radio communication, networking protocols, energy management, RFID, web services and its applications (such as smart environments and smart grid). It is a research-oriented course that includes reading and discussion of papers from the scientific literature. Students will be expected to understand the algorithms and protocols in the lecture and read and present several selected research papers. The students will also gain hands-on experience with sensor web system and testbed and learn how to design practical sensor web systems.</td>
</tr>
<tr>
<td>CSC 8260</td>
<td>Advanced Image Processing</td>
<td>4.0</td>

<td>CSC 8270</td>
<td>Digital Signal Processing</td>
<td>4.0</td>
<td>CSC 4210/6210</td>
<td>The nature of information, signals, transforms, and applications. Topics include periodic sampling, the Fourier transform, finite impulse response filters, signal averaging, the Haar transform, and the wavelet transform.</td>
</tr>
<tr>
<td>CSC 8320</td>
<td>Advanced Operating Systems</td>
<td>4.0</td>
<td>CSC 4320/6320</td>
<td>Advanced operating systems concepts and mechanisms. Topics may include process synchronization, process deadlock, distributed operating systems, atomicity, commitment, recovery, fault-tolerance, distributed leader election, distributed manual exclusion algorithm, and concurrency control.</td>
</tr>
</tbody>
</table>
**CSC 8321**  
**Multimedia Systems**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 4220/6220 Computer Networks  
**DESCRIPTION** This course covers state of the art on multimedia systems. Course materials consist of a mix of background knowledge, current practice and advanced research. The course is roughly divided into two parts. The first part provides an introduction to networked multimedia systems, including the basics on multimedia compression, and multimedia networking, as well as relevant multimedia applications on video streaming, virtual reality, cloud gaming and video conferencing. The second part presents standalone multimedia systems, discussing the background knowledge on multimedia operating systems, multimedia analysis and multimedia interaction, as well as corresponding multimedia applications on augmented reality and autonomous vehicles/drones.

**CSC 8350**  
**Advanced Software Engineering**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 4350/6350  
**DESCRIPTION** Advanced concepts in software engineering. Topics may include new life cycle paradigms, code reusability issues, formal specifications, new design methodologies, and others.

**CSC 8370**  
**Data Security**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 4320/6320 or CSC 4210/6210 or CSC 4220/6220  
**DESCRIPTION** The basics of data security and integrity in computer systems. The theoretical basis of data security, including concepts in cryptography, network protocols, operating systems, and authentication. Topics will include the structure, mechanism, and detection of computer viruses and worms; the use of firewalls and packet filters; common security lapses in operating systems and their prevention; checksums and basic cryptography; and related ideas such as buffer overflow attacks and indirect assembly programming. "Real-world" examples of attacks will be analyzed and discussed.

**CSC 8520**  
**Applied Combinatorics and Graph Theory**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CSC 4520/6520  
**DESCRIPTION** Development of combinatorial and graphical algorithms. Techniques for the study of complexity with application to algorithms in graph theory, sorting, and searching.

**CSC 8530**  
**Parallel Algorithms**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 6520  
**DESCRIPTION** Techniques for designing and analyzing parallel algorithms on shared-memory and other models. Topics may include basic techniques, lists, trees, searching, sorting, graphs, and randomized algorithms.

<td>4.0</td>
<td>CSC 6710 and CSC 6740 with a B or better grade</td>
<td>Advanced concepts in data mining: sequence data analysis, time-series data classification and forecasting (with usage of dynamic time warping and kNN classifiers), high-dimensional data analysis (with applications to high-dimensional data indexing), and emerging area of spatio-temporal patterns discovery. The lectures will provide students with sufficient foundation to conduct their own, but supervised research on the challenges of mining unconventional data (e.g. image, time-series, or spatiotemporal data) from massive real-life data repositories.</td>
</tr>
</tbody>
</table>
CSC 8741  
**Graph Mining**

**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 4740/6740 Data Mining

**DESCRIPTION** This course covers important graph mining techniques, which are not covered by the existing course CSC 4740/6740 Data Mining or any other existing courses. This course will cover the most important research topics in graph mining including graph generators, proximity measurement, community detection, frequent subgraph mining, influence analysis, and multiplex network analysis. During this course, the students will learn the classic algorithms in graph mining including R-MAT graph generator, PageRank, personalized PageRank, SimRank, spectral clustering, modularity, non-negative matrix factorization, gSpan, influence maximization, and densest subgraph detection. The computational complexity and other properties of the problems are discussed. Fast computing algorithms are also introduced. All students should know the problems and applications in the graph mining research area. Students should only learn basic theoretical formulation/analysis of the methods but also accumulate practical hands-on experience on applying those methods. The students will do assignments, take exams, and finish research projects. The students will give presentations about their research projects by the end of the semester.

CSC 8820  
**Advanced Graphics Algorithms**

**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 4820/CSC 6820

**DESCRIPTION** Study advanced algorithms and tools for computer graphics programming; topics include 3D pipeline, graphics processing unit, shader programming, view, transformation, texture mapping, game programming, and 3D graphics for mobile devices.

CSC 8830  
**Computer Vision: Theory and Systems**

**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 3320 or equivalent; MATH 3020, MATH 3030, or equivalent

**DESCRIPTION** This course provides an introduction to the concepts of 2D and 3D computer vision. Topics will include image formation and capture, filtering and feature detection/extraction, optical flow and motion tracking, classification and recognition, 3D reconstruction through stereo, and a brief introduction to deep-learning application in computer vision.

CSC 8840  
**Modeling and Simulation Theory and Application**

**CREDIT HOURS** 4.0  
**PREREQUISITES** programming maturity is assumed

**DESCRIPTION** The course covers theory and application of computer modeling and simulation. It includes basic systems modeling concepts and in-depth discussions of modeling elements, simulation protocols, and their relationships. In-class exposition of modeling and simulation techniques will be based on the discrete event modeling and simulation (DEVS) framework. Possible application domains of this class are numerous, including computer network, ecological systems, social/biological systems, and business to name a few.

CPS 6010 Introduction to Professional Counselor Identity, Practice and Ethics

CREDIT HOURS 3.0

REQUIREMENTS A minimum grade of "B" is required for this course

DESCRIPTION This course provides an introduction and overview of the unique topics associated with the practice of clinical mental health counseling and clinical rehabilitation counseling including ethical standards, history, laws, professional identity, roles and responsibilities, employment and work settings, standards of preparation, credentialing and licensure, current trends and issues, and ethical/professional/legal issues. Students become familiar with research, professional/organizational entities, vocational and rehabilitation counseling, and career development issues as they apply to mental health and rehabilitation counselors.

CPS 6020 Introduction and Professional Orientation to School Counseling

CREDIT HOURS 3.0

REQUIREMENTS A minimum grade of "B" is required for this course

DESCRIPTION This course provides an overview of the unique issues of each of the specialty areas in school counseling to include preschool-elementary, middle and secondary school counseling, including history and ethical/legal concerns. Students will become familiar with multicultural diversity, research, and professional/organizational issues as they apply to the school counselor.

CPS 6040 Introduction to School Psychological Services

CREDIT HOURS 3.0

REQUIREMENTS A minimum grade of "B" is required for this course

DESCRIPTION This course provides an overview of the unique issues of the specialty of school psychological services, including history and ethical/legal concerns. Students become familiar with multicultural diversity, research, and professional/organizational issues as they apply to the school psychologist.

CPS 6150 Ethical and Legal Standards in Counseling and Psychological Services

CREDIT HOURS 2.0 - 3.0

REQUIREMENTS A minimum grade of "C" is required for this course

DESCRIPTION This course provides the rationale of basic ethical, legal, and practical professional standards governing practice in school counseling and school psychology, especially as defined by the American Counseling Association, American School Counselor Association, American Psychological Association, and the National Association of School Psychologists. Roles and responsibilities of counselors and psychologists within multidisciplinary P-12 schools, community organizations, agencies, and private practice settings are discussed, as well as professional credentialing, public policy, and advocacy issues. Emphasis is placed on practice within schools, private practices, agencies, and organizational settings. A 10 hour growth group process is a required component of this class.

CPS 7450  Educational and Psychological Appraisal
CREDIT HOURS 3.0
REQUIREMENTS A minimum grade "C" is required for this course
DESCRIPTION This course covers cognitive and non-cognitive methods of data gathering in educational and psychological organization. Students focus on the history, ethical and legal practices, psychometrics of administration, scoring, and integration of tests, inventories, and interviews. Students are provided with direct laboratory experience in the professional use and interpretation of appraisal tools.

CPS 7490  Individual Assessment I
CREDIT HOURS 3.0
COREQUISITES CPS 6040 with a minimum grade of "B"
REQUIREMENTS Students must maintain a "B" average throughout the course
DESCRIPTION This first course covers assessment and evaluation of cognitive function (intelligence) in children and adolescents. A variety of assessment instruments and techniques are reviewed. The student is taught at least three interpretive schemes.

CPS 7495  Individual Assessment I: Lab
CREDIT HOURS 2.0
COREQUISITES CPS 7490
DESCRIPTION This supervised lab session provides students with an opportunity for guided practice and feedback on conducting assessments and evaluations of cognitive function (intelligence) in children and adolescents. Students will practice implementing a variety of assessment instruments and techniques.

CPS 7500  Individual and Family Over the Life Span
CREDIT HOURS 3.0
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION The purpose of this course is for students to explore actively the theoretical and research literature regarding human growth and development across the life span. Theoretical understanding of human development from birth to older adulthood including issues of family, culture, race, gender, and their roles in children's, adolescents', and adults' lives are considered. The goal of this course is to encourage independent thinking and clear communication regarding research in the field of human growth and development and ethical considerations related to these topics and to apply the information learned to the student's program of study. (Same as EPY 7500).

CPS 7510  Individual Assessment II
CREDIT HOURS 3.0
PREREQUISITES CPS 7490 with a minimum grade of "B"
REQUIREMENTS Students must maintain a "B" average throughout the course
DESCRIPTION This second course covers all aspects of academic assessment including visual-motor skills. In addition, Georgia Department of Education guidelines for determining categories of exceptionality are presented. Theories in developmental psychology are reviewed in the context of accurate academic assessment.

CPS 7515  Individual Assessment II: Lab
CREDIT HOURS 2.0
COREQUISITES CPS 7515
DESCRIPTION This supervised lab session provides students with an opportunity for guided practice and feedback on conducting assessments and evaluations of academic achievement in children and adolescents. Students will practice implementing a variety of assessment instruments and techniques.

<td>A minimum grade of &quot;S&quot; is required for this course. The purpose of the counseling practica is to introduce counseling master's students to the practice of professional counseling with actual clients at a site commensurate with the student's professional interests. (Repeatable).</td>
</tr>
</tbody>
</table>
### CPS 7661: Applied Practice I: School Counseling

**Credit Hours:** 3.0 - 6.0  
**Prerequisites:** CPS 6020 or CPS 6030 with minimum grades of "B"; CPS 6150 with a minimum grade of "C"; CPS 6450 with a minimum grade of "S"; CPS 7260, CPS 7300, CPS 7340, and CPS 7500 with minimum grades of "C"  
**Requirements:** Course is graded as satisfactory/unsatisfactory  
**Description:** A minimum grade of "S" is required for this course. The purpose of the counseling practica is to introduce counseling master’s students to the practice of school counseling with actual clients at a site commensurate with the student's professional interests. Practicum may extend beyond one term. (Repeatable).

### CPS 7662: Applied Practice I: School Psychology

**Credit Hours:** 3.0 - 6.0  
**Prerequisites:** CPS 6150 with a minimum grade of "C"; CPS 6410 with a minimum grade of "S"; CPS 6040, CPS 7490, CPS 7495, CPS 7510, CPS 7515, CPS 7520, and CPS 8440 each with a minimum grade of "B"  
**Requirements:** Course is graded as satisfactory/unsatisfactory  
**Description:** A minimum grade of "S" is required for this course. The purpose of the applied practicum is to introduce master’s students to the practice of school psychology with actual clients at a site commensurate with the student's professional interests. Practicum may extend beyond one term. (Repeatable).

### CPS 7663: Rehabilitation Counseling

**Credit Hours:** 3.0 - 6.0  
**Prerequisites:** CPS 6050 with minimum grade of "B"  
**Requirements:** Course is graded as satisfactory/unsatisfactory  
**Description:** CPS 6410 and CPS 6450 with minimum grades of "S". CPS 6150, CPS 7260, CPS 7340, CPS 7500, and CPS 8410 with minimum grades of "C". A minimum grade of "S" is required for this course. The purpose of the counseling practa is to introduce counseling master’s students to the practice of rehabilitation counseling with actual clients at a site commensurate with the student’s professional interests. Practicum may extend beyond one term. (Repeatable).

### CPS 7680: Internship: Mental Health Counseling

**Credit Hours:** 3.0 - 9.0  
**Prerequisites:** CPS 7660 with a minimum grade of "S"  
**Requirements:** Course is graded as satisfactory/unsatisfactory  
**Description:** A minimum grade of "S" is required for this course. This internship is designed to enable students to practice their mental health counseling skills by assuming the role of a counselor-in-training on their internship sites. Students carry out all the activities and functions performed by employed counselors on site. Internship may extend beyond one term. (Repeatable).
CPS 7681
Internship: School Counseling

CREDIT HOURS: 3.0 - 9.0
PREREQUISITES: CPS 7661 with a minimum grade of "S"
REQUIREMENTS: Course is graded as satisfactory/unsatisfactory
DESCRIPTION: A minimum grade of "S" is required for this course. This internship is designed to enable students to practice their school counseling skills by assuming the role of school counselor-in-training on their internship sites. Students carry out all of the activities and functions performed by employed school counselors on site. Internship may extend beyond one term. (Repeatable).

CPS 7683
Internship: Rehabilitation Counseling

CREDIT HOURS: 3.0 - 9.0
PREREQUISITES: CPS 7663 with a minimum grade of "S"
REQUIREMENTS: Course is graded as satisfactory/unsatisfactory
DESCRIPTION: A minimum grade of "S" is required for this course. This internship is designed to enable students to practice their rehabilitation counseling skills by assuming the role of a counselor-in-training on their internship sites. Students carry out all of the activities and functions performed by employed counselors on site. Internship may extend beyond one term. (Repeatable).

CPS 7975
Seminar for Graduate Assistants

CREDIT HOURS: 3.0 - 18.0
REQUIREMENTS: Course is graded as satisfactory/unsatisfactory
DESCRIPTION: A minimum grade of "S" is required for this course. This course is designed to inform the students of policies and procedures needed to complete an assistantship. Professional ethics associated with teaching, research planning, management, and accounting procedures are reviewed. The course focuses on the teaching and research being conducted in order to further the understanding of all students involved in teaching and research. (Repeatable).

CPS 8100
Psychobehavioral Diagnosis

CREDIT HOURS: 3.0
PREREQUISITES: CPS 6010, CPS 6020, CPS 6030, or CPS 6050 with a minimum grade of "B"
REQUIREMENTS: A minimum grade of "C" is required for this course
DESCRIPTION: This course is designed to assist students in the recognition and categorization of psychological and behavioral patterns (syndromes) which are considered dysfunctional, according to the classification system utilized by the American Psychiatric Association in their Diagnosis and Statistical Manual Disorders 5 (2013).
CPS 8260  Program Evaluation, Advocacy, and Leadership in School Counseling

CREDIT HOURS  3.0
PREREQUISITES  CPS 6020 or CPS 6030
DESCRIPTION  This course is designed to prepare the school counselor to prepare the school counselor to effectively carry out the transformed role of the school counselor in the 21st century. This role includes an understanding of program evaluation utilizing student outcome data, becoming an advocate for students, schools, and the field of school counseling, and becoming a leader in promoting, planning, and implementing all aspects of the counseling program in in the school.

CPS 8300  Traumatology

CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  Students explore the expanding literature base and attempt to delineate its common concerns, research basis, and practice guidelines for working with trauma.

CPS 8320  Rehabilitation Counseling Placement and Case Management

CREDIT HOURS  3.0
DESCRIPTION  Students will develop vocational and case management skills to assist people with disabilities to transition to employment. Labor market information, employer development and job keeping strategies are emphasized. Students are taught the flow of a rehabilitation case from intake through closure.

CPS 8340  Advanced Multicultural Counseling Strategies and Interventions

CREDIT HOURS  3.0
PREREQUISITES  CPS 6450 with a minimum grade of "S"; CPS 7260 and CPS 7340 with minimum grades of "C"
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  The course is designed to advance student's multicultural counseling knowledge and skills with diverse populations. Employing culturally relevant and effective intervention strategies and skills is considered an essential component of cultural competence. Students develop an understanding of how client's cultural, historical, and sociopolitical context may inform accurate assessment, interpretation and treatment interventions. Culturally-based interventions with the goal of developing purposeful, directional, and culturally relevant approaches to working with diverse clients who present with a range of clinical issues are reviewed. Treatment approaches developed from a cultural frame of reference with attention to the intersections of the client's race, ethnicity, gender, class, acculturation level, and presenting problem are explored.

CPS 8350  Biopsychology and Medication

CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  Students examine known relationships of biological functioning to psychological perceptions of mental functioning as related to mood, reality testing, attention, and/or focus of concentration. The effectiveness of medication and focus of psychotherapeutic intervention are reviewed and compared.
CPS 8370  Advanced Career Counseling
CREDIT HOURS 3.0
PREREQUISITES CPS 7300 with a minimum grade of "C"
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION This course extends the student's understanding of career counseling and provides opportunities for application of theoretical principles learned in the introductory course.

CPS 8380  Family Systems and Interventions
CREDIT HOURS 3.0
PREREQUISITES CPS 7260 with minimum grade of "C"
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION This course provides an overview of the historical roots of the family movement and the major theoretical orientations including systematic, psychodynamic, and communications orientations. A brief overview of the role of research and ethics in the development of the family movement is also discussed.

CPS 8390  Psychological Aspects of Human Sexuality
CREDIT HOURS 3.0
PREREQUISITES consent of the instructor
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION Students develop a knowledge base of current research on human sexuality and application to professional practice in evaluation and therapeutic intervention concerning problems of human sexual adjustment and function.

CPS 8400  Introduction to Play Therapy
CREDIT HOURS 3.0
PREREQUISITES CPS 6010, CPS 6020, CPS 6030, CPS 6040, or CPS 6050 with a minimum grade of "B" or CPS 6150 with a minimum grade of "C" and CPS 6410 with a minimum grade of "S"
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION This course is designed to train counseling students to become effective play therapists in a school or community setting. The course covers the history and theories of play therapy as they relate to child development, techniques of play therapy, the meaning of play in the therapeutic setting, and the logistics of setting up a playroom.

CPS 8410  Medical and Psychological Aspects of Disability I
CREDIT HOURS 3.0
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION Students learn medical etiology, prognosis, and psychological adjustment for individuals who experience trauma, injuries, and mental retardation.

CPS 8420  Medical and Psychological Aspects of Disability II
CREDIT HOURS 3.0
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION Students learn medical etiology, prognosis, and psychological adjustment for individuals who experience illnesses, psychiatric disturbances, addictions, and congenital deformities.
CPS 8430 | Advanced Counseling Skills
---
**CREDIT HOURS** | 3.0
**PREREQUISITES** | CPS 6410 with a grade of "S"
**REQUIREMENTS** | A student can attempt this course a maximum of two times while enrolled in one's respective program.
**DESCRIPTION** | A grade of W in this course counts as an attempt. The minimum grade of "C" is required for passing this course. This course introduces the constructs and techniques of motivational interviewing. It provides instruction on the stages of change and provides opportunity for case conceptualization and treatment planning. The course includes both didactic and experiential learning.

CPS 8440 | Social/Emotional Assessment of Children and Adolescents
---
**CREDIT HOURS** | 3.0
**PREREQUISITES** | CPS 7510 with a minimum grade of "B"
**REQUIREMENTS** | A minimum grade of "B" is required for this course.
**DESCRIPTION** | Assessment/diagnosis of social and emotional function in school-age children is discussed. Objectives, projective and behavioral checklist test instruments are utilized. Emphasis is on norm-based test instruments. Course includes laboratory experience.

CPS 8450 | Advanced Group Counseling
---
**CREDIT HOURS** | 3.0
**PREREQUISITES** | CPS 7680, CPS 7681, or CPS 7683 with a grade of "S" and CPS 6450 with a grade of "S"
**REQUIREMENTS** | A minimum grade of "C" is required for this course.
**DESCRIPTION** | Current theories and recent innovations in group counseling and group dynamics are discussed. Course may extend beyond one term.

CPS 8460 | Biopsychosocial Aspects of Addiction
---
**CREDIT HOURS** | 3.0
**PREREQUISITES** | CPS 6010, CPS 6020, CPS 6030, CPS 6040, or CPS 6050 with minimum grades of "C"
**REQUIREMENTS** | A minimum grade of "C" is required for this course.
**DESCRIPTION** | Dynamics of addictive behaviors are explored including abuse of substances and process addictions. Special attention is given to physiological factors, personal traits, family dynamics, diversity, treatment methods, and implications for schools, communities, and businesses.

CPS 8570  Psychological Consultation in the Schools II
CREDIT HOURS 3.0
PREREQUISITES CPS 7570 with a minimum grade of "B"
REQUIREMENTS A minimum grade of "B" is required for this course
DESCRIPTION This course investigates both the theory and the practice of school-based consultation. The focus is on indirect approaches to delivery of psychological services that maximize the efficacy of providing services to the greatest number of available students. There is an emphasis on consultation services provided in school settings, particularly consultation offered to teachers. There is a particular focus on mental health consultation, Adlerian consultation, instructional consultation, consultation provided to educators through multidisciplinary teams, and multicultural approaches to consultation. This course seeks to bridge theory and practice and to maintain the active participation of students. Course may extend beyond one term.

CPS 8600  Advanced Play Therapy
CREDIT HOURS 3.0
PREREQUISITES CPS 7680, CPS 7681, or CPS 7683 with minimum grades of "S" and CPS 8400 with a minimum grade of "C"
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION Students engage in the advanced study of play therapy. This includes theories of play therapy, advanced play therapy skills, special topics in play therapy, and a supervised on-campus practicum.

CPS 8620  Adlerian Techniques with Families and Couples
CREDIT HOURS 3.0
PREREQUISITES CPS 7260 with a minimum grade of "C"
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION This course is designed to provide students with applications of Adlerian theory and the use of techniques related to the theory opportunity via practice and skill building activities with individuals, couples, parents, and families. Course may extend beyond one term.

CPS 8640  Administration and Supervision in Pupil Personnel Services for School Psychology
CREDIT HOURS 3.0 - 4.0
PREREQUISITES CPS 6040 with a minimum grade of "B"
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION This course is designed for advanced school counseling/psychology majors who wish to pursue leadership roles in pupil personnel services also known as student support services.

CPS 8650  Advanced Counseling Theory
CREDIT HOURS 3.0
PREREQUISITES CPS 7260 with a minimum grade of "C"
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION Students examine representative theories of counseling and psychotherapy with attention to implications for practice.

<td></td>
<td>A minimum grade of &quot;S&quot; is required for this course. The consultation and intervention practicum is a fifteen-week field experience designed to provide opportunities to develop expertise in school-based intervention and consultation. Students are expected to participate in this experience on a part-time basis. A minimum of 300 clock hours is required in an assigned school district where the student receives on-the-job training under the direct supervision of a certified school psychologist. Additional time is required each week for on-campus instruction and supervision. During the practicum, each student is required to participate in a variety of experiences including consultation, prevention (e.g., SST or pre-referral meetings), intervention, and research (e.g., evaluating process and outcome of consultation cases and group interventions). Students are expected to be familiar and in compliance with the American Psychological Association's (APA) Code of Ethics, the National Association of School Psychologist's (NASP) Ethical Standards, and the concept of child advocacy.</td>

**DESCRIPTION**

A minimum grade of "S" is required for this course. Students explore current research and practice domains in the area of health psychology. Course may extend beyond one term. (repeatable).
CPS 8970  Seminar
CREDIT HOURS  1.0 - 3.0
PREREQUISITES  permission of the instructor
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  Students focus on research and discussion of special topics and analyze the issues facing the practitioner in contemporary society. Seminar may extend beyond one term. (Repeatable).

CPS 8980  Pedagogy and Teaching in Counselor Education
CREDIT HOURS  3.0
DESCRIPTION  Pedagogy and teaching are core features in the field of counselor education. This course is designed to facilitate development, knowledge, skills, and dispositions associated with culturally responsive teaching and evidence-based pedagogy in counselor education. This course focuses on practice and knowledge related to teaching roles, mentoring, responsibilities of counselor educators, use of teaching in leadership, advocacy, social justice, and development of program evaluation skills. Instructional theory and delivery, theories of adult learning development, curriculum design, assessment of learning, and multicultural pedagogy will also be a focus for this course.

CPS 9410  Assessment of Intelligence
CREDIT HOURS  3.0
DESCRIPTION  The course focuses on the formal assessment of cognitive abilities. The primary purpose of the course is to increase students' understanding and application of intellectual assessment. In particular, the course emphasizes the administration, scoring, and interpretation of tests designed to measure cognitive functioning with an emphasis on assessing adults. Students also learn about assessing intelligence in children and how to consider the cultural relevance of various intelligence tests.

CPS 9420  Adult Personality Assessment
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  Students learn the science and practice of psychological assessment, with specific emphasis on personality assessment. The course provides students with a basic understanding of the administration and scoring of the MMPI-2, MCMI-III, MIPS Revised, the 16PF, and other tests. The course also covers knowledge and skills associated with comprehensive interpretation and integrative report writing.

CPS 9480  Supervision of Counseling Services
CREDIT HOURS  3.0
PREREQUISITES  CPS 8660 with a minimum grade of "S"
REQUIREMENTS  Course is graded as satisfactory/unsatisfactory
DESCRIPTION  A minimum grade of "S" is required for this course. This course develops the knowledge and skills necessary for the administration and supervision of counseling practice. Course may extend beyond one term.

CPS 9660  Applied Practice III
CREDIT HOURS  1.0 - 3.0
REQUIREMENTS  Course is graded as satisfactory/unsatisfactory
DESCRIPTION  A minimum grade of "S" is required for this course. Students work in an appropriate psychological counseling setting with clients under supervision. Practicum may extend beyond one term.

CPS 9760 School Psychology Research Seminar
CREDIT HOURS 3.0 - 9.0
REQUIREMENTS Doctoral students in School Psychology must take course for at least three terms
DESCRIPTION This is an advanced graduate research seminar. Students will participate in an active research team that includes students and a faculty member in school psychology. Topics will include a consideration of research design relevant to the research group as well as the content that is the focus of the research team. This seminar may extend beyond one term. (Repeatable).

CPS 9820 Applied Quantitative Methods in Counseling and Psychology
CREDIT HOURS 3.0
DESCRIPTION This course will provide CPS doctoral students with training in foundational and emerging practice standards in quantitative research methods and design used specifically in counseling and psychology. The primary objective of this course is for students to learn to design quantitative research studies that meet field expectations and publishing standards in top-tier outlets in Counseling/Counselor Education (e.g., ACA and Division journals), Counseling Psychology, and School Psychology (e.g., APA and Division journals). Content covered will include sampling, measurement, literature reviews, reporting standards, and statistical analytic concerns that are most evident in counseling and psychology.
CPS 9830  Applied Qualitative Methods in Counseling and Psychology
CREDIT HOURS 3.0
DESCRIPTION This course will provide CPS doctoral students with training in foundational and emerging standards of practice in qualitative research methods and design used specifically in counseling and psychology. The primary objective of this course is for students to learn how to design qualitative research studies that meet field expectations and publishing standards in top-tier outlets in Counseling/Counselor Education (e.g., ACA and Division journals), Counseling Psychology, and School Psychology (e.g., APA and Division journals). Content covered will include literature reviews, qualitative methodologies, qualitative reporting standards, and qualitative analytic concerns that are most evident in counseling and psychology.

CPS 9920  Research and Publication
CREDIT HOURS 1.0 - 2.0
PREREQUISITES PhD standing
REQUIREMENTS Course is graded as satisfactory/unsatisfactory
DESCRIPTION A minimum grade of "S" is required for this course. Students study the processes and methodologies for the production of a research article for publication in a scholarly journal. Course may extend beyond one term. (Repeatable).

CPS 9962  Counseling Psychology Seminar
CREDIT HOURS 1.0 - 9.0
PREREQUISITES consent of the instructor; PhD standing
REQUIREMENTS Course is graded as satisfactory/unsatisfactory
DESCRIPTION A minimum grade of "S" is required for this course. Students study the professional standards, current issues, and personal rewards associated with the practice of counseling. Seminar may extend beyond one term. (Repeatable).

CPS 9963  Leadership in Counselor Education: Professional and Social Advocacy
CREDIT HOURS 1.0 - 9.0
PREREQUISITES consent of the instructor; PhD standing
REQUIREMENTS Course is graded as satisfactory/unsatisfactory
DESCRIPTION A minimum grade of "S" is required for this course. Students study the professional standards, current issues, and personal rewards associated with the practice of counseling. Seminar may extend beyond one term. (Repeatable).

CPS 9990  Dissertation
CREDIT HOURS 1.0 - 18.0
PREREQUISITES consent of the instructor; Ph.D. standing
REQUIREMENTS Course is graded as satisfactory/unsatisfactory
DESCRIPTION A minimum grade of "S" is required for this course. Students complete research and writing of the doctoral dissertation. Dissertation may extend beyond one term. (Repeatable).

Students will be presented with common types of fraudulent schemes, as well as several laws that have been enacted and developed specifically for computer crime. In addition, causes, victimization, legal issues, control strategies, and societal costs regarding the &quot;computer-crime&quot; problem will be explored and evaluated.</td>
</tr>
</tbody>
</table>
CRJU 7630  Applied Regression Analysis for Criminal Justice
CREDIT HOURS  3.0
DESCRIPTION  The objective of this course is to provide an understanding of commonly used regression techniques. Students will learn simple regression, multiple regression, and important diagnostic tests. Finally, they will learn how to remedy problems if the data fail to meet basic estimation assumptions.

CRJU 7920  Independent Study in Criminal Justice
CREDIT HOURS  3.0
PREREQUISITES  This course must have the approval of the student's instructor and the graduate program director
DESCRIPTION  Permits selected qualified criminal justice students to engage in independent research under the guidance of a faculty member.

CRJU 7980  Research Practicum
CREDIT HOURS  1.0 - 18.0
REQUIREMENTS  For graduate assistants
DESCRIPTION  Directed research in collaboration with a faculty member. Does not count towards degree requirements.

CRJU 7990  Capstone Seminar in Criminal Justice Administration
CREDIT HOURS  3.0
DESCRIPTION  Prerequisites: PMAP 8111, CRJU 7010. This seminar is the integration experience and assessment tool used to measure learning outcomes expected of students in the MIS Criminal Justice Administration program. Students complete an empirically-based project that explores a problem facing their home institution. The final product will be a capstone paper, to be graded by the MIS CJA program director and approved by the student's work supervisor.

CRJU 8010  Theory and Practice in Criminal Justice
CREDIT HOURS  3.0
DESCRIPTION  This course examines the form, function, and operation of the U.S. criminal justice system. Readings, discussions and assignments focus on how current criminal justice policies, practices, and controversies can be explained and understood from various theoretical and practical perspectives. Key issues of focus include understanding how and why the criminal justice system operates the way it does today, examining what is currently known about what works in policing, sentencing, and corrections, and discussing challenges to the system going forward.

CRJU 8050  Criminological Theory I
CREDIT HOURS  3.0
DESCRIPTION  Criminological issues and their effect on criminal justice, including theories of punishment, concepts of law, violence, and crime causation.

CRJU 8110  Law Enforcement Issues
CREDIT HOURS  3.0
DESCRIPTION  An examination of fundamental issues confronting the management of law enforcement organizations through a critical analysis of research related to police practices and operations.

CRJU 8210  Juvenile Justice Issues
CREDIT HOURS  3.0
DESCRIPTION  This course concerns itself with procedural and substantive aspects of the juvenile justice system, including such areas as history and philosophy, intake, legal and social investigations, judicial and administrative decision making, legal rights, roles of attorneys, and definitive case law addressing system analysis.
CRJU 8310  Correctional Issues  
CREDIT HOURS  3.0  
DESCRIPTION  A survey of the major issues confronting the field of corrections, and the administration and management of correctional systems, including institutional corrections and alternatives to incarceration.

CRJU 8321  Housing Markets and Housing Policy  
CREDIT HOURS  3.0  
DESCRIPTION  In-depth examination of housing market dynamics and processes, including racial and economic segregation, gentrification, affordability, housing finance, and other phenomena. Study of alternative local, state, and federal policies, both historical and contemporary, aimed at reducing housing problems and providing for fair and affordable housing and sustainable community development.

CRJU 8410  Criminological Issues  
CREDIT HOURS  3.0  
DESCRIPTION  An examination of the fundamental theories and issues in the field of criminology which additionally may include the exploration of white collar crime and organized crime.

CRJU 8610  Research Methods in Criminal Justice I  
CREDIT HOURS  3.0  
DESCRIPTION  An overview of research methodology as it applies to the field of criminal justice.

CRJU 8620  Statistics in Criminal Justice I  
CREDIT HOURS  3.0  
DESCRIPTION  A review of descriptive and inferential statistics as they apply to the field of criminal justice.

CRJU 8710  Legal Aspects of Criminal Justice  
CREDIT HOURS  3.0  
DESCRIPTION  Emphasizes the constitutionalization of the criminal justice process with special attention to the Supreme Court of the United States.

CRJU 8720  Legal Issues In Criminal Justice  
CREDIT HOURS  3.0  
DESCRIPTION  Gives in-depth treatment to selected topics involving judicial institutions and the criminal process.

CRJU 8830  Selected Topics in Methods, Data, and Analysis  
CREDIT HOURS  3.0  
DESCRIPTION  Provides in-depth treatment of research design, qualitative/quantitative methods, or data and workflow in criminal justice and criminology.

CRJU 8900  Selected Topics in Criminal Justice  
CREDIT HOURS  3.0  
DESCRIPTION  Research and seminar discussions of specified contemporary, behavioral or administrative problems which impact on criminal justice. May be repeated for credit when topics vary.

CRJU 8910  Readings in Criminal Justice  
CREDIT HOURS  1.0 - 3.0  
PREREQUISITES  This course must have the approval of the student's instructor and the graduate program director  
DESCRIPTION  Permits selected qualified students to pursue a course of readings on a selected topic under the guidance of a faculty member.
CRJU 8980  Capstone Seminar in Criminal Justice  This seminar is the integration experience and assessment tool for non-thesis students  

CREDIT HOURS: 3.0  
DESCRIPTION: Students will complete written and oral critical analyses of scholarly literature, applying their core knowledge to real-world problems and questions within the fields of criminal justice and criminology.

CRJU 8990  Thesis  

CREDIT HOURS: 1.0 - 6.0  
PREREQUISITES: Consent of instructor  
DESCRIPTION: Individual study of a selected research problem in criminal justice or criminology that requires the analysis of data. Student, with approval of the graduate program director and department chair, chooses a chair and at least two additional members to form a thesis committee. The committee must approve student's proposed and subsequent thesis.

CRJU 9010  Contemporary Criminal Justice Policy  

CREDIT HOURS: 3.0  
DESCRIPTION: Examines the development and implementation of criminal justice policies.

CRJU 9030  Graduate Orientation Seminar  

CREDIT HOURS: 3.0  
DESCRIPTION: Provides incoming Ph.D. students with an orientation to the scholarly infrastructure, standards of the program, and equips them with a set of fundamental tools needed to succeed in subsequent coursework and research endeavors.

CRJU 9450  Criminological Theory II  

CREDIT HOURS: 3.0  
PREREQUISITES: CRJU 8050 Criminological Theory or equivalent  
DESCRIPTION: Exposes advanced graduate students to the major theories, issues, and debates that guide contemporary efforts to explain crime and criminality.

CRJU 9550  Directed Teaching Seminar  

CREDIT HOURS: 3.0  
DESCRIPTION: Exposes advanced graduate students to the pedagogical literature and develops their abilities to teach undergraduate criminal justice and criminology courses.

CRJU 9610  Research Methods in Criminal Justice II  

CREDIT HOURS: 3.0  
PREREQUISITES: CRJU 8610  
DESCRIPTION: Examines the advanced quantitative methods and analytical strategies used in the study of crime and criminal justice.

CRJU 9630  Statistics in Criminal Justice II  

CREDIT HOURS: 3.0  
PREREQUISITES: CRJU 8620  
DESCRIPTION: Examines the use of multiple linear regression and other advanced techniques used in the study of crime and criminal justice.

CRJU 9800  Directed Research in Criminology/Criminal Justice  

CREDIT HOURS: 3.0  
PREREQUISITES: Approval of Graduate Program Director  
DESCRIPTION: Research (non-dissertation) on a selected topic under the guidance of a faculty member.

EDCI CURRICULUM & INSTRUCTION

EDCI 6600  Introduction to Secondary Teaching
CREDIT HOURS  3.0
DESCRIPTION  Examines the nature of secondary students and schools. Explores instructional materials, teaching strategies, technology, and effective teaching. Includes experiences in reflective teaching and micro-teaching.

EDCI 7020  Middle Schools in a Diverse Society
CREDIT HOURS  3.0
DESCRIPTION  Examines the rationale for middle schools, organizational patterns, nature of students, and the linkages among schools, families, and communities.

EDCI 7100  Service-Learning in Action
CREDIT HOURS  3.0
DESCRIPTION  In this course, students examine the nature of service-learning through an analysis of relevant research, theory, and practice. Students also research and evaluate their community’s needs. After synthesizing their research and needs assessment for the community, students engage in a service-learning project that is relevant to their major. (EDCI 7100 is cross-listed with EDCI 4100).

EDCI 7660  Practicum I
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of “B” is required for this course
DESCRIPTION  This course is a supervised practice in an approved instructional setting. A member of the faculty maintains close supervision.

EDCI 7670  Practicum II
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of “B” is required for this course
DESCRIPTION  This course is a supervised practice in an approved instructional setting. A member of the faculty maintains close supervision.

EDCI 7680  Practicum III
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of “B” is required for this course
DESCRIPTION  This course is a supervised practice in an approved instructional setting. A member of the faculty maintains close supervision.

EDCI 7680B  Practicum II: Advanced Teaching and Supervision
CREDIT HOURS  3.0
PREREQUISITES  EDCI 7980, EPEL 7000, EPEL 7020, EPEL 7680B
REQUIREMENTS  A minimum grade of “B” is required for this course
DESCRIPTION  This course is a supervised practice in an approved instructional setting. A member of the faculty maintains close supervision.

EDCI 7975  Seminar for Graduate Assistants
CREDIT HOURS  3.0 - 18.0
REQUIREMENTS  A minimum grade of “S” is required for this course
DESCRIPTION  This course is designed to inform the students of policies and procedures needed to complete an assistantship. Professional ethics associated with teaching, research planning, management, and accounting procedures are reviewed. The course focuses on the teaching and research being conducted in order to further the understanding of all students involved in teaching and research. Course is graded as satisfactory/unsatisfactory. (Repeatable).

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDCI 7980</td>
<td>Teaching and Learning in Urban Contexts</td>
<td>3.0</td>
<td>Focuses on the examination of the historical and contemporary notions of urban education and the analysis of critical sociocultural and policy-related factors related to teaching and learning in urban contexts. The student undertakes an interdisciplinary analytic approach to defining, analyzing, and evaluating topics relevant to urban school systems and their teachers, students, and community, and the consequential teaching and learning. (EDCI 7980 is cross-listed with EDCI 8780).</td>
</tr>
<tr>
<td>EDCI 8400</td>
<td>Complexities of Teaching, Learning, and Curriculum Design</td>
<td>3.0</td>
<td>Students explore the theory, research, and practice of curriculum design in school subjects and the aspects of effective teaching and learning across a broad spectrum of learners and learning environments.</td>
</tr>
<tr>
<td>EDCI 8550</td>
<td>Trends and Issues in Middle Childhood Education</td>
<td>3.0</td>
<td>Students explore the current problems, trends, and curricular issues related to middle childhood education.</td>
</tr>
<tr>
<td>EDCI 8640</td>
<td>Theoretical and Practical Perspectives on Designing Urban Teacher Education</td>
<td>3.0</td>
<td>Seminar focused on learning opportunities for preservice and inservice teachers working with historically minoritized populations across urban, suburban, and rural settings. Topics may include policies and politics impacting teacher education curriculum and program design, theories of teaching and learning in teacher education spaces, and teacher educator perspectives and roles across multiple teacher education arenas.</td>
</tr>
<tr>
<td>EDCI 8650</td>
<td>Curriculum and Instruction in Contemporary Urban Settings</td>
<td>3.0</td>
<td>This course focuses on the complex relationship between schools, the curriculum taught (explicit and hidden) and the larger society of which these are a part. Teacher leaders need to be able to see curriculum and instructional issues within a broad historical and sociopolitical context to understand how policies are intentionally or unintentionally developed, and to comprehend the links between policies and outcomes and its impact on curriculum. This course is designed to undertake an analytic approach to defining, analyzing, and evaluating topics relevant to urban school systems and its teachers, students, and community, and the consequential teaching and learning within all content areas and grade levels. Students will analyze the interplay of curriculum and instruction within the intended and unintended consequences of many processes: ideological, social, judicial, scientific, political, and economic.</td>

</tr>
</thead>
<tbody>
<tr>
<td>ECE 6360</td>
<td>Culturally Responsive Pedagogy</td>
<td>1.0 - 6.0</td>
<td>Student must complete the course with a minimum grade of &quot;S&quot;</td>
<td>This course is designed to examine the role of culture in child development and learning. Through a process of introspection and application, the candidate reflects on the impact and implications of culture and self-identity in the teaching and learning of various student populations and settings from a political, social, economic, and historic context. This course is graded as satisfactory/unsatisfactory.</td>
</tr>
<tr>
<td>ECE 6361</td>
<td>Responsive and Student Centered Pedagogy</td>
<td>3.0</td>
<td>Students must complete the course with a grade of &quot;C&quot; or higher</td>
<td>This course focuses on the teacher as a reflective practitioner, affirming children’s diverse backgrounds, abilities, interests, personalities, and experiences through exploring concepts of personally relevant pedagogy. Throughout this course, candidates consider their role in the creation of more just and equitable educative opportunities for all children, specifically the ones served daily in our classrooms. This work toward justice will be conceptualized through holistic and descriptive understandings of individual children and through a survey of scholarship on educational equity. Study focuses on strategies for effective communication and partnership between the teacher, student, family, and community. Reflection and application of knowledge will be contextualized in a discussion of the political, social, economic, and historical contexts within the U.S. and the intersection of these contexts and communities, equity in education, and educational practices broadly and locally constructed.</td>
</tr>
<tr>
<td>ECE 6370</td>
<td>Classroom Management and Instruction</td>
<td>3.0</td>
<td>Students must complete the course with a grade of &quot;C&quot; or higher</td>
<td>This field-based course focuses on effective teaching skills and techniques such as planning, instruction, assessment, and reflection in the development of an effective classroom community in an urban environment. Methods for appropriate classroom management are examined and developed.</td>
</tr>
<tr>
<td>ECE 6375</td>
<td>Responsive Practice for Urban Education</td>
<td>3.0</td>
<td>Students must complete the course with a grade of &quot;C&quot; or higher</td>
<td>In this course, the student examines issues including diversity, urban school culture, reflective teaching, and classroom management and their application to classroom practice. In addition, current issues relevant to urban education are explored.</td>
</tr>
<tr>
<td>ECE 6380</td>
<td>Foundations of Literacy Instruction for Young Children</td>
<td>3.0</td>
<td>Students must complete the course with a grade of &quot;C&quot; or higher</td>
<td>The candidate receives an overview of the basic concepts of literacy and their developmental denotations for school aged children from pre-kindergarten through grade five. This is a field-based course where the candidate applies learned skills within the context of schools in urban communities.</td>
</tr>
</tbody>
</table>
ECE 6385  
Teaching Literacy to Culturally and Linguistically Diverse Learners I  
CREDIT HOURS 3.0  
REQUIREMENTS Students must complete the course with a grade of "C" or higher  
DESCRIPTION This course is designed to introduce future educators to the knowledge and skills needed to provide an effective learning environment for students who are learning English as an additional language. Course participants will explore issues related to the methodology of teaching ELLs, as well as the language acquisition process. Current research, materials, curricula, and teaching methodologies in the area of ESOL and literacy instruction will be examined. Teacher candidates will continue to explore the components of a balanced literacy environment within an elementary classroom, exploring further teaching methods and theories for literacy instruction when teaching linguistically and culturally diverse students. This is a field based course where teacher candidates are applying learned skills within the context of schools in urban communities.

ECE 6386  
Teaching Literacy to Culturally and Linguistically Diverse Learners II  
CREDIT HOURS 2.0  
PREREQUISITES ECE 6385 with a grade of "C" or higher  
REQUIREMENTS Students must complete the course with a grade of "C" or higher  
DESCRIPTION The candidate continues to apply reading and language arts methodologies within the authentic context of schools and classrooms in urban communities. This course reinforces the integration of assessment, planning, instruction, and evaluation strategies, promoting an ability to describe and interpret the literacy behaviors of children.

ECE 6387  
ESOL: Language Acquisition  
CREDIT HOURS 3.0  
REQUIREMENTS Students must complete the course with a grade of "C" or higher  
DESCRIPTION Principles of first and second language and teaching will be examined. An emphasis on the analysis of language structure as it applies to second language acquisition is a core component of this course. Appropriate assessment of language proficiency will be examined in addition to ESOL program entrance and exit criteria.

ECE 6390  
Elementary Mathematics Curriculum and Pedagogy  
CREDIT HOURS 2.0  
REQUIREMENTS Students must complete the course with a grade of "C" or higher  
DESCRIPTION Candidates will learn about effective instructional methods for the mathematics content spanning the pre-kindergarten through grade five curriculum. Candidates will develop knowledge of developmentally appropriate, standards-based mathematics instruction, with specific emphasis on urban elementary classrooms.

ECE 6391  
Teaching Mathematics in Urban Schools  
CREDIT HOURS 3.0  
REQUIREMENTS Students must complete the course with a grade of "C" or higher  
DESCRIPTION Candidates will develop culturally responsive pedagogical skills for teaching mathematics in elementary urban contexts. Candidates will acquire mathematical content knowledge and gain understanding about children as learners of mathematics. Candidates will apply the learned skills in classrooms in urban communities.
ECE 6392  Critical Issues in Elementary Mathematics

CREDIT HOURS  2.0
PREREQUISITES  ECE 6390 with a grade of "C" or higher and ECE 6391 with a grade of "C" or higher
REQUIREMENTS  Students must complete the course with a grade of "C" or higher
DESCRIPTION  Candidates will explore critical issues in elementary mathematics and their impact on instructional practice. Candidates will acquire advanced culturally responsive mathematics pedagogical skills, with specific emphasis on integrating instruction, families, and urban communities.

ECE 6395  Child Growth and Development in Urban Education

CREDIT HOURS  3.0
REQUIREMENTS  Students must complete the course with a grade of "C" or higher
DESCRIPTION  This course focuses on the growth and development of children in urban settings. Theories and research on physical, cognitive, social, and emotional aspects of development are investigated and applied to the urban classroom. Issues of learner diversity and culture and their applications to classroom practices are also examined.

ECE 6405  Science and Social Studies in the Urban Classroom

CREDIT HOURS  3.0
REQUIREMENTS  Students must complete the course with a grade of "C" or higher
DESCRIPTION  This course provides experiences through which the candidate explores and investigates science relevant to urban school settings. It includes strategies for integrating the science curriculum and infusing culturally relevant content and pedagogy.

ECE 6406  Science in the Urban Classroom

CREDIT HOURS  3.0
REQUIREMENTS  Students must complete the course with a grade of "C" or higher
DESCRIPTION  This course provides experiences through which the candidate explores and investigates science relevant to urban school settings. It includes strategies for integrating the science curriculum and infusing culturally relevant content and pedagogy.

ECE 6407  Social Studies Methods for Culturally and Linguistically Diverse Learners

CREDIT HOURS  3.0
REQUIREMENTS  Students must complete the course with a grade of "C" or higher
DESCRIPTION  This course provides students with experiences through which they will explore and investigate social studies methods relevant to culturally and linguistically diverse classrooms. This course provides students with an overview of the field of social studies, attention to relevant disciplinary literacies, and strategies for teaching social studies to culturally and linguistically diverse kindergarten through fifth graders.

ECE 6415  Curriculum and Assessment Urban Education I

CREDIT HOURS  3.0
REQUIREMENTS  Students must complete the course with a grade of "C" or higher
DESCRIPTION  The candidate examines, integrates, and applies current theories of curriculum and assessment to the teaching of students in urban classrooms. The candidate assesses and enhances children’s concepts, skills, and dispositions through culturally responsive approaches and investigations of real issues.
ECE 6416 Curriculum and Assessment for Urban Education II

CREDIT HOURS 3.0
PREREQUISITES ECE 6415 with a grade of "C" or higher
REQUIREMENTS Students must complete the course with a grade of "C" or higher
DESCRIPTION The candidate extends the examination, integration, and application of current curricular and assessment theories to the teaching of students in urban classrooms. The candidate assesses and enhances children's concepts, skills, and dispositions through culturally responsive approaches and investigations of real issues.

ECE 6575 Beginning Teachers of Record as Reflective Practitioners I

CREDIT HOURS 2.0
DESCRIPTION This course is a field experience course for first semester first year teachers that utilizes a scaffolded, developmental coaching model in order to support beginning teachers of record as they grapple with constructs such as the creation of pupil centered and personally relevant curriculum and instruction. This course focuses on the continued development of critical reflexive and reflective practice for teacher growth and pupil learning. Structures of support are available for beginning teachers as they strive for an increased level of professionalization and claim opportunities to engage with communities, families, and pupils to bring about equitable educative opportunities for all children. Candidates will be observed and coached in their own classrooms. In order to ensure candidates preparedness for teaching in a range of P-12 classrooms they will also be observed and coached in complementary educational settings.

ECE 6576 Integrative and Iterative Curriculum Design

CREDIT HOURS 6.0
DESCRIPTION This course is designed to support beginning teachers of record as they strive to be successful and critically reflective teachers of culturally and linguistically diverse students in urban classrooms. The focus of this course is to consider means for education for democratic purposes and engagement in meaningful and critical curriculum design and implementation. Novice teachers will explore (a) strategies to support reading comprehension and vocabulary development during the elementary years; (b) science and social studies content and methods of inquiry; (c) strategies for integrating the curriculum around science and social studies content; (d) curriculum design that incorporates student interests and queries around critical and important themes and topics; (e) personally relevant and learner centered teaching strategies; and (f) ways that teachers can build on students' culture and prior knowledge to best meet the needs of students in diverse classrooms. This is a field-based course in which beginning teachers will connect theory to practice as they develop and implement an integrative and iterative curriculum with pupils.
**ECE 6585**

**Beginning Teachers of Record as Reflective Practitioners II**

**CREDIT HOURS**
2.0

**PREREQUISITES**
ECE 6575

**DESCRIPTION**
This course is a field experience course for second semester first year teachers that utilize a scaffolded, developmental coaching model in order to support beginning teachers of record as they grapple with constructs such as the creation of pupil centered and personally relevant curriculum and instruction. This course focuses on the continued development of critical reflexive and reflective practice for teacher growth and pupil learning. Structures of support are available for beginning teachers as they strive for an increased level of professionalization and claim opportunities to engage with communities, families, and pupils to bring about equitable educative opportunities for all children. Candidates will be observed and coached in their own classrooms. In order to ensure candidates preparedness for teaching in a range of P-12 classrooms they will also be observed and coached in complementary educational settings.

**ECE 6586**

**Advocating for Students Through the Descriptive Review of a Child**

**CREDIT HOURS**
3.0

**DESCRIPTION**
This course focuses on the teacher as a critically reflective practitioner, affirming children’s diverse backgrounds, abilities, interests, personalities, and experiences through exploring concepts of reflective teaching, child development, and the creation of a classroom climate which nurtures the holistic development of all children. Throughout this course teachers of record of in urban classrooms will consider their role in the creation of more just and equitable educative opportunities for all children, specifically the ones they serve daily in their classrooms. This work toward justice will be conceptualized through holistic and descriptive understandings of individual children as teachers turn a self-reflexive lean on themselves, their language use, and their practices, and engage dialogically with colleagues inquiring into the unique strengths and vulnerabilities of the individual children each serves. This course will examine issues including child development, diversity, and urban school culture, reflective teaching, and classroom management and the application of these constructs into classroom practice.
**ECE 6587**  
**Language and Literacy Development**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** This course focuses on the teacher as a reflective practitioner of language and literacy instruction for culturally and linguistically diverse pupils, affirming children's diverse backgrounds, abilities, interests, personalities, and experiences in order to nurture the holistic development of all children. This class explores (a) language and literacy development during the elementary years; (b) theories of learning languages and literacy; (c) teaching strategies and skills that contribute to additive language development and facilitate literacy development for all learners; (d) tools for taking well-reasoned, data-based, and deliberate actions to create meaningful learning opportunities in support of the language and literacy development of each pupil; and (e) ways that teachers can build on pupils' culture and prior knowledge to best meet the needs of learners in diverse classrooms.

**ECE 6655**  
**Student Teaching I**  
**CREDIT HOURS** 3.0  
**REQUIREMENTS** Students must complete the course with a grade of "B" or higher  
**DESCRIPTION** This is the first of two student teaching field experiences that focuses on the practical application of classroom management, culturally relevant curriculum and instruction, and child development. The candidate is observed and supervised in an urban school environment.

**ECE 6656**  
**Student Teaching II**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** ECE 6655 with a grade of "B" or higher  
**REQUIREMENTS** Students must complete the course with a grade of "B" or higher  
**DESCRIPTION** This is the second of two student teaching field experiences that focuses on the practical application of classroom management, culturally relevant curriculum and instruction, and child development. The candidate is observed and supervised in an urban school environment.

**ECE 6657**  
**ESOL Student Teaching**  
**CREDIT HOURS** 1.0 - 6.0  
**REQUIREMENTS** Student must complete this course with a grade of "B" or higher  
**DESCRIPTION** Candidates have supervised field placements in ESOL classrooms as well as in non-ESOL classrooms with significant culturally and linguistically diverse student populations. The candidates are observed and supervised in urban school environments in various K-12 grade level placements. This field experience focuses on the practical application of culturally relevant curriculum, instruction, and assessment.

**ECE 6660**  
**Mentorship in the Urban Classroom I**  
**CREDIT HOURS** 3.0  
**REQUIREMENTS** Students must complete the course with a grade of "B" or higher  
**DESCRIPTION** This is the first of two mentorship field experiences. The candidate must have teacher certification through the Alternative Preparation Program in the Department of Early Childhood Education at Georgia State University and currently hold a position as a first year teacher in an urban elementary school. This field based course is designed to actively support the teacher during the first year of teaching using a systematic form of reflection to mentor and assess professional development.

<td>3.0</td>
<td></td>
<td>This course will explore content and pedagogy of geometry and measurement concepts for elementary children. The course will explore attributes of 2- and 3-dimensional shapes as well as classifying, dividing, combining and transforming those shapes. Geometry topics will also include congruence, similarity, slides, flips, turns, and symmetry. Measurement topics will include attributes appropriate for the elementary classroom including distance, weight, area, volume, temperature and time; tools for measuring, the metric system and conversions. ECE 7394 is cross listed with ECE 9394.</td>
<td></td>
</tr>
</tbody>
</table>
ECE 7395  Rational Numbers and Algebra in the Elementary Classroom  
CREDIT HOURS  3.0  
DESCRIPTION  This course explores mathematics content and appropriate related pedagogy for understanding mathematical practices with rational numbers and algebraic concepts at the P-5 elementary level. Topics include concepts and operations with fractions and decimals; understanding equivalence; relational thinking; and making and justifying conjectures about general properties of arithmetic. ECE 7395 is cross listed with ECE 9395.

ECE 7396  Data Analysis and Probability in the Elementary Classroom  
CREDIT HOURS  3.0  
DESCRIPTION  This course will explore the Data Analysis and Probability Standard in the NCTM Standards for grades PreK-5. Topics in data analysis will include asking good questions, collecting data, representing/displaying data, measures of central tendency (mean, median and mode) and making predictions. Topics in probability will include basic concepts of probability such as theoretical and experimental probability, sample space, and calculating probability. Appropriate methods and materials for each topic will be discussed. ECE 7396 is cross listed with ECE 9396.

ECE 7397  Elementary Mathematics in Dual Immersion Settings  
CREDIT HOURS  3.0  
PREREQUISITES  Admission to the Dual Immersion Endorsement Program or Master of Education in Elementary Education Program  
DESCRIPTION  In this course, candidates will develop their mathematical content knowledge and gain understanding about bilingual children as learners of mathematics. Candidates will also learn about effective instructional methods for the mathematics content spanning the pre-kindergarten through five curricula. This is a field-based course where candidates apply learned skills in the context of Dual Immersion K-5 schools in urban communities.

ECE 7400  Curriculum in the Early Childhood Classroom II  
CREDIT HOURS  3.0  
PREREQUISITES  ECE 7390  
DESCRIPTION  Students examine and adapt current theory and professional standards when planning mathematics, science, social studies, and language arts instruction in the early childhood classroom. Faculty model integration and collaborative approaches; participants continually reflect upon classroom implementation. Course work is taken over two consecutive terms. IP grades are assigned each term until all course requirements have been completed.

ECE 7410  Critical Issues in Early Childhood Education I  
CREDIT HOURS  3.0  
DESCRIPTION  Students examine critical issues in the field such as diversity, technology, leadership, assessment and others, and their impact on instructional practice in a collaborative setting. For the Collaborative program, IP grades are assigned each term until all course requirements have been completed.
Biliteracy: Literacy Development in Multilingual Settings

**CREDIT HOURS**
3.0

**DESCRIPTION**
Prerequisite: Admission to the Dual Immersion Endorsement Program or Master of Education in Elementary Education Program. This course focuses on the knowledge and skills needed to provide an effective learning environment for bilingual students. Course participants will explore issues related to teaching methods as they relate to language acquisition. Current biliteracy research, materials, curricula, and teaching methods will be examined with those appropriate for Dual Immersion classrooms emphasized. This is a field based course where teacher candidates apply course-based learning within the context of schools in urban communities.

Induction Teachers as Change Agents I

ECE 6585

**DESCRIPTION**
This course is a field experience course that utilizes a scaffolded, developmental coaching model in order to support second year first semester beginning teachers of record as they grapple with constructs such as the creation of pupil centered and personally relevant curriculum and instruction. This course is closely tied to the other courses in the ECE M.A.T. in order to support novice teachers committed to social justice and structural change. These educators will engage in inquiry to identify, understand, and mitigate issues in the local context that prevent equitable opportunities for all learners. Structures of support are available for beginning teachers as they strive for an increased level of professionalization and claim opportunities to engage with communities, families, and pupils to bring about equitable educative opportunities for all children. Candidates will be observed and coached in their own classrooms. In order to ensure candidates preparedness for teaching in a range of P-12 classrooms they will also be observed and coached in complementary educational settings.

Teacher Inquiry for Critical Change

**CREDIT HOURS**
3.0

**DESCRIPTION**
This course is part of a yearlong engagement in teacher research that will bring about a change in classroom practice, communities, and the lives of P-5 students and their families. The goal of this course is for teacher-researchers to work toward the mitigation of educational and systemic inequities through systematic and iterative processes of inquiry. This course is the embodiment of Freire’s construct of praxis, the merging of contemplation and deliberate action alongside others in a shared ecological context (classroom, school, community, state, nation).
ECE 7585  Induction Teachers as Change Agents II  
CREDIT HOURS  3.0  
PREREQUISITES  ECE 7575  
DESCRIPTION  This course is a field experience course that utilizes a scaffolded, developmental coaching model in order to support second year first semester beginning teachers of record as they grapple with constructs such as the creation of pupil centered and personally relevant curriculum and instruction. This course is closely tied to the other courses in the ECE M.A.T. in order to support novice teachers committed to social justice and structural change. These educators will engage in inquiry to identify, understand, and mitigate issues in the local context that prevent equitable opportunities for all learners. Structures of support are available for beginning teachers as they strive for an increased level of professionalization and claim opportunities to engage with communities, families, and pupils to bring about equitable educative opportunities for all children. Candidates will be observed and coached in their own classrooms. In order to ensure candidates preparedness for teaching in a range of P-12 classrooms they will also be observed and coached in complementary educational settings.

ECE 7730  Perspectives on Child Development for Culturally and Linguistically Diverse Students  
CREDIT HOURS  3.0  
PREREQUISITES  Admission to the Dual Immersion Endorsement Program or Master of Education in Elementary Education Program  
DESCRIPTION  This course focuses on physical, cognitive, and affective stages of human growth and development in culturally and linguistically diverse contexts. It introduces theories and models of behavior and development applied to the field of early childhood education. In addition, students will explore the foundations of, and current research on, Dual Immersion education in grades K-5. The class is based on a socio-constructivist view of education. Therefore, much of the learning will take place through hands-on learning in concert with peers in interactive small and whole group discussions, and responses to readings and lectures.

ECE 7740  Internship in Early Childhood Classroom I  
CREDIT HOURS  3.0  
REQUIREMENTS  A minimum grade of "S" is required  
DESCRIPTION  This is a field experience in the P-5 classroom which encourages the educator to implement a program based on the assumption that learning is a constructive process which builds upon the knowledge and experience of the learner. The teacher functions as a collaborator with parents and children to focus on strategies for enhancing child learning. Students in the Mathematics Education concentration must enroll in this course concurrent with one of the following courses: ECE 7393, ECE 7394, ECE 7395, or ECE 7396. Course is graded as satisfactory/unsatisfactory.

<tbody>
<tr>
<td>ECE 7750</td>
<td>Content-based Curricula, Instruction and Assessment for</td>
<td>3.0</td>
<td>Admission to the ECEE Dual Immersion Endorsement Program or Master of Education in Elementary Education (MEd) Program</td>
<td>This course provides students with experiences through which they will explore and investigate science and social studies relevant to Dual Immersion classrooms. Students will learn strategies for integrating the curriculum around science and social studies that are culturally relevant. The class is based on a socio-constructivist view of education. Therefore, much of the learning will take place through hands-on learning in concert with peers in interactive small and whole group discussions, and responses to readings and lectures.</td>
</tr>
<tr>
<td>ECE 7760</td>
<td>Create to Learn</td>
<td>3.0</td>
<td></td>
<td>This course troubles normative conceptions of creation, innovation, and learning. Using constructionist, sociocultural, and culturally-responsive theories of learning, the course deepens educators' understandings of design thinking, pedagogical imagination, project-based learning, tinkering, play, and making in a variety of learning spaces (e.g., classrooms, museums, outdoors). The course offers opportunities for students to engage in critical discourse, collaboratively build projects, and practice designing and/or facilitating opportunities for young people to learn through creating. Some questions undergirding the course are: What is learning and how can we see it in everyday interactions (with young people, adults, etc.)? What counts as making. How are educators makers/creators?.</td>
</tr>
<tr>
<td>ECE 7800</td>
<td>Capstone Experience</td>
<td>3.0</td>
<td></td>
<td>This culminating seminar/independent study course allows participants to document, interpret, synthesize, and present benchmarks of professional development over the program. Capstone experience may extend beyond one term.</td>
</tr>
<tr>
<td>ECE 7850</td>
<td>Apprenticeship in Creative and Innovative Education</td>
<td>3.0</td>
<td></td>
<td>This apprenticeship is designed to support students in cultivating dispositions and skills key in operating education-related programs, partnerships, or enterprises. Students participate in an apprenticeship with a local agency (e.g., cultural center, museum, community guild, educational enterprise, non-profit organization) or university entity to gain hands-on experience in the operations, management, and development of learning sites. (Repeatable).</td>
</tr>
<tr>
<td>ECE 7930</td>
<td>Research and Theories of Creative Learning</td>
<td>3.0</td>
<td></td>
<td>This course is designed to explore research and theories related to creative learning practices of children and adolescents. Students examine and critique: theories instrumental in the development of creativity as a field; research focused on fostering children's creative and problem-solving practices; current discourses connecting creativity and national and global issues related to education.</td>
</tr>

</table>
ECE 7960  Seminar in Creative and Innovative Education  

CREDIT HOURS  1.0  

DESCRIPTION  This seminar provides an introduction and overview for masters work in Creative and Innovative Education. It focuses on key experiences (e.g., planning apprenticeships with community partners, developing specialization pathways, pitching ideas, writing grants and seeking funding, and marketing programs) that support students in designing, developing, and implementing creative and innovative educational programs for children. (Repeatable).

ECE 7963  Practicum in Interventions  

CREDIT HOURS  3.0  

DESCRIPTION  The course focuses on the principles of early intervention for diagnosing literacy problems for students, including an understanding of emergent literacy, the reading and writing process, knowledge of instructional implications of research in early literacy, special education, psychology, and other fields that deal with the treatment of students with literacy and learning difficulties. Special attention will be placed on designing individualized and small-group instructional interventions targeted toward those students in greatest need or low proficiency levels as well as instructional interactions and/or experiences that support greater understanding of principles related to emergent and early literacy.

ECE 7964  Comprehensive Literacy Model for School Improvement  

CREDIT HOURS  3.0  

PREREQUISITES  Master's degree or a minimum of 9 hours of appropriate reading coursework  

DESCRIPTION  This course is designed as a summer institute for teachers and school teams interested in implementing a comprehensive literacy model, including a framework for literacy, individual and small group interventions, literacy team meetings, assessment walls and progress monitoring, school plans and literacy coaching. This course is one of the six course requirement for the literacy coach course of study.

ECE 7965  Intervention Designs for Struggling Readers  

CREDIT HOURS  3.0  

PREREQUISITES  In addition to completing the Comprehensive Intervention Model (CIM) Institute the previous summer, participants are required to have completed ECE 7963 Practicum in Interventions or be a trained Reading Recovery teacher, Reading Recovery teacher leader or Literacy Collaborative Coordinator  

DESCRIPTION  This year long training course focuses on preparing K-6 educators to differentiate reading and writing instruction within a range of settings for students experiencing difficulty in literacy learning. The training consists of intensive study of the Comprehensive Intervention Model Framework (a Response to Intervention Framework) and focuses on gaining in-depth knowledge and skills in designing and implementing a portfolio of small-group interventions for K-6 students. (Repeatable).

<tr>
<td>ECE 7975</td>
<td>Seminar for Graduate Assistants</td>
<td>3.0 - 18.0</td>
<td>Course is graded as satisfactory/unsatisfactory</td>
<td>A minimum grade of &quot;S&quot; is required for this course. This course is designed to inform the students of policies and procedures needed to complete an assistantship. Professional ethics associated with teaching, research planning, management, and accounting procedures are reviewed. The course focuses on the teaching and research being conducted in order to further the understanding of all students involved in teaching and research. (Repeatable).</td>
</tr>
<tr>
<td>ECE 7980</td>
<td>Theory and Practice in Literacy</td>
<td>3.0</td>
<td>Master's degree or a minimum of 9 hours of appropriate reading coursework</td>
<td>This course examines theory of cognitive, linguistic and cultural learning for their practical implication for teaching students in the elementary grades. A focus is placed on designing and implementing research-based interventions for struggling readers.</td>
</tr>
<tr>
<td>ECE 7981</td>
<td>Supervision and Organization of Literacy Programs</td>
<td>3.0</td>
<td>Master's degree or a minimum of 9 hours of appropriate reading coursework</td>
<td>This course focuses on preparing reading specialists and literacy coaches for supervising and organizing a school-wide literacy program, including organizational techniques and instructional approaches. An additional focus will be on developing the knowledge and skills of a literacy coach in three major areas: coaching teachers, providing professional development to school personnel, and evaluating a school's literacy program. This course is one of the six course requirement for the PCL-Literacy Coach course of study.</td>
</tr>
<tr>
<td>ECE 7982</td>
<td>Professional Experiences in Reading</td>
<td>3.0</td>
<td>Master's degree or a minimum of 9 hours of appropriate reading coursework and ECE 7981 Supervision and Organization of Literacy Programs or Consent of Instructor</td>
<td>This course focuses on practical experiences with a literacy program in a school. Requires field experiences as a literacy coach in a school, attendance at scheduled seminars, and a portfolio that demonstrates competency as a reading professional, including conducting literacy team meetings and staff development, coaching teachers, making evidence-based curricula decisions, and collecting data for school improvement. This course is one of the six course requirement for the PCL-Literacy Coach course of study.</td>
</tr>
<tr>
<td>ECE 7983</td>
<td>Literacy Coaches as Agents of Change</td>
<td>3.0</td>
<td>Master's degree or a minimum of 9 hours of appropriate reading coursework and ECE 7981 Supervision and Organization of Literacy Programs or Consent of Instructor</td>
<td>This course focuses on the roles and responsibilities of a literacy coach, including specialized techniques and language prompts for scaffolding teachers. An emphasis is placed on observing change over time in knowledge levels and types of self-reflection. Other responsibilities include modeling lessons, conducting team meetings, leading teacher study groups, selecting materials, and collecting and analyzing data for school improvement. This course is one of the six course requirement for the PCL-Literacy Coach course of study.</td>
</tr>
</tbody>
</table>
**ECE 7984**  
**Curriculum Design and Evaluation of Literacy Programs**  
**CREDIT HOURS**  
3.0  
**PREREQUISITES**  
Master's degree or a minimum of 9 hours of appropriate reading coursework  
**DESCRIPTION**  
This course focuses on designing and assessing literacy curriculum, including evaluating literacy programs and materials and analyzing their evidence-based rationales, aligning curriculum to state and professional standards, creating activities and rubrics to match curriculum, and using school-embedded professional development to achieve literacy goals. This course is one of the six course requirement for the PCL-Literacy Coach course of study.

**ECE 7990**  
**Special Topics**  
**CREDIT HOURS**  
1.0 - 9.0  
**DESCRIPTION**  
The purpose of this course is to engage students with specialized topics within the field of education. (Repeatable).

**ECE 8000**  
**Issues in International Education**  
**CREDIT HOURS**  
3.0  
**DESCRIPTION**  
The course is designed to increase students' knowledge and awareness of social, economic, and political issues related to international education. Students will also examine and compare policies and practices of educational systems in various countries in the world. The course is presented and studied online. It comprises twelve units on international educational issues such as citizenship, culturalism, and multiculturalism equality and Education, inclusion and norms, values and beliefs. Each unit provides an overview of the issues associated with the topic as well as materials that outline those issues. Student/activities/projects require the gathering of data from a variety of sources, synthesizing those data and presenting a summary.

**ECE 8021**  
**Child Development and Beyond**  
**CREDIT HOURS**  
3.0  
**DESCRIPTION**  
Exploring historical and contemporary theories and practices related to human development in childhood and early adolescence, students in this course examine and critique the origins, goals, and assumptions of developmental discourses (e.g., developmentally appropriate practice, readiness). Students examine effects of these discourses on current educational practice and draw implications for designing and implementing in school and out-of-school experiences with children that enhance creative learning.

**ECE 8100**  
**Children in Society**  
**CREDIT HOURS**  
3.0  
**DESCRIPTION**  
The purpose of this course is to empower educators to teach for a more equitable society. Issues of diversity, including race, social class, language, intelligence, etc. will be explored to deepen understandings of diversity so that educators may be agents of change. Educators will examine how cultural practices, policies, and media position and represent children in US and international societies. They will also examine how children themselves are advocating and influencing policies, practices, and media through their own socially networked activities and child-made media products. ECE 8100 may be cross-listed with ECE 9360.

**ECE 8300**  
**Reading Recovery Theory I**  
**CREDIT HOURS**  
3.0  
**PREREQUISITES**  
Restricted to Reading Recovery students  
**COREQUISITES**  
ECE 8360, ECE 8370, and ECE 8700  
**DESCRIPTION**  
Students examine the theoretical and research foundation for Reading Recovery, its history, issues for implementation, and the nature of this systemic educational innovation.
ECE 8310  
**Reading Recovery Theory II**  
CREDIT HOURS 3.0  
PREREQUISITES Restricted to Reading Recovery students and ECE 8300  
COREQUISITES ECE 8320, ECE 8380, ECE 8390, and ECE 8700  
DESCRIPTION Students examine the theoretical and research foundation for Reading Recovery issues for implementation of this systematic educational innovation. Emphasis in this course shifts to a focus on developing and understanding of Clay's theories of reading and emergent literacy in comparison to those of other theorists in the field.

ECE 8320  
**Reading Recovery Theory III**  
CREDIT HOURS 3.0  
PREREQUISITES Restricted to Reading Recovery students and ECE 8300  
COREQUISITES ECE 8310, ECE 8380, ECE 8390, and ECE 8700  
DESCRIPTION Students examine the theoretical and research foundation for Reading Recovery issues for implementation of this systemic educational innovation. Emphasis in this course continues on developing an understanding of Clay's theories of reading and emergent literacy in comparison to those of other theorists in the field.

ECE 8360  
**Reading Recovery Clinical for Leaders I**  
CREDIT HOURS 3.0  
PREREQUISITES Restricted to Reading Recovery students  
COREQUISITES ECE 8300, ECE 8370, and ECE 8700  
DESCRIPTION This course is designed to help teacher leaders in training develop an in-depth knowledge of the principles and procedures of the Reading Recovery program and to implement these principles and procedures with at-risk regular education first grade children within local school districts. (1.5 lecture hours and 1.5 laboratory hours a week.).

ECE 8370  
**Reading Recovery Clinical For Leaders II**  
CREDIT HOURS 3.0  
PREREQUISITES Restricted to Reading Recovery students  
COREQUISITES ECE 8300, ECE 8360, and ECE 8700  
DESCRIPTION This course is designed to help teacher leaders in training develop further an in-depth knowledge of the principles and procedures of the Reading Recovery program and to continue to explore these teaching methods and procedures, for acceleration of learning, and subsequent discontinuing from the program with at-risk regular education first grade children within local school districts. (1.5 lecture hours and 1.5 laboratory hours a week.).

ECE 8380  
**Reading Recovery Clinical for Leaders III**  
CREDIT HOURS 3.0  
PREREQUISITES Restricted to Reading Recovery students and ECE 8370  
COREQUISITES ECE 8320, ECE 8390, and ECE 8700  
DESCRIPTION This course is designed to help teacher leaders in training develop further the principles and procedures of the Reading Recovery program and to continue to explore these teaching methods and procedures, acceleration of learning, discontinuing from the program, regular education first-grade children within local school districts. Other issues discussed include midyear selection of students, guidelines for program withdrawal, records management, data collection, system-wide implementation, reporting, and evaluation of the Reading Recovery program. (1.5 lecture hours and 1.5 laboratory hours a week.).

<tr>
<td>ECE 8400</td>
<td>Teacher Development</td>
<td>3.0</td>
<td></td>
<td></td>
<td>The course is designed to develop identities of teacher as researcher, child-centered practitioner, and professional learner in the context of teacher development. Participants will examine not only the multiple educational contexts and conditions that may inhibit or promote teacher knowledge, growth and change but also stimulate inquiry essential to better understand the characteristics, perceptions, tasks and training needs of teachers over the lifespan of their professional development. Introduction of program requirements for completion of Teacher Support and Coaching Endorsement begins in this course. May extend beyond one term.</td>
</tr>
<tr>
<td>ECE 8420</td>
<td>Essentials of Elementary Science</td>
<td>3.0</td>
<td></td>
<td></td>
<td>This course introduces the science content and pedagogy of early elementary classrooms. Participants will learn Life, Physical, Earth and Space Disciplinary Core Ideas based on the Framework for K-12 Science Education. They will also develop lesson plans using the 5E Model and the 3 Dimensional Planning as outlined in the Framework for Science Education. Special attention is paid to 1) common misconceptions in early elementary topics and 2) safety. This is a required course for the K-5 Science Endorsement but non-endorsement candidates can take this course as an elective.</td>
</tr>
<tr>
<td>ECE 8430</td>
<td>Mastery of Elementary Science</td>
<td>3.0</td>
<td></td>
<td></td>
<td>This course addresses the content of upper elementary classrooms. Students will learn Life, Physical, Earth and Space Disciplinary Core Ideas based on the Framework for K-12 Science Education including content such as: cells, ecosystems, heredity of traits, energy, chemical reactions, climate and Earth’s systems. The pedagogy will focus on assessment, differentiation and engaging a diverse community of learners to be inclusive of all students. This is a required course for the K-5 Science Endorsement but non-endorsement candidates can take this course as an elective with permission from the instructor.</td>
</tr>
</tbody>
</table>
ECE 8440  Leadership in Elementary Science
CREDIT HOURS  3.0
DESCRIPTION  This course addresses interdisciplinary and challenging science concepts from the K-5 progression of the Framework for K-12 Education such as, plate tectonics, natural selection, conservation of energy and wave properties. Participants will prepare to become leaders in their schools through their deeper investigation of the Crosscutting Concepts and Science and Engineering Core Ideas as well as STEM (Science Technology Engineering and Mathematics) practices in the elementary classroom. This is a required course for the K-5 Science Endorsement.

ECE 8450  Nature of STEM Education
CREDIT HOURS  3.0
REQUIREMENTS  Students must complete the course with a grade of "C" or higher
DESCRIPTION  This course explores the History and Pedagogy of STEM Education through an interdisciplinary exploration of STEM research, STEM business and STEM Education as part of a STEM Endorsement. STEM fields are fast-moving, ever-changing fields. The goal of the course is to develop STEM leaders as lifelong learners of STEM fields so they will be able to change as the fields change. An emphasis is placed on current STEM research, business and education trends as well as making authentic connections with professionals in all of these fields.

ECE 8455  STEM Project-Based Instruction
CREDIT HOURS  3.0
REQUIREMENTS  Students must complete the course with a grade of "C" or higher
DESCRIPTION  Within a STEM philosophy pedagogical content knowledge(s) (PCK) are further developed as teachers work toward the design of project-based units. Competency is continually built as candidates read about and discuss the principles of PBI; reflect on observations of project-based learning environments in elementary school settings; and incorporate what they are learning into the design of project-based lessons and ultimately, an entire project-based unit.

ECE 8660  STEM Field Experience
CREDIT HOURS  2.0 - 3.0
REQUIREMENTS  Students must complete the course with a grade of "B" or higher
DESCRIPTION  This course is designed to prepare teachers of STEM through authentic experiences as part of an STEM Endorsement. Candidates will be observed and supervised in an STEM classroom environment as well as participate in a STEM related externship. Candidates will culminate this experience by implementing a collaborative STEM project.
ECE 8680 Internship in Teacher Support
CREDIT HOURS 3.0
PREREQUISITES ECE 8400
REQUIREMENTS Minimum grade of "S" required for this course
DESCRIPTION This course provides participants with opportunities to engage in field-based opportunities in P-5 schools and classrooms to encourage development as teacher researchers, mentors, and leaders. Additionally, participants function in a collaborative way with other professionals to enhance their own and others' growth and development. This course also provides support for teacher development experiences. Program requirements for completion of the Teacher Support and Coaching (TSC) Endorsement continue in this course. Internship may extend beyond one term. (Repeatable).

ECE 8700 Reading Recovery Supervision
CREDIT HOURS 3.0
PREREQUISITES Restricted to Reading Recovery students
COREQUISITES ECE 8300, ECE 8360, and ECE 8370
DESCRIPTION This course prepares students for the role of Reading Recovery teacher leader. Special attention is given to the understanding of how theory and research support the Reading Recovery program, issues related to effective implementation, theories and models of professional development, supervision, and systemic change. Students develop skills for administering, implementing, evaluating, and improving district and regional early literacy intervention programs and further develop skills for facilitating professional development of classroom teachers and educators. Issues that impinge on program development and change and the professional development of educators are explored. Teacher leaders in training apply knowledge of teacher effectiveness and supervision theory and supervision of Reading Recovery teachers. (Repeatable).

ECE 8765 Critical Perspectives on Family and Community Engagement in Schools: A Funds of Knowledge Approach
CREDIT HOURS 3.0
DESCRIPTION In this course students will explore the application of the theory and research methods of ethnography and sociohistorical psychology to educational problems by taking an in depth look at the Funds of Knowledge research project, which combined these theoretical perspectives for the purpose of counteracting deficit perspectives on working class and minoritized youth and their families. Students will also have the opportunity to learn about other research projects that have taken similar approaches to addressing inequitable outcomes for students from marginalized groups. This course will be conducted as a seminar and will consist of considerable discussion of the readings and concepts of the course. Students will have the opportunity to engage in scholarly writing. In addition, students will be expected to engage in ethnographic data gathering techniques outside of class, including participant observation and interviewing.

ECE 8810 Directed Readings in Early Childhood Education
CREDIT HOURS 1.0 - 3.0
DESCRIPTION This course includes individual readings on special topics in early childhood education. These areas must be ones not covered by any course regularly taught in the Department of Early Childhood Education or an extension of a previously completed course. A Directed Reading Form, available in the Department of Early Childhood and Elementary Education, must be completed and signed by the instructor and the departmental chair prior to registration. (Repeatable).
ECE 8820  Cultivating Curiosity in Creative Inquiry

CREDIT HOURS  1.0 - 3.0

DESCRIPTION  Adopting the stance that curiosity is not an individual trait but rather a participatory and distributed process, this course looks at the role of curiosity in creativity-based inquiry practices. Students explore strategies for cultivating cultures of curiosity in classrooms and workplaces that can contribute to the ongoing development of ethical and professional inquiry and pedagogical practices in creative education.

ECE 8930  Critical Pedagogy and Practices in Elementary Mathematics

CREDIT HOURS  3.0

DESCRIPTION  The course is designed to explore scholarship on equity, social justice, and sociocultural issues in teaching and learning elementary mathematics. Students examine and critique philosophical and theoretical perspectives, and current discourse framing historically marginalized student populations in mathematics education.

ECE 9120  Poststructural Inquiry

CREDIT HOURS  3.0

PREREQUISITES  EPRS 8510 or permission of the instructor

REQUIREMENTS  A minimum grade of “B” is required for this course

DESCRIPTION  The purpose of this course is to provide an introduction to the function of poststructuralism in the research process. In this course, students will begin to grapple with several different poststructural theories, play with constructing a research design grounded in these theories, and deconstruct the inquiry process. Students will work with theories of Butler, Deleuze and Guattari, Derrida, Foucault, and Lyotard. (Same as EPRS 9120).

ECE 9360  Curriculum, Issues, and Historical Perspectives in Early Childhood and Elementary Education

CREDIT HOURS  3.0

REQUIREMENTS  A minimum grade of “B” is required for this course

DESCRIPTION  The focus of this course is on curriculum models, current issues, and historical perspectives in early childhood education and their implications for research, teaching, and leadership in the profession. Participants examine their beliefs and experiences related to young children, analyze critical and contemporary issues in early childhood and elementary education, including the political and societal contexts for those issues, and become advocates for young children and their families. ECE 9360 may be cross-listed with ECE 8100.

ECE 9380  Discourse Analysis

CREDIT HOURS  3.0

REQUIREMENTS  A minimum grade of “B” is required for this course

DESCRIPTION  This course focuses on the study of language within social contexts, particularly as applied to teaching and learning within educational settings. Students will have opportunities to read and explore the theories and analytic techniques of a number of researchers, as well as do their own analyses of discourse-based data. (Same as EPRS 9380).

<td>The purpose of this course is to examine how writing operates within scholarly inquiry. Using published works and their own works-in-progress, students will explore how academic writers use forms, structures, and rhetorical moves to sculpt scholarly articles with the intent of impacting their fields. Students will also develop their knowledge of theories and research-based pedagogical practices to cultivate student writers, including how writing discourses produce notions of research, academia, teaching, and learning. (Repeatable).</td>

ECE 9830  Becom(ing) a Field: Exploration Amidst Diverse Perspectives
CREDIT HOURS  3.0
DESCRIPTION  Students will work with instructors and peers to develop an individual reading trajectory based on a discourse, trend, idea, or topic vital to each student’s scholarly focus in education. Students will read texts from their individual trajectories and draw upon those readings in discussions and writing with peers and instructors. The combination of self-directed reading and collaborative sense-making aims to diversify students’ understandings about the problems and issues operating in the broader field of education.

ECE 9840  Socio-Cultural Issues in Early Childhood and Elementary Education
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of “B” is required for this course
DESCRIPTION  The purpose of the course is to explore educational theory, research, and practice within a critical socio-cultural context in early childhood and elementary education. Contemporary issues such as race, class, sexual orientation, gender, immigration, religion, and language acquisition will be analyzed for their role in shaping educational practices; family, school and community relationships; and teaching and learning. Students enrolled in this course will have opportunities to explore the intersections between their research interests and the issues of diversity related to the course.

ECE 9850  Research Seminar in Early Childhood and Elementary Education
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of “B” is required for this course
DESCRIPTION  This course focuses on research and methods on topical issues (e.g., literacy, mathematics, play, etc.) and their application to early childhood theory and classroom practice. Each seminar highlights one or two topics in depth. (Repeatable).

ECE 9860  Evaluating and Interpreting Research in Early Childhood and Elementary Education
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of “B” is required for this course
DESCRIPTION  This course is intended to strengthen students’ understanding of research methodologies used for research in early childhood and elementary contexts. Students will develop this knowledge by analyzing quantitative, qualitative, and mixed methods research with attention to critiquing research questions, methodology, data analytic techniques, findings, and implications.

ECE 9870  University Teaching Apprenticeship
CREDIT HOURS  1.0 - 6.0
DESCRIPTION  The student learns to teach at the university level through close participation with an experienced faculty member. Upon completion, the student is prepared to teach independently. The course is graded as satisfactory/unsatisfactory. (Repeatable).
**ECE 9880**  
**Teacher Development Apprenticeship**  
**CREDIT HOURS** 1.0 - 6.0  
**DESCRIPTION** The student learns to supervise and/or mentor preservice and inservice teachers through close participation with an experienced faculty member. Upon completion, the student is prepared to work independently with beginning and experienced teachers in the field. The course is graded as satisfactory/unsatisfactory. (Repeatable).

**ECE 9890**  
**Research Apprenticeship**  
**CREDIT HOURS** 1.0 - 6.0  
**PREREQUISITES** ECE 9850  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** The student learns to conduct research through close participation with an experienced faculty researcher. At the end of the course the student is prepared to conduct research independently.

**ECE 9910**  
**Developing Doctoral Students as Scholarly Writers**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Students examine the literature on scholarly writing, analyze exemplary writing, and study the writing processes involved in writing for publication. Students work with peers and instructor on their own writing currently in progress. Course may extend beyond one term. Course is graded as satisfactory/unsatisfactory. (Repeatable).

**ECE 9960**  
**Advanced Research and Theory in Child Development**  
**CREDIT HOURS** 3.0  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This course focuses on the major theories of child development. Original works by the major theorists are read and discussed and effects of theories on research and practice are examined. Participants critically examine the major theories of development, families of theories, the relationship between theory and research, and the research base for the various theories. Participants study cognitive, affective, and social aspects of development.

**ECE 9990**  
**Dissertation**  
**CREDIT HOURS** 1.0 - 18.0  
**REQUIREMENTS** A minimum grade of "S" is required for this course  
**DESCRIPTION** Involves the research and writing of the doctoral dissertation. Dissertation may extend beyond one term. Course is graded as satisfactory/unsatisfactory. (Repeatable).

<tr>
<td></td>
<td></td>
<td></td>
<td>Analysis of the role of government in the economy. Survey of the problems of monopoly, government regulation, externalities, public goods, and income redistribution. Emphasis on measuring the output and costs of government services. Survey of public sector decision-making techniques such as benefit-cost analysis.</td>
</tr>
</tbody>
</table>
ECON 8100 Applied Microeconomic Analysis
CREDIT HOURS 3.0
PREREQUISITES ECON 3910 and ECON 6030 or MGS 9910
DESCRIPTION This course provides comprehensive coverage of microeconomic topics by analyzing the applications of the theory. A graphical and intuitive approach is stressed in addition to the mathematical. Topics include both the standard and the new consumer theory, production and cost analysis, modern theories of the firm and markets, and basic welfare economics. Applications useful to business students are also provided.

ECON 8110 Macroeconomic Analysis
CREDIT HOURS 3.0
PREREQUISITES ECON 3900 and ECON 6030 or MGS 9910
DESCRIPTION This course covers the theory of aggregate demand and supply, sector demand functions (consumption, investment, money), disequilibrium models, economic growth, inflation, unemployment and expectations, stabilization, and control.

ECON 8150 Monetary Economics and Policy
CREDIT HOURS 3.0
PREREQUISITES ECON 4500
DESCRIPTION This course introduces the student to monetary theory and the institutions and policy through which phenomena influence national economic performance. The brand of monetary theory developed is based on a simple intergenerational model with foundations planted in the microeconomic theory of choice (on the demand for money side). Monetary macroeconomics and open economy macroeconomics are treated extensively to recognize the importance of international economic phenomena and foreign sector policy as influences on the outcomes of domestic monetary policy actions.

ECON 8180 Applied Economic Analysis
CREDIT HOURS 3.0
PREREQUISITES ECON 8100 and ECON 8110
DESCRIPTION Tools and techniques that are used for policy purposes and for forecasting by business and government will be studied. Large-scale econometric models, leading indicators, anticipations surveys, and other devices will be analyzed in order to determine the range of their usefulness for the decision maker. Model evaluation at the industry, firm, or regional level also will be pursued.

ECON 8200 Health Economics and Policy
CREDIT HOURS 3.0
DESCRIPTION This course analyzes both individual and public policy decisions surrounding health and resource allocation issues in the health care sector of the U.S. and other economies. The demand, production, cost, and financing of health are examined using a variety of conceptual and empirical models. The economic evaluation of alternative health care programs and policy implications is also discussed.

ECON 8220 Human Resources and Labor Markets
CREDIT HOURS 3.0
PREREQUISITES ECON 3910 and MBA 7030
DESCRIPTION The course examines the operation of labor markets, the determination of labor supply, labor demand, and wages, and the impact that market forces and institutions have on the practice of human resource management and employment relations. A variety of public policy issues related to the labor market are also considered.

</thead>
<tbody>
<tr>
<td>ECON 8230</td>
<td>Experimental Economics</td>
<td>3.0</td>
<td>ECON 8100 or MBA 7030</td>
<td>This course introduces the student to economics experiments, providing the tools and concepts to evaluate and conduct economics experiments. Students will be encouraged to think about the empirical and policy implications of theories taught in other economics classes and to learn skills that are used to conduct empirical analysis (using both experimental and field data). We consider the historical development of experimental economics, market experiments (where policy issues such as market power and regulation are considered), bargaining and games (where we will focus on bargaining and collective action problems), and individual decision-making experiments (focusing on decision making under risk).</td>
</tr>
<tr>
<td>ECON 8300</td>
<td>Urban Economics</td>
<td>3.0</td>
<td>ECON 8080 or ECON 3910</td>
<td>This course examines the underlying causes of urban economic problems and evaluates alternative public policies for dealing with specific problems including congestion, discrimination, poverty, affordable housing, and central city decay. Emphasis is placed on the spatial characteristics of the urban economy as well as on market failures arising from the presence of externalities.</td>
</tr>
<tr>
<td>ECON 8310</td>
<td>Economics of Educational Policy</td>
<td>3.0</td>
<td></td>
<td>This course explores policy issues associated with K-12 education, focusing on issues raised since the publication of A Nation At Risk. The course first provides an economic conceptual framework in which to evaluate education policy alternatives and then examines education reform proposals that have been advanced over the last two decades.</td>
</tr>
<tr>
<td>ECON 8320</td>
<td>Environmental and Natural Resource Economics and Theory</td>
<td>3.0</td>
<td>ECON 2106 or ECON 8100 or PMAP 8141 or MBA 7030 or consent of the instructor</td>
<td>The goal of this course is to stimulate critical thinking about today's environment and natural resource problems and the public policies designed to alleviate them. It attempts to broaden students' approaches to evaluating the state of their environment and the policies that affect the environment through critical analyses of case studies concerning current environmental issues. Students will gain experience in applying principles of economic analysis to evaluate today's environmental issues and public policy.</td>
</tr>
<tr>

<tr>
<td>ECON 8430</td>
<td>Theory of the Firm and Business Strategy</td>
<td>3.0</td>
<td>ECON 8100</td>
<td>An application of microeconomic theory and industrial organization to topics for internal firm organization and strategic business decision-making. Topics vary, but typically include transactions cost analysis and empirical implications, multiproduct cost concepts, vertical integration, product differentiation and product quality, durable good pricing, innovation and patents, spatial competition, delivered (base point) pricing, price discrimination, product building, network economies and information implications, and special topics in regulatory economies and transitional adjustments in deregulated industries.</td>
</tr>
</tbody>
</table>
ECON 8440  Industrial Organization and Antitrust Economics
CREDIT HOURS  3.0
PREREQUISITES  ECON 3910 or MBA 7030
DESCRIPTION  This course applies microeconomic analysis to the study of firm strategies and industry behavior, with special emphasis on those horizontal and vertical interactions that have been subject to antitrust scrutiny. Specific examples include price fixing, mergers, tying contracts, exclusive dealer and territorial arrangements, price discrimination, boycotts and reciprocity, and various predation strategies. Doctrinal disputes are explored and specific cases studied in light of the academic literature in industrial organization.

ECON 8460  Economics of the State and Local Public Sector
CREDIT HOURS  3.0
PREREQUISITES  ECON 8080 or PMAP 8141 or MBA 7030
DESCRIPTION  This course focuses on the application of economic principles to fiscal decisions of state and local governments. Three major topics are discussed: the description and analysis of revenue sources including taxes, lotteries, and debt; intergovernmental fiscal relations including grants, school-aid programs, and the allocation of functions between levels of government; and the provision of public services.

ECON 8470  International Public Economics
CREDIT HOURS  3.0
PREREQUISITES  ECON 8080 or PMAP 8141 or MBA 7030
DESCRIPTION  This course is a survey of topics in international public economics with an emphasis on world-wide practices. The purpose of the course is to provide students with case studies of international experiences developed using standard tools of public economics so that students can analyze these and other topics outside the classroom. The course uses the concepts of public economics (public goods, externalities, economic efficiency, equity, and income distribution) to analyze issues such as the following: Which level of government should provide which goods. How should a tax system be structured in developing, transitional, and developed economies. How many levels of government should exist. How can taxes be more effectively collected. At the end of the class, students will be familiar with the more important policy questions facing countries around the world and will be better equipped to analyze alternative policy reforms.

ECON 8500  History of Economic Thought
CREDIT HOURS  3.0
PREREQUISITES  ECON 2106
DESCRIPTION  This course deals with the development of political economy from its Greek origins through the twentieth century. The continuity of intellectual and economic thought and their relationship to changing social and political settings are stressed. Particular emphasis is placed on the Classical and neo-Classical authors and their critics.
ECON 8600  Economics of Development  
CREDIT HOURS 3.0  
PREREQUISITES ECON 8100 and ECON 8740  
DESCRIPTION This course examines the microeconomic foundations of issues of development in poor countries. The course will focus on the study of household behavior and the analysis of how institutions in developing countries work. Topics include the neoclassical unitary household model, intra-household bargaining and allocation, the effect of incomplete and imperfect markets on labor and land market arrangements, savings and credit institutions in the face of imperfect information, and risk sharing and its effects on decisions, and social interactions in decision-making.

ECON 8710  Introduction to Statistical Foundations for Econometrics  
CREDIT HOURS 3.0  
PREREQUISITES Basic probability and statistics; multivariate calculus is recommended  
DESCRIPTION The course provides probability and statistical tools necessary for studying econometrics at graduate level. Topics covered include basic techniques of probability theory, estimation, hypothesis testing, estimation methods, and matrix algebra. Applications of these concepts to economic problems and illustrations from business and economics are emphasized.

ECON 8740  Applied Statistics and Econometrics  
CREDIT HOURS 3.0  
DESCRIPTION This course develops basic knowledge of applied statistics and applied econometrics with particular emphasis on the relationship between economic variables. The first part of the course reviews statistical measures, random variables, and probability distributions. It will examine the role of a random sample and estimation and testing of parameters. The second part will introduce estimation approaches such as simple ordinary least squares and then multiple regression. These techniques will be applied to real data for the purpose of policy analysis in areas as diverse as health, labor markets, finance, development, and taxation.

ECON 8780  Financial Econometrics  
CREDIT HOURS 3.0  
PREREQUISITES ECON 8740 or ECON 9720 with grade of C or higher  
DESCRIPTION The course provides background in financial econometric methods to conduct applied empirical work using financial data. The topics covered are predictability of asset returns; modeling of volatility (ARCH-GARCH and stochastic volatility); high-frequency data models; extreme values and VaR; multivariate time series analysis (VAR, cointegration, principal components, factor analysis); continuous-time models; and econometrics of option pricing models and term-structure of interest rates.

It develops an open economy macro model showing balance of payments equilibrium, and assesses policies to deal with imbalances. It examines the impact of international capital flows.</td>
</tr>
<tr>
<td>ECON 8899</td>
<td>Causal Inference and Evidence-based Policy</td>
<td>3.0</td>
<td>A graduate-level statistics course that covers probability theory, hypothesis testing and linear regression</td>
<td>If unsure about prerequisite, contact the professor. To answer cause-and-effect questions, a counterfactual model of causality and a unified methodological framework has been developed over the last three decades. This class aims to teach students to apply and interpret the counterfactual model and associated designs for answering policy-relevant empirical questions. Students will gain a deeper understanding of, and connections among, approaches to answering causal questions and of the nature of evidence itself. The topics comprise experimental designs and a suite of observational designs, including conditioning designs, partial identification designs, multiple control group designs, instrumental variable designs, regression discontinuity designs, synthetic control designs and tests of known effects and sensitivity tests to hidden bias. These topics are examined in a broad range of policy domains (poverty, planning, economic development, politics, crime, social work, health, public finance, environment, and others).</td>

</tbody>
</table>
ECON 8999  Masters Research in Economics  
**CREDIT HOURS** 1.0 - 18.0  
**DESCRIPTION** May be repeated for credit; does not count toward degree requirements. This course is designed for graduate research and teaching assistants seeking to conduct supervised research on topics related to duties or instructional technologies. A grade of S or U will be assigned based on attendance and participation in departmental research activities.

ECON 9000  Doctoral Research  
**CREDIT HOURS** 1.0 - 18.0  
**DESCRIPTION** Doctoral students who have not yet passed their field examinations and are not registered in nine or more hours of course work on their program of study must register for this course to satisfy continuous registration requirements. A grade of S or U will be assigned based on attendance and participation in departmental research activities.

ECON 9010  Microeconomic Analysis I  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Only Ph.D. students in economics, business, and political science, except by special permission from the instructor  
**DESCRIPTION** This course is designed for Ph.D. students who plan to take the entire microeconomics theory core sequence at Georgia State University (ECON 9010, ECON 9030). This course provides comprehensive coverage of microeconomic topics by analyzing the applications to the theory. Topics include basic introduction to game theory, consumer theory, and the economics of risk and uncertainty.

ECON 9020  Macroeconomic Analysis I  
**CREDIT HOURS** 3.0  
**PREREQUISITES** ECON 3900 and ECON 6030 or MGS 9910  
**DESCRIPTION** This course covers the theory of aggregate demand and supply, sector demand functions (consumption, investment, money), disequilibrium models, economic growth, inflation, unemployment and expectations, stabilization, and control.

ECON 9030  Microeconomic Analysis II  
**CREDIT HOURS** 3.0  
**PREREQUISITES** ECON 8030 and ECON 9010  
**DESCRIPTION** This course is the second of the two part sequence in Microeconomic theory. Topics covered include: Producer theory, partial and general equilibrium analysis, welfare economics and information economics.

ECON 9040  Macroeconomic Analysis II  
**CREDIT HOURS** 3.0  
**PREREQUISITES** ECON 9020 and ECON 8030  
**DESCRIPTION** This is the second of two advanced macroeconomics courses designed to bring graduate students to the frontier or current research. Topics in this course include money and monetary policy, growth theory, and theories of economics fluctuations. Strong attention will be paid to policy implications.

ECON 9080  Topics in Macroeconomic Theory  
**CREDIT HOURS** 3.0  
**PREREQUISITES** ECON 9040  
**DESCRIPTION** This second course in advanced macroeconomic theory covers special topics in contemporary macroeconomics. While some topics may vary from year to year in response to theoretical developments, primary emphasis is placed upon the overlapping generations model, money, multiple equilibria, and optimal consumption.

</tr>
</tbody>
</table>
ECON 9310  Environmental and Resource Economics I
CREDIT HOURS  3.0
PREREQUISITES  ECON 8100 and ECON 8120
DESCRIPTION  This course is part of a two-course sequence designed to provide students with a working knowledge of the most important models and analytical techniques used in the design of public policy for the management and conservation of natural and environmental systems; environmental benefits measurement; and dynamic models of natural resource management.

ECON 9320  Environmental and Resource Economics II
CREDIT HOURS  3.0
PREREQUISITES  ECON 8100 and ECON 8120
DESCRIPTION  This concluding section of environmental and resource economics will focus the skills developed in Environmental and Resource Economics I toward using theoretical models and analytical techniques associated with contemporary environmental and natural resource management problems.

ECON 9325  Applied Environmental Economics
CREDIT HOURS  3.0
DESCRIPTION  This course focuses on empirical applications in environmental economics. It covers several methods used in applied economics research to tackle various environmental issues, such as climate change mitigation, climate change adaptation, congestion, water pollution, health consequences of local air pollution, and several more.

ECON 9330  Regional Economics
CREDIT HOURS  3.0
PREREQUISITES  ECON 8100 and ECON 8300 or equivalent
DESCRIPTION  The course examines the structure and development of regional economies, the causes of growth among regions, and the location of economic activity within an economic system. The role of factor mobility and other determinants of growth will be covered.

ECON 9340  Experimental Economics
CREDIT HOURS  3.0
DESCRIPTION  ECON 930 with grade of C or higher. This course is a research class in experimental economics that is intended to expose students to a varied set of experimental economics research papers to guide them to think about economics from the perspective of an empirical science. The course provides students with a working knowledge of techniques for conducting experiments in economics and helps them design their own experiment(s).

ECON 9450  Advanced Public Economics I
CREDIT HOURS  3.0
PREREQUISITES  ECON 8100
DESCRIPTION  This is an advanced course that focuses on the theory of and recent research on public expenditures. Topics include: Public goods, externalities, cost benefit analysis, and bureaucracy.

ECON 9460  Advanced Public Economics II
CREDIT HOURS  3.0
PREREQUISITES  ECON 8100
DESCRIPTION  This is an advanced course that focuses on the theory of recent research on taxation. Topics covered include: tax incidence, incentive effects of taxation, and welfare analysis of taxation.

ECON 9610  Health Economics I: Economics of Health Care Supply

CREDIT HOURS 3.0

DESCRIPTION ECON 9010 and ECON 9030 with a B- or higher, or consent of instructor. The field of health economics can be broadly described as consisting of two parts: 1) the demand side, or factors influencing individuals' demand for health and medical care, and 2) the supply side, or factors influencing health care providers' supply of medical services. This course focuses on the supply side of the field, divided into eight segments: 1) An overview of the field of health economics that focuses on what makes health economics a distinct field and where health economists typically work, 2) the transformation of medical care into health, 3) the market for physician care, 4) the market for hospital care, 5) the market for health insurance, 6) public health insurance, 7) private health insurance, and 8) health care reform and the ACA.

ECON 9620  Health Economics II: The Demand for Health and Health Care

CREDIT HOURS 3.0

DESCRIPTION ECON 9010 and ECON 9030 with a B- or higher, or consent of instructor. The field of health economics can be broadly described as consisting of two parts: 1) the demand side, or factors influencing individuals' demand for health and medical care, and 2) the supply side, or factors influencing health care providers' supply of medical services. This course focuses on the demand side of the field, divided into eight segments: 1) an introduction that focuses on trends in health care spending, 2) the human capital model of health, 3) socioeconomic status and health, 4) health insurance and health, 5) economic models of addiction 6) the economics of smoking, 7) the economics of alcohol, and 8) the economics of obesity.

ECON 9710  Econometrics I: Statistical Foundations

CREDIT HOURS 3.0

DESCRIPTION This course covers probability and statistical tools necessary for studying econometrics. Topics covered include basic techniques of probability theory, estimation, hypothesis testing, and maximum likelihood methods. Applications of these concepts to economic problems and illustrations from economics are emphasized.

ECON 9720  Econometrics II

CREDIT HOURS 3.0

PREREQUISITES ECON 9710 or MGS 9920

DESCRIPTION This course covers the econometric techniques for linear models. Subjects include the classical linear regression model, generalized least squares, instrumental variable methods, and generalized method of moments. An introduction to asymptotic distribution theory is provided. Emphasis is placed on inference and specification testing. Brief introductions to time series techniques and dichotomous choice models are included.

ECON 9730  Advanced Econometrics

CREDIT HOURS 3.0

PREREQUISITES ECON 9720 or MGS 9950

DESCRIPTION The course deals with advanced econometric methods for the analyses of cross-section and panel data. Topics include generalized method of moments, semiparametric and nonparametric methods, and extensive coverage of panel data, discrete response, censored and selection models. Empirical implementation is an essential component of the course.

</thead>
<tbody>
<tr>
<td>ECON 9740</td>
<td>Time Series Econometrics</td>
<td>3.0</td>
<td>ECON 9720</td>
<td>This course is designed to provide students with the necessary theoretical and applied tools to conduct research involving time series data. The topics covered are stationary univariate (ARMA) and multivariate (VAR), and nonstationary univariate (unit roots) and multivariate (spurious regressions and cointegration) time series models; forecasting, estimation and asymptotic theory in the context of time series models; nonlinear models (ARCH/GARCH, regime shifts) and others.</td>
</tr>
<tr>
<td>ECON 9750</td>
<td>Topics in Econometrics</td>
<td>3.0</td>
<td>ECON 9720 and ECON 9730</td>
<td>The course provides in-depth treatment of selected current topics in econometrics. Topics include program evaluation, spatial econometrics, survival analysis, and data management.</td>
</tr>
<tr>
<td>ECON 9780</td>
<td>Data Management and Analysis</td>
<td>3.0</td>
<td>ECON 9720 (C or better)</td>
<td>This course will help students how to use and analyze large data sets in economics and introduces students to programming language. Although the primary focus is on Stata, Matlab or R programs may be considered for more flexible programming. The course is intended to give students the necessary data management and programming skills to undertake a guided research project during their second year. It will also serve as a building block in applied economic analysis. Specifically, students will learn how to read, write and combine data; how to extract and manage data from large data sources; how to manipulate and prepare data for research purposes; how to describe, tabulate and display various data types; how to conduct basic analysis and work with descriptive and regression output; and how to address common data problems, such as missing data.</td>
</tr>
<tr>
<td>ECON 9800</td>
<td>International Trade Theory</td>
<td>3.0</td>
<td>ECON 8100</td>
<td>A rigorous development of the pure theory of international trade, examining the economic factors which in the long-run determine the structure of trade. The classical, neoclassical, and modern theories of international trade; the gains from trade; and factor movements are all analyzed in detail. Trade theory is also applied to commercial policy and economic integration.</td>
</tr>
</tbody>
</table>
**ECON 9880**  International Monetary Economics  
**CREDIT HOURS** 3.0  
**PREREQUISITES** ECON 8100 and ECON 8110  
**DESCRIPTION**  This course deals in a systematic fashion with the monetary aspects of international trade and investment. Topics covered include the foreign exchange market, the balance of payments, adjustment under alternative monetary systems, international capital movements, and policies to maintain external and internal balance.

**ECON 9940**  Workshop in Experimental Economics  
**CREDIT HOURS** 3.0  
**PREREQUISITES** ECON 9340  
**DESCRIPTION**  This workshop is intended to support dissertation research by Ph.D. students while encouraging Ph.D. students to work and interact with several faculty members on a continuing basis. The course integrates research seminar presentations in experimental economics by resident faculty and visiting scholars into the Ph.D. field research experience. The course prepares Ph.D. students to write and submit research papers for professional journal review.

**ECON 9942**  Project Development in Experimental Economics  
**CREDIT HOURS** 2.0  
**PREREQUISITES** ECON 9340 with a C+ or higher, or consent from instructor  
**DESCRIPTION**  This course is intended to prepare students to design and conduct computerized economic experiments. Students learn how to write original software for conduct their own experiments. Students also learn laboratory procedures for conducting experiments within the Georgia State University Experimental Economics Laboratory.
EDUC 7440  Self in Society: Decolonizing Educator Identities Toward Excellence in Urban Education

CREDIT HOURS  3.0

DESCRIPTION  This course centers the documented need for teachers to be self-aware of their positioning in society and reflective of their work as educators. As a foundational course in the Endorsement of Urban Education, this course centers the self in relation to society and structures of power toward helping the learner best engage their current and future students—and anyone they will come to teach. Students use an ecological identity development theory to afford a nuanced view of how our “self” is constructed socially, culturally, politically and historically—all through a decolonizing lens, one that allows us to name and work toward undoing oppressive histories. This course satisfies Strand 1 of 3 in the Urban Education Endorsement.

EDUC 7460  Culturally and Historically Responsive Education

CREDIT HOURS  3.0

DESCRIPTION  This course blends history, theory and practice for understanding and implementing culturally and historically responsive educational practices in classrooms and communities. Students critically reflect and engage in issues of culture, identity, equity, inclusion, and criticality in education for teaching and learning.

EDUC 7777  Field Experiences in International Education

CREDIT HOURS  0.0 - 3.0

REQUIREMENTS  Students must participate in the international travel required for this course.

DESCRIPTION  Modern communication technologies have increasingly made the countries of the world more interdependent. This interdependency can be either positive or negative. This course seeks to provide students with a global perspective on education and society, and its impact on both culture and world affairs. This course will concentrate specifically on the educational system and customs of the host country. Lectures and class discussions, utilizing the student’s first hand experiences, will be directed toward cultural analysis of the host country with special focus on how educational systems help shape national consciousness. Cross-listed with EDUC 3333.

EPY 7080  The Psychology of Learning and Learners
CREDIT HOURS  3.0
DESCRIPTION  This course provides an overview of major behavioral, cognitive, and sociohistorical approaches to learning with consideration of learning across the life span. Sources for individual differences in learning are discussed.

EPY 7090  The Psychology of Learning and Learners: The Young Child
CREDIT HOURS  3.0
DESCRIPTION  This course provides an overview of major behavioral, cognitive, and sociohistorical approaches to learning with a special emphasis on learning in the young child. Sources for individual differences in learning are discussed.

EPY 7660  Practicum in Applied Behavior Analysis
CREDIT HOURS  3.0
PREREQUISITES  Admission to the M.S. program in Applied Behavior Analysis or in Educational Psychology at Georgia State University or by special permission of the Applied Behavior Analysis Program Coordinator
DESCRIPTION  Students must have completed with a grade of B or higher the following courses: EPY 8020, EPY 8850, and EPY 8970. This course will provide students with opportunities for supervision of clinical work in applied behavior analysis. The course will follow the experience guidelines set forth by the Behavior Analyst Certification Board (bacb.com). The purpose of this course is to provide additional learning opportunities in the areas of working directly with clients/customers, implementing treatment plans, and monitoring and analyzing data to make data-based decisions. Students enrolled in practicum will be required to find placement at an approved practicum site that will allow them to meet the specified hour requirements. (Repeatable).

EPY 7975  Seminar for Graduate Assistants
CREDIT HOURS  3.0 - 18.0
REQUIREMENTS  A minimum grade of "S" is required for this course
DESCRIPTION  This course is designed to inform students of policies and procedures to complete an assistantship. Professional ethics associated with teaching, research planning, management, and accounting procedures are reviewed. The course focuses on the teaching and research being conducted in order to further the understanding of all students involved in teaching and research. Course is graded as satisfactory/unsatisfactory. (Repeatable).

EPY 7990  Master's Capstone
CREDIT HOURS  1.0 - 6.0
PREREQUISITES  Restricted to MS Educational Psychology students
REQUIREMENTS  A minimum grade of "S" is required for this course
DESCRIPTION  Students earn credit for supervised development and preparation of the project, thesis, or comprehensive examination for the M.S. degree with a major in educational psychology. The master's thesis may extend beyond one term. The thesis is graded as satisfactory/unsatisfactory. (Repeatable).

<tr>
<td>ENGL 8065</td>
<td>Foundations of Modern Critical Theory</td>
<td>3.0</td>
<td>Survey of the philosophical, psychological, and political writings that form the basic foundations of modern critical theory. Works studied range from the late 18th to the mid 20th centuries and may include texts by Kant, Hegel, Marx, Nietzsche, Freud, Bataille, Heidegger, Benjamin, Horkheimer, and Adorno.</td>
</tr>
<tr>
<td>ENGL 8070</td>
<td>Contemporary Literary Theory</td>
<td>3.0</td>
<td>A survey of contemporary ideas, issues, and concepts in literary theory from New Criticism to the present day.</td>
</tr>
<tr>
<td>ENGL 8071</td>
<td>Trauma Literature, Culture, and Theory</td>
<td>3.0</td>
<td>This course will introduce students to the complex literature of trauma theory in the context of modern social and political events. By surveying classic and contemporary contributions to the field and critical frameworks from psychoanalysis, history, literary studies, postcolonial studies, the social sciences, and psychiatry, students will explore the complex implications of trauma on temporality, historiography, identity, and culture.</td>
</tr>
<tr>
<td>ENGL 8075</td>
<td>Feminist Literary Theory</td>
<td>3.0</td>
<td>Survey of contemporary ideas, issues, and concepts in feminist literary theory.</td>
</tr>
<tr>
<td>ENGL 8090</td>
<td>History of the English Language</td>
<td>3.0</td>
<td>Development of the structure and history of the English language from its Indo-European roots through Old English, Middle English, Early Modern English to Present-Day English. Attention will also be given to social and regional variations of English and the International Phonetic Alphabet (IPA).</td>
</tr>
<tr>
<td>ENGL 8100</td>
<td>Directed Individual Research</td>
<td>3.0</td>
<td>Specialized research projects for doctoral and advanced M.A. students. May be repeated if topics vary.</td>
</tr>
<tr>
<td>ENGL 8115</td>
<td>Technical Writing</td>
<td>3.0</td>
<td>(Formerly ENGL 6110.) Study of scientific and technical styles; practice in various formats, including reports, proposals, instructional manuals, and professional papers.</td>
</tr>
<tr>
<td>ENGL 8120</td>
<td>Proseminar: Writing for Academic Publication</td>
<td>3.0</td>
<td>Study of academic writing and publication opportunities; focus on submitting conference abstracts, book reviews, and journal articles for publication; prospectus writing for M.A. and Ph.D. theses and dissertations. Students will have the opportunity to develop and expand their research in the field in which they choose to write a thesis or dissertation.</td>

<tr>
<td>ENGL 8121</td>
<td>Rhetoric of Digital Media</td>
<td>3.0</td>
<td>This course will introduce current theories and practices for design and production with digital media with the goal of developing rhetorically savvy composers and critics. Covers current digital media theory, digital literacy, and theories of visual, aural, haptic, spatial, and other analysis important for digital rhetoric and composition.</td>
</tr>
<tr>
<td>ENGL 8122</td>
<td>User Experience Research and Writing</td>
<td>3.0</td>
<td>Introduces students to qualitative research methods developed in the software and web design industries that are now used in a wide variety of businesses where an interest in design thinking and user-centered design have become important. Students will learn how to develop effective questionnaires, conduct insightful interviews, lead focus groups, and write actionable persona descriptions. Focus on workplace-based applications.</td>
</tr>
<tr>
<td>ENGL 8123</td>
<td>Digital Media Production</td>
<td>3.0</td>
<td>This course will be production-intensive and focus on current practices in web design and other digital media design for different applications such as scholarly projects, digital pedagogy, online teaching and digital editing.</td>
</tr>
<tr>
<td>ENGL 8124</td>
<td>Web Programming for Writers</td>
<td>3.0</td>
<td>This course will provide students with the skills to build a content management system (a dynamic website) that will effectively share and promote their work as writers and digital communicators.</td>
</tr>
<tr>
<td>ENGL 8125</td>
<td>Writing and Research Methodology</td>
<td>3.0</td>
<td>Theory and practice of reading and conducting empirical research for the study of writing. Strong emphasis on theoretical and ethical principles of research methodology important for critically reading empirical research and designing new studies.</td>
</tr>
<tr>
<td>ENGL 8160</td>
<td>Form and Theory of Literary Craft</td>
<td>3.0</td>
<td>Study of literary structures and techniques. Designed for but not limited to creative writing students. May be repeated if topics vary.</td>
</tr>
<tr>
<td>ENGL 8170</td>
<td>History and Theory of Rhetoric and Composition I</td>
<td>3.0</td>
<td>The first of a two-part survey of the field of rhetoric and composition, this class explores the major works, ideas, and theories developed in roughly the first 1,000 years of rhetorical history. Selected readings and emphases may change in different sections.</td>
</tr>
<tr>
<td>ENGL 8171</td>
<td>History and Theory of Rhetoric and Composition II</td>
<td>3.0</td>
<td>The second of a two-part survey of the field of rhetoric and composition, this course explores the trajectory of developments in oratory, belles-lettres rhetoric, composition pedagogy, print rhetoric, and varied venues of rhetorical engagement from the Early Modern period to the present. Selected readings and emphases may change in different sections.</td>
</tr>
</tbody>
</table>
ENGL 8174  Twentieth and Twenty-first Century Rhetoric
CREDIT HOURS  3.0
DESCRIPTION  Contemporary scholarship from foundational Twentieth-Century rhetorical theories to current diverse perspectives that inform Rhetoric and Composition Studies.

ENGL 8175  Topics in Rhetoric and Composition
CREDIT HOURS  3.0
DESCRIPTION  Focused study of a problem, question, issue, genre, or specialized subject not covered in other courses. May be repeated as topic varies.

ENGL 8180  Contemporary Issues in Writing Studies
CREDIT HOURS  3.0
DESCRIPTION  This course examines foundational concepts theorized by writing researchers in the 20th Century and explores contemporary social, political, and ideological issues associated with writing studies, including debates about how people learn to write and use language in order to investigate contemporary scholarship in composition theory and pedagogical practice.

ENGL 8195  Composition Pedagogy
CREDIT HOURS  3.0
DESCRIPTION  An introduction to methods and contemporary practices for teaching writing in classroom and writing center settings; practical applications focusing on strategies for course development and assignment design, response, assessment, and reflective classroom practices.

ENGL 8201  Contemporary Poetry
CREDIT HOURS  3.0
DESCRIPTION  Survey of contemporary poetry. Designed for but not limited to creative writing students. May be repeated if topic varies.

ENGL 8202  Contemporary Fiction Craft
CREDIT HOURS  3.0
DESCRIPTION  Study of fiction technique through the reading and analysis of contemporary fiction. Designed for fiction writers. May be repeated if topic varies.

ENGL 8203  Twentieth-Century American and British Poetry Craft I
CREDIT HOURS  3.0
DESCRIPTION  Close analysis of selected works by major American and British poets, primarily of the first half of the 20th century. Designed for, but not limited to, creative writing students.

ENGL 8210  Old English
CREDIT HOURS  3.0
DESCRIPTION  An examination of grammar and other features of Old English.

ENGL 8220  Beowulf
CREDIT HOURS  3.0
DESCRIPTION  The poem as a literary masterpiece and as an important philological document. Knowledge of Old English is required.

ENGL 8250  Middle English
CREDIT HOURS  3.0
DESCRIPTION  Medieval texts with emphasis on philology.

ENGL 8270  Chaucer
CREDIT HOURS  3.0
DESCRIPTION  Chaucer’s major poetry in Middle English. Prior knowledge of Middle English is not required. May be repeated if topics vary.

</tbody>
</table>
ESL ENGLISH SECOND LANGUAGE (GRAD)

ESL 7100  Building Academic Language
CREDIT HOURS  2.0
DESCRIPTION  This course is designed to help graduate level non-native speakers of English expand their academic vocabulary for improved speaking, reading, and writing fluency. Students explore the use of online tools to improve their understanding and productive use of general academic vocabulary, phraseology, discipline-specific collocations, and related grammar structures. Students complete written and spoken activities to practice and apply this knowledge.

ESL 7250  Academic Listening/Speaking for Graduate Students
CREDIT HOURS  3.0
DESCRIPTION  This course is designed to improve the aural/oral communication skills of ESL graduate students. Students develop skills that help them (a) give presentations on topics in their disciplines, (b) participate in small group and whole class discussions, (c) listen to and take notes from academic lectures, and (d) improve pronunciation and fluency.

ESL 7350  Academic Writing for Graduate Students
CREDIT HOURS  3.0
DESCRIPTION  This course focuses on improving graduate-level writing, including (a) developing research writing skills, (b) gaining a clearer understanding of writing conventions in students' disciplines, and (c) writing problem-solution papers, data commentary, summaries, and critiques. In addition, (d) students develop an understanding of the use of text organization, complex language structures, and editing skills. Grammar review is incorporated as needed.

ESL 7400  Reading and Summarizing Research
CREDIT HOURS  2.0
DESCRIPTION  This course is designed to help graduate level non-native speakers of English develop their critical reading and summarizing skills, focusing on research articles from their discipline. Students learn how to apply reading strategies to improve their understanding of academic articles, write summaries and critiques, and compile an annotated bibliography or literature review of articles they have selected from their field.

ESL 7500  Teaching at the University for International Teaching Assistants
CREDIT HOURS  3.0
DESCRIPTION  Training and support for GTAs and GLAs who are non-native speakers of English. Focus on the use of spoken English to communicate appropriately in instructional settings.
ENI 8000  Organizational Entrepreneurship. 3.00 Credit hours

CREDIT HOURS  3.0

DESCRIPTION
The course explores contemporary concepts, theories, methods, and tools for systematic and sustainable entrepreneurship within established organizations, companies, non-profits, and public sector organizations. Whether recognized or not, every organization has a continual stream of potential opportunities to create customer demand. However, the complexity and speed of business obscures these opportunities (and threats). Students learn a rigorous and disciplined methodology for discovering and prioritizing opportunities for demand creation and perilous threats that can result in demand destruction. Additionally, the course investigates the emerging micro startup approach that involves a small team of entrepreneurs who innovate a new offering and/or business model.

ENI 8101  Improving the Customer Experience

CREDIT HOURS  3.0

PREREQUISITES
ENI 7101, 2.8 GPA and 45 credit hours

DESCRIPTION
Non-RCB Majors BUSA6090. The course deals with the application of a strategic entrepreneurship approach to dynamic business growth called Demand Creation. To prosper in today's intensely competitive business environment, established organizations must effectively exploit current offerings/business models in ways that maximize customer demand for these offerings. Building on the foundation of ENI 7101, the course focuses on the value enhancement side of Demand Creation – identifying and exploiting the best opportunities to increase the demand for current products/services by raising customer value while simultaneously reducing the cost structure of the offerings (allowing price reduction without margin erosion). Students apply the Demand Creation methodology for improving and extending current offerings.

ENI 8102  Innovating Customer Value

CREDIT HOURS  3.0

PREREQUISITES
ENI 7101, 2.8 GPA and 45 credit hours

DESCRIPTION
Non-RCB Majors: BUSA6090. The course deals with the application of a strategic entrepreneurship approach to dynamic business growth called Demand Creation. To prosper in today's intensely competitive business environment, established organizations must effectively innovate new offerings/business models in timely response to changing social/business realities with the aim of maximizing profitable revenue and creating beneficial social outcomes. Building on the foundation of ENI 7101, the course focuses on the value innovation side of Demand Creation – discovering and exploiting the best opportunities to fulfill important and unsatisfied customer needs via new offerings and business models in a way that maximizes an organization's growth potential.
ENI 8301  Managing for Dynamic Growth
CREDIT HOURS  3.0
PREREQUISITES  ENI 8101 and ENI 8102
DESCRIPTION  Non-RCB Majors: BUSA6090. The course explores managerial action for strategic entrepreneurship within established organizations, companies, non-profit organizations and public sector organizations. The business environment today is both complex and fast, resulting in unprecedented levels of uncertainty. Entrepreneurial organizations exploit this uncertainty to achieve dynamic growth by proactively enhancing and innovating offerings, business models and strategies in timely response to changing social/business realities with the aim of maximizing profitable revenue and creating beneficial social outcomes. Building on the foundation of both ENI 8101/8102, the course focuses on developing an entrepreneurial workforce, developing the requisite organizational capabilities for dynamic growth, and related strategies.

ENI 8302  Leading for Entrepreneurship
CREDIT HOURS  3.0
PREREQUISITES  ENI 7101
DESCRIPTION  Non-RCB Majors BUSA6090. The course explores the intersection of leadership and entrepreneurship within established organizations, companies, non-profit organizations and public sector organizations. It is widely recognized that all established organizations must engage in entrepreneurial activities to one degree or another if they are to remain viable. Entrepreneurial efficacy, in large part, depends on effective leadership. But unlike conventional notions of leadership as a static leader-follower paradigm (military model), leadership in the entrepreneurial context requires entrepreneurial agents to dynamically alternate between leading and following as appropriate to the circumstances.
EPEL EPS/EDUCATIONAL LEADERSHIP

EPEL 7000  Educational Leadership and Organizational Culture
CREDIT HOURS  3.0
DESCRIPTION  Introduces the student to selected theories of educational leadership and their relationship to organizational culture; develops skills in administrative problem analysis and decision making; enables students to sharpen their skills and insights into various models and meanings of leadership practice and school change; and provides students with opportunities to examine their own practices in ways that will improve the performance of the educational organizations.

EPEL 7020  Leadership for a Diverse Society
CREDIT HOURS  3.0
DESCRIPTION  This course is designed to engage students in demonstrating and understanding how the nuances of leadership have changed with regard to our increasing diversity in society as well as our schools. This course will prepare students to demonstrate as well as understand how culturally relevant leadership can be an asset for the diversity found in educational organizations.

EPEL 7330  Law, Policy, and Governance
CREDIT HOURS  3.0
DESCRIPTION  This course provides an overview of the legal systems and governance structure of public schools in Georgia, and the legal issues that face students, parents, and public school employees.

EPEL 7410  Instructional Leadership
CREDIT HOURS  3.0
DESCRIPTION  Students examine supervision, assessment, instruction, and effective implementation of curriculum. The focus will be on instructional program design, curriculum alignment and design in the classroom, effective assessment of student learning. The focus of this course will be on school leaders as instructional leaders.

EPEL 7500  Human Resource Management and School Operations
CREDIT HOURS  3.0
DESCRIPTION  This course is designed to develop knowledge, dispositions, and performances in the areas of human resources and school operations with particular attention given to administrative, instructional, and support personnel in schools and school systems. Specific attention is given to strategic personnel planning, state certification, personnel appraisal and compensation, staff development, and selected areas of student personnel services; budgeting, facilities operation and management, and safe, orderly, engaging learning environments.

EPEL 7680A  Practicum Seminar: Data Analysis and School Improvement Processes for School Leaders
CREDIT HOURS  3.0
DESCRIPTION  The course is designed as a part classroom work and part field-based supervised practicum/internship in a school or district-based setting. Students learn and demonstrate proficiency in the areas of data analysis and school improvement processes (not repeatable).

</tr>
<tr>
<td>EPEL 8330</td>
<td>Advanced Law, Policy, and Governance</td>
<td>3.0</td>
<td></td>
<td>This course is designed to help students understand the role of law, policy, and governance from a regulatory, constitutional, statutory, and judicial perspective. Students will explore how each of these mechanisms has shaped and influenced America's current educational landscape and the implications for school leadership.</td>
</tr>
<tr>
<td>EPEL 8420</td>
<td>Advanced Instructional Leadership</td>
<td>3.0</td>
<td></td>
<td>The course is designed to further the understanding of instructional leadership in an educational organization and will be part classroom work and part field-based supervised practicum/internship in a school or district-based setting. The focus is on approaches to supervisory practices and strategies to bring about improvement in the capacity of schools to improve student achievement by improved teaching and learning processes. The emphasis of this course will be on school leaders as instructional leaders.</td>
</tr>
</tbody>
</table>
EPEL 8500 Central Office Leadership

CREDIT HOURS 3.0

DESCRIPTION This course is designed as an advanced course for individuals who aspire to leadership positions at the building and/or central office level of administration. The concepts that are included in the course content, and the theoretical bases from which the concepts have been developed, are appropriate to all areas of central office leadership.

EPEL 8620 Psychological Aspects of Leadership

CREDIT HOURS 3.0

DESCRIPTION Students learn through a participatory small group experience. Major topics are leadership style, conflict resolution, use of power, planned change, and decision making.

EPEL 8650 The Principal

CREDIT HOURS 3.0

REQUIREMENTS A minimum grade of “B” is required for this course

DESCRIPTION Students investigate the role of the principal from an instructional leadership perspective. His or her role as a catalyst for bringing about new curricula, techniques, organization, and administrative practices is studied. Special attention is given to leadership, instructional programs, management of school operations, evaluation of personnel, student affairs, and auxiliary services. Skill development is emphasized in problem analysis, judgement, decisiveness, and organizational ability.

EPEL 8690 Research-Based Decision Making for School Leaders

CREDIT HOURS 3.0

DESCRIPTION This course is designed to prepare leaders to be effective consumers of research in education and to help others use various methods of inquiry to better understand their contexts and implement positive changes within those contexts.

EPEL 8930 Applied Research

CREDIT HOURS 3.0

REQUIREMENTS A minimum grade of “B” is required for this course

DESCRIPTION This course is the study and exploration of issues in educational administration. It focuses on problem identification, analysis, and problem solving approaches.

EPEL 8970 Seminar in Educational Leadership

CREDIT HOURS 1.0 - 3.0

REQUIREMENTS A minimum grade of “B” is required for this course

DESCRIPTION This course is the study and exploration of issues in educational administration. It focuses on problem identification, analysis, and problem solving approaches. (Repeatable).

EPEL 9000 Concepts of Leadership and Research in Educational Leadership

CREDIT HOURS 3.0

REQUIREMENTS A minimum grade of “C” is required for this course

DESCRIPTION Doctoral students are provided experiences designed to assist them to gain skill in accessing and using the full range of literature in educational leadership research.

EPRS 7900  Methods of Research in Education
CREDIT HOURS  3.0
DESCRIPTION  Students study research methods, procedures, and designs. Preparation of research abstracts in education and related fields is included.

EPRS 7910  Action Research
CREDIT HOURS  3.0
DESCRIPTION  This course provides an overview of the research methods and philosophy of practitioner self-study.

EPRS 7920  Classroom Testing, Grading, and Assessment
CREDIT HOURS  3.0
PREREQUISITES  college algebra
DESCRIPTION  The development and application of classroom assessment instruments and the use of standardized measurement instruments in educational settings are emphasized.

EPRS 8450  Popular Culture as a Qualitative Text
CREDIT HOURS  3.0
DESCRIPTION  This course interrogates popular culture as a qualitative text. Qualitative research methods such as semiotics, textual analysis, and content analysis will be utilized to explore how identities like race, class, gender, and sexuality are represented and constructed in popular culture forms. Many forms of popular culture will be investigated with the intent to analyze, critique, and understand. Forms to be considered include television, film, music, digital media, as well as aspects of material culture such as dress, games, and toys. In addition to learning how to analyze popular culture through media textual analysis, the course will also examine the history of popular culture, its power, and complexities as well as how it is used as a tool of revealing, producing and reproducing ideology and political struggle.

EPRS 8500  Qualitative/Interpretive Research in Education I
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  This is the introductory course in a sequence of three courses (including the core requirement EPRS 8500 and the elective courses EPRS 8510 and EPRS 8520) designed to provide theoretical and practical understandings of qualitative/interpretive research. This course provides students with an overview of the broad field of qualitative methodology, as well as an introduction to historical, philosophical, and policy research methodologies. Students will study theoretical underpinnings of qualitative research and research design. In addition, students will learn how to evaluate qualitative studies and write literature reviews.

<td>Quantitative Methods and Analysis in Education I</td>
<td>3.0</td>
<td>This is the introductory course in a sequence of three courses (including the core requirement EPRS 8530 and the elective courses EPRS 8540 and EPRS 8550) designed to provide theoretical and applied understandings of quantitative research. Fundamentals of research and hypothesis testing are taught and then built upon for instruction in experimental, quasi-experimental, and correlational designs along with the requisite statistical tools for analyzing data from these designs. In addition, skills are developed in the use of SPSS, reviewing research articles, and writing research papers.</td>
</tr>
<tr>
<td>EPRS 8540</td>
<td>Quantitative Methods and Analysis in Education II</td>
<td>3.0</td>
<td>This is the second course in a sequence of three courses (including the core requirement EPRS 8530 and the elective courses EPRS 8540 and EPRS 8550) designed to provide theoretical and applied understandings of quantitative research. In this course, fundamentals of experimental design and quasi-experimental design are built upon for instruction in research designs of more than two populations, designs with more than one independent variable, repeated-measures designs, and the ANOVA techniques appropriate for these designs. Fundamentals of hypotheses testing are extended with the introduction of sampling distributions and power analysis, and this course introduces designs for multiple predictor variables of a single criterion variable. Skills at using SPSS, reviewing research articles, and writing research reports are further developed.</td>
</tr>
</tbody>
</table>
EPRS 8550  Quantitative Methods and Analysis in Education III  
CREDIT HOURS 3.0  
PREREQUISITES EPRS 8540 with a grade of "C" or higher or instructor permission  
REQUIREMENTS A minimum grade of "C" is required for this course  
DESCRIPTION This is the third course in a sequence of three courses (including the core requirement EPRS 8530 and the elective courses EPRS 8540 and EPRS 8550) designed to provide theoretical and applied understandings of quantitative research. In this course, fundamentals of correlational designs are extended for instruction in designs incorporating one or more independent variables to predict or to explain one dependent variable, including simple linear regression, multiple regression, and logistic regression. This course also provides continued development of skills in the use of SPSS and in writing and reviewing research reports.

EPRS 8560  Computer Use in Educational Research  
CREDIT HOURS 3.0  
PREREQUISITES EPRS 8540 with a grade of "C" or higher or instructor permission  
DESCRIPTION This course introduces programming in the context of educational research. Students will learn the logic of programming along with the tools and best practices for cleaning, manipulating, and graphically displaying data for analysis. The programming language will be noted in the course listing for each semester.

EPRS 8610  Advanced Computer Methods for Educational Research  
CREDIT HOURS 3.0  
PREREQUISITES EPRS 8550 and EPRS 8600 or instructor permission  
DESCRIPTION Advanced topics in statistical software programming in the educational research context are continued. Topics include programming loops, data simulation, and applications of analyses utilizing educational data. The programming language will be noted in the course listing for each semester.

EPRS 8620  Program Evaluation I  
CREDIT HOURS 3.0  
PREREQUISITES EPRS 7900 or consent of the instructor  
DESCRIPTION Students study the formative and summative evaluations of primarily educational products, processes, programs, and systems. Models, philosophies, and methods as well as current controversies and applications, are examined.

EPRS 8640  Case Study Methods  
CREDIT HOURS 3.0  
DESCRIPTION This course is an introduction to qualitative design, analysis, and reporting of the particularity and complexity of case study and the relation of case study to educational evaluation.

EPRS 8660  Bayesian Statistics  
CREDIT HOURS 3.0  
PREREQUISITES EPRS 8540 with a grade of "C" or higher or permission of instructor  
DESCRIPTION This course provides an introduction to Bayesian statistics including Bayes theorem, beta priors and binomial data, normal priors and data, and empirical Bayes.

EPRS 8850  Introduction to Mixed Methods Research
CREDIT HOURS  3.0
PREREQUISITES  EPRS 8500 and EPRS 8530
DESCRIPTION  This is the first course in a two-course sequence (EPRS 8850 and EPRS 8860) exploring mixed methods research. Introduction to Mixed Methods research (EPRS 8850) introduces students to a methodology that combines qualitative and quantitative approaches. Students will explore conceptualization, design, data collection and analysis within a mixed methods framework. The study of this methodology will be contextualized within the broad field of educational research.

EPRS 8860  Advanced Mixed Methods Research
CREDIT HOURS  3.0
DESCRIPTION  This is the second course in a two-course sequence (EPRS 8850 and EPRS 8860) exploring mixed methods research. Advanced Mixed Methods research (EPRS 8860) introduces students to a methodology that combines qualitative and quantitative approaches. Students will explore conceptualization, design, data collection and analysis within a mixed methods framework. The study of this methodology will be contextualized within the broad field of educational research.

EPRS 8920  Educational Measurement
CREDIT HOURS  3.0
PREREQUISITES  EPRS 8540 with a grade of "C" or higher or instructor permission
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  This course is an introduction to measurement theory in education, emphasizing the application of measurement theory to test development and to educational research.

EPRS 9120  Poststructural Inquiry
CREDIT HOURS  3.0
PREREQUISITES  EPRS 8510 with a grade of "C" or higher or permission of the instructor
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  The purpose of this course is to provide an introduction to the function of poststructuralism in the research process. In this course, students will begin to grapple with several different poststructural theories, play with constructing a research design grounded in these theories, and deconstruct the inquiry process. Students will work with theories of Butler, Deleuze and Guattari, Derrida, Foucault, and Lyotard. (Same as ECE 9120).

EPRS 9350  Introduction to Item Response Theory
CREDIT HOURS  3.0
PREREQUISITES  EPRS 8920 and EPRS 8550; or instructor permission
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  This course is an introduction to 1-, 2-, and 3-parameter item response theory models and their applications to educational measurement and educational research.

EPRS 9360  Advanced Item Response Theory
CREDIT HOURS  3.0
PREREQUISITES  EPRS 9350
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  Extends EPRS 9350 to differential item function analysis, multidimensional models, and other advanced applications of item response theory.
EPRS 9380    Discourse Analysis
CREDIT HOURS 3.0
REQUIREMENTS A minimum grade of "B" is required for this course
DESCRIPTION This course focuses on the study of language within social contexts, particularly as applied to teaching and learning within educational settings. Students will have opportunities to read and explore the theories and analytic techniques of a number of researchers, as well as do their own analyses of discourse-based data. (Same as ECE 9380).

EPRS 9400    Writing Qualitative Research Manuscripts
CREDIT HOURS 3.0
PREREQUISITES EPRS 8520 or permission of the instructor
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION This course provides students with a further understanding of how qualitative researchers move from idea to published text.

EPRS 9550    Multivariate Analysis
CREDIT HOURS 3.0
PREREQUISITES EPRS 8550 or instructor permission
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION Students examine a greater depth of topics taught in Quantitative Methods and Analysis in Education I-III, including additional ANOVA and regression designs. In addition, designs incorporating classification techniques are covered, and students are introduced to factor analysis.

EPRS 9560    Structural Equation Modeling
CREDIT HOURS 3.0
PREREQUISITES EPRS 8550 or instructor permission
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION This course introduces research designs and associated statistical analyses for investigating the predictive or explanatory relations among latent variables and observed variables. SPSS is used early in the course, but LISREL is used for most of the statistical analyses in the course.

EPRS 9570    Hierarchical Linear Modeling I
CREDIT HOURS 3.0
PREREQUISITES EPRS 8550 or instructor permission
REQUIREMENTS A minimum grade of "C" is required for this course
DESCRIPTION This is the first course in a sequence of two courses (including EPRS 9571) designed to provide theoretical and applied understandings of hierarchical linear modeling. Foundational knowledge of HLM is taught by extending knowledge of regression analyses to designs involving a nested data structure. Other basic concepts in HLM are also taught, including intraclass correlation and crosslevel interaction. The course also includes instruction in programming for and interpretation of the output for computer software for conducting HLM.
EPRS 9571  Hierarchical Linear Modeling II  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  EPRS 9570 or permission of the instructor  
**DESCRIPTION**  This is the second course in a sequence of two courses (including EPRS 9570) designed to provide theoretical and applied understandings of hierarchical linear modeling. The foundational knowledge of HLM and the basic designs involving multilevel data are built upon for instruction in advanced applications of HLM in educational research, including cross-classified modeling, growth curve analysis, and meta-analysis. Additional instruction is provided in programming HLM software, interpreting the output from the software, and writing research reports of HLM designs and analyses. The course culminates in a research project that students may want to develop into a dissertation or other potentially publishable work.

EPRS 9570  Research Ethics in the Professional and Social Sciences  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  Any prior course in the Quantitative or Qualitative sequence with a grade of C or higher  
**DESCRIPTION**  This course explores ethical and moral dilemmas researchers have encountered in conducting research in the social, professional, and human sciences and the sources of ethical principles and practices they have used in addressing these dilemmas. Philosophical traditions in ethics from around the world and codes of ethical practice from professional associations, government agencies, and other relevant institutions are examined for their applications to choices researchers make and challenges they face. This course is designed to equip researchers studying human behavior and experience to engage in ethical analysis and concrete ethical problem solving when designing, conducting, analyzing, reporting, and applying research design. It is not intended to provide definitive answers to ethical conundrums, but rather to orient the researcher to the moral complexity inherent in all inquiry and present a collection of tools for navigating ethically ambiguous research situations. Students apply these frameworks to their own and others' research dilemmas. Drawing from personal experiences and the professional, social, and human science literature, students develop their own principles for ethical research practice.

EPRS 9820  Advanced Qualitative Data Analysis  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  EPRS 8520 with a grade of C or higher  
**DESCRIPTION**  This course will provide students a chance to continue the development of their analysis skills. It begins with a review of the fundamentals of data analysis and then explores these methods in more detail. Students will bring their own data and practice analyzing them with different theoretical frameworks and analysis methods. The course will also examine ethical and practical considerations of data representation. It is geared to advanced students who have identified (in the Qualitative course sequence) what data analysis method(s) they want to use in an ongoing or future research project. Students will end the course having written a manuscript they can submit.

EPRS 9900  Research Design  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  EPRS 8500 and EPRS 8530 or consent of the instructor  
**DESCRIPTION**  Students study the identification, planning, and implementation of research projects in education.
EPRS 9920  Seminar in Special Topics in Qualitative Research

CREDIT HOURS  3.0

PREREQUISITES  Permission of Instructor

DESCRIPTION  This course is designed for students to research and discuss special topics in qualitative research and analyze issues facing qualitative researchers. (Repeatable- may be taken as many as three times).
Critical Pedagogy

Students learn ways to enhance and stimulate opportunities for democratic schooling. Topics address teaching for social action through community service, critical literacy, multiculturalism, and post colonialism.

Multicultural Education

Students explore educational reforms in relation to race, ethnicity, culture, gender, and diversity within a democratic framework. Emphasis is placed on examining the economic, political, and social frames that affect the quality of education within a multicultural, social reconstructionist perspective.

Social and Cultural Foundations of Education

Students analyze the roles of schools in the social order from the perspectives of the humanities and the social sciences.

Curriculum Foundations for the Educational Leader

This course prepares students to engage in curriculum design, implementation, and evaluation with a critical focus on social, philosophical, and historical foundations as a basis for that work.

Cultural Studies in Education: Film

Images of education presented in popular films are analyzed from a variety of perspectives for their representations of such phenomena as school work, knowing, knowledge, and education.

Cultural Studies in Education: Gender

Students examine the sociocultural relationship between gender and education in U.S. society. Focuses on how schools teach about gender and the ways females and males respond to differing learning contexts.

Sociology of Inner-City Children

Students study problems facing culturally different children. Concepts, problem-solving procedures, and attitudes which aid constructive interaction between culturally different teachers and learners are explored.

Philosophy of Education

Students study major philosophical writings, their relation to the roles of students and teachers, and their relation to the aims of schooling. Students develop philosophy positions and research a philosopher of their choice. Findings are presented to the class for discussion and analysis.

Anthropology of Education

Students study the field of cultural anthropology as it relates to contemporary issues in education. The course focuses on education as a social institution.

Sociology of Education

Students study the myriad relationships between formal systems of education and the dominant characteristics of post-industrial society. Content is derived from current thought and writing in sociology and educational theory and practice.
EPSF 8320  Politics and Policy in Education  
CREDIT HOURS 3.0  
DESCRIPTION Students study political and educational policy processes in relation to such problems as globalization and the nation-state, local and community development, social identification and political participation, pressure groups and indoctrination, academic freedom, and school reforms.

EPSF 8330  Globalization and Education Policy  
CREDIT HOURS 3.0  
DESCRIPTION This graduate course offers an in-depth examination of the way globalization discourses have an impact on educational policy. Students will analyze debates over the knowledge economy and globalizing the curriculum. Case studies from selected nation-states will be used to enhance understandings of educational policy borrowing and lending, privatization in education, international benchmarking and testing, citizenship and social exclusion, and policy modeling in non-governmental organizations (NGOs).

EPSF 8340  History of American Education  
CREDIT HOURS 3.0  
DESCRIPTION Students examine American educational thought and practice emphasizing developments in the nineteenth and twentieth centuries. Special attention is paid to recent works in the field which emphasize the social purpose and context of the U.S. public school.

EPSF 8350  Comparative Educational Systems  
CREDIT HOURS 3.0  
DESCRIPTION This graduate course offers a study of comparative educational systems around the globe. Students will examine the structural systems of educational provision in various countries. Topics also include theory in comparative education, educational reform policies, culture and equality in schooling, challenges to early childhood care, and international aid and human rights for education.

EPSF 8360  History and Politics of Curriculum  
CREDIT HOURS 3.0  
DESCRIPTION Students analyze the history and politics of curriculum through an examination of the enduring ideological debates as well as from the perspectives of educational leaders in the curriculum field.

EPSF 8440  Curriculum Design and Analysis  
CREDIT HOURS 3.0  
DESCRIPTION This course prepares students to lead a school in curriculum design, implementation, and evaluation with a critical focus on social, philosophical, and historical foundations as the basis for that work.

EPSF 8630  Critical Policy Studies  
CREDIT HOURS 3.0  
DESCRIPTION This course describes and clarifies the domains constitutive of critical policy studies as a field that explores policy documents in order to change educational practices toward social justice; questions who benefits most from particular social arrangements; and reveals the degrees to which education policy is inherently political.
Critical Race Theory and Urban Education

Critical race theory is a tradition that explores issues of race and racial power. It is a tradition that takes seriously the need to historically ground understandings of racial identity and the dynamics of present-day racial projects. Not without significance, critical race theory also emphasizes social transformation of racially oppressive ideologies and institutions, including schools. Drawing upon key writings in the field of law and critical race scholarship in urban education, this course explores a range of key themes, questions, and practices relevant to challenging racial inequities.

Epistemology and Learning

Students investigate definitions of knowledge and theories of knowledge in the process of developing their own epistemology positions. Knowledge claims are evaluated in relation to multiple ways of learning, and students present their ideas to the class for consideration and critique.

Historical Research in American Education

Students study selected problems and issues in American education. Primary and secondary source materials are used, and students present their findings to the class for discussion and critique.

Philosophical Analysis and Method

A minimum grade of "C" is required for this course

Students explore cogent reasoning, logic, and conceptual analysis. Students apply each area to research questions of their interest and present their work to the class for examination and debate.
EXC 6350  Orientation to Deafness  
**CREDIT HOURS** 3.0  
**DESCRIPTION** This course is an overview of the field of deafness. Topics include psychosocial aspects of deafness, educational settings, modes of communication, technology, vocational opportunities, social-emotional development, and needs of the deaf and hard of hearing population with multiple disabilities. EXC 6350 will be cross-listed with EXC 4350.

EXC 6360  Audiological Considerations  
**CREDIT HOURS** 3.0  
**DESCRIPTION** An introduction to the types and causes of hearing loss, orientation to hearing testing, and characteristics and needs of individuals with hearing loss. EXC 6360 will be cross-listed with EXC 4365.

EXC 6370  American Sign Language and Deaf Culture I  
**CREDIT HOURS** 3.0  
**DESCRIPTION** This course provides an introduction to basic American Sign Language conversational phrases and fingerspelling skills. Students receive an orientation to Deaf Culture. (Taught with EXC 4370.)

EXC 6380  American Sign Language and Deaf Culture II  
**CREDIT HOURS** 3.0  
**DESCRIPTION** This course prepares students to understand and use the grammar, signs, finger spelling, and non-manual markers of American Sign Language at the intermediate level. Students increase their understanding of deaf culture and explore the American Sign language QCC. (Taught with EXC 4380.).

EXC 6560  Educational Evaluation of Students with Disabilities  
**CREDIT HOURS** 3.0  
**DESCRIPTION** This course is the study of the process of gathering information regarding the individual strengths and needs of students with disabilities. It introduces both formal and informal evaluation procedures used in special education settings. Students select and administer both formal and informal assessment instruments and use the data from these assessments for eligibility decision making, instructional planning, and progress monitoring. Limitations of assessment tools related to test bias and cultural and linguistic concerns are addressed in the areas of test selection, administration, interpretation of test results. Technology that facilitates the assessment process is used throughout the course. This course requires additional assignment(s) beyond those at the initial level. (Repeatable, twice).

EXC 6570  Individual and Classroom Management  
**CREDIT HOURS** 3.0  
**DESCRIPTION** The course is designed to promote skill development in the use of empirically validated methodology on the formation of interventions and effective management strategies for individuals as well as groups across a variety of learning environments. Participants develop an understanding of individual and group motivation and behavior to create a learning environment that encourages positive social interactions, active engagement in learning, and self motivation. A case study approach is used to promote reflection, evaluation, synthesis, and application of principles learned. This course requires additional assignment(s) beyond those at the initial level. (Repeatable, twice).
EXC 6580  Instructional Methods for Students with Behavior/Learning Disabilities

CREDIT HOURS 3.0

DESCRIPTION This course focuses on the fundamental elements of design, implementation, and evaluation of individualized programs based on educationally relevant characteristics of students with mild behavioral and learning disabilities. Research-based strategies and materials for instruction and technology use in the areas of reading, math, and written language are described and demonstrated with an emphasis on explicit teaching approaches. This course requires additional assignment(s) beyond those at the initial level. (Repeatable, twice).

EXC 6590  Functional and Social Methods for Students with Behavior/Learning Disabilities

CREDIT HOURS 3.0

DESCRIPTION This course focuses on development, implementation, and evaluation of strategies and methods to promote the acquisition of critical functional life skills in students with mild disabilities. A major focus is the use of integrated thematic instruction which embeds functional skills in the content area. Adaptive behaviors and strong determination of students' success in various contexts are also included. This course requires additional assignment(s) beyond those at the initial level. (Repeatable, twice).

EXC 6600  Infusing Co-teaching Strategies across the Content Areas

CREDIT HOURS 3.0

DESCRIPTION Instructional models for both special and general education teachers have significantly changed over the last decade as greater numbers of students with disabilities are served in inclusive co-taught classrooms. In this course, students will examine consultative strategies, cooperative teaching techniques, and other culturally-responsive methods that have been designed to foster student performance in diverse inclusive settings. The primary focus of the course is on the development of the collaborative and technical skills of co-teaching across the content areas. EXC 6600 will be cross-listed with EXC 4600.

EXC 6661  Practicum I: Special Education General Education Curriculum: Consultative

CREDIT HOURS 3.0

DESCRIPTION This field-based experience is the first of two required practica for students seeking initial licensure in special education. This practicum provides students with an opportunity to develop and practice skills in delivering instruction and assessment with students who have mild disabilities. Practicum requirements may be completed on the job for those students who are currently employed as a classroom teacher in an approved setting. Students not employed by an approved school will be placed by the program. They will be required to proof of tort liability coverage and have completed a criminal background check through the College of Education Office of Academic Assistance. Students complete the requirements for this practicum with a supervising teacher in a public school setting. The placement requires 15-20 hours per week in classroom settings working with students with mild disabilities. This course requires additional assignment(s) beyond those at the initial level. (Repeatable, once).
EXC 6671  Educational Partnerships and Practicum II: Special Education General Education Curriculum: Consultative

CREDIT HOURS 3.0
PREREQUISITES EPY 2050, EXC 4010, EXC 6560, EXC 6570, EXC 6580, EXC 6590, and EXC 6661

DESCRIPTION This is the second of two required practica for students preparing for initial licensure in special education general education curriculum: consultative. This course includes the study of family systems and parenting perspectives, effective communication, and models of collaboration. Students are placed in public school settings for the entire school day during the semester of their practicum. Practicum requirements may be completed on the job for those students who are currently employed as a classroom teacher in an approved setting. Students not employed by an approved school will be placed by the program. They will be required to show proof of tort liability coverage and have completed a criminal background check through the College of Education Office of Academic Assistance. Students complete the requirements for this practicum with a supervising teacher in a public school setting. The placement requires 15-20 hours per week in classroom settings working with students with mild disabilities. Various means of collaboration within the school setting are discussed as well as roles and responsibilities of school personnel in consultation, collaboration, and teamwork during the required seminars. Learners demonstrate an understanding of the importance of collaboration in specific special education activities such as pre-referral teams, assessment, IEP/ITP meetings, and consultation with general education teachers regarding strategies for working with students with disabilities. This course requires additional assignment(s) beyond those at the initial level. (Repeatable, once).

EXC 7000  Collaboration with Parents and Professionals

CREDIT HOURS 3.0
PREREQUISITES planned certification or degree program or consent of the instructor

DESCRIPTION This course provides students with strategies to successfully collaborate with families, teachers, related staff, and other members of the educational team for students in special education.

EXC 7010  Language Development and Language Disabilities

CREDIT HOURS 3.0

DESCRIPTION This course examines normal and delayed communication development. It includes theories of language development as well as implications for educational programming for preschool and school age students with special needs.

EXC 7030  Applied Behavior Analysis

CREDIT HOURS 3.0
REQUIREMENTS A minimum grade of “B” is required for this course

DESCRIPTION This course is a study of the theory and implementation of behavioral strategies for behavior change in students. Strategies include those for data collection and analysis and behavior increase, maintenance, and decrease. This course is cross-listed with EXC 4030.

1.210
EXC 7130  Assessment for Instructional Planning  
CREDIT HOURS 3.0  
REQUIREMENTS A minimum grade of "B" is required for this course  
DESCRIPTION This course focuses on the design of assessment strategies for students with behavior and learning disabilities to determine specific instructional needs and monitoring of academic progress. Students use assessment data to develop individualized educational programs. Students develop assessment and monitoring strategies in the following curriculum areas: reading comprehension, word decoding, oral language, written expression, writing mechanics, and study skills.

EXC 7150  Methods for Teaching Students with Varying Exceptionalities  
CREDIT HOURS 3.0  
REQUIREMENTS A minimum grade of "B" is required for this course  
DESCRIPTION This course provides an examination of the methods of teaching students with a variety of disabilities. Students will investigate how disability may affect behavior and learning. Empirically-validated methods for teaching communication, socialization, self-help, and academics will be discussed along with the application of these methods across environments.

EXC 7160  Strategies for Social and Emotional Behavior in Students with Behavior and Learning Disabilities  
CREDIT HOURS 3.0  
REQUIREMENTS A minimum grade of "B" is required for this course  
DESCRIPTION This course examines techniques for individual and group behavior management as well as curriculum and teaching strategies for promoting the social and emotional development of students with behavior and learning exceptionalities. Both reactive and proactive strategies for working with students are covered.

EXC 7170  Methods for Teaching Functional Life Skills to Students with Behavior and Learning Disabilities  
CREDIT HOURS 3.0  
REQUIREMENTS A minimum grade of "B" is required for this course  
DESCRIPTION This course trains teachers to implement appropriate strategies and methods for students with behavior and learning exceptionalities in developing critical life skills. A major focus is the use of the thematic approach that allows the training of functional life skills embedded in the content areas of academics, social, and adaptive behavior across age levels. The curricular base for the course is functional life skills including topics in career education.

<tr>
<td>EXC 7190</td>
<td>Alternative Approaches to Literacy Instruction for Students with Disabilities</td>
<td>3.0</td>
<td>Consent of the instructor</td>
<td>A minimum grade of &quot;B&quot; is required for this course</td>
<td>Students study the design, implementation, and evaluation of reading, writing, and spelling instruction for students with disabilities, with an emphasis on an explicit, direct approach to instruction as supported by research. Students study explicit instructional procedures in phonological awareness, decoding, comprehension, writing, spelling. Commercial programs that are research-based and that meet the needs of students with disabilities are reviewed and demonstrated. EXC 7190 is cross-listed with EXC 4190.</td>

</table>
**EXC 7300**  Assistive Technology: Reading and Academics  
**CREDIT HOURS** 3.0  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This course provides instruction in various forms of assistive technology for students with disabilities and includes computer adaptations for physical access and assistive technology to promote reading, writing, math and other academic areas. Course may extend beyond one term.

**EXC 7310**  Strategies for Challenging Behaviors  
**CREDIT HOURS** 3.0  
**PREREQUISITES** EXC 7030 or EPY 8020  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This course is the study of functional assessment and functional analysis procedures for the development of a hypothesis concerning the function of challenging behavior. The development of intervention strategies based on such hypotheses is discussed.

**EXC 7315**  Assessment and Curricular Planning for Students with Autism Spectrum Disorders  
**CREDIT HOURS** 3.0  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This course addresses contemporary assessments and models for evaluating students with ASD. Students will acquire competency in a variety of assessments used for screening, diagnosing, and identifying skill targets for instruction across socialization, communication, sensory, behavior, self-help, and academic domains. Diagnostic prescriptive assessment will be linked to program development and ongoing classroom data collection.

**EXC 7320**  Methods of Teaching Low Functioning Students with Autism Spectrum Disorders  
**CREDIT HOURS** 3.0  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This course provides an examination of the unique learning styles of students functioning on the lower end of the autism spectrum and how their disability may affect behavior and learning. Empirically-validated methods for teaching communication, socialization, self-help, and basic academics will be discussed along with the application of these methods across environments.

**EXC 7325**  Methods of Teaching High Functioning Students with Autism Spectrum Disorders  
**CREDIT HOURS** 3.0  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This course will prepare professionals to plan and implement effective programs for children and youth with Aspergers and those who are functioning at the high end of the autism spectrum. Empirically-based strategies for enhancing functioning in academics, communication, socialization, and behavioral flexibility will be discussed. EXC 7325 is cross-listed with EXC 4325.

**EXC 7330**  Physical and Health Management of Students with Disabilities  
**CREDIT HOURS** 3.0  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This course includes a wide variety of techniques to meet the student's physical and health needs including how to position the student for optimal instruction, lifting and handling procedures, feeding techniques, and health care procedures (e.g., tube feeding, catheterization).
EXC 7360  Language Development in Students Who Are Deaf/Hard of Hearing
CREDIT HOURS  3.0
PREREQUISITES  Consent of Instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  The purpose of this course is to provide students with techniques and strategies for assessing and teaching reading and written language skills to students with hearing loss. Assessment, lesson planning, and effective instruction are addressed. This course is cross-listed with EXC 4460.

EXC 7390  Reading and Writing Instruction for Deaf/Hard of Hearing
CREDIT HOURS  3.0
PREREQUISITES  consent of the instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  The purpose of this course is to provide students with techniques and strategies for assessing and teaching reading written language skills to students with hearing losses. Assessment, lesson planning, and effective instruction are addressed. This course is cross-listed with EXC 4390.

EXC 7400  Methods of Teaching Students Who Are Deaf/Hard of Hearing
CREDIT HOURS  3.0
PREREQUISITES  consent of the instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  The purpose of this course is to provide students with techniques and strategies for assessing and teaching students who are deaf/hard of hearing whether in resource, self-contained, or inclusive settings. Lesson planning, classroom management, curriculum, and effective instruction are addressed. This course is cross-listed with EXC 4400.

EXC 7410  Educational Assessment of Atypical Deaf Students
CREDIT HOURS  3.0
PREREQUISITES  Consent of Instructor; undergraduate degree in deaf education
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course reviews the administration and/or adaptation of assessment tools in speech, language, academic subjects, and cognitive skills of students who are deaf/hard of hearing and have additional learning disorders and relates these to IEPs programming and classroom procedures.

EXC 7420  Methods for Teaching Atypical Students Who are Deaf/Hard of Hearing
CREDIT HOURS  3.0
PREREQUISITES  consent of the instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course presents advanced methods, techniques, and instructional issues regarding the education of deaf/hard of hearing students who have additional learning disorders. Course content covers issues of characteristics, planning, programming, curriculum, and management of additional learning disorders.

EXC 7430  Auditory and Speech Development in Students Who Are Deaf/Hard of Hearing
CREDIT HOURS  3.0
PREREQUISITES  consent of the instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  The purpose of this course is to prepare teachers of students who are deaf/hard of hearing to provide appropriate assessment and intervention to enhance speech and listening skills in clinical and classroom contexts. This course is cross-listed with EXC 4430.
EXC 7460  Mathematics Instruction in Special Education I  
CREDIT HOURS 3.0  
REQUIREMENTS A minimum grade of "B" is required for this course  
DESCRIPTION This course provides core mathematics knowledge for K-8 teachers emphasizing the use of algebraic thinking to connect mathematics, its ideas, and application through conjecture, inventing, and problem solving. This course emphasizes problem solving, sets, whole numbers, functions, numerations systems, whole number computation, integers, fractions, decimals, and percents. Part I of a two part course. (Repeatable, twice).

EXC 7650  Characteristics of Young Children with Disabilities  
CREDIT HOURS 3.0  
PREREQUISITES consent of the instructor  
REQUIREMENTS A minimum grade of "B" is required for this course  
DESCRIPTION This course focuses on legislation and learning and behavioral characteristics of young children with disabilities.

EXC 7660  Methods of Teaching Young Children with Disabilities  
CREDIT HOURS 3.0  
PREREQUISITES EXC 7650  
REQUIREMENTS A minimum grade of "B" is required for this course  
DESCRIPTION This course includes instructional methods, materials, and curriculum used in teaching young children with disabilities. Three-hour weekly field placement is required as part of course.

EXC 7810  Directed Reading and Research in Special Education  
CREDIT HOURS 1.0 - 6.0  
PREREQUISITES consent of instructor  
DESCRIPTION Students intensively study selected areas of special education through special reading or conducting special projects depending on the needs of the student. Directed reading may extend beyond one term. (Repeatable).

EXC 7920  Practicum I: Deaf/Hard of Hearing  
CREDIT HOURS 3.0  
PREREQUISITES contact the department  
DESCRIPTION This intensive practicum course provides opportunity for initial in-depth experiences with deaf and hard of hearing students. This practicum may extend beyond one term. This course is cross-listed with EXC 4920.

EXC 7925  Practicum I: Adapted Curriculum  
CREDIT HOURS 3.0  
PREREQUISITES contact the department  
DESCRIPTION This intensive practicum course provides opportunity for initial in-depth experiences with students with intellectual disability or autism. This practicum may extend beyond one term. EXC 7925 may be cross-listed with EXC 4925.

EXC 7926  Practicum I: Autism  
CREDIT HOURS 3.0  
PREREQUISITES contact the department  
DESCRIPTION This intensive practicum course provides opportunity for initial in-depth experiences with students with autism. This practicum may extend beyond one term.
**EXC 7929**  
**Practicum I: Early Childhood**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** contact the department  
**DESCRIPTION** This intensive practicum course provides opportunity for initial in-depth experiences with early childhood students. This practicum may extend beyond one term.

**EXC 7930**  
**Practicum II: Deaf/Hard of Hearing**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** contact the department  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This intensive practicum course provides opportunity for full-time, in-depth experiences with deaf/hard of hearing students. This practicum may extend beyond one term.

**EXC 7935**  
**Practicum II: Adapted Curriculum**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** contact the department  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This intensive practicum course provides opportunity for full-time, in-depth experiences with students with intellectual disability or autism. This practicum may extend beyond one term. EXC 7935 may be cross-listed with EXC 4935.

**EXC 7936**  
**Practicum II: Autism**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** contact the department  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This intensive practicum course provides opportunity for full-time, in-depth experiences with students with autism. This practicum may extend beyond one term.

**EXC 7937**  
**Practicum II: Physical and Health Disabilities**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** contact the department  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This intensive practicum course provides opportunity for full-time, in-depth experiences with students who have orthopedic impairments. This practicum may extend beyond one term.

**EXC 7939**  
**Practicum II: Early Childhood**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** contact the department  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This intensive practicum course provides opportunity for full-time, in-depth experiences with early childhood students. This practicum may extend beyond one term.

**EXC 7940**  
**Practicum: Deaf/Hard of Hearing**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** contact the department  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This intensive practicum course provides opportunity for advanced in-depth experiences with deaf/hard of hearing students. This practicum may extend beyond one term. This course is cross-listed with EXC 4940.

**EXC 7941**  
**Current Issues in Special Education**  
**CREDIT HOURS** 3.0  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This course provides students with the opportunity for advanced in-depth study and discussion of current important issues in the special education profession.
EXC 7980  
**Research in Special Education: Master’s Capstone**

**CREDIT HOURS**  
1.0 - 6.0

**REQUIREMENTS**  
A minimum grade of "S" is required for this course

**DESCRIPTION**  
Students earn credit for supervised development and preparation of the action research project, research thesis, master’s project, or comprehensive examination for the M.Ed. degree with a major in Special Education. The master’s thesis or action research project may extend beyond one term. The research thesis or action research project, and master’s project is graded as satisfactory/unsatisfactory. (Repeatable).

---

EXC 8770  
**Positive Behavioral Interventions and Supports**

**CREDIT HOURS**  
3.0

**DESCRIPTION**  
This course examines the three-tiered proactive and preventative positive behavioral interventions and supports (PBIS) framework for implementation for all students within a variety of educational environments and across age spans (preschool through secure juvenile justice settings). Each tier will be discussed along with appropriate strategies and interventions. This course emphasizes the PBIS data-based decision-making process and fidelity of implementation in terms of student academic and social outcomes appropriate for a variety of school staff (e.g., teachers, administrators, school psychologists, correctional education, etc.). Note: Course open to students in graduate degree programs from any college in the university; consent of instructor required for students in post-baccalaureate programs.

---

EXC 8810  
**Directed Reading or Research in Special Education**

**CREDIT HOURS**  
1.0 - 6.0

**PREREQUISITES**  
consent of instructor

**DESCRIPTION**  
This independent study course is for intensive study of selected areas of special education not covered in course work. Directed reading may extend beyond one term. (Repeatable).

---

EXC 8961  
**Professional Development Seminar in Special Education**

**CREDIT HOURS**  
1.0 - 3.0

**REQUIREMENTS**  
Course is graded as satisfactory/unsatisfactory

**DESCRIPTION**  
A minimum grade of "S" is required for this course. Students discuss current issues and topics in special education and develop a personal line of research leading to a residency study and preparation for their dissertation. The seminar may extend beyond one term. (Repeatable).

---

EXC 8980  
**Professional Investigation and Writing in Special Education**

**CREDIT HOURS**  
3.0

**REQUIREMENTS**  
A minimum grade of "B" is required for this course

**DESCRIPTION**  
This course for educational specialist students in special education provides the knowledge and skills to complete the research and writing of a school improvement project.

---

EXC 9660  
**Internship in Special Education I**

**CREDIT HOURS**  
3.0

**PREREQUISITES**  
consent of instructor

**DESCRIPTION**  
This internship provides intensive experience for students to teach college level courses in special education under the supervision of a faculty member. Internship may extend beyond one term.
**EXC 9900**  Research Seminar in Special Education  

**CREDIT HOURS**  1.0 - 3.0  

**DESCRIPTION**  Students analyze advanced research in special topics. (Repeatable). [Cross-listed with PSYC 9900L].

**EXC 9981**  Grant Proposal Writing in Special Education  

**CREDIT HOURS**  3.0  

**PREREQUISITES**  EPRS 8530; two course sequence (6 units) in quantitative or single-case methodology  

**DESCRIPTION**  This course provides students with the opportunity to locate and develop private and public grant proposals with an emphasis on special education funding.

**EXC 9985**  Educational Theory and Research Design  

**CREDIT HOURS**  3.0  

**DESCRIPTION**  This seminar will include discussion and assignments related to (a) educational theories, (b) the application of theoretical frameworks to educational research, and (c) developing a line of research.

**EXC 9990**  Dissertation  

**CREDIT HOURS**  1.0 - 18.0  

**REQUIREMENTS**  Course is graded as satisfactory/unsatisfactory  

**DESCRIPTION**  A minimum grade of "S" is required for completion of the dissertation. This course involves the research and writing of the doctoral dissertation. Dissertation may extend beyond one term. (Repeatable).
EDB 9000  Leadership To Create Human Value

CREDIT HOURS  3.0

DESCRIPTION  Leadership is critical for creating and sustaining value in organizations. The academic investigation of leadership focuses on: 1) What is leadership. 2) What are human values. 3) What is the relation between leadership and human values. The course examines these questions to help students untangle concepts of leadership, authority, and status; understand the competing human values in leadership theories; identify the boundary conditions that pertain to leadership theories; and strike an appropriate balance between learning about leadership and learning to lead. The course favors the practical over the theoretical and focuses on theories supported by evidence, including adaptive leadership, transformational leadership, transactional leadership, and competing values leadership.

EDB 9020  Philosophy and Practice of Engaged Scholarship

CREDIT HOURS  3.0

DESCRIPTION  This course explores the different forms of engaged scholarship. It focuses on the research process that can enable students to generate both scholarly contributions and practical knowledge, which is at the core of Robinson's Executive Doctorate program. The course is designed to enable students to develop a research focus and understand the research process. It examines the roles of theory and models in the research process and the differences between variance and process models. Students learn how to formulate a problem, motivate a research question, synthesize relevant literatures, draw on relevant theoretical perspectives, and develop variance and process models.

EDB 9030  Theory and Practice of Managing Organizations

CREDIT HOURS  3.0

DESCRIPTION  This course examines the theory and practice of managing collaboration and change in organizations. The focus is on achieving coordination and cooperation among autonomous and self-interested, yet interdependent parties. Dominant management and organization theories are examined and applied to real-world issues within different industrial contexts. The course introduces the students to a select variety of theoretical frameworks, it investigates the possible roles of such frameworks in designing engaged scholarship research, and it engages all students in exploring specific management and organization theories that are relevant for their research interests.

EDB 9040  Emerging Markets and Global Models for Business

CREDIT HOURS  3.0

DESCRIPTION  This course examines how globalization impacts market intelligence analysis, organization design, and business operation with a focus on differences in business models and practices around the globe. The course is designed to help students appreciate and analyze how cultural, political, and economic systems in emerging markets impact international business activities. The course examines key players in emerging markets, makes comparisons to developed markets, and assesses the informational and institutional voids that exist. It explores how managers can develop strategic alliances that may be employed to create competitive advantage. Emerging markets in regions such as the Americas, Eastern and Central Europe, Asia, and Middle East-North Africa will be examined in more detail.
EDB 9050  Qualitative Research I  3.0

This course introduces the student to qualitative research approaches, including action research, case study research, ethnographic research, and grounded theory. Relative strengths and weaknesses are discussed along with examples of how each approach has been used in practice. The course introduces several data collection techniques that are widely used in qualitative research, namely interviews, participant observation, fieldwork, and using documents. Research design issues associated with qualitative or small sample studies are discussed. Issues such as reliability and validity are explored. The differences between positivist, interpretivist, and critical perspectives are discussed. In addition, students are introduced to the Institutional Review Board (IRB) Process.

EDB 9060  Global Economic Systems & Issues  3.0

This course provides a framework to understand global macroeconomic developments and their effects on businesses. These global developments include: the growth process countries have followed and the various policies that have been implemented; interest rates, exchange rates in international settings, and asset prices in the global economy; causes and consequences of trade deficits and external imbalances; emerging market economy crises; causes of currency, banking and financial crises in emerging market and advanced economies; short- and long-term effects of monetary and fiscal policy; the drive to reform the international financial architecture; and, the role of international economic institutions like the IMF, the World Bank, and the World Trade Organization.

EDB 9070  Qualitative Research II  3.0

This course provides concepts and tools for qualitative data analysis. The course exposes students to a variety of approaches, including hermeneutics, semiotics, narrative analysis, and content analysis, with particular emphasis on grounded theory and case study research. Students are introduced to grounded theory coding, memo writing, theoretical sampling, saturation, sorting, and use of qualitative data analysis software. Various techniques for analyzing case study evidence are explored including pattern matching, explanation building, and within-case and cross-case analysis. Perspectives on what it means to draw conclusions and build theory from qualitative data are explored. The course concludes with guidance on how to write and publish qualitative research.

EDB 9080  Quantitative Research I  3.0

This course provides students with a command of the core concepts and tools needed to design quantitative studies and to collect, evaluate and analyze quantitative data. The course covers empirical data collection methods, such as surveys. It also covers sampling techniques, various types of data and appropriate analytical techniques. These include an introduction to univariate and bivariate statistics (i.e., chi-square, t- and z- tests, the ANOVA family, correlation, and regression). In addition, the course helps students gain proficiency in using SPSS software to analyze and interpret empirical results.
EDB 9100  
**Quantitative Research II**  
**CREDIT HOURS** 3.0  
**DESCRIPTION**
This course introduces students to quantitative methods such as experiments, field studies, and use of secondary data. It strengthens student's ability to design and execute quantitative research with an emphasis on construct measurement (i.e., development of measurement scales associated with key variables of interest) and topics such as theoretical modeling, framing research questions, developing hypotheses, model refinement, reliability, scientific validity, and statistical conclusion validity. The course reinforces the knowledge base developed in Quantitative Research I (EDB 9080) with focus on univariate, bivariate and multivariate statistics (t-test, the ANOVA family, correlations, factor analysis, and OLS regression), nonparametric statistics, and structural equation modeling.

EDB 9110  
**Influences and Limitations on Executive Decision Making**  
**CREDIT HOURS** 3.0  
**DESCRIPTION**
Although executives make decisions continually, many are unaware of the hidden, yet substantial influences that cognitive and organizational factors have on the processes they follow and the outcomes that result. This course examines the human factors that influence and guide executive decision making. It also explores organizational influences on executive decisions, including organizational structure, and social and political forces. It investigates the actions executives can take if they seek to address their human limitations and organizational limitations affecting their executive responsibilities.

EDB 9120  
**Evidence-Based Management**  
**CREDIT HOURS** 3.0  
**DESCRIPTION**
This course develops the student's knowledge and skills related to the role of scientific and organizational evidence in management thinking and decision making. Students will learn to recognize management practices based on habit, fads, convention and unrealistic levels of confidence and how to improve these practices with principles based on relevant scientific findings and unbiased organizational facts. Students will learn how to: identify, access, and use an organization's data challenges; create decision-making information from organizational facts; and find, appraise, interpret and apply scientific evidence as managers.

EDB 9130  
**Ethical Issues Confronting Contemporary Business Leaders**  
**CREDIT HOURS** 3.0  
**DESCRIPTION**
Course content is applied to students' experiences grounded in the assumption that ethics principally concerns cooperative behavior—abiding by rules, conventions and principles; acting in the interest of both self and others; and exploring and determining with others ends and appropriate means. Considering ethics as a potentially important dimension of every human activity, the course examines different types of cooperation and different forms of ethical inquiry that enable human flourishing. As such, this course strives toward developing comprehensive ethical expertise for business leaders.

</thead>
<tbody>
<tr>
<td>EDB 9140</td>
<td>Laboratory for Business Driven Research</td>
<td>3.0</td>
<td>This course is a workshop-oriented forum in which students will meet with their peers and the faculty to discuss obstacles encountered in their research as well as solutions for how to overcome them.</td>
</tr>
<tr>
<td>EDB 9150</td>
<td>Creating and Disseminating Research Knowledge</td>
<td>3.0</td>
<td>This course develops an understanding of the role of executive doctorates in the creation and dissemination of new knowledge. Among the topics to be covered are how to develop a program of research to create knowledge within particular domains of theory and practice; approaches to present, discuss, and defend the results of rigorous engaged scholarship; methods of knowledge dissemination including publication in internal (e.g. white papers) and external (e.g. practitioner or academic publications) outlets; and the process of crafting engaged scholarship research for dissemination through these various outlets.</td>
</tr>
<tr>
<td>EDB 9170</td>
<td>Dissertation</td>
<td>3.0 - 6.0</td>
<td>During the last three semesters students will register for a total of 12 hours of independent dissertation work aimed at addressing a contemporary business problem. During this period, students will be expected to develop and defend a proposal, organize an independent research project, and write and defend a coherent dissertation. This course may be taken multiple times for credit.</td>
</tr>
<tr>
<td>EDB 9171</td>
<td>Dissertation Seminar</td>
<td>1.0 - 9.0</td>
<td>Completed all other EDB course work, permission of the academic program director. The seminar is intended for students who have not finalized their Executive Doctorate dissertation within the designated three years of the program. The objective is to facilitate the participants' dissertation work. During the seminar, the students will meet on a regular basis to present status of dissertation work, to receive critique and guidance on their dissertation, to review relevant research methodology, and, to review key challenges and approaches in dissertation writing. A grade of IP (satisfactory progress was made on the dissertation) or U (satisfactory progress) is assigned each term. At the end of the term during which the dissertation is completed/defended, a grade of S (satisfactory) or U (unsatisfactory) is assigned. May be repeated once for credit.</td>

EMBA 8000  Introduction to Executive Management
CREDIT HOURS
1.0 - 3.0
PREREQUISITES
Consent of director of EMBA program
DESCRIPTION
This course provides an introduction to executive management education. The role of general management, in which the executives have responsibilities for a broad spectrum of tasks, is established. Six themes that transcend any one course and continue through the entire program are identified and introduced. The themes are oral communications, written communications, quantitative analysis, computer skills, interpersonal skills, and an international perspective. Basic skills in accounting and mathematics are covered.

EMBA 8005  Cross-Cultural Business Practices
CREDIT HOURS
3.0
PREREQUISITES
Consent of director of EMBA program. This course is directed toward understanding the changing demographics of the workplace in the United States and the impact culture has on how business is conducted both in the U.S. and in other countries. Emphasis is placed on the awareness of the cultural differences and the recognition of their impact on business norms and practices.

EMBA 8007  Fundamentals of Accounting
CREDIT HOURS
1.0 - 3.0
PREREQUISITES
Consent of director of EMBA program
DESCRIPTION
This course covers the fundamentals of accounting principles. Specifically included are accounting concepts, principles, traditions, and terminology, the accounting model, introduction to the financial statements (balance sheet, income statement, and statement of cash flows), and the bookkeeping process from analysis of transactions through adjustments to the preparation of a balance sheet and income statement.

EMBA 8010  Strategic Digital Transformation
CREDIT HOURS
1.0 - 3.0
PREREQUISITES
Approval of EMBA Director
DESCRIPTION
This course focuses on the understanding of how and why firms need to transform themselves in the increasingly digital world by embracing the changes brought about by the Internet, social media, and big data. Topics included in this course will broadly cover the strategic importance of web, mobile and social media presence for firms, how firms can develop competitive advantage through big data and analytics, and important factors to consider for successful implementation of digital, and social media strategies. Particular attention will be given to real world business case studies to complement theoretical concepts and frameworks.

EMBA 8015  Leading through Strategic Communication
CREDIT HOURS
1.0 - 3.0
PREREQUISITES
Approval of EMBA director
DESCRIPTION
This course presents excellent written and oral business communication as a leadership strategy critical to success in the global workplace. Students master a communication model useful to identify objectives, analyze audiences, choose information, and create the most effective arrangement and channel for written and oral messages. Students will practice influencing and persuading others through strategically aligned business documents that are clear, precise, and readable including communications to executive level readers. Students will also develop skills in the effective design and delivery of persuasive presentations, delivering unwelcome information, and effective, productive group communication, and negotiations.

<tbody>
<tr>
<td>EMBA 8025</td>
<td>Financial &amp; Cost Accounting</td>
<td>1.0 - 6.0</td>
<td>None</td>
<td>This course introduces financial accounting concepts and principles along with elements of financial analytical methods. It is designed to lay a foundation for the Executive MBA curriculum, especially subsequent accounting and finance courses. This course is also a study of the major accounting methods used for costing products, services, programs, projects, departments, and other operational units and cost objects. The primary emphasis is on developing the needed understanding, insights, and skills to correctly use such data in making various kinds of managerial decisions.</td>
</tr>
<tr>
<td>EMBA 8100</td>
<td>Organizational Behavior for Executives</td>
<td>1.0 - 3.0</td>
<td>Consent of director of EMBA program</td>
<td>Designed for the experienced manager, this course is an extensive study of human behavior in the workplace. Among the topics addressed are theories considered critical to the understanding of workplace motivation, communication, leadership, rewards and sanctions, team building, workplace stress, and organization structuring and design. Particular attention is paid to managing persons in complex environments (including the rapidly changing nature of jobs and work and work in international/multicultural settings).</td>
</tr>
<tr>
<td>EMBA 8150</td>
<td>Data Analytics and Decision Making</td>
<td>5.0 - 3.0</td>
<td>Consent of director of EMBA program</td>
<td>This course focuses on quantitative decision making. Analytics is a major component of business decision making to gain competitive advantage. Students will work with data to create predictive models. The course will include time series and regression techniques as well as Bayesian analysis for decision making. Model development, validation, interpretation, and practical application will be addressed.</td>
</tr>
<tr>
<td>EMBA 8200</td>
<td>Legal and Ethical Environment of Business</td>
<td>1.0 - 3.0</td>
<td>Consent of director of EMBA program</td>
<td>This course provides the EMBA student with a study of the interrelationship of law, ethics and business. The course covers the American legal system and ethical responsibilities of business. The course equips the student to recognize legal and ethical issues and to manage legal risks in business decision making.</td>
</tr>

**EMBA 8250**  
**Strategic Marketing Management**  
**CREDIT HOURS**  
1.0 - 3.0  
**PREREQUISITES**  
Consent of director of EMBA program  
**DESCRIPTION**  
The purpose of this course is to provide students with an understanding of the current and future problems faced by the marketing manager. Emphasis is placed on the practical applications of the theories developed in marketing and related literature. More specifically, the marketing mix, including product, price, promotion, and place, is discussed in relation to the environmental characteristics, including competition, technology, governmental regulation, and recent megatrends. Special attention is also given to market opportunity analysis, marketing tactics, marketing strategy and decision making, and evaluation.

**EMBA 8355**  
**Operations and Quality Management**  
**CREDIT HOURS**  
1.5.0  
**PREREQUISITES**  
Consent of director of EMBA program  
**DESCRIPTION**  
This course is directed toward the management and control of operating systems with an emphasis on supply chain management. Specific topics include matching operating decisions to a firm’s strategy; design of operations control systems; unique operations considerations in the services, design, selection and improvement of processes; capacity planning; quality management; and the management of inventories.

**EMBA 8389**  
**Directed Readings in the Executive MBA Program**  
**CREDIT HOURS**  
1.0 - 3.0  
**PREREQUISITES**

**DESCRIPTION**

**EMBA 8400**  
**Managerial Economics**  
**CREDIT HOURS**  
2.0  
**PREREQUISITES**  
Consent of director of EMBA program  
**DESCRIPTION**  
This course uses the basic tools of microeconomics and macroeconomics to analyze management decisions and the competitive strategies of firms in a market economy. Microeconomic concepts of supply and demand, production, cost, and market structure are combined with the macroeconomic issues of aggregate demand and supply and national income determination to develop an analysis of the overall economic environment in which firms operate.

**EMBA 8425**  
**Strategic Assessment in Global Market**  
**CREDIT HOURS**  
1.0 - 3.0  
**PREREQUISITES**  
Approval of EMBA Director  
**DESCRIPTION**  
This course provides EMBA students with tools and frameworks for devising transnational business strategy. Drawing on political economy and managerial strategy, the course examines the intersection of organizational decision-making and country risk. Evolving globalization and political economic management are examined, and attention is focused on how organizations around the world respond to local and global challenges. The course employs comparative qualitative and quantitative analysis across key country cases, such as India, Brazil, and China. Students engage in scenario-based cooperative exercises to solve organizational challenges on the global playing field.
EMBA 8430 Negotiation and Deal Making
CREDIT HOURS 1.0 - 3.0
PREREQUISITES Approval of EMBA director
DESCRIPTION This course is designed to help executives become better negotiators by analyzing and practicing the negotiation strategies and tactics appropriate for different situations. These situations range from straightforward buying and selling to establishing and maintaining long-term agreements with key business partners. Advanced topics such as agent-principal negotiations and multi-party negotiations are also included. The course is a general treatment of negotiation that is useful to executives from a broad range of professions and industries.

EMBA 8450 Asset Valuation, Analysis and Selection
CREDIT HOURS 1.0 - 3.0
PREREQUISITES Consent of director of EMBA program
DESCRIPTION This course considers conceptual and policy issues associated with the financial management of the non-financial firm. Students develop skills in financial analysis and interpretation and examine the various economic profit-based metrics used by financial executives. The dominant paradigms of risk and return are considered, and techniques for the valuation of both financial and real assets are analyzed. Included are capital budgeting techniques for making optimal asset and financing decisions as used in project financing and the setting of hurdle rates and the use of simulation in the conduct of risk management. Financial management practices in other countries are considered. Case analysis is employed, and personal computers are used as a supporting tool.

EMBA 8500 Corporate Financial Policy
CREDIT HOURS 1.0 - 3.0
PREREQUISITES Consent of director of EMBA program
DESCRIPTION This course focuses on the determination and evaluation of the corporate capital strategies. Topics considered include financial structure, leasing, cost of capital, dividend policy, and valuation. The financial topics are combined with the investment strategies to yield a synthetic view of financing-investment interactions and their impact on firm value. The related topics of mergers, acquisitions, and leveraged buyouts are addressed. Case analysis in the classroom will draw upon the background readings in the professional and academic literature and from the lectures. Personal computers are used as a supporting technique.

EMBA 8510 Creating and Valuing New Ventures
CREDIT HOURS 1.0 - 3.0
PREREQUISITES Consent of director of EMBA program
DESCRIPTION This course introduces students to the competencies critical to the successful creation of an entrepreneurial venture. Students will learn frameworks for evaluating the potential of a new product or service, as well as the methods for financing and bringing to market such innovations.

EMBA 8550 Cost Analysis
CREDIT HOURS 1.5.0
PREREQUISITES Consent of director of EMBA program
DESCRIPTION This course is a study of the major accounting methods used for costing products, services, programs, projects, departments, and other operational units and cost objects. The primary emphasis is on developing the needed understanding, insights, and skills to correctly use such data in making various kinds of managerial decisions.

<td>EMBA 8600</td>
<td>Digital Enablement</td>
<td>1.5.0</td>
<td>Consent of director of EMBA program</td>
<td>This course examines the basic components of information technology and how emerging technology has lead to the development of diverse and important business applications. The course provides the student with an understanding of the various kinds of technology and their role in developing an information technology infrastructure. Topics include the basic components of information technology, telecommunications, and electronic commerce. The first half of the course is a comprehensive overview of the various kinds of information technologies. This is then augmented with strategies for successful systems development and implementation. Together these components provide the manager with the skills to properly manage the acquisition technologies within the firm.</td>
</tr>
<tr>
<td>EMBA 8650</td>
<td>International Management Practices</td>
<td>1.0 - 6.0</td>
<td>Consent of director of EMBA program</td>
<td>This course entails the overseas visit to directly observe the practices and concepts of business in foreign countries. The students visit a series of businesses in one or more countries, both U.S. companies doing business in the countries and country-national companies. In addition, discussions are organized between the students and members of the governments in the countries, U.S. business people in the countries, and American Chambers of Commerce in the countries. Time is allowed for students to become familiar with the cultural aspects of the countries visited.</td>
</tr>
<tr>
<td>EMBA 8700</td>
<td>Firms, Markets, Context</td>
<td>1.0 - 3.0</td>
<td></td>
<td>This course introduces several core concepts that are relevant to inquiry in almost every business discipline and useful in every course in this curriculum. These ideas are also central to your development as a leader in a global economy. The primary purpose of this course is to imbue in each student an interdisciplinary conceptual framework for thought and analysis in the first year of MBA study. Students should be able to identify, describe and discuss within theoretical frameworks the following concepts as they appear in everyday market interactions. 1. The Theory of the Firm 2. The Concept of Strategy 3. Firm Level Competitive Advantage 4. Industry Analysis.</td>
</tr>
<tr>
<td>EMBA 8710</td>
<td>Resource Based Management</td>
<td>2.0</td>
<td></td>
<td>This course is designed to build on the EMBA 8700 Firms, Markets and Context. There are three goals in this module. First, the course expands on the material from EMBA 8700 by looking at the basis of resource based competitive advantage. Second, the course develops how resource-based competitive advantage anchors strategic action in innovation strategy, technology strategy and corporate diversification strategy. Third, the course looks at the role of the CEO in creating value in these environments.</td>

Valuation of Financial Assets

3.0

MBA 8135

This course develops core competencies that all finance graduates regardless of area of specialization should possess. Topics include foreign exchange markets, interest rate risk measures, term structure theory, introductory option pricing, futures markets, swaps, and valuation. This course is required of all MBA students seeking a major or a concentration in finance as well as all M.S. in finance students. This course is a prerequisite for all other finance electives except FI 8020 and FI 8040 and may be taken in the same semester as MBA 8135.

Financial Analysis and Loan Structuring

3.0

MBA 8135

This course provides students with the skills to analyze a business, determine its funding needs, and design a financing structure to satisfy those needs (primarily, private debt instruments). There is minimal discussion of pricing; the focus is credit analysis. The principal teaching method is case analysis, and a significant course objective is the development of logical thinking and communication skills. The case mix includes companies of all sizes including small- and medium-sized firms. Students have the opportunity to evaluate the needs of a variety of businesses that differ with respect to type, industry, profitability, growth, cyclicality, and degree of distress.

Survey of International Finance

3.0

MBA 8135

This course surveys the conceptual and institutional aspects of financial decision making in multinational firms in a global economic environment. The students are introduced to foreign exchange risk with special emphasis on the mechanics of foreign exchange and related derivatives markets as well as the parity conditions in international finance. Institutional realities of regional economic blocks, foreign exchanges regimes, euro markets, and balance of payments are discussed to highlight their impact on financial management.

Current Issues in Finance

1.0 - 6.0

MBA 8135

This course allows for in-depth analysis of select, topical issues in finance. Coverage is drawn from current issues in financial markets that do not necessarily require an entire semester of study. As examples, topics could include corporate governance, executive compensation, financial market regulation, and financial system reform. Reliance is placed on authoritative faculty having specific expertise in a topic area, readings from the current professional literature, guest speakers, case studies, and group projects. The topic of each offering will be announced in advance, and students may take this course multiple times for course credit as different topics are covered.
FI 8070  Leading the Finance Function  1.0 - 3.0  
Co-rerequisite: MBA 8135. This course addresses the leadership, design, and organization of the finance function in a modern corporation for effectively promoting the development of human capital and firm value. First, an economics-based framework for leading and organizing a finance department is established with a focus on the optimal assignment of decision rights, the design and alignment of incentive and compensation systems, and performance review and evaluation. Next, a bridge is built between economic theory and practice with the use of case studies and guest speakers representing leading corporate organizations.

FI 8090  Financial Data Analytics  3.0  
PREREQUISITES  None  
COREQUISITES  MBA 8135  
DESCRIPTION  This course provides the foundation for financial data analytics. Students will develop knowledge of data analytics modeling aimed at addressing a range of financial questions in practice. The objective of this course is to gain experience in analyzing financial data using modern machine learning techniques, statistical methods, and prediction models. Students will perform data analysis using a statistical programming environment. Students will have hands-on experience on the development of data analytics applications.

FI 8092  AI and Advanced Analytics Applications in Finance  3.0  
PREREQUISITES  None  
DESCRIPTION  This is an advanced graduate elective course on artificial intelligence (AI) and advanced analytics applications in finance. Students will develop skills for applying modern machine learning methods and other analytics techniques to address practical problems encountered in asset management, corporation finance, and financial institutions settings. Students will develop programming skills using Python language for the applications of these methods. The techniques discussed and applied include tree regression, neural network, textual analysis, web scraping, data visualization, and model assessment and selection using cross-validation.

FI 8200  Derivative Markets I  3.0  
PREREQUISITES  FI 8000  
DESCRIPTION  This course focuses on the valuation, uses, and regulation of derivative instruments-contracts or agreements whose values derive from the prices of underlying assets such as equities, commodities, interest rates, and currencies. The course is presented from the perspective of corporate risk managers and institutional professionals who use these valuable risk-shifting instruments for controlling market risks. Coverage is presented of both exchange and off-exchange derivatives including futures, options, forwards and swaps, and structured products such as hybrid debt having embedded derivative features. The course keeps abreast of global trends, trading developments such as electronic markets, and new products such as electricity, weather, bandwidth, and credit derivatives.

<tr>
<td>FI 8240</td>
<td>Global Portfolio Management</td>
<td>3.0</td>
<td>FI 8000</td>
<td>This course explores in greater depth than possible in FI 8000 the practical aspects of investment valuation and portfolio management in a global framework. The focus is on market microstructure, bond- and equity-portfolio management and overall asset allocation. Practical aspects of portfolio management are introduced through lectures and class discussions of journal articles and cases.</td>
</tr>
<tr>
<td>FI 8260</td>
<td>Hedge Funds And Their Trading</td>
<td>3.0</td>
<td>FI 8000</td>
<td>This is an advanced graduate elective course on hedge funds, which have emerged as popular investment vehicles. The course will cover institutional topics including the history and evolution of hedge funds, the differences between hedge funds and mutual funds, funds of hedge funds, and key sources of information such as databases, indices, and benchmarks. The course will investigate hedge fund risk-return characteristics, performance evaluation, risk management, asset allocation, and managerial compensation. Trading strategies to be considered will include long-short equity, merger arbitrage, relative value arbitrage, convertible arbitrage, fixed income arbitrage, and trend-following.</td>
</tr>
<tr>
<td>FI 8300</td>
<td>Advanced Corporate Finance</td>
<td>3.0</td>
<td>FI 8000</td>
<td>This course develops a framework and tools for analyzing corporate investment and financing decisions. Students become familiar with the cutting-edge techniques for evaluating capital investments, the central issues in capital structure and dividend policy decisions, and the interaction between financing and investment decisions. Techniques covered provide the tools necessary to evaluate strategic investments in technology, mergers and acquisitions, corporate restructurings, and research and development. Skills are developed for the valuation of firms in traditional and new technology industries as well as security offerings such as initial public offerings. Reliance is placed on a variety of pedagogical vehicles including problem solving, case studies, lectures, and group projects.</td>
</tr>
<tr>
<td>FI 8310</td>
<td>Investment Banking</td>
<td>3.0</td>
<td>MBA 8135</td>
<td>This course covers the three distinct activities of investment banking: (1) underwriting- new issues of securities, (2) fee banking-activities that earn a fee like advising on corporate restructurings, securities and economic research, and other types of financial consulting, and (3) transactions- trading in the secondary markets, proprietary trading for the firms own account, and retail brokerage. The emphasis of the course will be on equity underwriting and advising in corporate restructuring activities. It will also focus on the principles of firm valuation. These tools will be used to value, for example, an initial public offering firm, the target firm in a takeover contest, and a leveraged buyout firm.</td>
</tr>
</tbody>
</table>
FI 8320  Corporate Financial Strategy  
CREDIT HOURS  3.0  
PREREQUISITES  MBA 8135  
DESCRIPTION  This course uses a combination of lectures, case analyses, class discussion, and team projects to develop the ability and skills necessary to make strategic financial decisions within the firm. The emphasis is on investment and financial decision-making and their impact on firm value; capital market imperfections and their impact on the capital acquisition process; and corporate governance and its impact on firm value. Specific topics will vary according to current relevance and may include the estimation of divisional cost of capital, project analysis including flexibility and real options, incentive alignment, corporate governance, and the influence of alternative financing choices on firm value.

FI 8350  Corporate Restructuring and Workouts  
CREDIT HOURS  3.0  
PREREQUISITES  FI 8000  
DESCRIPTION  This is an advanced course examining corporate restructuring. It exposes students to a broad range of restructuring strategies that can be employed to increase firm value. Class coverage and case discussions will illustrate how the various corporate restructuring strategies can be used to improve firm performance. The course begins with a brief consideration of mergers and acquisitions. It then focuses on restructuring strategies available to individual firms to improve their competitive situation and enhance shareholder value. Topics here include spin-offs, equity carve-outs, split-offs, sell-offs, leveraged recapitalizations and LBOs. This is followed by a consideration of restructuring of financially distressed firms under both out of court and formal bankruptcy circumstances.

FI 8360  Special Topics in Corporate Finance  
CREDIT HOURS  3.0  
PREREQUISITES  
DESCRIPTION  This seminar-style course allows for in-depth study of select corporate finance topics of special current significance. Coverage is drawn from cutting-edge issues such as the capital acquisition process, investment banking, venture capital financing, the financial management of the e-commerce firm, corporate control, international capital budgeting and financing, project finance, corporate reorganizations and restructuring, corporate governance, and the interaction of product-market strategies and financial strategies. Reliance is placed on readings from the professional literature, lectures, case studies, and group projects. The topic of each offering will be announced in advance, and students may take this course multiple times for course credit as different topics are offered.

FI 8389  Directed Readings in Finance  
CREDIT HOURS  1.0 - 3.0  
PREREQUISITES  FI 8000, consent of instructor, good academic standing  
DESCRIPTION  

FI 8391  Field Studies in Finance  
CREDIT HOURS  1.0 - 3.0  
PREREQUISITES  FI 8000 and Instructor Consent  
DESCRIPTION  The field study is a supervised, employer-site learning experience that provides students the opportunity to learn and apply finance skills in a professional setting. Participating students are expected to work a designated number of hours each week, to attend education lectures and seminars, and to submit assignments, projects and term papers. The field study is typically non-paid; students will receive course credit. Participating students will be selected through a competitive review.

<tr>
<td>FI 8410</td>
<td>Financial and Managerial Decisions: A Study Abroad Experience</td>
<td>3.0</td>
<td>MBA 8000 or MBA 8135 or MGS 8200</td>
<td>Cross listed with MGS 8410. This study abroad program provides an opportunity to examine the business climate in foreign markets, with field experience in a specific foreign market. Students will gain insight into financial and managerial issues, with emphasis on the capital structure of firms, the organization of financial markets, and cross-cultural influence on corporate governance practices and managerial decision making and entrepreneurship. The in-country experience will allow students to observe and discuss first-hand how companies work within that market.</td>
</tr>
<tr>
<td>FI 8420</td>
<td>The Financial System</td>
<td>3.0</td>
<td>FI 8000</td>
<td>This is a macro-finance course, focusing on the broad issue of funds flows through the entire economy. The course analyzes the dynamic and complex pattern of world-wide funds flows, the identity of the major players in the system and the factors influencing their behavior in financial markets, the basis for the myriad financial assets available, the crucial importance of a well-developed financial system for economic development, the influence of the legal/regulatory system, and financial innovation. Special attention is placed on the structure and role of interest rates.</td>
</tr>
<tr>
<td>FI 8440</td>
<td>Finance and Banking in the Global Economy</td>
<td>3.0</td>
<td>FI 8000</td>
<td>This course allows for in-depth study of select finance and banking topics of global significance. Coverage is drawn from cutting-edge issues such as the global financial architecture, the management of risk exposures (market/credit/operational/other risks), financial value chains, regulatory frameworks and developments, project financing decisions, corporate governance, and the interaction of product-market strategies and financial strategies. Topic coverage will also include newer developments in the financial world such as, for example, Islamic banking, microfinance, peer-to-peer lending, or credit derivatives.</td>
</tr>
<tr>
<td>FI 8450</td>
<td>Financial Analysis of Asset &amp; Wealth Management</td>
<td>3.0</td>
<td>FI 8000</td>
<td>This course introduces the student to a financial analysis of the major agents in the economy: the household; small business; publicly-traded corporation; and the financial institution. The major elements of value, stock and flow are critically examined for each of the agents with analytical emphasis given to financial concepts such as cash versus accrual accounting, fair value, and financial accounting principles. The course also examines the structure and economics of the investment and wealth advisory business, evaluating the intersection of the demand for services with the supply. Integration of the various elements of asset and wealth management is done through a course project.</td>
</tr>
</tbody>
</table>
**Introduction to FinTech**  
Prerequisite: None  
Corequisites: FI 8090 or MBA 8040 recommended

**Credit Hours**  
3.0

**Description**  
Financial technology (FinTech) is revolutionary and rapidly changing the financial services industries. This course provides an introduction to FinTech such as blockchain, cryptocurrencies (e.g., Bitcoin and Ethereum), alternative lending, machine learning, and robo-advising. Students are expected to develop a broad understanding of the recent FinTech development and its impact in the financial industries. Students will also have hands-on and problem solving experiences that can be useful in FinTech applications and innovation. Topics may include but are not limited to: blockchain and cryptocurrencies, smart contracts and their markets, alternative lending and crowdfunding, machine learning and its applications in FinTech.

**Blockchain and Business Disruption**

**Credit Hours**  
3.0

**Prerequisites**  
FI 8090, MBA 8040, or by permission of instructor

**Description**  
Blockchain is a transformative technology in finance and other businesses, including banking, payments, financing, securities exchanges, real estate, insurance, supply chains, healthcare, media, and other industries. This graduate course provides an introduction to blockchain technology and its disruptive roles in business. Students will have hands-on and problem solving experiences that can be useful in blockchain applications and innovation. Topics may include but are not limited to: blockchain and cryptocurrencies, initial coin offerings, blockchain platforms, smart contracts, decentralized applications, applications of blockchain technologies in various business areas.

**Financing Innovation**

**Credit Hours**  
3.0

**Prerequisites**  
MBA 8135 or Permission of the instructor

**Description**  
Entrepreneurial activity is the engine of growth in the knowledge economy. This course examines the phases of capital planning and fundraising over the lifecycle of a new venture from startup to exit. The first part of the course focuses on learning how to use the tools of corporate finance to make business decisions and understand startup valuation. The second part will focus on capital raising and financing of ventures at different stages in their life cycle, including the new opportunities opened up in FinTech such as crowdfunding and alternative lending. Topics covered include, but are not limited to: evaluation of startup business opportunities, valuation of entrepreneurial firms, venture capital cycle, new financing models in FinTech, and exit options in entrepreneurial investments.

**The Theory of Asset Valuation**

**Credit Hours**  
3.0

**Prerequisites**  
Consent of instructor

**Description**  
This course acquaints students with the modern theory of asset valuation. Topics covered may include the relationship between no-arbitrage conditions and the existence of equilibrium pricing measures, spanning, market completeness and the uniqueness of the pricing functional, and the pricing of derivative securities in both continuous-time and discrete-time stochastic economies. The specific topics covered depend on the instructor and the needs of the students.
FI 9200  Seminar in the Theory of Investments
*CREDIT HOURS* 3.0
*PREREQUISITES* Consent of instructor
*DESCRIPTION* This seminar exposes the student to the basic theoretical paradigms of contemporary investments research. Topics which may be covered include portfolio theory, two-fund separation, mean-variance analysis, contingent-claim pricing, consumption-based asset pricing theory, asset pricing in a rational expectations setting, and the microstructure of securities markets. The specific topics covered depend on the instructor and the needs of the students.

FI 9300  Seminar in Corporate Finance
*CREDIT HOURS* 3.0
*PREREQUISITES* Consent of instructor
*DESCRIPTION* This course acquaints students with theoretical and empirical research in corporate finance. Topics covered may include the effect of taxes and transactions costs on corporate capital structure, bondholder-stockholder and stockholder-manager agency conflicts, the effect of informational asymmetry between firms and outside investors on financial decisions, the design of securities, the design of optimal control mechanisms, theory of corporate control, bankruptcy and corporate restructuring, shareholder heterogeneity, and corporate governance. The specific topics covered depend on the instructor and the needs of the students.

FI 9400  Theory of Financial Management of Financial Institutions
*CREDIT HOURS* 3.0
*PREREQUISITES* Consent of instructor
*DESCRIPTION* This course develops the theory of the financial markets and institutions which link suppliers and users of investment capital. Topics which may be covered include: the reasons for the existence of financial intermediaries, productivity of financial institutions, the determinants of interest rates, the pricing of interest-rate-contingent instruments, optimal regulatory policies for financial institutions, the capital structure and hedging policies of institutions, market microstructure and non-depository financial intermediation, bank credit policies and credit rationing, macro finance, and the role of intermediaries in supplying liquidity. The specific topics covered depend on the instructor and the needs of the students.

FI 9500  Advanced Topics in Contemporary Finance Research
*CREDIT HOURS* 3.0
*PREREQUISITES* Consent of instructor
*DESCRIPTION* This doctoral-level course is devoted to analyzing significant topics in finance research. Topics covered in the course will vary across a wide spectrum of possible areas and methodologies in finance research. The course may be repeated when the topics vary.

FORL FOREIGN LANGUAGE

FORL 6021 Technology Integration for Foreign Language Teaching and Learning

CREDIT HOURS 3.0

DESCRIPTION Selection and use of technology resources in the Pre-K-12 classroom with an emphasis on foreign language instruction. Students learn how to select and integrate appropriate technologies that align with edTPA and principles of communicative language teaching in order to enhance student learning, language proficiency and interculturality. A special emphasis is placed on emerging technologies and video development.

FORL 6030 Teaching Diverse World Language Learners – Field Experience

CREDIT HOURS 3.0

PREREQUISITES FORL 4025 or FORL 4026 with a grade of C or higher, or equivalent

DESCRIPTION This field-based experience offers students an opportunity to observe and teach diverse world language students in local K-12 schools. In addition to learning about how to differentiate instruction to meet their diverse learners' needs, students will complete a mini edTPA in preparation for the culminating field experience class.

FORL 6060 Teaching World Languages Internship

CREDIT HOURS 3.0 - 9.0

PREREQUISITES Completion of all other coursework in teacher education, and passing score on departmental language proficiency examination

DESCRIPTION This full-time, field-based experience offers students who are the teacher of record in their own classroom an opportunity to hone their teaching skills in local K-12 world language classrooms. Under the guidance of a university supervisor, students will gain experience planning, instructing, and assessing for diverse learners. The course culminates with the official submission of edTPA (a national standardized teacher performance assessment), which is required for teacher certification.

FORL 6061 Teaching World Language Learners Student Teaching

CREDIT HOURS 4.0

PREREQUISITES Completion of all other coursework in teacher education, and passing score on departmental language proficiency examination

DESCRIPTION Students will gain experience planning, instructing, and assessing for diverse learners. The course culminates with the official submission of edTPA (a national standardized teacher performance assessment), which is required for teacher certification.
FORL 6062  Teaching World Language Learners Student Teaching

CREDIT HOURS  4.0

PREREQUISITES  Completion of all other coursework in teacher education, and a passing score on the departmental language proficiency examination.

DESCRIPTION  Full-time, field-based experience for students to hone their teaching skills in local K-12 world language classrooms under the guidance of a university supervisor and an on-site mentor. Students will gain experience planning, instructing, and assessing for diverse learners. The course culminates with the official submission of edTPA (a national standardized teacher performance assessment), which is required for teacher certification.

FORL 6063  Teaching World Language Learners Student Teaching

CREDIT HOURS  4.0

PREREQUISITES  Completion of all other coursework in teacher education, and a passing score on the departmental language proficiency examination.

DESCRIPTION  Full-time, field-based experience for students to hone their teaching skills in local K-12 world language classrooms under the guidance of a university supervisor and an on-site mentor. Students will gain experience planning, instructing, and assessing for diverse learners. The course culminates with the official submission of edTPA (a national standardized teacher performance assessment), which is required for teacher certification.

FORL 6122  Developing and Marketing Second Language Teaching Skills

CREDIT HOURS  3.0

DESCRIPTION  Prepares students to understand language learning processes and best teaching practices to maximize learners' proficiency. Students create a portfolio to demonstrate their ability to teach foreign languages at home and abroad, in the public or private sector and write about current research on best teaching practices including learner characteristics, second language development, standards-based lesson planning in meaningful cultural contexts and proficiency assessment.

FORL 6126  Approaches to Language Teaching, Grades 9-12

CREDIT HOURS  3.0

DESCRIPTION  Applicable knowledge of learner characteristics, foreign language curricula and standards, edTPA, unit/lesson planning, approaches to effective lesson implementation and assessment in meaningful cultural contexts for grade levels 9-12.

FORL 6650  Opening School Experience

CREDIT HOURS  0.0

PREREQUISITES  Admitted to Teacher Education program

DESCRIPTION  Students gain practical experiences in the school and classroom during the week of pre-planning and the first week of school. While assisting in the classroom, students learn effective procedures for beginning the school year. This zero-credit course is graded as satisfactory/unsatisfactory. A minimum grade of S is required for the course.

<td>Geol 3002 with a C or higher</td>
<td>Properties of sediments; origin, classification, and description of sedimentary rocks; principles of stratigraphy; analysis of sedimentary facies and environments of deposition.</td>
</tr>
</tbody>
</table>
**GEOS 6008**  
**Rock Fracture and Fluid Flow**  
**CREDIT HOURS** 3.0  
**DESCRIPTION**  
Formation and analysis of rock fracture and its relationship to hydraulic properties of dual porosity aquifers, exploration of deep aquifers, flow equations in fractured porous and crystalline rock, hydraulic testing of fractured rock, spatial and statistical methods of exploration of karst aquifers, geophysical and statistical methods of detection of fractured aquifers. 3.000 Credit hours.

**GEOS 6009**  
**Applications of Chemical Tracers in Hydrology**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Geol 1122K (or GEOL 1122 and GEOL 1122L) and MATH 2212, each with a C or higher  
**DESCRIPTION**  
Study of theory and applications of stable-isotopes, radioactive-isotopes, and major ions as tracers of the geographic-source areas, flow pathways, and ages of water within surface and subsurface water bodies. The course includes parallel coverage of hydrological transport theory, including advective-diffusive-dispersive transport theory and its application in conjunction with chemical tracers.

**GEOS 6011**  
**Principles of Paleontology**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** Geol 1122K (or GEOL 1122 and GEOL 1122L) with a C or higher  
**DESCRIPTION**  
An introduction to the principles of paleontology including taphonomy, taxonomy, evolution, and extinction by examination of the fossil record. Study of commonly preserved organisms and their use in paleoecology, paleoenvironmental reconstruction, biostratigraphic correlation, and conservation paleobiology will be stressed as well.

**GEOS 6012**  
**Sustainable Development: Practice and Policies**  
**CREDIT HOURS** 3.0  
**DESCRIPTION**  
This course introduces multidisciplinary aspects of practice and policy development drawn from the United Nations 2030 Agenda for Sustainable Development. Topics covered include food security, agriculture, forestry, water resources, energy production, education, health, social protection, job opportunities, international trade, tourism, and urbanization in member countries to promote their economic growth while tackling climate change and environmental protection.

**GEOS 6013**  
**Structural Geology**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** Geol 1122K (or GEOL 1122 and GEOL 1122L) and Geol 3002, each with a C or higher  
**DESCRIPTION**  
Introduction to the principles of structural geology including theories and methods of analysis of: stress, strain, rheology, fractures, folding, faulting, foliation, and lineation. The study of geologic maps and cross sections.

**GEOS 6015**  
**Crystallography and Optical Mineralogy**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** GEOL 1122K (or GEOL 1122 and GEOL 1122L), and CHEM 1211K (or CHEM 1121 and CHEM 1121L) with grades of C or higher or concurrent registration  
**DESCRIPTION**  
Principles of crystallography and optical mineralogy. Laboratory study of minerals using the polarizing microscope.
**GEOS 6016**  Igneous and Metamorphic Petrology  
**CREDIT HOURS**  4.0  
**DESCRIPTION**  Prerequisite or co-requisite: Geol 4015. Nature, distribution, and origin of igneous and metamorphic rocks in relation to tectonic setting and experimental studies. Laboratory study of igneous and metamorphic rocks in hand specimen and thin section.

**GEOS 6017**  Environmental Geology  
**CREDIT HOURS**  3.0  
**DESCRIPTION**  Four lecture hours per week. Application of geological and geochemical concepts to the study of Earth’s near surface environment. Topics may include water supply and pollution, global warming, ozone depletion, soil contamination, natural disasters, mineral resources, environmental management, and selected regulations. Quantitative treatment of population growth and water resources.

**GEOS 6018**  Introduction to Environmental Health and Safety  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  GEOG 1113, GEOL 1121K (or GEOL 1121 and GEOL 1121L), GEOL 2001, and BIOL 2108K (or BIOL 2108 and BIOL 2108L), each with a C or higher, or consent of the instructor  
**DESCRIPTION**  Review of the development US environmental regulatory framework including the key or legacy hazardous waste sites that lead to the environmental movement of the 1960s and 1970s. Principles of toxicology, common contaminant geochemistry, environmental risks and hazards, and personal protective equipment.

**GEOS 6020**  Urban Environments  
**CREDIT HOURS**  3.0  
**DESCRIPTION**  Examines the physical environmental processes relating to soil, climate, water, and ecosystems that characterize urban environments as opposed to more natural or rural ones. Explores the human-environmental interface in urban areas as reflected in issues such as environmental justice, sustainability, resilience, population growth, unequal distribution of resources, and public health. Sustainability will be particularly emphasized. The City of Atlanta is used as a living laboratory for the course.

**GEOS 6042**  Environmental Instrumentations I: Aqueous Media  
**CREDIT HOURS**  4.0  
**PREREQUISITES**  CHEM 1212K (or CHEM 1121 and CHEM 1121L) and MATH 2211, each with a C or higher  
**DESCRIPTION**  Covers the theoretical and practical aspects of analytical instrumentations and methodologies used for modern-day analysis of environmental samples (water, soils, sediments, biological tissues, etc.) including the basis for each analysis, limitations and potential sources of errors.

**GEOS 6043**  Environmental Analytical Methods and Instrumentations 2: Solid Media  
**CREDIT HOURS**  4.0  
**PREREQUISITES**  CHEM 1212K (or CHEM 1122 and CHEM 1122L) and MATH 2211, each with a C or higher  
**DESCRIPTION**  The course will be one of two instrumentations classes offered in the Geosciences curriculum. It is designed to expose students to the breadth of instrumentations and techniques utilized in modern-day analysis of solid media.

<tr>
<td>GEOS 6050</td>
<td>Natural Enviornment of Georgia</td>
<td>4.0</td>
<td></td>
<td>Georgia is a state with great a diversity of natural communities, in large part because of the many different landscapes present in the state. Through readings, discussions, tests, field outings, projects and in-class exercises, students will become familiar with the principles involved in the structure and function of Georgia's dwindling, but diverse, ecosystems. There will be an emphasis on plant communities and the physical environment, but animal communities and landscape management strategies will also be covered. Locations, diversity, and plant indicator species (especially trees) will be examined in the classroom and in the field, and experiential learning is emphasized.</td>
</tr>
<tr>
<td>GEOS 6051</td>
<td>Introduction to the Environmental History of Georgia</td>
<td>3.0</td>
<td></td>
<td>Georgia’s natural environments have been impacted at varying spatial and temporal scales since the initial arrival of humans in the Southeastern US approximately 10,000 years ago. Significant impacts were realized following the arrival of European colonists in the late 16th century. An analysis of anthropogenic impacts will be provided to understand changes in the landscapes and hydrologic systems of Georgia through time.</td>
</tr>
<tr>
<td>GEOS 6075</td>
<td>Fundamentals of Soils</td>
<td>3.0</td>
<td>CHEM 1211K (or CHEM 1121 and CHEM 1121L) with a C or higher</td>

<td>One to three lecture hours a week. Detailed presentation of a selected topic in geographical sciences. May be repeated for credit for a maximum of six credit hours if topic is different.</td>
</tr>
<tr>
<td>GEOS 6120</td>
<td>Basic Field Geology</td>
<td>4.0</td>
<td>Completion of a core-curriculum science sequence and consent of instructor</td>
<td>Nine hours a day, six days a week, for three weeks. Introduction to field geology in the Rocky Mountains of Montana, with emphasis on basic concepts and field methods. Construction of simple geologic maps, cross sections, and stratigraphic columns, using topographic maps and aerial photographs in the field. Includes a seven-day excursion to geologically interesting areas of the U.S. Northwest. Open to teachers and students majoring in Geography, Anthropology Biology, Environmental Science, or others who are seeking a geological field experience.</td>
</tr>
</tbody>
</table>
GEOS 6121  Advanced Field Geology
CREDIT HOURS  4.0
PREREQUISITES  Geol 4006 and Geol 4013, and consent of instructor; prerequisite or corequisite: Geol 4120 or Geol 6120 or equivalent
DESCRIPTION  Nine hours a day, six days a week for three weeks. Intensive geologic mapping and interpretation in the Rocky Mountains of Montana, with particular emphasis on complexly deformed areas. Includes mapping in folded and faulted sedimentary rocks, intrusive and volcanic igneous rocks, and high-grade metamorphic basement terrain. Construction of multiple cross sections for complex structures and advanced interpretation of geologic history of complex areas. Involves extensive, rough, off-trail hiking.

GEOS 6123  Geoinformatics
CREDIT HOURS  3.0
DESCRIPTION  Fundamentals of geoscience knowledge representation applying semantic web languages of OWL, RDF, and RDFS. Design and development of spatial and process ontologies in geosciences.

GEOS 6235  Water, Wastewater, and the Environment
CREDIT HOURS  3.0
DESCRIPTION  This course introduces the environmental context, principles, and approaches to water quality and treatment. The course includes multidisciplinary perspectives on water and wastewater, including biology, chemistry, engineering, hydraulics, and quantitative methods. Students will be able to identify the major processes of treatment systems, factors that influence their efficacy, and methods of collection, conveyance, and analysis.

GEOS 6402  Geography of Africa
CREDIT HOURS  3.0
DESCRIPTION  (Same as AAS 6056.) An overview of the physical, economic, and cultural geography of Africa, including North Africa. Emphasis on relationships between Africa's resources, both human and physical, and the development process.

GEOS 6515  Qualitative Methods in Geography
CREDIT HOURS  3.0
DESCRIPTION  This course provides the theoretical knowledge and practical skills required to carry out qualitative research in geography. It focuses on the need and merits of qualitative research, the "how to" of various qualitative research methods, and issues related to ethics, the researcher-researched relationship, and positionality.

GEOS 6518  Digital Cartography
CREDIT HOURS  3.0
DESCRIPTION  An introduction to the principles, methods, theory, and practices of contemporary digital cartography.

GEOS 6520  Quantitative Spatial Analysis
CREDIT HOURS  3.0
DESCRIPTION  Techniques of spatial analysis of geographic data; emphasis on sampling, measurements, and pattern analysis of points, lines, and areas on maps.

GEOS 6530  Introduction to Remote Sensing
CREDIT HOURS  4.0
PREREQUISITES  natural science lab sequence or consent of instructor
DESCRIPTION  A survey of remote sensing technology, aerial photograph and satellite image interpretation and digital processing, and applications in engineering and environmental sciences.

GERO GERONTOLOGY

GERO 6475 Communication and Aging
CREDIT HOURS 3.0
DESCRIPTION (Same as COMM 6475.) This course provides a broad overview of the ways in which communication affects, and is affected by, the aging process and introduces students to theory and research in the area of communication and aging.

GERO 7110 Aging Policy and Services
CREDIT HOURS 3.0
DESCRIPTION (Same as SOCI 7110.) Overview of aging policy, services and programs with an emphasis on legislation, funding, planning, the aging network, and the long-term care system.

GERO 7200 Health and the Older Adult
CREDIT HOURS 3.0
DESCRIPTION This course provides an introduction to physiological aging and the health status of older people and is designed for non-health professionals who work with older adults. Normal aging processes, age-related changes, and associated health promotion activities will be discussed. Information on the assessment and implications of alterations in functional health states, drug use, and referral sources are included.

GERO 7260 Aging Practice, Policy, and Research
CREDIT HOURS 3.0
DESCRIPTION (Same as SW 7260.) This course is designed to provide the basic knowledge and entry-level skills appropriate for social work practice with older people and their families. Special attention is given to the biological, sociological, psychological, political and economic factors affecting older adults and methodology meeting these needs.

GERO 8000 Seminar in Gerontology
CREDIT HOURS 3.0
DESCRIPTION An introduction to the field of aging and the profession of gerontology for beginning master's students. Focuses on socialization to the student role, identification with the field, integration into the department, and preparation for employment.

GERO 8100 Research Methods in Gerontology
CREDIT HOURS 3.0
DESCRIPTION An introduction to the process of scientific research with particular emphasis on the common research methods and statistics used in gerontology, including both quantitative and qualitative approaches. Students will develop a proposal for a feasible research project.

GERO 8102 Life Course Sociology
CREDIT HOURS 3.0
DESCRIPTION (Same as SOCI 8102.) Development of the key concepts of life course theories, with application to issues such as: child development and socialization, adolescence, marriage and parenting, work and occupational careers, retirement, illness and institutionalization, and death and bereavement.

GERO 8110 Evaluation Research in Gerontology
CREDIT HOURS 3.0
DESCRIPTION Principles and techniques for applied research in gerontology, including program evaluation, interventions with older people, and measurement of outcomes.
**GERO 8115** Qualitative Gerontology

**CREDIT HOURS** 3.0

**DESCRIPTION** This course offers an introduction to qualitative methods in gerontology. Topics include: research design, data collection, ethical issues, and data analysis. Students will apply their knowledge by collecting and analyzing qualitative data.

---

**GERO 8116** Sociology of Aging

**CREDIT HOURS** 3.0

**DESCRIPTION** (Same as SOCI 8116 and WGSS 8116.) The study of aging as a social process affecting individuals, societies, and social institutions. Topics include age stereotypes, social roles, socioeconomic status, minority elders, older women, work and retirement, family and community relationships, politics, housing, and health care.

---

**GERO 8119** Global Aging and Social Policies

**CREDIT HOURS** 3.0

**DESCRIPTION** (Same as SOCI 8119.) This course examines issues of aging and social policies in global perspectives. Topics include global and comparative studies of demographic changes, aging and social inequality, retirement and social security, intergenerational exchange, and health care and elder care.

---

**GERO 8120** Intervention Research Methodology: Design, Implementation, and Dissemination

**CREDIT HOURS** 3.0

**DESCRIPTION** The overall goal of this course is to expose students to conceptual and theoretical frameworks as well methodology that guide the design, evaluation, and implementation of behavioral interventions.

---

**GERO 8122** Death, Dying, and Loss

**CREDIT HOURS** 3.0

**DESCRIPTION** (Same as SOCI 8122.) Death and dying; loss; and the cultural process of grief, mourning, and bereavement.

---

**GERO 8124** Diversity and Aging

**CREDIT HOURS** 3.0

**DESCRIPTION** (Same as AAS 6042 and SOCI 8124.) This course examines aging through the lens of diversity and considers the socio-cultural factors that create variations, including disparities, across the life course and into later life. Emphasis is placed on understanding the influences of race and ethnicity as well as other key intersecting social relations and how they shape older adults' lives, especially among minority elders.

---

**GERO 8130** Ties that Bind: Family, Intimacy, and Aging

**CREDIT HOURS** 3.0

**DESCRIPTION** (Same as SOCI 8130.) This course examines older adults’ family lives and intimate relationships in social, historical and demographic context. Emphasis is placed on theoretical and methodological understanding in the type, nature, content and meaning of relationships, empirical research, and on identifying influential factors, including, for example, gender, race, ethnicity, class, sexual orientation, and health status. 3.000 Credit hours, Target student Group: GERO Certificate students, Gero MA Students, Soci MA and PHD students.

GMBA 7035  Economics for Manager  
CREDIT HOURS  3.0  
PREREQUISITES  None  
DESCRIPTION  This course uses basic macroeconomic concepts to develop a basic model of the macroeconomy emphasizing real world data and relationships. The goal is for managers to understand the main forces and trends in the economy, how they are interrelated, and how policymakers try to affect them. Because changes in the macroeconomy affect industries and firms throughout the economy, it is important for managers to understand how these changes can affect managerial decisions, particularly in terms of the concepts discussed in the context of microeconomics. The performance of the economy is presented in the context of industries and firms studied in microeconomics.

GMBA 8025  Financial Accounting  
CREDIT HOURS  3.0  
DESCRIPTION  This course takes a user-oriented approach to the study of financial statements. Students study the role of the financial statements and the annual report in the financial reporting process. Using ratio analysis, students analyze past firm performance and make forecasts of future performance. Students also study the effects of differing accounting methods on financial statement analysis.

GMBA 8030  Global Legal and Regulatory Issues  
CREDIT HOURS  3.0  
PREREQUISITES  None  
DESCRIPTION  This course analyzes the legal and regulatory issues facing businesses, with an emphasis on how those issues affect businesses seeking to enter the international marketplace. The course begins by delineating how law is made on both a domestic and international scale. Students will learn how the major markets regulate from the inside out and how the global community regulates, via treaty, multinational organizations, etc., from the outside in. The course then examines how law creates both advantages for and limitations upon international transactions. Students will then explore tools for facilitating the advantages and appreciating the limitations with particular focus on issues of international trade, international contracts and international dispute resolution.

GMBA 8090  International Business Environment  
CREDIT HOURS  3.0  
PREREQUISITES  None  
DESCRIPTION  The course is divided into two parts. The first part provides an intensive study of the changing economic, political, financial, and cultural environment in which organizations compete, both traditionally and digitally. The second part of the course encompasses specific business operations through a global lens, including import, export, counter trade, manufacturing and materials management; marketing and research and development; human resource management; accounting; and financial management.
GMBA 8115  Managerial Accounting

CREDIT HOURS 3.0

REQUIREMENTS None

DESCRIPTION Prequisites: None. The focus of this course is on managing with accounting data, giving attention to limitations and behavioral implications of using such information in decision-making. Students will determine what financial information international managers need to plan, monitor and improve their critical processes, products and services. This course explores tasks such as cost analysis and management, cost-volume-profit analysis, cost allocation, activity-based costing, cost drivers, performance measurement, variance analysis, balancing the scorecard, compensation schemes and responsibility centers.

GMBA 8120  Information Technology and Global Competition I

CREDIT HOURS 1.5.0

PREREQUISITES None

DESCRIPTION This casebased course module serves as an introduction to the relationship between information systems (IS) and business processes in the modern organization, particularly in an international setting. Directed at general managers, the module provides an overview of the cycle of business investment in IS. This cycle begins with a needs assessment stage, identifying opportunities or challenges relating to business processes; matching IT resources and application solutions to these needs are the second stage. The third stage is creating and deploying systems, whether these are developed inside the organization or acquired externally. It also covers the retiring of systems. With rapidly changing technology, the IT industry itself is analyzed for emerging developments and potential impacts.

GMBA 8135  Corporate Finance

CREDIT HOURS 3.0

PREREQUISITES None

DESCRIPTION Prerequisite. None. This course focuses on the financial management of both publicly-held and private corporations. Students are presented with a conceptual framework for understanding and addressing problems commonly faced by corporate decision-makers and provided opportunities to apply these concepts to contemporary business situations. Topics covered include, but are not limited to: the valuation and role of debt and equity, capital acquisition and the organization of domestic and international financial markets, the relationship between risk and return including the capital asset pricing model, capital budgeting/project evaluation techniques, cost of capital, cash flow estimation, project risk analysis, real options, company valuation, and capital structure decisions.

GMBA 8145  Marketing Management

CREDIT HOURS 3.0

PREREQUISITES None

DESCRIPTION Prerequisite. None. This course explores the managerial aspects of the marketing function. Quantitative and qualitative analysis of the company and its customers and competition will be emphasized through the use of case analysis. The course is organized around the key marketing decision variables: promotions, product, pricing, and distribution, and around the various marketing processes of strategy formulation, organization and implementation.
GMBA 8150  Global Operations and Logistics I
CREDIT HOURS  1.5.0
PREREQUISITES  None
REQUIREMENTS  None
DESCRIPTION  This course focuses on the basic concepts, principles and techniques for efficient and effective operations. Special emphasis is placed on the planning and execution of the operating systems of an organization. Fundamental operation topics such as operations strategy, capacity, just-in-time inventory management, resource scheduling, and supply chain management are covered in the context of both the domestic and international marketplace.

GMBA 8160  Human Resources Management and Organizational Behavior I
CREDIT HOURS  1.5.0
PREREQUISITES  None
DESCRIPTION  This course introduces what managers need to know about organizational structure and people in organizations. The course begins with an overall framework and then moves into individual topics, including a treatment of the functional and potentially dysfunctional consequences of combining people and organizational structure.

GMBA 8170  International Finance I
CREDIT HOURS  1.5.0
DESCRIPTION  Prerequisite. None. We focus on the international corporate finance environment and on foreign exchange risk management. We start the basics of risk and return, applied to an international asset portfolio setting. We proceed with a general overview of the determination of exchange rates. We will study different foreign exchange rate systems and how capital and trade flows may affect the balance of payments of countries and, consequently, their currencies. We will then learn about foreign exchange parity relations and forecasting. We proceed to study the foreign exchange market and begin studying risk management tools, such as futures and options.

GMBA 8190  International Affairs and Economic Integration
CREDIT HOURS  3.0
PREREQUISITES  None
DESCRIPTION  This course examines regional integration and global business strategies in different regions of the world. Students examine globalization and regionalization and then conduct an analysis of business strategies and options for a chosen company. NGO, government (business chambers, local and national government), private sector (local research centers, manufacturing and service firms) sources and case studies are used to provide primary and secondary data and to support the development of presentations on business competitiveness strategy in the region of focus. This course may be repeated for different world regions.

</thead>
<tbody>
<tr>
<td>GMBA 8220</td>
<td>Information Technology and Global Competition II</td>
<td>1.5.0</td>
<td>None</td>
<td>This course examines how business processes and their services can be innovated, enabled by information technology. The course explores radical and evolutionary innovations, discusses organizational agility as a key process capability and relates these themes to the opportunities/challenges provided by information technology. The course finishes with an examination of problems related to organizational implementation. The course is centered on a project in which students learn to recognize organizational business processes, assess their service innovation potential, their ability to contribute to organizational agility, their information-related pathologies, and to design and implement client-centric innovations enabled by information technology.</td>
</tr>
<tr>
<td>GMBA 8250</td>
<td>Global Operations and Logistics II</td>
<td>1.5.0</td>
<td>None</td>
<td>This course focuses on the basic concepts, principles and techniques for efficient and effective operations. <td>GMBA 8260</td>
<td>Human Resources Management &amp; Organizational Behavior II</td>
<td>1.5.0</td>
<td>None</td>
<td>This course deals with issues of organizational behavior. These include working in groups, power and political dynamics in leadership and organizational culture. The approach of looking at multiple causal antecedents of organizational phenomena introduced in GMBA 8160 is continued and extended to these additional topics.</td>
</tr>
<tr>
<td>GMBA 8270</td>
<td>International Finance II</td>
<td>1.5.0</td>
<td>None</td>
<td>Focus is on foreign exchange risk management, management of the multinational financial system (transfer pricing, taxation, and the investment and financing decisions of global firms). We study foreign exchange market and demonstrate how currency futures and options markets are used for short-term risk management, followed with management of exposure to foreign exchange risk. We examine principles for taxation of foreign source income and the role of transfer pricing. This discussion paves the way for learning about multinational capital budgeting and the international cost of capital. Finally, financing decisions of the global firm given Eurocurrency markets and markets for interest rate swaps and currency swaps will be examined together with demonstrating role in LT risk management.</td>
</tr>
</tbody>
</table>
GMBA 8410  Asian Experience
CREDIT HOURS  3.0
DESCRIPTION  Prerequisite. None. Students will travel in Asia. Before and during this journey, students will learn about the regions they will be studying and about the businesses they will be visiting. The regions currently scheduled include Beijing, Shanghai and a second tier city. Students will undertake a host-company audit to gain an in-depth understanding of the unique issues facing businesses in this market.

GMBA 8500  International Business Internship
CREDIT HOURS  1.0 - 6.0
PREREQUISITES  GMBA 8090
DESCRIPTION  The Internship is a supervised work program in an organization (e.g. public or private sector, government agency, NGO) typically in a location which utilizes the language skills of the candidate. All internships must be approved in advance by the program directors for the Global Partners MBA program.

GMBA 8605  International Marketing
CREDIT HOURS  1.5.0
PREREQUISITES  None
DESCRIPTION  This course begins by examining the Marketing Management concept in the context of business-to-business functions and business-to-consumer services. The course then explores methodologies and techniques for conducting market research. Students will build on this exploration by next developing marketing strategies in an international context. Students will also analyze the operational implications of international marketing management by investigating topics such as branding, sales and negotiation, direct marketing and the "four p's" of product, price, promotion (advertising) and place (distribution channels). The course will conclude by integrating all of the above into the development of an international marketing plan.

GMBA 8610  Leadership Practices
CREDIT HOURS  3.0
PREREQUISITES  None
DESCRIPTION  The theme explores the practices associated with exercising leadership, defined as ?mobilizing people to meet their most significant challenges. The course is designed for people from many backgrounds and cultures in order to aid them in leading teams, business units, and corporations, with an emphasis on enterprises that conduct business globally and ethically. By studying the practice of leadership, students gain experiential knowledge of practices that are effective and ineffective. They also gain an understanding of the impact that individuals and groups exercising leadership can make on the performance of an organization. The theme also includes activities and exercises designed to enable participants to gain greater insight into their own leadership strengths & weaknesses.
GMB 8620   Commercial Diplomacy

CREDIT HOURS  
1.5.0

PREREQUISITES  
None

DESCRIPTION  
This course examines commercial diplomacy from the company-specific point of view. In particular, the program focuses on the concerns of the line-of-business or country manager. The course makes extensive use of visiting speakers and materials which address the central question of how companies relate to a broader environment that includes political/legal/economic risk assessment, business-government relations, relations with non-governmental organizations and the larger civil society, and linkages to the institutions of trade regimes.

GMB 8630   Strategic Business Communication

CREDIT HOURS  
1.5.0

PREREQUISITES  
None

DESCRIPTION  
This course presents written and oral business communication as a management strategy through a strategic communication model useful to identify objectives, analyze audiences, choose information, and create the most effective arrangement and channel for written and oral messages. Students will practice drafting and editing clear, precise, and readable written business documents, crafting effective communications to executive level readers. Students will also develop skills in listening, managing groups, dealing with conflict, and leveraging the power of diversity at both the individual and cultural level. Finally, students will develop and deliver individual presentations using appropriate and effective visual support to persuade and motivate.

GMB 8990   Policy & Strategy

CREDIT HOURS  
3.0

PREREQUISITES  
None

DESCRIPTION  
This capstone course will bring together components of all the courses taken up to this point. Students will analyze the managerial implications of the material covered in their courses, field experiences and visits to develop a working knowledge of corporate strategy, competitive strategy, strategy in uncertainty, global strategy for multinationals and strategic management of innovation. This course will be applied to cases and real-time scenarios, requiring students to use all of their skills in readiness for their role as global managers and leaders.
GLOS 6040  Race, Class and Gender in Global Perspective  
CREDIT HOURS 3.0  
DESCRIPTION Exploration of the various ways that perceptions and designations of race, class, and gender intersect with each other and shape the human experience. This includes an analysis how categories of class, ethnicity, and gender affect daily life for people in multiethnic, stratified societies, particularly in terms of how inequities of access to wealth, power, and resources have emerged on global and local levels. Structural violence is an important theme of many of the readings in the class. The idea of race as a social construct rather than a biological phenomenon is another key topic. We will examine how gender identity and gender roles are shaped by culture. Globalization and immigration, and their relationship to gender, race, and class, are foci of the latter part of the course.

GLOS 6114  Language and Social Justice  
CREDIT HOURS 4.0  
DESCRIPTION This course focuses on the linguistic anthropological study of inequality and questions of social justice that arise. From the work of translation in institutional settings that often falls to bilingual children of immigrants to the marked evaluation of African-American English, students will explore how language is integral in processes of exclusion, stigma, and oppression.

GLOS 6210  Global Issues in Social Psychology  
CREDIT HOURS 3.0  
DESCRIPTION A survey course that covers topics in social psychology from a cross-cultural lens, focusing on global issues. Topics include cultural values, methodological equivalences, inter-cultural group conflict, self and identity, aggression and violence, attitudes about immigration and refugees, and altruism. The course is suitable for undergraduate students majoring in sociology, psychology, and the social and behavioral sciences. Same as GLOS 8210. May not be repeated for credit.

GLOS 6211  Psychology of Terrorism  
CREDIT HOURS 3.0  
DESCRIPTION Terrorism describes both a set of tactics and a broader strategy that can have overwhelming personal, social, and political consequences. The course provides a comprehensive understanding of the psychology of terrorist behavior for students in psychology, the social sciences, public policy, and criminology.

GLOS 6212  International Conflict Resolution: Theory and Practice  
CREDIT HOURS 3.0  
DESCRIPTION Introduction to the key concepts, frameworks, theories, techniques, and policies of international conflict resolution. Considers the theory and practice of international conflict resolution as it applies to interstate conflicts and intrastate conflicts. Students practice techniques of negotiation, mediation and conflict mapping through simulations. Signature Experience course.
GLOS 6220  Refugees and Forced Migration
CREDIT HOURS  3.0
DESCRIPTION  This course provides an understanding of forced migration processes (the complex causes, characteristics, and consequences of displacement) and of the "refugee problem" (how international policymakers and scholars have constructed displacement as an object for analysis and action and some of the consequences of this construction). (Same as ANTH 6220.).

GLOS 6230  Global Water Policy and Governance
CREDIT HOURS  3.0
DESCRIPTION  Availability of water is becoming a critical social issue in the 21st century. Aimed at providing students with a holistic and comprehensive understanding of multi-scalar/multidimensional nature of human-water interactions, this graduate seminar explores the complex relationship between humans and water at local, regional, and international scales with an emphasis on governance and policy. Appropriate for graduate students from across the university. Same as GEOG 6230. Global Perspectives Course.

GLOS 6490  The Anthropology of Globalization
CREDIT HOURS  4.0
DESCRIPTION  This course critically analyzes the concept of globalization by examining the various components that are often invoked in defining/discussing the concept and the current world structure. We will explicitly examine the anthropological components of globalization and determine the manner in which it shapes culture, constructions of identity, restrictions of the body, distributions of economic and natural resources, intercultural contact, and patterns of global inequality. Same as ANTH 6490.

GLOS 6560  International Field Experience in Global Studies
CREDIT HOURS  1.0 - 9.0
DESCRIPTION  This variable credit course provides participating students with an opportunity to gain practical experience in global studies in another country through an organized study abroad trip.

GLOS 6650  Special Topics in Global Studies
CREDIT HOURS  3.0
DESCRIPTION  Intensive treatment of specified topics in global studies. May be repeated for credit if topic varies.

GLOS 6761  Directed Study in Global Studies
CREDIT HOURS  1.0 - 4.0
PREREQUISITES  At least 9 hours of graduate credit completed, good academic standing, and permission of instructor
DESCRIPTION  This variable credit hour course allows students to design a directed study on a special topic with a faculty member.

GLOS 6990  Topics in International Development Methods
CREDIT HOURS  1.0 - 3.0
DESCRIPTION  Special topics in international development methods. May be repeated for credit if topic varies. Global Perspectives.

GLOS 8010  Policy in Global Affairs
CREDIT HOURS  3.0
DESCRIPTION  Introduces graduate students in global studies, public policy, or the social sciences to the major approaches, actors, and challenges in global affairs, from a variety of social science perspectives. Designed to help students think analytically and assess policy and practice on issues with an international and transnational dimension, through an examination of contemporary problems and challenges.

</thead>
<tbody>
<tr>
<td>GLOS 8210</td>
<td>Global Issues in Social Psychology</td>
<td>3.0</td>
<td>A survey course that covers topics in social psychology from a cross-cultural lens, focusing on global issues. Topics include cultural values, methodological equivalences, inter-cultural group conflict, self and identity, aggression and violence, attitudes about immigration and refugees, and altruism. The course is suitable for undergraduate students majoring in sociology, psychology, and the social and behavioral sciences.</td>
</tr>
<tr>
<td>GLOS 8211</td>
<td>Psychology of Terrorism</td>
<td>3.0</td>
<td>Terrorism describes both a set of tactics and a broader strategy that can have overwhelming personal, social, and political consequences. The course provides a comprehensive understanding of the psychology of terrorist behavior for students in psychology, the social sciences, public policy, and criminology.</td>
</tr>
<tr>
<td>GLOS 8212</td>
<td>International Conflict Resolution: Theory and Practice</td>
<td>3.0</td>
<td>Introduction to the key concepts, frameworks, theories, techniques, and policies of international conflict resolution. Considers the theory and practice of international conflict resolution as it applies to interstate conflicts and intrastate conflicts. Students practice techniques of negotiation, mediation and conflict mapping through simulations. Signature Experience course.</td>
</tr>
<tr>
<td>GLOS 8220</td>
<td>Refugees and Forced Migration</td>
<td>3.0</td>
<td>This course provides an understanding of forced migration processes (the complex causes, characteristics, and consequences of displacement) and of the &quot;refugee problem&quot; (how international policymakers and scholars have constructed displacement as an object for analysis and action) and some of the consequences of this construction. (Same as ANTH 8220.)</td>
</tr>
<tr>
<td>GLOS 8225</td>
<td>Development and Conflict</td>
<td>3.0</td>
<td>Examines the challenges of political and economic development the impact of foreign aid and intervention in contexts affected by civil war, terrorism, crime and violence in contexts affected by civil war, terrorism, crime and violence. Drawing from a variety of disciplinary perspectives, the course explores the impact of conflict and development, the organization and practice of foreign aid and intervention, and the tensions and trade-offs involved in external involvement in conflict-prone settings. It examines theory, evidence and practice for addressing specific policy challenges including economic development, democratization and governance, justice and the rule of law, security sector reform, urban and rural development, public health and the environment.</td>

HA HEALTH ADMINISTRATION

HA 8160  Introduction to the Health Care System
CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  None
DESCRIPTION  This course introduces and describes the healthcare delivery system and the resources that comprise it. The theoretical basis for the system, as well as the overall planning, organization, management, evaluation, quality, and major health policy issues are discussed.

HA 8190  Health Policy and Ethics
CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  None
DESCRIPTION  This course concentrates on health policy issues in the planning, delivery and organization of health services. Examination of policy issues focuses on the relative roles of the public and private sectors and the control procedures used to implement these policies. Ethical issues and problems and their resolutions are presented within a decision-making framework.

HA 8250  Health Economics and Financing
CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  None
DESCRIPTION  This course explores central problems in the economics and financing of health care services in the U.S. and other economies. The demand, production, cost, and allocation of health care services are examined through the use of a variety of conceptual and empirical models. The effects of financing methods on the availability, quality, and planning of health care are also explored.

HA 8389  Directed Readings in Health Administration
CREDIT HOURS  1.0 - 3.0
PREREQUISITES  Consent of the instructor, good academic standing
DESCRIPTION

HA 8391  Health Administration Field Study
CREDIT HOURS  1.0 - 3.0
PREREQUISITES  None
REQUIREMENTS  None
DESCRIPTION  This course is designed to provide Master of Health Administration students with an opportunity to apply the health administration skills learned at the Robinson College of Business (RCB) is an approved site off campus. The course immerses students in the planning and execution of complex activities involved in both large and small healthcare organizations. The settings for the activities may change over time. While students are under the general supervision of the faculty, they are expected to display responsible independent action and to interact frequently with healthcare executives.

HA 8440  Executive Leadership in Health Care
CREDIT HOURS  3.0
PREREQUISITES  HA 8160 or HA 8190
REQUIREMENTS  None
DESCRIPTION  This course is designed to provide a detailed understanding of the administration and organization of healthcare systems, including analysis of management problems, planning, evaluation, operations, and policy analysis within the healthcare environment.

HIST 6315  Civil Rights Memory in the United States and South Africa
CREDIT HOURS  3.0
DESCRIPTION  This course examines the comparative histories of civil rights and human rights movements in the United States and South Africa, paying particular attention to the way these movements have been memorialized. Students will explore the ways in which movements for social change in both countries have been documented and remembered, looking at memoirs, novels, museum exhibitions, public art and film.

HIST 6320  Metropolitan Atlanta
CREDIT HOURS  3.0
DESCRIPTION  (Same as Geog 6768 and SOCI 6279.) Interdisciplinary perspective focusing on social, historical, and geographic processes which have shaped the Atlanta region.

HIST 6885  Special Topics in Heritage Preservation
CREDIT HOURS  3.0 - 4.0
DESCRIPTION  Analysis of selected topics in public history or historic preservation such as cultural resource management historic site management, museum management or curatorial studies. May be repeated if topics differ.

HIST 6920  Oral History
CREDIT HOURS  4.0
DESCRIPTION  Comprehensive introduction to oral history, its evolution, methodological and theoretical concerns, interviewing techniques, and applications.

HIST 6940  Administration and Use of Historical Archives
CREDIT HOURS  3.0
DESCRIPTION  Creation, preservation, and use of historical records which includes the study of archival principles and techniques; practical experience in the University and local, Federal, and State archival depositories.

HIST 7000  Introduction to Historical Methods and Theory
CREDIT HOURS  4.0
DESCRIPTION  A general introduction to the theoretical and analytical frameworks used by historians, which can include but is not limited to Marxist, gender, anthropological, sociological, cultural, linguistic, and post colonial interpretative methods. Required of all candidates for graduate degrees in history, to be taken in the first year of residence if possible. A grade of B or higher is required of all M.A. and Ph.D. candidates.

HIST 7010  Issues and Interpretations in American History
CREDIT HOURS  4.0
DESCRIPTION  Study and discussion of important historical questions; introduction to the historiography of the field.

HIST 7020  Issues and Interpretations in European History
CREDIT HOURS  4.0
DESCRIPTION  Study and discussion of important historical questions; introduction to the historiography of the field.

HIST 7030  Issues and Interpretations in World History
CREDIT HOURS  4.0
DESCRIPTION  Study and discussion of important historical questions; introduction to the historiography of the field.

<td>U.S. Gilded Age and the Progressive Era</td>
<td>4.0</td>
<td>This graduate seminar engages scholarship about the social, cultural, political, and economic history of the United States during the years between Reconstruction and the economic crash of 1929. We will cover a range of topics, including race and ethnicity, class and economic ideologies, gender, domestic politics, foreign policy, and regional difference. We will also read and discuss a selection of important primary sources from this period.</td>
</tr>
</tbody>
</table>
HIST 8030  Seminar in United States History in the Twentieth Century
CREDIT HOURS 4.0
DESCRIPTION May be repeated if topics vary.

HIST 8035  US Legal & Constitutional History
CREDIT HOURS 4.0
DESCRIPTION Seminar in the historiography and evidentiary materials of United States Legal and Constitutional History. Examines the multiple legalities of colonial America, the debate about the origins and meanings of the Constitution, the law of slavery, and the development of both public and private law through the twentieth century. Intellectual topics will also include metahistorical accounts of law and constitution, as well as theories of jurisprudence and their relation to the lived experience.

HIST 8040  Seminar in U.S. Cultural and Intellectual History
CREDIT HOURS 4.0
DESCRIPTION May be repeated if topics vary.

HIST 8060  Seminar in the History of the South
CREDIT HOURS 4.0
DESCRIPTION Selected topics in the political, social, cultural, and economic history of the antebellum and postbellum South.

HIST 8065  History of Georgia
CREDIT HOURS 4.0
DESCRIPTION This seminar course offers an overview to some of the key currents and developments in Georgia history, from pre-colonial times to contemporary Georgia, as well as the relevant historiography. The course will situate Georgia history within a variety of broader regional, national and international contexts. Furthermore, the course will emphasize the history of both ordinary and prominent Georgians, and will include examples of various subfields of history (i.e., environmental history, social history, labor history, women’s history, political history). This offering is of use to students considering Georgia-related themes for their theses and dissertations, students in the Heritage Preservation Program, and TEEMS students alike, along with students generally interested in the subject.

HIST 8070  Seminar in African-American History
CREDIT HOURS 4.0
DESCRIPTION (Same as AAS 6025.) A three-topic sequence which explores the diversity in African-American ideologies, movements, class and gender. Topics vary according to instructor. May be repeated if topics vary.

HIST 8200  Seminar in Ancient History
CREDIT HOURS 4.0
DESCRIPTION Content alternates between Greece and Rome. May be repeated if topics vary.

HIST 8220  Seminar in Early Modern European History
CREDIT HOURS 4.0
DESCRIPTION Selected topics in the history of early modern Europe. May be repeated if topics vary.

<tr>
<td>HIST 8630</td>
<td>The American Built Environment</td>
<td>3.0</td>
<td>Explores the history, design, and meaning of ordinary buildings in the U.S. from houses and resorts to skyscrapers and factories. Topics include theories of &quot;high&quot; culture and &quot;low,&quot; definitions of house and home, the cultural significance of real estate, and how to assign value to mass-produced landscapes. Students will learn to use buildings as evidence of larger social, economic, and political trends in the 19th and 20th century, and to interpret buildings through methodologies and theories from urban and architectural history, cultural geography, anthropology, and sociology.</td>
</tr>
<tr>
<td>HIST 8635</td>
<td>U.S. Cities</td>
<td>3.0</td>
<td>The history of the U.S. city from colonial times to the present, focusing on spatial development, technological change, and their relationship to civic culture.</td>
</tr>
<tr>
<td>HIST 8640</td>
<td>Preservation Planning</td>
<td>3.0</td>
<td>Planning tools for the identification and preservation of the historic environment. May be repeated if topics vary.</td>
</tr>
<tr>
<td>HIST 8645</td>
<td>Historic Resource Evaluation</td>
<td>3.0</td>
<td>An introduction to the philosophical and practical aspects of historic resource survey and evaluation, including application of the National Register of Historic Places criteria.</td>
</tr>
<tr>
<td>HIST 8650</td>
<td>Historic American Landscapes and Gardens</td>
<td>3.0</td>
<td>American landscapes and gardens with respect to the social, cultural, historical, and geographic factors that influence their design and development.</td>
</tr>
<tr>
<td>HIST 8660</td>
<td>Case Study in International Preservation</td>
<td>4.0</td>
<td>The study of preservation and conservation programs and processes in foreign countries, through lectures, readings, and site visits. Comparison of preservation and public history as it is practiced in foreign programs with the approaches taken in the United States. Field trips abroad are required. May be repeated for credit if topics vary.</td>
</tr>
<tr>
<td>HIST 8665</td>
<td>Cultural Landscape Preservation</td>
<td>3.0</td>
<td>(No prerequisites or restrictions.) Cultural Landscape Preservation is a graduate level course in the Heritage Preservation Program (other graduate students may also register) designed to develop an understanding and vocabulary about cultural landscapes; articulate landscape preservation concepts through verbal and written mediums; understand techniques, processes, and policies related to the documentation and preservation of cultural landscapes; and work collaboratively to develop a Cultural Landscape Report.</td>

<tr>
<td>HIST 8670</td>
<td>Investigating and Documenting Historic Structures</td>
<td>3.0</td>
<td>This course will intensify your knowledge of professional standards and practices for documenting historic structures. Students will be exposed to the processes for investigating and reading historic buildings. Using the National Park Service’s Historic American Building Survey (HABS) standards and guidelines, this class explores both analog and digital processes for documenting and investigating historic buildings.</td>
</tr>
<tr>
<td>HIST 8680</td>
<td>Internship</td>
<td>1.0 - 15.0</td>
<td>Required for students seeking concentration in archival administration. Through a prescribed field experience students are given the opportunity to apply knowledge, theory, and understanding gained from courses. May be repeated if topics vary.</td>
</tr>
<tr>
<td>HIST 8685</td>
<td>Preservation Economics</td>
<td>3.0</td>
<td>This course introduces students to the basic principles of the economics of historic preservation and the financial techniques used to encourage the reuse of historic properties. The course will establish these principles and techniques through discussions and fieldwork related to measuring the economic value of historic places, assessing a historic place’s economic sustainability, and evaluating the long-term economic impacts of preservation policies.</td>
</tr>
<tr>
<td>HIST 8690</td>
<td>American Architectural History</td>
<td>3.0</td>
<td>Major themes in American architecture from European colonization to modernism. Selected architects, buildings, and vernacular traditions are examined.</td>
</tr>
<tr>
<td>HIST 8700</td>
<td>Case Studies in Historic Preservation</td>
<td>3.0</td>
<td>Research seminar in techniques of documentation and analysis of historic sites and districts.</td>
</tr>
<tr>
<td>HIST 8720</td>
<td>Museum Studies</td>
<td>3.0</td>
<td>Comprehensive overview of museums in the U.S., their history, philosophical backgrounds, and ethical issues. Museum management, artifact accession, and exhibition production will be examined.</td>
</tr>
<tr>
<td>HIST 8725</td>
<td>History and Theory of Museums</td>
<td>3.0</td>
<td>This course offers an introduction to the social, cultural, and political history of museums and to museum studies as a theoretical and interpretive discipline. We will focus on the formation of the modern museum and emphasize the U.S. context. Museums have always been conceived as centers for the production and dissemination of knowledge, but what criteria and whose authority determine the categories museums include - categories like art, history, science, nature and civilization. This course will explore these questions by looking at historical and theoretical discourse on museums in course readings and through our own investigation of museums through research and museum visits.</td>

<td>HIST 8730</td>
<td>Exhibit Planning and Production</td>
<td>3.0</td>
<td>This course examines the process by which museums create exhibitions, from planning and research through object identification and selection, community involvement, script and text preparation, design, fabrication, installation and maintenance. The course brings students into contact with theory, and provides application of theory through their conceptualization and installation of an interpretive history exhibition.</td>
</tr>
<tr>
<td>HIST 8740</td>
<td>Material Culture</td>
<td>3.0</td>
<td>Provides an overview of interdisciplinary approaches to diverse material culture traditions including furniture, architecture, decorative arts, clothing and adornment, foodways, and other aspects of material life. Students explore issues of material form and structure, geographic diffusion, function, construction techniques, and multiple ways of understanding material objects in context, including cultural landscapes, performance, consumption, embodiment, and the role of the senses. This course will emphasize material culture as a means of understanding everyday life historically, as well as contexts for the exhibition and interpretation of material objects in contemporary public contexts such as museums.</td>
</tr>
<tr>
<td>HIST 8750</td>
<td>Public History Education Planning and Practice</td>
<td>3.0</td>
<td>This course is intended as an introduction to key theoretical, methodological, and practical issues related to creating public history programs for and with a wider public in a variety of contexts including museums, historic sites, festivals, community projects, and other public history contexts. Students will study best practices in interpretive planning and collaboration, theories of learning, program strategies, and assessment and evaluation techniques.</td>
</tr>
<tr>
<td>HIST 8760</td>
<td>Heritage Tourism</td>
<td>3.0</td>
<td>This course examines Heritage Tourism in the United States by looking at the cultural politics of marketing the past, exploring decisions made by local communities and national institutions about what histories to present to the public.</td>
</tr>
<tr>
<td>HIST 8770</td>
<td>Introduction to Digital History</td>
<td>3.0 - 4.0</td>
<td>This course offers an introduction to the theory and practice of digital humanities. Course content will address the long-term evolution of the historical craft from manuscript to print to digital culture, and explore how new electronic platforms reshape traditional approaches to narrative and argument for historians. Students will consider the ethical, legal, and intellectual concerns involved in using online tools and engaging broader audiences in scholarship. Training sessions bring in outside experts to help students learn to use technologies such as blogs, wikis, podcasts, and digital archives. The course is project-based, allowing students to experiment with different methods as they develop a unique project of digital history by the end of the semester.</td>

HADM HOSPITALITY ADMINISTRATION

HADM 8100 Survey of Hospitality and Tourism

CREDIT HOURS 3.0
PREREQUISITES None
DESCRIPTION A survey of the concepts, principles, problems and practices of hospitality and tourism enterprises and the industry in general. Managerial, operational and organizational issues pertaining to the management of convention venues, hotels, commercial and institutional foodservice and private clubs are covered.

HADM 8300 Hospitality International Field Research

CREDIT HOURS 3.0
PREREQUISITES HADM 8650
DESCRIPTION Students will conduct applied research on hospitality issues in an international setting selected for a study abroad trip for the Masters in Global Hospitality Management cohort.

HADM 8389 Directed Readings in Hospitality Administration

CREDIT HOURS 1.0 - 3.0
PREREQUISITES Consent of instructor, good academic standing
DESCRIPTION

HADM 8400 Financial Management Application in Hospitality Enterprises

CREDIT HOURS 3.0
DESCRIPTION This course presents an overview of finance issues pertaining to the planning and development of hospitality properties. Forms of ownership, tax considerations, financing procedures and costs of capital, capital sources, leases, franchising, valuation of hospitality properties, financial statement analysis, pricing methods, sales analysis, and cash management strategies are covered.

HADM 8500 Economic and Cultural Impact of Travel and Tourism

CREDIT HOURS 3.0
PREREQUISITES None
DESCRIPTION This course provides an overview of the economic and cultural impact of travel and tourism on local, state, regional and national economics. The benefits and costs of tourism development, components of tourism and tourism management, the planning and development of tourism destinations/venues, understanding tourism policy, and tourism organizational are covered.

HADM 8550 Sustainability in the Hospitality Industry

CREDIT HOURS 3.0
PREREQUISITES None
DESCRIPTION This course is an examination of sustainable practices in hotels, restaurants and other hospitality facilities & operations. Topics covered include material use, waste reduction and recycling, water conservation, energy management, site selection, green building design and indoor environmental quality.

HADM 8600 Trends in the Food Service Industry

CREDIT HOURS 3.0
PREREQUISITES None
DESCRIPTION This course provides an overview of the trends and current issues facing domestic and international foodservice enterprises. The course examines the process of managing existing foodservice concepts in a global economy with the emerging issues of food safety and overall security of employees and guests. The history, organization, and development of modern foodservice concepts, industry demographics, and service delivery issues are covered.
HADM 8650  
**Applied Research i Hopspitality and Tourism**

**CREDIT HOURS**  
3.0

**PREREQUISITES**  
None

**DESCRIPTION**  
This course is structured to provide students with an orientation to the scope, meaning, and the basic concepts of scientific research in the field of hospitality and tourism. The foundations of research, research design, data collection techniques, sampling and statistical techniques will be covered. This course enables students to undertake primary research and to critically evaluate research work.

HADM 8700  
**Trends in the Lodging Industry**

**CREDIT HOURS**  
3.0

**PREREQUISITES**  
None

**DESCRIPTION**  
This course provides an overview of the trends and issues in the domestic and international lodging industry and examines the process of managing existing lodging concepts in a global economy. An overview of the historical evolution and development of the hotel industry and the management issues pertaining to modern lodging properties is covered.

HADM 8750  
**International Special Event Management**

**CREDIT HOURS**  
3.0

**PREREQUISITES**  
None

**DESCRIPTION**  
This course offers an analysis of the major components in managing events of various types (including corporate, social, educational, and sporting events) on an international level. Topics include event leadership, financial administration of events, models of global planned events, human resource planning and development, risk management, event marketing and technology utilized in event management.

HADM 8800  
**Hotel Assets**

**CREDIT HOURS**  
3.0

**REQUIREMENTS**  
CSP: 1,2,6,7

**DESCRIPTION**  
Prerequisites. Preequisite: RE 8030, RE 8050, HADM 8400, HADM 8700. This course will focus on the real estate property and physical assets of hotels. Management contract terms will be analyzed as well as current and predicted future trends and issues in hotel management contracts. The negotiation process will also be explored in depth including the pre-selection process, selection of brand/manager and actual rounds of negotiation. The resulting owner-manager relationship will be evaluated including franchise and chain affiliation programs. Students will have the opportunity to apply their knowledge in analyzing existing contracts representing varied ownership-management structures. This course will also discuss acquisition due diligence including evaluation of the lodging asset. The hotel investment decision components of buy, hold and sell will be analyze.

IB INTERNATIONAL BUSINESS

**IB 5000**  
MIB Energizer Orientation

- **CREDIT HOURS**: 0.0  
- **PREREQUISITES**: None  
- **REQUIREMENTS**: All MIB students must enroll in IB 5000 in their first semester of enrollment  
- **DESCRIPTION**: This course is for zero credit, and there is no charge. It is graded on a Satisfactory/Unsatisfactory basis. The objectives of the orientation program are: 1. To develop a sense of community and identify for the MIB students. 2. To begin the process of program planning and career planning, including internship details, community resources, mentor program. 3. To enhance cultural awareness through exercises and develop classroom skills through case study & team building exercises.

**IB 8080**  
Legal Aspects of International Business

- **CREDIT HOURS**: 3.0  
- **PREREQUISITES**: None  
- **REQUIREMENTS**: Students not enrolled in MIB must obtain instructor consent  
- **DESCRIPTION**: This course addresses the business and legal issues of international business and commercial transactions. The course addresses types of international business transactions: import/export, distributorships, technology transfers, and foreign direct investment. The course also addresses the international regulation of trade and international dispute resolution. Students gain practical skills, including negotiating international contracts, working with overseas agents and partners, protecting intellectual property rights, and evaluating foreign markets for investment. Teaching methodologies vary and may include: hands-on work with international business documents, in-class problems and activities, case studies on foreign markets, contract negotiations, and guest speakers from consulates.

**IB 8085**  
International Business Analysis

- **CREDIT HOURS**: 3.0  
- **DESCRIPTION**: Data and numbers are critical for conducting the analysis necessary for international business decision making. Using basic financial and managerial accounting concepts, the course will focus on analyzing, using and interpreting information found in the financial statements with an emphasis on the different perspectives of various domestic and international stakeholders. Decision making tools and analysis will include those such as ratio analysis, cost planning and control, relevant variable analysis, capital budgeting, and current topics with international implications.

**IB 8090**  
International Business Environment

- **CREDIT HOURS**: 3.0  
- **PREREQUISITES**: None  
- **REQUIREMENTS**: None  
- **DESCRIPTION**: This course is divided into two parts. The first part provides an intensive study of the changing economic, political, financial, and cultural environment in which organizations compete, both traditionally and digitally. The second part of the course encompasses specific business operations through a global lens, including import, export, counter trade, manufacturing and materials management; marketing and research and development; human resource management; accounting; and financial management.
Analyzing International Business Problems

CREDIT HOURS: 3.0
PREREQUISITES: None
DESCRIPTION:
The course reviews and applies the fundamental analytical frameworks in international and cross-cultural business. The course has a primary focus on models and decision support tools for making optimal decisions encountered by the firm in international market entry and expansion. The perspective is of the manager who integrates data, insights, and intelligence with decision making tools in order to arrive at rational choices in internationalization. Managerial decisions addressed in the course include: international market opportunity analysis; assessment of foreign market entry risk; international market research; cross cultural frameworks for analyzing customers; foreign location analysis; and others.

International Entrepreneurship

CREDIT HOURS: 3.0
PREREQUISITES: IB 8090 or consent of instructor
DESCRIPTION:
This course considers theory, research, and practical advice about how to take a small- or medium-sized business or a new venture (traditional or dot.com) international. In addition to readings and lectures, students explore complex written cases and participate in class discussions with visiting speakers involved with international entrepreneurship. In a major project, students explore the feasibility of an international business venture.

Doing Business in Emerging Markets

CREDIT HOURS: 3.0
PREREQUISITES: None
DESCRIPTION:
Emerging markets are rapidly developing and transitioning economies characterized by industrialization, urbanization and a growing middle class. This course explores the potential and challenges of emerging markets as compared with more developed economies and the less developed business environments. Focusing on how countries develop comparative and competitive advantages, the course covers the nature of institutions and growth factors, as well as the global trade and capital flows, that shape growth, risks and volatility in business environments today.

Doing Business in World Regions

CREDIT HOURS: 3.0
PREREQUISITES: None
DESCRIPTION:
In this course, you creatively adapt your business model to the peculiarities of foreign markets. You find that doing business in our focal world region of greater Asia involves a complex consideration of corporate strategy, local and regional environments, ever-changing consumer behaviors, competitor actions, and a host of other dynamics. The course will involve lecture and discussion of relevant concepts, individual and team presentations, and computer-based simulation of foreign market expansion.

<td>This seminar provides doctoral candidates with a comprehensive overview of the field of international business. We address an eclectic assortment of theoretical and empirical approaches to the study of cross-border business. We explore interesting research questions raised by the interdisciplinary literature. An important objective is to familiarize participants with the evolution of thought in international business, theory of the MNC, and contemporary perspectives. Each participant is given an opportunity to frame and design potential research projects in the field.</td>
</tr>
</tbody>
</table>
IB 9920  Cultural Frameworks and Cross-Cultural Behavior

CREDIT HOURS 3.0

PREREQUISITES None

DESCRIPTION The primary objective of the seminar is to examine the conceptual foundations of culture and how culture affects organizational behavior in comparative and multicultural contexts. Conceptualizations of culture are studied from a number of different disciplinary perspectives. We examine how alternate conceptualizations of culture influence research design issues. Also addressed are critical methodological issues in implementing a cross cultural study, with a particular focus on psychometric considerations, as well as recent research on the ways in which cultures vary. We also investigate how national culture affects teams, leadership, conflict, and negotiation.

IB 9930  Global Interorganizational Relationships

CREDIT HOURS 3.0

PREREQUISITES None

DESCRIPTION This seminar provides an in-depth review and analysis of inter-enterprise relationships in an international context, tracing key theoretical and empirical literature. Cross-border trading arrangements involve organizational actors from different cultural and institutional settings, necessitating the use of multiple theoretical perspectives to assess the complex structure and processes. Also discussed are contemporary forms of international business phenomena such as global supply chains, international strategic alliances, and other cross-border, enterprise arrangements.

<td>Sport Organizational Behavior</td>
<td>3.0</td>
<td>For individuals entering into the sport and recreation industry, it is critical to understand the behavior of individuals and groups within sport organizations. Managers need to understand the people that work for them and the people for whom they work. They also need to know that the context and the type of organization influence the people within it. This course is intended to provide students with a comprehensive coverage of managing the most critical aspect of any organization: its employees.</td>
</tr>

<td>Curriculum Development for Health, Physical Education, and Adaptive Physical Education</td>
<td>3.0</td>
<td>This is a completely online course during which students examine curriculum theory and contemporary curriculum models for health, physical education and adapted physical education. Students learn how to develop a standards-based curriculum for an inclusive K-12 HPE program.</td>
</tr>
<tr>
<td>KH 7440</td>
<td>Sport Communication and Media</td>
<td>3.0</td>
<td>The purpose of this class is to provide an overview of sport communication and media relations as they pertain to sport organizations. The class will focus on how sport organizations utilize and manage the media as an advantageous part of marketing. Specifically, discussions will center around the history of sport media, sport media outlets, impact of media on sport consumers, understanding of the strategic planning process, sports information roles, placement of stories, and the management of press conferences, press releases, websites, social media, sensitive situations and game operations.</td>
</tr>
<tr>
<td>KH 7460</td>
<td>Using Popular Culture to Reduce Youth Risk Behaviors</td>
<td>3.0</td>
<td>This course explores the six major adolescent health risk behaviors documented by the Youth Risk Behavior Survey (CDC), examines the direct and indirect relationship between risk behaviors and popular culture. Additionally, the course emphasizes how to use popular culture in teaching secondary health education.</td>
</tr>
<tr>
<td>KH 7470</td>
<td>Using Technology to Assess in Health, Physical Education, and Adapted Physical Education</td>

<tr>
<td>KH 7480</td>
<td>Curriculum Development for Health, Physical Education, and Adapted Physical Education</td>
<td>3.0</td>
<td>A study of curriculum development in health and physical education focusing on current theories and models including factors affecting the curriculum, proper scope and sequence, scheduling, implementation and change theories, and curriculum evaluation techniques.</td>
</tr>
<tr>
<td>KH 7500</td>
<td>Physiology of Exercise</td>
<td>3.0</td>
<td>Physiology of Exercise (KH 3650) or consent of instructor. Students examine the acute responses and chronic adaptations of human physiological systems to exercise and physical activity, including bioenergetics, neuromuscular, cardiovascular, pulmonary, endocrine, and renal systems. Factors affecting exercise performance are evaluated including ergogenic aids, environmental conditions, age, and gender.</td>
</tr>
<tr>
<td>KH 7510</td>
<td>Biomechanics</td>
<td>3.0</td>
<td>Biomechanics (KH 3600) or consent of instructor. Students investigate the anatomical and mechanical factors which influence human motion and perform analyses of complex human motions with the goal of optimizing human movement performance.</td>
</tr>
<tr>
<td>KH 7610</td>
<td>Sport Law</td>
<td>3.0</td>
<td>Students apply law to selected aspects of education, commercial, and professional sports.</td>
</tr>
<tr>
<td>KH 7662</td>
<td>Internship in Sports Management</td>
<td>1.0 - 6.0</td>
<td>Consent of faculty adviser and consent of instructor. Course is graded as satisfactory/unsatisfactory. A minimum grade of &quot;S&quot; is required for this course. Students receive practical administrative experience in a selected sport setting. Internship may extend beyond one term.</td>
</tr>
<tr>
<td>KH 7680</td>
<td>Sport Marketing Field Research</td>
<td>3.0</td>
<td>This course provides an introduction to and hands-on experience of sport marketing survey research conducted in real sport business settings. Every sport business must have reliable information about consumers to make decisions and develop successful marketing plans. Sports consumer research is what provides this complex and essential data. Through developing an understanding of the sports consumer, marketers are able to develop strategies to enhance the sports product or event experience, while identifying key factors that affect the consumers' decision-making process, consumer spending trends, sports tourism, sponsor, and stakeholder data, and event and facility experience.</td>
</tr>
<tr>
<td>KH 7690</td>
<td>Practicum in Sports Administration</td>
<td>1.0 - 3.0</td>
<td>Course is graded as satisfactory/unsatisfactory. A minimum grade of &quot;S&quot; is required for this course. Students gain practical experience in sports marketing, sports information, coaching, or related areas of sports administration through a supervised experience in an appropriate sport setting. Practicum may extend beyond one term.</td>
</tr>
</tbody>
</table>
KH 7710  Practicum in Exercise Science  
CREDIT HOURS 1.0  
PREREQUISITES Completion of all course work (except KH 7750) and permission of instructor  
DESCRIPTION Students must pass a standardized exit exam to complete this requirement. A minimum grade of "S" is required for this course.

KH 7750  Internship in Exercise Science  
CREDIT HOURS 6.0  
PREREQUISITES KH 4350, KH 4360, KH 4630, KH 7500  
REQUIREMENTS Course is graded as satisfactory/unsatisfactory  
DESCRIPTION A minimum grade of "S" is required for this course. Provides students with practical experience in a specific area of professional interest such as corporate fitness/work site health promotion, cardiac rehabilitation, hospital-based wellness, community or commercial fitness, etc. A total of 250 contact hours must be completed. Internship may extend beyond one term.

KH 7780  Drug Use Prevention and Intervention  
CREDIT HOURS 3.0  
DESCRIPTION This course addresses family, school, and community factors placing children and youth at risk for tobacco, alcohol, and other drug use; investigates tobacco, alcohol, and other drug effects on child and adolescent health and academic performance; and emphasizes prevention and risk reduction strategies appropriate for inclusion in coordinated and comprehensive school health education.

KH 7785  Public Policy and Sport  
CREDIT HOURS 3.0  
DESCRIPTION The purpose of this course is to explore the many ways in which sport pervades the sociopolitical sphere, both domestically and abroad. Students will identify, analyze, and critique the diverse arguments related to sport's functions in issues including, but not limited to, politics, human rights, urban and regional planning, and international diplomacy, as well as government's role in sport administration and governance. By developing understanding of the ways in which sport shapes public policy and vice versa, students will gain a great appreciation of how the decisions they make as leaders in the sport industry can carry broader social, political, and cultural significance.

KH 7790  Current Issues in School Health and Physical Education  
CREDIT HOURS 3.0  
DESCRIPTION This course will provide students with opportunities to learn about, discuss, and present positions on important new issues and policies related to P-12 Health and Physical Education (including inclusive and adapted physical education). Course readings will cover a variety of topics that reflect current developments in the design and implementation of school HPE programs, including new federal and state policies that impact the conduct of those programs.
KH 7810 Directed Readings and Research
CREDIT HOURS 1.0 - 6.0
PREREQUISITES consent of instructor
REQUIREMENTS A directed reading may extend beyond one term
DESCRIPTION Course is graded as satisfactory /unsatisfactory. A minimum grade of "S" is required for this course. With the assistance of a faculty member, the student plans and implements an independent study project or research. A Directed Reading Form is available from the Office of Academic Assistance and Graduate Admissions and requires consultation with the instructor of choice to develop the topic of study, approval by the student's advisor, and approval by the chair of the department. (Repeatable).

KH 7850 Introduction to Action Based Research for Health, Physical Education and Adapted Education
CREDIT HOURS 3.0
DESCRIPTION Students will learn about evidence-based practice and action research in health, physical education and adapted physical education. The course leads to the development of an action research project in the student's school to be completed in KH 7870.

KH 7855 Instructional Assessment and Program Evaluation in Health, PE and Adapted PE
CREDIT HOURS 3.0
DESCRIPTION Students will be exposed to a variety of assessment instruments for evaluating motor skill performance, physical fitness and behavior and social competence. Students will use these instruments and gain experience translating assessment data into evidence based practice for program evaluation, curriculum planning and differentiated and individualized instruction.

KH 7870 Action Research Project Health, Physical Education and Adapted Education
CREDIT HOURS 3.0
PREREQUISITES KH 7850
DESCRIPTION Students will complete an action research project in their schools based on their approved proposal in KH 7850.

KH 7875 Seminar for Graduate Assistants
CREDIT HOURS 3.0 - 18.0
REQUIREMENTS Course is graded as satisfactory/unsatisfactory
DESCRIPTION A minimum grade of "S" is required for this course. This course is designed to inform the students of policies and procedures to complete an assistantship. Professional ethics associated with teaching, research planning, management, and accounting procedures are reviewed. The course focuses on the teaching and research being conducted in order to further the understanding of all students involved in teaching and research. (Repeatable).

KH 7975 Seminar for Graduate Assistants
CREDIT HOURS 3.0 - 18.0
REQUIREMENTS Course is graded as satisfactory/unsatisfactory
DESCRIPTION A minimum grade of "S" is required for this course. This course is designed to inform the students of policies and procedures to complete an assistantship. Professional ethics associated with teaching, research planning, management, and accounting procedures are reviewed. The course focuses on the teaching and research being conducted in order to further the understanding of all students involved in teaching and research. (Repeatable).

KH 7990 Master's Thesis
CREDIT HOURS 1.0 - 6.0
PREREQUISITES consent of adviser
REQUIREMENTS The master's thesis is graded as satisfactory/unsatisfactory
DESCRIPTION A minimum grade of "S" is required for this course. Master's-level students in exercise science or sports medicine conduct research and complete a formal thesis. Research may extend beyond one term.

KH 8350 Supervision in Instructional Settings
CREDIT HOURS 3.0
DESCRIPTION Provides education and training in the skills, knowledge and attitudes needed by a student teacher supervisor, mentor, and coach.

<td>KH 8600</td>
<td>Physical Activity Interventions and Behavior Change</td>
<td>3.0</td>
<td>KH 6280 or consent of instructor Study and discuss the psychological and behavioral perspectives of physical activity promotion, theoretical strategies to promote physical activity, and research-based interventions to change physical activity behavior for a variety of populations including those with special needs such as older adults, children and adolescents, and persons with disabilities.</td>
</tr>
</tbody>
</table>
**KH 8610  Curriculum Theory in Physical Education**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Approval of instructor

**DESCRIPTION**
Students will become familiar with several major contemporary theories that guide the design and implementation of P-16 physical education programs. Included theories will be: constructivism, social learning, critical analysis, behaviorism, health promotion, and cognition. Students will articulate their personal theory regarding physical education curriculums to compare and contrast with the major theories presented in KH 8610.

**KH 8620  Assessment Theory in Physical Education**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Approval of instructor

**DESCRIPTION**
Students will become familiar with several major contemporary theories that guide the assessment of teaching and learning in P-16 physical education programs. Students will articulate their personal positions regarding assessment theory and current assessment practices in physical education in KH 8620.

**KH 8630  Instructional Design for Physical Education**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Approval of instructor

**DESCRIPTION**
Students will learn how to design instructional systems that can be used to achieve intended learning outcomes in a variety of physical education settings. Students will become familiar with the relevant literature in learning psychology as it can be applied in P-16 physical education instruction. Students will develop a unique instructional system in KH 8630.

**KH 8650  Physical Education for Students with Developmental, Physical, and Sensory Disabilities**

**CREDIT HOURS**
3.0

**DESCRIPTION**
This course will provide K-12 Health and Physical Education teachers with techniques and knowledge for the design and implementation of effective instruction for students with disabilities in inclusive and self-contained physical education settings.

**KH 8655  Inclusion Through Disability Sport**

**CREDIT HOURS**
3.0

**DESCRIPTION**
This course is designed for K-12 health and physical educators and professionals in the field of sport and physical activity interested in working with individuals with disabilities. Through sport participation, students will learn the fundamental skills, rules, and strategies of selected disability sports and be able to develop programs for individuals with and without disabilities using games and activities derived from the field of disability sport.

**KH 8665  Assessment and Curriculum Development for Students with Disabilities**

**CREDIT HOURS**
3.0

**DESCRIPTION**
This course is designed for K-12 health and physical educators and professionals who are interested in gaining knowledge and skill regarding the implementation of and effective use of assessment data in the development of appropriate physical education curriculum and instruction for students with disabilities.
KH 8680  International Experience in Sport and Exercise Science

CREDIT HOURS  3.0

DESCRIPTION  This course is designed for graduate students to gain an international perspective on sport and exercise science. Students will learn to apply knowledge in sport and exercise science and gain field experience through a study-abroad program. Topics will include principles in sports biomechanics, materials in sports equipment, and research methods in exercise science.

KH 8685  Instructional Supervision and Teacher Development in Physical Education

CREDIT HOURS  3.0

PREREQUISITES  Approval of instructor

DESCRIPTION  This course will develop knowledge and skills needed for the supervision of instruction in physical education and the mentoring of preservice and inservice physical education teachers. Topics will include: models of instructional supervision, effective communication, support for teacher development, and teacher-coaching skills.

KH 8690  Technology in Physical Education Instruction and Teacher Education

CREDIT HOURS  3.0

PREREQUISITES  Approval of instructor

DESCRIPTION  This course will develop knowledge and skills needed to effectively implement technology-based instruction in P-12 physical education instruction and physical education teacher education programs. A variety of topics will cover hardware, software, applications, and distance learning technologies that can be applied to instruction and the training of physical education teachers.

KH 8695  Grant Writing and Fundraising in Health, PE, and APE

CREDIT HOURS  3.0

DESCRIPTION  This class will introduce students to various types of grants and fundraising in health, physical education, and adapted physical education for K-12 schools. Students will be exposed to strategies needed to secure funding for K-12 programs.

KH 8770  Advanced Topics in Exercise Physiology: Neuromuscular Physiology

CREDIT HOURS  3.0

PREREQUISITES  KH 7500

DESCRIPTION  This course is designed to develop advanced knowledge by critically evaluating research literature on specific topics in neuromuscular physiology. Discussion and research presentations are required as students review topics such as muscle fiber type plasticity, motor unit recruitment, skeletal muscle mechanics, exercise-induced muscle injury and fatigue, and skeletal muscle adaptation to exercise.
**KH 8771**  
**Advanced Topics in Exercise Physiology: Cardiovascular Physiology**

**CREDIT HOURS** 3.0  
**PREREQUISITES** KH 7500 or consent of instructor  
**DESCRIPTION** The objective of the course is to provide students with an in-depth understanding of the cardiovascular system. The central theme of the course will focus on the idea that arterial pressure is the regulated variable of the cardiovascular system. Topics in this course will include (but are not limited to): 1) baroreflex control of arterial pressure at rest and during exercise, 2) autonomic control of heart rate and the peripheral vasculature, 3) mechanisms of sweating, skin blood flow, and human thermoregulation, 4) mechanisms underlying the cardiovascular response to dynamic exercise, 5) regulation of blood flow and CO at rest and during exercise, and 6) cardiovascular responses to chronic physical activity and inactivity. Major emphasis in this class will be placed on reading the primary research literature and discussing/understanding the experimental data.

**KH 8772**  
**Advanced Topics in Exercise Physiology: Bioenergetics**

**CREDIT HOURS** 3.0  
**PREREQUISITES** KH 7500 or consent of instructor  
**DESCRIPTION** This course is designed to develop advanced knowledge by synthesizing existing research literature on selected topics in exercise bioenergetics. Discussion and research presentations are required as students review such topics as metabolism and exercise, bioenergetics, energy transfer, exercise and physical training.

**KH 8773**  
**Advanced Topics in Exercise Physiology: Chronic Disease and Myopathies**

**CREDIT HOURS** 3.0  
**PREREQUISITES** KH 7500 or consent of instructor  
**DESCRIPTION** This course will be centered on the American College of Sports Medicine initiative “Exercise is Medicine.” Delivered in seminar-style format, we will discuss the development and symptoms of various disease states or chronic conditions (HIV, congestive heart failure, diabetes, muscular dystrophy, cancer, inactivity, obesity, etc.). While traditional medical treatments will be considered, the true focus of this course will be to explore the impact that exercise, as well as physical inactivity, have on each condition. Students will read current literature, and deliver presentations to the class.

**KH 8825**  
**Research Design**

**CREDIT HOURS** 3.0  
**DESCRIPTION** This course is designed to help students understand how to select topics, design research protocols and complete research prospectus in the area of kinesiology.

**KH 8830**  
**Motion Analysis**

**CREDIT HOURS** 3.0  
**DESCRIPTION** Explores the principles of observational and instrumented motion analysis, focusing on human motion and including instrumentation, data collection and analysis, and biomechanical modeling of kinematics, kinetics, and muscle function.

<td>Advanced Topics in Exercise Psychology</td>
<td>3.0</td>
<td>KH 6280 or consent of instructor</td>
<td>This course examines, in depth, contemporary topics and issues in the field of exercise psychology. Topics to be covered may include current physical activity epidemiology, current motivational, and methodological issues associated with exercise adoption and adherence, and current developments associated with the mental health benefits of exercise.</td>
</tr>
<tr>
<td>KH 9290</td>
<td>Current Topics in Sport Administration</td>
<td>3.0</td>
<td></td>
<td>The course will familiarize students with the current topics, trends, and research in the sport industry. Specifically, students will be able to examine the current trends in both practice and theory to identify gaps in the literature and content for exploration in practice.</td>
</tr>
<tr>
<td>KH 9480</td>
<td>Exercise for Mental Health: Mechanisms and Applications</td>
<td>3.0</td>
<td>EPRS 8500 and KH 8825 or consent of the instructor</td>
<td>This course examines scientific evidence of neurobiological mechanisms and practical applications of exercise for mental health. Topics to be covered may include current evidence for the effects of exercise on a wide range of mental health outcomes (e.g., depression, anxiety, addiction, ADHD), their underlying neurobiological mechanisms, and practical applications of evidence to date.</td>
</tr>
<tr>
<td>KH 9520</td>
<td>Advanced Exercise Physiology: Energy Metabolism</td>
<td>3.0</td>
<td>CHEM 6610 and consent of instructor</td>
<td>Students gain advanced training on the influence of selected external and internal factors on the body during exercise. The focal topics include energetics of muscular activity, recovery from exercise, and the biochemical basis for muscular fatigue.</td>
</tr>
</tbody>
</table>
KH 9530  Advanced Exercise Physiology: Cardiorespiratory

CRedit hours  3.0

PREREQUISITES  15 hours of university residency or consent of instructor

DESCRIPTION  Students discuss the effects of exercise on the cardiorespiratory system as well as skeletal muscle. Students review and analyze current research. Selected laboratory exercises are conducted to illustrate concepts.

KH 9550  Advanced Exercise Physiology: Myocellular

CRedit hours  3.0

PREREQUISITES  CHEM 6610

DESCRIPTION  Students critically evaluate the literature addressing mechanisms regulating the plasticity of skeletal muscle cells. Understanding structure-function relationships of muscle organelles and cells as well as current models of muscle degeneration, repair, regeneration, and growth are examined in detail.

KH 9560  Neuromechanics of Human Locomotion

CRedit hours  3.0

PREREQUISITES  KH 7510 or consent of instructor

DESCRIPTION  This course is designed for graduate students to gain the knowledge on the interactions of the neural and musculoskeletal systems in human locomotion. Students will learn to use the basic biological and mechanical principles to solve human locomotion questions both qualitatively and quantitatively. Topics will include the neural and musculoskeletal systems in humans, neuromechanical control of movement, and neural and physical rehabilitation.

KH 9570  Advanced Theory in Sport Administration

CRedit hours  3.0

DESCRIPTION  The sport administration discipline is broad and grounded in classic management, marketing, communication, ethical, financial, and legal theory. This course is intended to provide students with comprehensive coverage of the development of sport administration theory, both in its history and the contemporary sport specific theories that are adopted and tested today.

KH 9610  Sport Consumer Behavior

CRedit hours  3.0

DESCRIPTION  This course is intended to provide students with comprehensive coverage of sport spectator consumer behavior with an emphasis on theory development, review of research, and marketing applications. Various models and paradigms relevant to sport spectator consumption behavior will be examined.

KH 9660  Analysis of Teaching Physical Education

CRedit hours  3.0

PREREQUISITES  Approval of instructor

DESCRIPTION  Students will acquire the knowledge and skills needed to conduct systematic analyses of teaching and learning in physical education. Specific attention will be given to designing and validating systems for the direct observation and analyses of teaching/learning interactions and process-product variables.
KH 9670 Models of Teacher Education in Physical Education
CREDIT HOURS 3.0
PREREQUISITES Approval of instructor
DESCRIPTION Students will become familiar with major contemporary models used in the design, implementation and assessment of physical education teacher education (PETE) programs. The underlying philosophical and/or empirical basis of each model will be presented and analyzed. Students will present and defend a PETE program design of their own in this course.

KH 9680 Internship in Adapted Physical Activity (APA)
CREDIT HOURS 1.0 - 3.0
DESCRIPTION This course was created to provide structure and professional development for students completing their Ph.D. in Kinesiology with a concentration in Physical Education Teacher Education with a cognate in Adapted Physical Education within the Department of Kinesiology and Health. This course is designed to provide intensive experiences for students to work with individuals with disabilities in sport, physical education and recreation settings under the supervision of a faculty member. The goal of the course is to give doctoral students an opportunity to continue to develop practical skills working with individuals with disabilities. In so doing students bring real life experiences with them to their college classroom and will continue to be connected to the issues professionals face while working with students with disabilities in sport and educational settings. This understanding will lead to better collaborations between schools, not-for-profit agencies and institutions of higher education and increased advocacy for students with disabilities at all levels. (Repeatable).

KH 9620 Research in Kinesiology
CREDIT HOURS 1.0 - 6.0
PREREQUISITES consent of instructor
REQUIREMENTS Course is graded as satisfactory/unsatisfactory
DESCRIPTION A minimum grade of “S” is required for this course. Prior to registration, the student must submit a proposal (including goals and objectives, research activities and expected outcomes, and evaluation criteria) to his or her Doctoral Advisory Committee. The student works under the direct guidance of a faculty member to develop and apply research skills in sport science. Research activities may include learning and implementing relevant research techniques as well as designing, conducting, and presenting an original research study. Research may extend beyond one term. (Repeatable).

KH 9830 Research on Teaching and Learning in Physical Education
CREDIT HOURS 3.0
PREREQUISITES Approval of instructor
DESCRIPTION Students will become familiar with the empirical research on teaching and learning in P-16 physical education programs. Course content will include extensive readings from multiple paradigms of inquiry in this field, including quantitative, qualitative, mixed-methods, and meta-analytic research. Students will complete a comprehensive review of research on one line of inquiry on teaching and/or learning in physical education.

KH 9840 Grant Proposal Writing in Health, Physical Education and Adapted Physical Activity
CREDIT HOURS 3.0
DESCRIPTION This course provides students in Health, Physical Education and Adapted Physical Activity with an opportunity to understand the grant writing process, demonstrate grant writing skills, and examine ethics in higher education.
KH 9960  **Advanced Research Seminar in Kinesiology**

**CREDIT HOURS**  1.0 - 4.0

**DESCRIPTION**  Current research topics and techniques and professional development activities are discussed in group sessions with program faculty. Students complete complementary individual research projects.

KH 9990  **Dissertation**

**CREDIT HOURS**  1.0 - 18.0

**REQUIREMENTS**  Course is graded as satisfactory/unsatisfactory

**DESCRIPTION**  A minimum grade of "S" is required for completion of the dissertation. The student engages in dissertation research approved by his or her committee. Successful completion requires a significant contribution to knowledge in the area of sport science. Dissertation may extend beyond one term. (Repeatable).

<tr>
<td>EDLA 6400</td>
<td>Theory and Pedagogy of Middle Level Language Arts Instruction</td>
<td>3.0</td>
<td>This course provides theory and pedagogical content knowledge necessary for effective middle school instruction in language arts. Students engage in lesson and curriculum planning, explore various teaching strategies and methods, and develop the reflective practices necessary for teaching middle grades language arts.</td>
</tr>
<tr>
<td>EDLA 6550</td>
<td>Principles of English Instruction</td>
<td>3.0</td>
<td>Students examine instructional procedures, teaching strategies, technology, and evaluation procedures for middle and secondary school English.</td>
</tr>
<tr>
<td>EDLA 7150</td>
<td>Children's and Adolescents' Literature</td>
<td>3.0</td>
<td>In this course students read widely from the body of literature for children and adolescents, examine selected texts in terms of theories of literary criticism, and evaluate books on the basis of literary quality, the characteristics and needs of contemporary young people, and relevance for the teaching of literature.</td>
</tr>
<tr>
<td>EDLA 7440</td>
<td>Theory and Pedagogy in the Study of Literature</td>
<td>3.0</td>
<td>This course focuses on the relationship between the reader and the literary text, examining assumptions about the nature of literature, the characteristics and patterns of readers, the processes of reading, responding to, and interpreting texts, and implications for teaching.</td>
</tr>
<tr>
<td>EDLA 7460</td>
<td>Theory and Pedagogy in the Study of Writing</td>
<td>3.0</td>
<td>In this course students examine theory and research in rhetoric and composition, study the problems of teaching and assessing writing, and examine various designs and strategies of instruction. Students also investigate their own writing habits and patterns with the purpose of improving writing instruction in the schools.</td>
</tr>
<tr>
<td>EDLA 7480</td>
<td>Theory and Pedagogy in the Study of the English Language</td>
<td>3.0</td>
<td>This course engages students in a study of theory and pedagogy related to the teaching of the English language. The course focuses on various instructional methods used to help students gain oral and written discourse competence in a multicultural society. Topics include teaching English grammar and usage as well as the social, political, cultural, and historical influences on language variation and change.</td>
</tr>
<tr>
<td>EDLA 7550</td>
<td>Theory and Pedagogy of English Instruction</td>
<td>3.0</td>
<td>Examines current issues in strategies, materials, and technology related to the teaching and learning of English at the middle school and secondary levels. Current literature in English curriculum, teaching, and research in English education are investigated.</td>
</tr>
</tbody>
</table>
EDLA 8330  Language Variation and Learning

CREDIT HOURS  3.0

DESCRIPTION  Restricted to Ed.D. or Ph.D. students. This course focuses on language characteristics marking regional, ethnic, and social variations of American English. Emphasis is on learning problems arising from linguistic differences and on strategies and materials for students from diverse language backgrounds.

<tr>
<td>LT 7100</td>
<td>Design of Performance and Instructional Systems</td>
<td>1.0 - 3.0</td>
<td>This course provides students with an in-depth study of instructional design and technology topics such as Conducting Needs and Instructional Analysis; Instructional Strategies and Detailed Design; and Developing, Implementing, and Evaluating Instructional or Performance Systems. Topics may change. (Repeatable).</td>
</tr>
<tr>
<td>LT 7110</td>
<td>Instructional Design for School-Based Settings</td>
<td>3.0</td>
<td>This course provides students with the knowledge, skills, and dispositions needed to apply current principles of learning and instruction to the systematic design of learning experiences in school-based settings. Special attention is paid to topics specific to learning in school settings, including unit and lesson planning, learning, assessment, classroom management, content and technology standards, authentic learning, differentiation, cooperative learning, and the design, development, and management of learning experiences for both school-aged children and professional development for (adult learner) teacher populations. Students create an instructional or performance system in a real world context.</td>
</tr>
<tr>
<td>LT 7150</td>
<td>Analysis of Performance and Instructional Systems</td>
<td>3.0</td>
<td>This course provides students with the skills and knowledge needed to conduct all aspects of a well-designed analysis of performance and instruction systems. Students will conduct &quot;real world&quot; analysis of performance problems in school or business settings to determine the most appropriate solution.</td>
</tr>
<tr>
<td>LT 7360</td>
<td>Integrating Technology in School-Based Learning Environments</td>
<td>3.0</td>
<td>This course provides teachers with the skills and knowledge to design and create technology-enhanced classroom environments. Design and creation of products for student-centered learning environments takes place through numerous activities with various technologies.</td>
</tr>
<tr>
<td>LT 7500</td>
<td>Digital and Information Literacy</td>
<td>3.0</td>
<td>A renewable certificate, level 4 or higher, in a content area other than Computer Science at any grade level (P-12), or another eligible field specified in PSC Educator Preparation Rules. Service or leadership certificates do not qualify as teaching certificates. The course will teach students about digital literacy (i.e., cybersecurity and use of computer and mobile apps) and information literacy (i.e., data science and modeling) literacy. As we explore these topics, we will concurrently explore methodologies to teach the topics in K-12. We will also discuss the creation of digital artifacts and cyber-ethics in this course.</td>
</tr>
</tbody>
</table>
### LT 7501 Computational Thinking and Human-Computer Interaction

**CREDIT HOURS** 3.0

**PREREQUISITES** A renewable certificate, level 4 or higher, in a content area other than Computer Science at any grade level (P-12), or another eligible field specified in PSC Educator Preparation Rules

**DESCRIPTION** Service or leadership certificates do not qualify as teaching certificates. The course will introduce students to computational thinking concepts and practices as well as human-computer interaction (HCI) design and display principles. As we explore these topics, we will concurrently explore methodologies to teach the topics in K-12. We will also discuss various components of computer science and the programming environments and non-computer tools that can be used to teach computational thinking without over-emphasizing coding.

### LT 7502 Computer Science Instructional Methods

**CREDIT HOURS** 3.0

**PREREQUISITES** A renewable certificate, level 4 or higher, in a content area other than Computer Science at any grade level (P-12), or another eligible field specified in PSC Educator Preparation Rules

**COREQUISITES** LT 7503

**DESCRIPTION** Service or leadership certificates do not qualify as teaching certificates. LT 7500 and LT 7501 with grades of "C" or higher. Students develop skills in creating instruction, learning activities and assessments for computing concepts and practices. Students will be introduced to and evaluate resources from the public and private sector that support K-12 computing education. Students will also develop a plan for managing courses held in computer labs or instructional environments that use laptops, mobile devices and other forms of technology.

### LT 7503 Computer Science Concepts for Teachers

**CREDIT HOURS** 3.0

**PREREQUISITES** A renewable certificate, level 4 or higher, in a content area other than Computer Science at any grade level (P-12), or another eligible field specified in PSC Educator Preparation Rules

**COREQUISITES** LT 7502

**DESCRIPTION** Service or leadership certificates do not qualify as teaching certificates. LT 7500 and LT 7501 with grades of "C" or higher. The course will introduce students to computer science concepts that are specified in the PSC standards for a Computer Science Endorsement program. The main topic areas include programming in Java, data structures, and networks. The course is taught concurrently with LT 7502 Computer Science Instructional Methods to help students to translate the concepts that they are learning for use in their classrooms.

### LT 7504 Computer Science Concepts for Teachers

**CREDIT HOURS** 3.0

**PREREQUISITES** A renewable certificate, level 4 or higher, in a content area other than Computer Science at any grade level (P-12), or another eligible field specified in PSC Educator Preparation Rules

**COREQUISITES** LT 7503

**DESCRIPTION** Service or leadership certificates do not qualify as teaching certificates. LT 7500 and LT 7501 with grades of "C" or higher. The course will introduce students to computer science concepts that are specified in the PSC standards for a Computer Science Endorsement program. The main topic areas include programming in Java, data structures, and networks. The course is taught concurrently with LT 7502 Computer Science Instructional Methods to help students to translate the concepts that they are learning for use in their classrooms.

### LT 7777 Inventing to Learn: Teaching and Learning with Maker Technologies

**CREDIT HOURS** 3.0

**DESCRIPTION** This course prepares teachers to take advantage of Maker technologies to support student learning. Students will learn to use a variety of technologies, including 3D printers and microcontrollers, while also exploring various pedagogical strategies that leverage these technologies. (Cross-listed with LT 3737).

<td>LT 7975</td>
<td>Seminar for Graduate Assistants</td>
<td>3.0 - 18.0</td>
<td>Course is graded as satisfactory/unsatisfactory</td>
<td>A minimum grade of &quot;S&quot; is required for this course. This course is designed to inform the students of policies and procedures needed to complete an assistantship. Professional ethics associated with teaching, research planning, management, and accounting procedures are reviewed. The course focuses on the teaching and research being conducted in order to further the understanding of all students involved in teaching and research. (Repeatable).</td>
</tr>
<tr>
<td>LT 8000</td>
<td>Foundations of Instructional Technology</td>
<td>3.0</td>
<td></td>
<td>This course provides students with an overview of the field of instructional technology. It covers historical foundations, current practice, and future directions. It provides students with the big picture of instructional technology and gives them a context for future courses.</td>
</tr>
<tr>
<td>LT 8050</td>
<td>Evaluation and Assessment of Online Learning</td>
<td>3.0</td>
<td></td>
<td>This course focuses on evaluating and assessing learning in online education and training environments. It is designed to provide students with the knowledge, skills, and abilities they need to determine what and how well students are learning in an online setting.</td>
</tr>
<tr>
<td>LT 8090</td>
<td>Advanced Technology Tools for Interactive Learning</td>
<td>3.0</td>
<td></td>
<td>This course provides teachers with the skills and knowledge to design and create advanced interactive online learning environments. Design and creation of interactive learning products along with development of strategies for classroom implementation takes place through numerous activities with various interactive technologies.</td>
</tr>
<tr>
<td>LT 8100</td>
<td>Theoretical and Cognitive Foundations of Learning Sciences</td>
<td>3.0</td>
<td></td>
<td>This seminar will introduce students to fundamental topics in the learning sciences, an area that blends cognition with education, and theory with application. For most of the course, we will discuss predominant learning theories and current debates in the field. For the last third of the course, we will discuss applications of learning theories to educational technology.</td>
</tr>
<tr>
<td>LT 8110</td>
<td>Leadership in Instructional Technology</td>
<td>3.0</td>
<td>LT 7110 or permission of instructor</td>
<td>This course provides students with the knowledge, skills, and dispositions needed to a) inspire and lead the development and implementation of a shared vision for the effective use of technology to promote excellence and support transformational change throughout the school/district organization, and b) conduct needs assessments, develop technology-based professional learning programs, and design and implement regular and rigorous program evaluations to assess effectiveness and impact on student learning.</td>
</tr>
</tbody>
</table>
**LT 8150** | Project Management for Instructional Designers  
_CREDIT HOURS_ 1.0 - 3.0  
_DESCRIPTION_ This course provides students with the skills and knowledge of project management. Topics may vary. Examples of topics are Planning a Learning Development Project; Leading a Learning Development Project; Internal Consulting Skills for Effective Learning Project Managers. (Repeatable).

**LT 8151** | Planning a Learning Development Project  
_CREDIT HOURS_ 1.0  
_DESCRIPTION_ Students in this course will: a) define what is meant by the concept of project management as this concept applies to various instructional design and learning development projects; b) define the skills and competencies of an effective learning development project manager; c) define the basic phases in the life cycle of various learning development projects; d) estimate the resources and the effort needed to complete a variety of learning development projects; and e) create an initial project plan in response to a client request.

**LT 8152** | Leading a Learning Development Project  
_CREDIT HOURS_ 1.0  
_DESCRIPTION_ Students in this course will: a) demonstrate the use of various project management software tools that are appropriate to learning development projects; b) create project management tools to track, manage, and report on projects to clients and stakeholders; and c) conduct effective team and client meetings.

**LT 8153** | Internal Consulting Skills for Effective Learning Project Managers  
_CREDIT HOURS_ 1.0  
_DESCRIPTION_ Students in this course will: a) determine how to match the appropriate project management competencies to various types of learning development projects; b) discuss internal consulting strategies to handle conflict and solve problems with team members, management, and stakeholders; and c) demonstrate the use of project management competencies for a real, or simulated, learning development project.

**LT 8200** | Diffusion and Adoption of Technological Innovation  
_CREDIT HOURS_ 3.0  
_DESCRIPTION_ This course provides students with the theoretical foundations of adoption and diffusion of technological innovations in educational categories, and the role of personality and communication in change agency. Students complete a case study in which they examine and analyze the adoption and diffusion of an educational "real-world" technological innovation in their choice of settings.

**LT 8300** | Design Research in Practice  
_CREDIT HOURS_ 3.0  
_DESCRIPTION_ This course will facilitate the skills needed to locate, evaluate, interpret, utilize, and conduct Instructional Design and Technology Research. The particular interest of the course is to enrich students' understanding of and capacity to conduct new approaches to educational research known by a variety of names such as "design experiments" and "design-based research," etc.

<tr>
<td>LT 8360</td>
<td>E-Learning Design and Development</td>
<td>3.0</td>
<td>Students design and develop multimedia tools for educational and training purposes while learning to use state of the art digital tools for instruction.</td>
</tr>
<tr>
<td>LT 8390</td>
<td>Analysis of Education, Training, and Performance Support Centers</td>
<td>3.0</td>
<td>This course provides the student with opportunities to explore the success and problems of various types of education, training, and performance support centers which are found in the literature and in the metro Atlanta area. Extensive research, reading, reporting, and field experiences are used in order to learn the unique attributes that result in successful world class service and support.</td>
</tr>
<tr>
<td>LT 8400</td>
<td>Developing Digital Multimedia for Learning</td>
<td>3.0</td>
<td>This graduate level course is designed to guide students through the basics of developing digital multimedia objects for learning. After completing the course, students should be able to make sound and informed decisions about the selection, design, and development of digital multimedia; and demonstrate basic/intermediate digital multimedia authoring skills. We recommend that students take LT 8360 E-Learning Design and Development prior to taking this course.</td>
</tr>
<tr>
<td>LT 8420</td>
<td>Topics in Instructional Technology</td>
<td>3.0</td>
<td>This course offers students the opportunity to conduct in-depth study of specialized topics that are not covered in any other course. Emerging trends and issues that are of vital interest to the field of instructional technology are studied. (Repeatable).</td>
</tr>
<tr>
<td>LT 8440</td>
<td>E-Learning Environments</td>
<td>3.0</td>
<td>This course focuses on working with the internet as it applies to teaching and learning. Specifically, students work in four overlapping areas of the internet. These are theoretical foundations and issues affecting e-learning, the cognitive and affective experiences of students in e-learning environments, the design and development of e-learning, and the current state of research and practice regarding e-learning.</td>
</tr>
<tr>
<td>LT 8660</td>
<td>Internship in Instructional Technology</td>
<td>3.0</td>
<td>This work/study experience provides students with the opportunity to apply theories, concepts, and principles of instructional technology presented in regular classes. Supervised work/study experiences in school or business settings are selected with faculty approval. Internship may extend beyond one term. (Repeatable).</td>
</tr>
</tbody>
</table>
**LT 8700  Computer-Supported Collaborative Learning**

**CREDIT HOURS** 3.0

**PREREQUISITES** LT 8000, LT 8050, LT 8360, LT 8400, or LT 8440 with a grade of "C" or higher

**DESCRIPTION** Computer-supported collaborative learning (CSCL) is an emerging branch of the learning sciences concerned with studying how people can learn together with the help of networked systems. This course will explore how technologies have impacted the research and practice of teaching and learning, especially collaborative learning, in K-12 schools and Higher Education. Through several design activities students learn how to design for learning that is both collaborative and computer-mediated.

**LT 8720  Learning Analytics and Impact Education**

**CREDIT HOURS** 3.0

**DESCRIPTION** This course provides learning professionals the skills to design impact evaluations as part of their learning projects and use learning analytic methods to gather, analyze, interpret, and provide conclusions on the effectiveness of learning initiatives on organizational goals. In addition, students completing this course demonstrate the ability to use data visualization and reporting dashboard techniques to report results to organizational stakeholders.

**LT 8810  Directed Readings and Research in Learning Technologies**

**CREDIT HOURS** 1.0 - 9.0

**DESCRIPTION** Provides opportunity for students to focus attention on a specific area of interest in learning technologies not covered in regular course offering. Directed reading may extend beyond one term. (Repeatable).

**LT 8950  Evaluation of Instructional Technologies**

**CREDIT HOURS** 3.0

**DESCRIPTION** This course focuses on the evaluation of instructional products, both those that are commercially produced and those that a classroom teacher or trainer might develop for his or her own use. It provides students with the skills they need not only to plan and implement a successful evaluation of technology-based learning but also to judge merits of evaluations conducted by others.

**LT 9850  Research Seminar in Learning Technologies**

**CREDIT HOURS** 1.0 - 3.0

**REQUIREMENTS** A minimum grade of "S" is required for this course

**DESCRIPTION** Considers the identification, planning, and implementation of advanced research projects. Seminar may extend beyond one term. (Repeatable).

**LT 9900  Critique of Educational Research in Learning Technologies**

**CREDIT HOURS** 3.0

**REQUIREMENTS** A minimum grade of "C" is required for this course

**DESCRIPTION** Students critically examine theoretical and empirical work in their fields and in the area of research focus.

**LT 9990  Dissertation**

**CREDIT HOURS** 1.0 - 18.0

**REQUIREMENTS** Course is graded as satisfactory/unsatisfactory

**DESCRIPTION** A minimum grade of "S" is required for completion of the dissertation. Involves the research and writing of the doctoral dissertation. Dissertation may extend beyond one term. (Repeatable).

MGS 8350  Workforce Sustainability  
**CREDIT HOURS** 3.0  
**PREREQUISITES** None  
**DESCRIPTION** This course focuses on the theories, research and issues central to the development and maintenance of the healthy workforce. Students will cultivate the knowledge and tools necessary for HR professionals to be thought leaders and evidence-based practitioners in the optimization of organizational capability via promotion of positive and sustainable workplace cultures, policies and practices.

MGS 8360  Designing Talent Acquisition and Development Systems  
**CREDIT HOURS** 3.0  
**PREREQUISITES** MGS 8300  
**REQUIREMENTS** None  
**DESCRIPTION** This course focuses on the human resource recruitment and selection functions of organizations. Topics covered include methods of recruitment, organizational choice, job analysis, validation, laws pertaining to equal employment opportunity, interviewing, testing, and organizational socialization. Both the theoretical foundations of the recruitment and selection functions as well as the practical application of these activities are presented.

MGS 8389  Directed Reading in Managerial Science  
**CREDIT HOURS** 1.0 - 3.0  
**PREREQUISITES** Consent of instructor, good academic standing  
**DESCRIPTION** This course allows a student with a special interest in an area to pursue that interest in depth and direction as approved by the instructor. Examples of such areas are topics that are not covered in other course offerings and special in-depth coverage beyond normal course offerings. Instruction and guidance are normally on a tutorial basis. Students must make arrangements to take this course with an appropriate MGS faculty member at least two weeks prior to the end of the preceding term.

MGS 8390  Total Rewards Systems  
**CREDIT HOURS** 3.0  
**REQUIREMENTS** None  
**DESCRIPTION** This course focuses on how organizations use pay, benefits, and reward systems to attract, retain, and motivate employees. Linkage between compensation and firm competitiveness are emphasized. This course is relevant for both small and large businesses.

MGS 8396  Strategic Human Resource Management  
**CREDIT HOURS** 3.0  
**PREREQUISITES** MGS 8320, MGS 8360, and MGS 8390  
**DESCRIPTION** This course explores human resource management from a strategic perspective with a focus on how HR executives, and the HR function in general, can and should engage in the strategy making and strategy implementation process of organizations. Students develop skills in, and appreciation of, the role of HR executives in the process of formulating and implementing organizational strategies to enhance organizational performance.
MGS 8410  Financial and Managerial Decisions: A Study Abroad Experience

CREDIT HOURS  3.0
PREREQUISITES  MBA 8000 or MBA 8135 or MGS 8200
DESCRIPTION  Cross listed with FI 8410. This study abroad program provides an opportunity to examine the business climate in foreign markets, with field experience in a specific foreign market. Students will gain insight into financial and managerial issues, with emphasis on the capital structure of firms, the organization of financial markets, and cross-cultural influence on corporate governance practices and managerial decision making and entrepreneurship. The in-country experience will allow students to observe and discuss first-hand how companies work within that market.

MGS 8420  Enhancing Leadership Skills

CREDIT HOURS  3.0
DESCRIPTION  Participants in this course are introduced to various processes and tactics that are used to enhance leadership skills, as well as to various perspectives on important leadership skill content that can help to guide and motivate their development as leaders. They undergo assessments of their leadership-relevant skills and characteristics, and receive guidance on how to improve as leaders. Skills improvement comes from enhanced insight and knowledge, activities conducted in class, as well as from out-of-class tasks that participants design themselves. The course is premised on the assumption that participants have had some leadership experience, since the course requires participants to reflect on their leadership experiences and skills so that their leadership skills can be improved.

MGS 8425  Coaching for Leadership

CREDIT HOURS  3.0
PREREQUISITES  None
DESCRIPTION  This course identifies the roles of leadership coaching and links the applications of behavioral theory to the coaching process. The course enables students to apply appropriate assessment activities, goal-setting activities, communication processes, well-designed interventions, and feedback activities to an effective coaching process. This course focuses on one-on-one coaching relationships.

MGS 8430  Negotiation

CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  None
DESCRIPTION  This course is designed to help students become better negotiators by understanding and practicing the negotiation strategies and tactics appropriate for different situations. These situations range from simple buying and selling to establishing long-term agreements with key business partners. Advanced topics such as agent-principal negotiations and multi-party negotiations are also included. The course is a general treatment of negotiation that is useful to students from a broad range of majors.

MGS 8435  Power in Organizations

CREDIT HOURS  3.0
PREREQUISITES  None
DESCRIPTION  Students examine sources of personal and organizational power, then develop skills for obtaining and using power. The course focuses on management-oriented views of resource control and dependency as well as strategic, political, and service-based approaches to power. Through case studies, exercises, and in-depth discussions, students learn to apply the theories to their own and others' circumstances.
MGS 8450  Leading Organizational Change
CREDIT HOURS 3.0
PREREQUISITES None
REQUIREMENTS None
DESCRIPTION This course is designed to train theorists/researchers/practitioners in organizational development and change. It provides an overview of the theory and practice of making organizations more effective by changing individual attitudes and behaviors, group relationships, and organizational cultures. An experiential approach to organizational development interventions and methods is offered.

MGS 8455  Strategic Leadership: Leading Implementation of Strategy
CREDIT HOURS 3.0
PREREQUISITES It is recommended that students take MGS 8420 or a similar course prior to taking MGS 8455
DESCRIPTION This course focuses on one of the more important areas in strategic management and one of the biggest challenges in leadership: The role of CEOs and other top managers as the leader of strategy implementation. The basic objective of this course is to develop a student's ability to understand the role and effect of the leader on the company's strategy, performance, and vitality. Students will increase their capabilities in strategic leadership when evaluating situations, identifying alternative plans of action, making strategic choices, and implementing these choices with effectiveness.

MGS 8710  Logistics and Supply Chains
CREDIT HOURS 3.0
PREREQUISITES Consent of the instructor
REQUIREMENTS None
DESCRIPTION This course covers the design of information and decision systems for allocating resources and scheduling activities. Topics include inventory control, capacity planning, material and resource requirements planning, and the design of computer-based systems for integrated planning and logistics managements (supply chain event management).

MGS 8730  Project Management
CREDIT HOURS 3.0
PREREQUISITES An introductory course in probability and statistics
REQUIREMENTS None
DESCRIPTION This course covers management techniques that are applicable to a wide variety of project types including information systems development, business start-ups, marketing campaigns, facility relocations, construction, research, and special events. Emphasis is on processes for scheduling, budgeting, and controlling projects. The selection and application of project management software are addressed. Other topics include project organizational structures, qualifications and roles of the project manager, project leadership, team building, and the management of conflict and stress in projects.

<tr>
<td>MGS 8740</td>
<td>Operations Strategy</td>
<td>3.0</td>
<td>Consent of instructor</td>
<td>This course addresses the development and implementation of production/operations strategy and the integration of this strategy with the corporate, business, and other functional strategies of the organization. Topics include alternate production strategies and their characteristics, strategy selection, technology management, organization design for operations, integration of information technology into the production environment, and implementation of operations strategy.</td>
</tr>
<tr>
<td>MGS 8760</td>
<td>Quality Management</td>
<td>3.0</td>
<td>Consent of instructor</td>
<td>This course addresses a strategic, structured approach to the design and development of quality management programs in manufacturing and services. The analytical and behavioral aspects of quality management are addressed. Topics include the strategic importance of quality to organization success and the importance of customer orientation and human resource management in a total quality management program.</td>
</tr>
<tr>
<td>MGS 8770</td>
<td>Service Operation Management</td>
<td>3.0</td>
<td>Consent of instructor</td>
<td>This course focuses on the analysis of service sector performance and methods designed to improve service operations from a competitiveness standpoint. The topics covered are cross-functional in nature including operations, marketing, human resource management, information technology and entrepreneurship and are presented as an integrated systems approach to the service organization.</td>
</tr>
<tr>
<td>MGS 8860</td>
<td>Management Studies Abroad</td>
<td>3.0</td>
<td>Consent of the instructor</td>
<td>Emphasizing a collaborative rather than competitive learning environment, this course examines the interrelatedness of economic, political, legal, social, and cultural factors on cross-cultural management issues. Concepts of human behavior, motivation, strategy, and labor/management relations are linked to practice in different national settings. An extensive international on-site program is an integral part of this program. Interviews are conducted at a broad range of organizations and industries. Objectives include cultivating a global mindset and developing a richer understanding of international business challenges relating to management. Company visits showcase evolving corporate profiles in the global marketplace.</td>
</tr>
<tr>
<td>MGS 9150</td>
<td>Reading Seminar in the Decision Sciences</td>
<td>3.0</td>
<td>Consent of the instructor</td>
<td>The coverage of this course is highly variable. The course allows a student with a special interest in an area to pursue his or her interest in whatever depth and direction are appropriate. Examples of such areas are topics not covered in other course offerings and special in-depth coverage beyond normal course offerings. Instruction and guidance are normally on a tutorial basis.</td>

<tr>
<td>MGS 9390</td>
<td>Advances Seminar in Management</td>
<td>3.0</td>
<td>None</td>
<td>The primary goal of this course is to prepare students to pursue doctoral research in management. The course has three objectives: (1) to socialize students to academic life during and after the PhD program, (2) to expose students to research being conducted in the field of management, and (3) to provide a forum for students to present their own research and obtain feedback on it. This course will address a variety of emerging or advanced topics in management such as strategic leadership, innovation, self-regulation, teams, and workforce diversity. In addition to providing an in-depth understanding of different topics in management, the course will also address diverse and novel research methodologies and designs. This course is repeatable for different topics.</td>
</tr>
<tr>
<td>MGS 9400</td>
<td>Seminar in Organizational Behavior</td>
<td>3.0</td>
<td>Consent of the instructor</td>
<td>Operating from an interdisciplinary framework, this seminar is designed to explore the function, structure, and goals of organizations as political, social, and economic units. Emphasis in this course is placed primarily upon the patterns of relationships that are manifested during the various phases of organizational development. Special attention is also given to all forms and types of research, both of an ephemeral and a classical nature, which provide an understanding of the complexities of organizations and organizational behavior.</td>

</tbody>
</table>
MGS 9410  Seminar in Organization Design and Implementation  
CREDIT HOURS 3.0  
PREREQUISITES Consent of the instructor  
DESCRIPTION This seminar is designed to train theorists/researchers/practitioners in the design, redesign, and implementation of effective organizations. The seminar focuses on the analysis, planning, implementation, and evaluation of the social and technical systems of organizations with emphasis on the structural changes necessary to improve and maintain productivity and on the quality of work life.

MGS 9470  Seminar in Advanced Topics in Contemporary Behavior  
CREDIT HOURS 3.0  
PREREQUISITES Consent of instructor  
DESCRIPTION This course is devoted to the investigation of significant topics in organizational behavior. It is intended primarily for advanced doctoral students. The course can be repeated when the topics vary; topics are announced in advance.

MGS 9610  Seminar in Competitive Strategy  
CREDIT HOURS 3.0  
PREREQUISITES Ph. D  
DESCRIPTION This course is a doctoral level seminar on the major theoretical and empirical approaches to business-level strategy or competitive strategy research. The main objective of the course is to familiarize students with the basic assumptions concepts and theories underlying these topics in the field. The course is intended to expose students to the major theoretical 'lenses' that underpin current research in the field and the major research issues to which they are applied. Students will analyze and discuss the major questions in the field and explore ways in which those questions may be addressed both theoretically and empirically.

MGS 9640  Seminar in Strategy Formulation  
CREDIT HOURS 3.0  
PREREQUISITES Ph.D. student status  
DESCRIPTION The objective of this doctoral seminar is to acquaint students with the theories and research related to strategy formulation. Students will read, critically analyze and discuss classic and current writings on the processes associated with strategy formulation and the various contexts that affect the process by which competitive strategies are developed in organizations. Topics included in this literature include theories of organizational change, decision making processes, top management team attributes, organizational resources, and characteristics of the external operating environment. Student will explore ways in which emerging issues in strategy formulation can be addressed both conceptually and empirically.

MGS 9940  Design and Conduct of Experiments  
CREDIT HOURS 3.0  
PREREQUISITES MGS 9920  
DESCRIPTION This course examines epistemologies and methods that lie at the heart of experimental research. It covers validation of experimental instruments, internal and external validity, and statistical conclusion validity derived through the family of ANOVA techniques, regression, and structural equation modeling. Students learn how to properly design an experiment and how to handle problems that come up in actually conducting experiments.

MIT 8100  Management of Information Services  
CREDIT HOURS  3.0  
PREREQUISITES  None  
DESCRIPTION  This course addresses the many management issues unique to the information services function within organizations. Coverage includes information systems planning, managing the information infrastructure, justifying information technology investments, the costing of services and networks evaluating information system performance, alternative information service delivery modes, managing distributed and end-user computing, project and operations management, systems security, and the management of information technology professionals.

MIT 8200  Information Systems Strategy  
CREDIT HOURS  3.0  
PREREQUISITES  None  
DESCRIPTION  This course emphasizes the use of information technology to develop distinct competitive advantage in relations with competitors, customers, and suppliers, and with respect to products and services. It examines these central issues: 1) the design of information systems offering strategic advantages; 2) the competitive potential for strategic use of information systems; 3) special issues related to inter-organization information systems; 4) special issues related to strategic use of information systems involving international networks; 5) development of financial and audit structures for strategic use of information systems; and 6) the impact of information technology on the global business community.

MIT 8210  Global Systems Sourcing  
CREDIT HOURS  3.0  
PREREQUISITES  None  
DESCRIPTION  This course is designed to assist students in developing the knowledge and skills needed to work with systems integration vendors and processes. It focuses on the concepts and methods associated with designing, planning, contracting for and overseeing information technology infrastructure and applications. The course familiarizes students with the legal issues related to preparing, distributing, and evaluating requests for proposal (RFP) and subsequent integration contracting matters. Students will prepare and evaluate systems proposals for various sourcing and managing third party relations.

MIT 8299  Finance & Accounting for IT Managers  
CREDIT HOURS  3.0  
PREREQUISITES  None  
DESCRIPTION  Because of the many advances in information technology and the corresponding development techniques, new business opportunities are constantly emerging, and with them the need to manage these applications effectively. This course explores these new application areas and the management approaches needed to make them successful.
**MIT 8699  Organizational Change Management**

**CREDIT HOURS** 3.0  
**DESCRIPTION** Toward the end of the 20th century, the fundamental processes in conducting business evolved with help of enabling technologies. Enterprise Resource Planning (ERP), supply chain management, e-Procurement with B2B technology, agent technologies and shopbots, trust and electronic payment systems and adaptive enterprise computing are just a few of the newer technologies now permeating today's organization. The purpose of this course is to examine key technologies adapted for use in the 21st century organization.

**MIT 8990  IT Management Capstone Project**

**CREDIT HOURS** 0.0 - 6.0  
**DESCRIPTION** Master of Science students approved for the thesis option must continuously enroll in this research course each semester until the thesis is completed and presented.
MK 8010  Marketing Metrics

**CREDIT HOURS**
3.0

**PREREQUISITES**
MBA 8145

**DESCRIPTION**
This course is designed to emphasize and teach the critical role of analysis in marketing decision-making. Drawing on concepts from economics, finance, and accounting, as well as best-practice marketing metrics, the course will present a series of metrics designed to guide marketers in formulating and evaluating key decisions. Students will also learn to evaluate and analyze marketing problems presented in the form of case analyses.

MK 8100  Buyer Behavior

**CREDIT HOURS**
3.0

**PREREQUISITES**
MBA 8145

**DESCRIPTION**
This course provides an opportunity for study of the behavior of buyers of business-to-business and consumer goods and services. Objectives include increasing the student's understanding of buyers and their behavior and providing the student with experience in applying this knowledge in marketing management decisions. Topics such as life style analysis, organization, individual and family decision making, consumerism, behavioral models, attitude formation and change, information seeking, and market segmentation are explored using readings, projects and case materials.

MK 8200  Marketing Research

**CREDIT HOURS**
3.0

**PREREQUISITES**
MBA 8145

**DESCRIPTION**
Marketing research focuses on the generation of primary data to improve decisions. This course helps students determine when research should be conducted and on designing the appropriate means for gathering and interpreting information. The course examines a range of methods of data collection made possible and develops skills in converting data to useful information that will improve marketing efforts. The course uses client-based group projects, extensive hands-on assignments, and readings to develop conceptual, analytical and communication skills.

MK 8330  Strategic Selling

**CREDIT HOURS**
3.0

**PREREQUISITES**
MBA 8145

**DESCRIPTION**
This course analyzes the role of the salesperson/account representative in high level sales processes such as those associated with Key and Strategic Account Management. The course emphasizes quantitative and qualitative analysis of high-level selling issues, customer perspectives, and the competitive nature of this sales environment. Major topics in this course include: 1) investigating customer requirements; 2) reaching key decision makers; 3) understanding key financial considerations related to large sales; 4) negotiations. Additionally, the course examines the interplay between sales and marketing as they relate to acquiring and managing these key accounts.

<td>MK 8340</td>
<td>Strategic Sales Leadership</td>
<td>3.0</td>
<td>MBA 8145</td>
<td>In the past, many sales leaders were viewed by other corporate executives as managers in a tactical arena only. However, in a globalized business world as more and more products and services move toward commoditization, a good sales force helps organizations attract and retain customers. In this course, students learn to manage the modern sales force as a key strategic tool in achieving the goals of the organization in an increasingly competitive market place. Through this course, students acquire the skill sets needed to develop strategic sales plans and lead the sales team in achieving strategic objectives.</td>

<td>MBA 8145</td>
<td>This course offers a comprehensive understanding of the digital and social media marketing landscape including different platforms, media, tools, and metrics. Based on this understanding, students will learn how different marketing objectives of the organization such as customer management, branding, sales, PR, promotion, communication and so on can be accomplished through digital and social media marketing strategies for both business-to-consumer as well as business-to-business settings.</td>
</tr>
</tbody>
</table>
MK 8705  
**Digital Marketing Analytics**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** MBA 8145  
**DESCRIPTION**  
This course offers a comprehensive understanding of the digital and social media marketing landscape (including search engines, popular social media platforms, mobile phones etc.) with an emphasis on state-of-the-art analytical tools and metrics required to succeed in the digital marketing space. Based on this understanding, students will learn how to measure, track, monitor and hence improve, optimize and efficiently manage different marketing programs in digital and social media platforms.

MK 8710  
**Customer Relationship Management**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** MBA 8145  
**DESCRIPTION**  
Customer Relationship Management (CRM) is a comprehensive set of processes and technologies for managing the relationships with potential and current customers and business partners across marketing, sales, and services areas regardless of the channel of distribution. This course focuses on the development and implementation of relationship marketing strategies via the use of CRM initiatives. Topics covered in the course include: relationships marketing; operational, analytical, and collaborative CRM; reasons for CRM implementation failure; and the role of CRM in marketing management.

MK 8715  
**Brand and Customer Analytics**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** MBA 8145  
**DESCRIPTION**  
This course is designed to teach analytic techniques related to brand and customer management. Students will gain experience with state of the art techniques, such as the efficient allocation of marketing resources, new product management, effective branding strategy and customer engagement value, which includes customer lifetime value and customer referral value.

MK 8720  
**Data Driven Marketing**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** MBA 8145  
**DESCRIPTION**  
The Data Driven Marketing course offers a detailed overview of how firms can leverage data to derive the necessary insights for driving impactful marketing strategies. Consistent with its rapidly increasing demand in contemporary marketing practices, this course is geared to make students well versed with theory, tools and applications related to how data driven marketing can help address a wide variety of marketing problems and challenges.

MK 8730  
**Marketing Engineering**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** MBA 8145  
**DESCRIPTION**  
The objective of this course is to show the benefits of using a systematic and analytical approach to marketing decision-making, and to build skills and confidence in undertaking such analyses and decision making. An analytical approach will enable one to: (1) identify alternative marketing options and actions, (2) calibrate the opportunity costs associated with each option, and (3) choose one or more options that have the highest likelihood of achieving business goals. Completing this course will enable making the ROI case for marketing expenditures that companies are increasingly asking of their executives.
MK 8800  Marketing Services Strategically
CREDIT HOURS  3.0
PREREQUISITES  MBA 8145
DESCRIPTION  With over 75% of the U.S. GDP represented by companies engaged in the marketing of services such as financial, hospitality, retail, transportation, consulting, professional services, non-profit organizations, it is vital to understand how marketing in this sector is both complementary to and differentiated from product marketing. As such, this course looks at both the strategy and practice of understanding customer wants and needs; how the visibility of service creation affects customer satisfaction; how both business and individual customers judge satisfaction with service providers and how these are best reached through marketing communications and sales.

MK 9200  Seminar in Marketing
CREDIT HOURS  3.0
PREREQUISITES  MBA 8145
DESCRIPTION  This course consists of supervised study and investigation of specific topics and problems in the field of marketing such as consumer behavior, organizational buying behavior, structural equation modeling, channels of distribution, and marketing models. It may be repeated for credit when topics vary.
**MBA 7025**  
**Statistical Business Analysis**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** None  
**DESCRIPTION** This course deals with the basics of converting corporate data into actionable information for managerial decision making. Statistical data analysis techniques in the context of Business Intelligence are covered with applications in various functional areas of business. Specific techniques include data visualization, descriptive statistics, estimation, hypothesis testing modeling relationships, basic forecasting techniques, and optimization techniques for decision support. The contextual topics focus on the implementation of six sigma methodologies for corporate performance management.

**MBA 7035**  
**Economics for Manager**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** None  
**DESCRIPTION** This course uses basic macroeconomic concepts to develop a basic model of the macroeconomy emphasizing real world data and relationships. The goal is for managers to understand the main forces and trends in the economy, how they are interrelated, and how policymakers try to affect them. Because changes in the macroeconomy affect industries and firms throughout the economy, it is important for managers to understand how these changes can affect managerial decisions, particularly in terms of the concepts discussed in the context of microeconomics. The performance of the economy is presented in the context of industries and firms studied in microeconomics.

**MBA 8000**  
**Managing in the Global Economy**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Managing in the Global Economy provides students with an integrated managerial framework based on economic principles to facilitate effective decision making across and within functional areas, across and within global borders, and across and within organizational boundaries. Students will learn to formulate strategic decisions and to face complex challenges through lecture, case study, discussion and exercises that emphasize critical thinking within an economic paradigm. Key concepts include the power of markets, the influence of technology on markets and organizations, the impact of incentives on actions, and how information influences decisions and actions.

**MBA 8015**  
**Strategic Business Communication**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** None  
**DESCRIPTION** This course presents written and oral business communication as a management strategy critical to success in the workplace by introducing a communication model useful to identify objectives, analyze audiences, choose information, and create the most effective arrangement and channel for written and oral messages. Students will practice drafting and editing clear, precise, and readable written business documents including communications to executive-level readers. Students will also develop skills in the effective design and delivery of unwelcome information, technical information to non-technical audiences, and group communication.
MBA 8025  Financial Statement Analysis
CREDIT HOURS 3.0
PREREQUISITES None
DESCRIPTION Restrictions: Not allowed for the Master of Professional Accountancy program. This course takes a user-oriented approach to the study of financial statements. Students study the role of the financial statements and the annual report in the financial reporting process. Using ratio analysis, students analyze past firm performance and make forecasts of future performance. Students also study the effects of differing accounting methods on financial statement analysis.

MBA 8030  Legal Environment: Ethics and Corporate Governance
CREDIT HOURS 3.0
PREREQUISITES None
REQUIREMENTS CSP: 1, 2, 6, 7
DESCRIPTION Companies that ignore their legal and ethical obligations to owners, customers, and consumers open the door to parties who seek legal recourse that can limit their gain or even threaten their existence. Law and ethics, when incorporated properly into managerial decision-making, provide strategic tools to facilitate growth, creativity, competitive advantage, and legal certainty and to reduce legal risk and liability. By examining the application of law and ethics to a variety of business and corporate governance issues, this course offers the master?s student an understanding of how businesses can comply with the law and use an ethical culture as a positive strategy for making successful business decisions.

MBA 8040  Data Driven Decision Making
CREDIT HOURS 3.0
PREREQUISITES None
DESCRIPTION Evidence based decision making is critical to an organization?s ability to compete in the global economy. This course explores the role of data in driving decisions made by managers across and within functional boundaries. Specifically, students learn to understand, visualize and present data that supports organizational decision making processes. They also learn how to create data driven models such as regression and decision trees to make decisions to address critical challenges faced by organizations and society. The course features hands-on exercises with appropriate software.

MBA 8045  Analytics Experience
CREDIT HOURS 1.5.0
PREREQUISITES MBA 8000 and MBA 8025
DESCRIPTION The Analytics Experience gives students the opportunity to work on real world data analytics problems and apply analytical techniques to solve a diverse set of problems. The course is housed in the Insight Lab, the big-data analytics facility where analytics students and faculty conduct research and work with companies on obtaining analytical insights from data. It also teaches students to find solutions to big data challenges facing real companies and organizations. The specific problems that students will address depend on what research projects and company projects are ongoing at the time of the course. Student teams will compete to produce and communicate the best solution.

<td>MBA 8015 and MBA 8030 and MBA 8040 and MBA 8045</td>
<td>Restrictions: Not allowed for the Master of Professional Accountancy program. This course demonstrates how managerial accounting and control systems can help managers make affective operating and strategic decisions within the firm. In particular, this course uses cases and other materials to demonstrate how cost, planning, and performance measurement systems can help managers increase the effectiveness of small and large firms within their current and future operating environment. To help students develop the analytical skills necessary for evaluating alternative designs of control systems, this course also introduces economic and behavioral theories of managerial control.</td>

<td>Digital Innovation</td>
<td>3.0</td>
<td>MBA 8000 and MBA 8025 and MBA 8040</td>
<td>MBA 8015 and MBA 8030 and MBA 8045</td>
<td>This course develops competencies necessary for professionals to harness the power of digital innovation in business and society. Students will learn how established and entrepreneurial firms can leverage digital innovation to transact with markets, to source goods/services, to develop real-time context-aware processes, and to attract equity. Topics include how to leverage information technology (IT) to innovate business models, how to digitize products and services, how to apply business analytics to derive insights from structured and unstructured data, and how to leverage the power of Big Data for digital innovation. Students will also learn how to keep pace with IT developments that generate new capabilities, disrupt existing business models, and give rise to new business models.</td>

<td>Corporate Finance</td>
<td>3.0</td>
<td>MBA 8000 and MBA 8025</td>
<td></td>
<td>This course focuses on the financial management of both publicly-held and private corporations. Students are presented with a conceptual framework for understanding and addressing problems commonly faced by corporate decision-makers and are provided opportunities to apply these concepts to contemporary business situations. Topics covered include, but are not limited to: the valuation and role of debt and equity, capital acquisition and the organization of domestic and international financial markets, the relationship between risk and return including the capital asset pricing model, capital budgeting/project evaluation techniques, cost of capital, cash flow estimation, project risk analysis, real options, company valuation, and capital structure decisions.</td>

<td>Marketing Management</td>
<td>3.0</td>
<td>MBA 8000 and MBA 8025</td>
<td>MBA 8015 and MBA 8030</td>
<td>This course is a study of the managerial aspects of marketing. Emphasis is placed on the quantitative and qualitative criteria used in evaluating marketing alternatives and in choosing among these alternatives. The course includes topics related to market segmentation, marketing research, product/service development, branding, promotion, pricing, channels of distribution, marketing strategy, and global marketing.</td>
</tr>
<tr>
<td>MBA 8155</td>
<td>Operations Management</td>
<td>3.0</td>
<td>MBA 8000 and MBA 8025</td>
<td>MBA 8015 and MBA 8030</td>
<td>This course focuses on the basic concepts, principles, and techniques for efficient and effective operations. Special emphasis is placed on process improvement and supply chain management. Topics such as operations strategy, product and service design, process analysis, lean production, materials and inventory management, quality management, six sigma, and project management will be covered in the context of domestic and international marketplaces.</td>
</tr>
<tr>
<td>MBA 8165</td>
<td>Leadership and Organizational Behavior</td>
<td>3.0</td>
<td>None</td>
<td></td>
<td>What do managers need to know about organizations and people within organizations. This class will develop an understanding of the key issues managers need to master in order to manage the interface between people and organizations. The course begins with a focus on the individual within the organization, including topics of attitudes, motives, and personality. The course then progresses to a broader focus on the organization as a whole, including topics of power and political concerns, group and organizational leadership, and organizational culture. (MBA students are encouraged to take MBA 8000 and MBA 8025 prior to taking this course.).</td>

MBA 8820  
**Global Competitive Strategy**

**CREDIT HOURS**  
3.0

**PREREQUISITES**  
All of the Functional Core course requirements, must apply to take the capstone core courses

**DESCRIPTION**  
This course explores methods of directing an entire organization or a significant division in an internationally competitive environment. The perspective is that of the general manager who must integrate many business functions to successfully lead a multinational organization. Topics include the identification of organizational competence in light of external environmental and international conditions, the development of business/corporate strategy that addressed the international marketplace, and the internal processes required for successful implementation of that strategy.

MBA 8880  
**Field Study in Business**

**CREDIT HOURS**  
1.0 - 3.0

**PREREQUISITES**  
Students must be within two terms of graduation

**REQUIREMENTS**  
None

**DESCRIPTION**  
This course is a field-based integrative course for MBA students during their last year of study. In cross-functional teams of four or five, students address in-depth projects in companies in the greater Atlanta area. These projects cover the entire project life cycle, from problem definition to the presentation of final recommendations to the company’s management.

<tr>
<td>MRM 8000</td>
<td>Introduction to Analytical Programming and Numerical Methods</td>
<td>2.0</td>
<td>Admission to the MRM program or consent of the instructor</td>
<td></td>
<td>This course is an introduction to analytical programming and numerical methods. The objective is to learn how to develop algorithms and computer code for scientific computing with a view towards the practical application of mathematical models in risk management, insurance, economics, finance, and related fields. The course emphasizes the principles and numerical techniques used to turn algorithms into reliable and efficient computer programs.</td>
</tr>
<tr>
<td>MRM 8320</td>
<td>Stochastic Risk Management Models</td>
<td>3.0</td>
<td>MBA 8135</td>
<td></td>
<td>This course introduces stochastic models for risk management, broadly defined. The course has two main components. The first component covers single-period models including severity models, frequency models, compound distributions, and aggregate loss models. The second component covers multi-period models by introducing stochastic processes with emphasis on Markov chains, Poisson processes, and Brownian motion. Applications to insurance appear throughout the course. The second component adds applications to finance such as the Black/Scholes/Merton model and credit loss models.</td>
</tr>

</tr>
<tr>
<td>MRM 8600</td>
<td>Theory of Risk Sharing</td>
<td>3.0</td>
<td>MBA 8135</td>
<td>FI 8000</td>
<td>This course provides a rigorous introduction to financial economics. The course is comprised of three main components. The first is the analysis of individual behavior under uncertainty and its implications for individual portfolio choice and the demand for insurance in both static and dynamic settings. The second component introduces students to the equilibrium approach to pricing determination in securities and insurance markets. The final section focuses attention on the valuation of interest-rate dependent assets.</td>
</tr>
<tr>
<td>MRM 8610</td>
<td>Financial Engineering</td>
<td>3.0</td>
<td>MBA 8135 and FI 8000 concurrently</td>
<td></td>
<td>This course introduces students to continuous-time financial models essential for the practice of mathematical risk management. It begins with a discussion of the fundamental mathematical tools from continuous-time stochastic processes including Ito's formula, change of measure, and martingales. This provides a framework for financial concepts including hedging, complete markets, and incomplete markets. The mathematical tools and financial concepts are applied to the risk management and valuation of financial derivatives based on stocks and bonds, separately, and insurance company liabilities with embedded financial options. The course concludes with a consideration of models that jointly value stocks, bonds and non-traded assets.</td>

<td>MRM 8620</td>
<td>Quantitative Financial Risk Models</td>
<td>3.0</td>
<td>MRM 8600</td>
<td>This course introduces several risk management models designed to allow risk managers of financial institutions to measure and manage various sources of financial risk including market risk, interest-rate risk, and default risk, among others. Emphasis is on the development of &quot;hands-on&quot; experience which includes the calibration of models and discussion of the data issues faced in the application of these models. This course is intended for all students considering a career in quantitative risk management, whether in the insurance, banking, or non-financial sector.</td>
<td></td>
</tr>
<tr>
<td>MRM 8630</td>
<td>Interest Rate Models</td>
<td>3.0</td>
<td>MRM 8600 and MRM 8610</td>
<td>This course provides a detailed study of pricing of interest rate securities based on stochastic term structure models. A review of stochastic calculus is given; short rate and HJM models are introduced, developed and compared.</td>
<td></td>
</tr>
<tr>
<td>MRM 8640</td>
<td>Advanced Credit Risk Models</td>
<td>3.0</td>
<td>MRM 8000 and MRM 8600 and MRM 8610</td>
<td>The course introduces students to the most important theoretical and operational aspects of credit risk models. The content is organized in six modules, which cover single and multi-name credit products, reduced form and structural models of credit risk, as well as fundamentals of counterparty risk pricing and management. The course provides a rigorous introduction to credit risk modeling and management methodologies that are relevant for risk managers, asset managers, structurers, and traders working across different asset classes.</td>
<td></td>

</table>
MATH MATHEMATICS

MATH 6010 Mathematical Biology
CREDIT HOURS 3.0
PREREQUISITES MATH 2212 or MATH 1220 with grade of C or higher
DESCRIPTION (Same as BIOL 6010.) This course provides an introduction to the use of continuous and discrete differential equations in the biological sciences. Biological topics will include single species and interacting population dynamics, modeling infectious and dynamic diseases, regulation of cell function, molecular interactions and receptor-ligand binding, biological oscillators, and an introduction to biological pattern formation. There will also be discussions of current topics of interest such as Tumor Growth and Angiogenesis, HIV and AIDS, and Control of the Mitotic Clock. Mathematical tools such as phase portraits, bifurcation diagrams, perturbation theory, and parameter estimation techniques that are necessary to analyze and interpret biological models will also be covered.

MATH 6211 Optimization
CREDIT HOURS 3.0
PREREQUISITES MATH 3435 or MATH 3030 with a C or higher; and the ability to program in a high-level language
DESCRIPTION Lagrange multipliers, gradient methods (steepest descent), search techniques, variational methods and control problems; other varying topics such as dynamic programming, nonlinear programming.

MATH 6258 Vector Calculus
CREDIT HOURS 3.0
PREREQUISITES MATH 2215
DESCRIPTION (Same as PHYS 6510.) Vector algebra, curvilinear motion, vector fields, gradient, divergence, Laplacian, line and surface integrals, integral theorems.

MATH 6265 Partial Differential Equations
CREDIT HOURS 3.0
PREREQUISITES A course in ordinary differential equations
DESCRIPTION (Same as PHYS 6520.) First-order equations, classification of linear second-order equations, separation of variables, Fourier series, orthogonal functions, Green’s functions.

MATH 6275 Applied Dynamical Systems
CREDIT HOURS 3.0
DESCRIPTION Three lecture hours per week. An introduction to discrete and continuous dynamical systems. Topics include: phase space; linear and nonlinear systems; structural stability; classification of equilibrium states, invariant manifolds; poincare maps, fixed points and periodic orbits; stability boundaries; local bifurcations; homoclinic orbits; routes to chaos in dissipative systems; applications from physics, biology, population dynamics, economics.
MATH 6301 College Geometry
CREDIT HOURS 3.0
PREREQUISITES MATH 3000 with grade of C or higher

MATH 6371 Modern Geometry
CREDIT HOURS 3.0
PREREQUISITES MATH 3000
DESCRIPTION Euclidean and non-Euclidean geometry, including incidence, order, and the parallel postulate.

MATH 6381 General Topology
CREDIT HOURS 3.0
PREREQUISITES Grade of C or higher in MATH 3000
DESCRIPTION This course will provide an introduction to general topology, which is the study of spaces and how to classify spaces according to their characteristic properties. The class will begin with a brief review of basic set theory and metric spaces. Topics covered include topological spaces, continuous functions, topological properties (connectedness, compactness, countability, and separation axioms), the fundamental group, and covering spaces.

MATH 6420 Graph Theory
CREDIT HOURS 3.0
PREREQUISITES MATH 3000
DESCRIPTION Introduction to graph theory; topics include structure of graphs, trees, connectivity, Eulerian and Hamiltonian graphs, planar graphs, graph colorings, matchings, independence, and domination. Additional topics may include symmetry of graphs, directed graphs, extremal graph theory and Ramsey theory, graph embeddings, and probabilistic methods in graph theory.

MATH 6435 Linear Algebra II
CREDIT HOURS 3.0
PREREQUISITES MATH 3435 with grade of C or higher
DESCRIPTION Theory and applications of matrix algebra, vector spaces, and linear transformations. Topics include matrix representations of linear transformations, eigenvalues and eigenvectors, similarity, the spectral theorem, and orthogonality. 3.0 Credit hours.

MATH 6441 Modern Algebra I
CREDIT HOURS 3.0
PREREQUISITES MATH 3435 and MATH 3000 with grades of C or higher, or equivalents
DESCRIPTION Axiomatic approach to algebraic structures, groups, permutations, homomorphisms, and factor groups.

MATH 6442 Modern Algebra II
CREDIT HOURS 3.0
PREREQUISITES MATH 4441/6441
DESCRIPTION Rings, integral domains, and fields; polynomials over a field, matrices over a field, algebraic numbers and ideals.
MATH 6444  Polynomials  3.0  
PREREQUISITES  MATH 3000 with grade of C or higher  
DESCRIPTION  The topic of polynomials is one of the oldest in mathematics and has applicability to almost every area of mathematics. The course will use algebra and analysis to study polynomials. Among topics to be covered: roots of polynomials (inequalities, relationship between the root of a polynomial and its derivative), resultants, discriminant, irreducible polynomials, special classes of polynomials (symmetric, cyclotomic, Chebysev, Lagrange), Grobner bases and algorithms.

MATH 6450  Theory of Numbers  3.0  
PREREQUISITES  MATH 3000  

MATH 6544  Biostatistics  3.0  
PREREQUISITES  BIOL 1107K, BIOL 1108K, and MATH 2211  
DESCRIPTION  Principles and methods of statistics as applied to biology and medicine.

MATH 6547  Introduction to Statistical Methods  3.0  
PREREQUISITES  a course in calculus  
DESCRIPTION  Data analysis, sampling, and probability; standard methods of statistical inference, including t-tests, chi-square tests, and nonparametric methods. Applications include use of a statistical computer package.

MATH 6548  Methods of Regression and Analysis of Variance  3.0  
PREREQUISITES  a course in calculus and a course covering methods of statistical inference  
DESCRIPTION  Simple and multiple regression, model selection procedures, analysis of variance, simultaneous inference, design and analysis of experiments. Applications include use of a statistical computer package.

MATH 6610  Numerical Analysis I  3.0  
PREREQUISITES  MATH 2215 and the ability to program in a high-level language  
DESCRIPTION  (Same as CSC 6610.) Nature of error; iteration; techniques for nonlinear systems; zeros of functions; interpolation; numerical differentiation; Newton-Cotes formulae for definite integrals; computer implementation of algorithms.

MATH 6620  Numerical Analysis II  3.0  
PREREQUISITES  MATH 3030 or MATH 3435, and the ability to program in a high-level language  
DESCRIPTION  (Same as CSC 6620.) Gaussian Elimination for linear systems; least squares; Taylor, predictor-corrector and Runge-Kutta methods for solving ordinary differential equations; boundary value problems; partial differential equations.

MATH 6661  Analysis I  3.0  
PREREQUISITES  Corequisite: MATH 4435/6435  
DESCRIPTION  The real number system, basic topology of metric spaces, sequences and series, limits and continuity.

Mathematics topics to include the development of arithmetic, geometry (practical, deductive, and axiomatic), number theory, trigonometry, syncopated and symbolic algebra, probability, and statistics. This course is for high school mathematics teachers in the M.A.T. or M.Ed. programs who have had a full sequence of calculus courses and a first course in linear algebra.</td>
</tr>
</tbody>
</table>
MATH 7821  Historical and Cultural Development of Mathematics II

CREDIT HOURS  3.0
PREREQUISITES  MATH 3000 with grade of C or higher
DESCRIPTION  Three lecture hours a week. Exploration of the historical and cultural development of mathematics from ~A.D. 1600 to the present. Mathematics topics to include the development of algebraic geometry, logarithms, calculus, non-Euclidean geometry, abstract algebra, probability, and analysis.

MATH 8110  Real Analysis I

CREDIT HOURS  3.0
PREREQUISITES  MATH 4662/6662
DESCRIPTION  Topological and metric spaces, measures, and abstract integration.

MATH 8120  Real Analysis II

CREDIT HOURS  3.0
PREREQUISITES  MATH 8110
DESCRIPTION  Topics include: function spaces, general measure and integration theory, elements of Banach and Hilbert space theory.

MATH 8200  Advanced Matrix Analysis

CREDIT HOURS  3.0
PREREQUISITES  Prerequisite: MATH 4435 or MATH 6435 with a grade of C or higher, or equivalent
DESCRIPTION  Topics oriented to applications of linear algebra; topics may include unitary similarity and normal matrices, simultaneous diagonalization, Jordan canonical form, variational characterizations of eigenvalues of Hermitian matrices, eigenvalue location and Gersgorin theory, positive definite matrices, nonnegative matrices, and the Perron-Frobenius theorem.

MATH 8201  Combinatorial Matrix Theory

CREDIT HOURS  3.0
PREREQUISITES  MATH 8200 with grade of C or higher
DESCRIPTION  The course covers the basic results and methods of combinatorial matrix theory. It is concerned with the use of matrix theory and linear algebra in providing combinatorial theorems and in describing and classifying combinatorial constructions. The course includes a lot of graph theory, in particular, matrix connections with undirected graphs, bipartite graphs, directed graphs, and special graphs.

MATH 8210  Topics in Applied Matrix Analysis

CREDIT HOURS  3.0
PREREQUISITES  MATH 8200 with grade of C or higher
DESCRIPTION  Applications of selected topics in matrix analysis to other areas of mathematics, as well as statistics, engineering, biology, physics, computational and social sciences are considered in this course. The course covers topics such as: Boolean matrices with applications; Generalized inverses; Applications of the Singular Value Decomposition (SVD); Matrix inequalities with applications; Semidefinite programming. The course may be taken more than once if topics vary.

MATH 8220  Abstract Algebra I

CREDIT HOURS  3.0
PREREQUISITES  MATH 4442/6442 with grade of C or higher
DESCRIPTION  Group actions and Sylow Theorems, solvable and nilpotent groups, algebraic, separable, and normal field extensions, symmetric polynomials, Galois theory.

MATH 8515  Dynamical Foundations of Neuroscience
CREDIT HOURS  3.0
PREREQUISITES  MATH 4010/6010, MATH 4275/6275, or PHYS 4180/6180 with grade of C or higher
DESCRIPTION  (Same as NEUR 8340.) This course deals with computational and mathematical neuroscience with the emphasis on models of neurons and neural networks described in terms of dynamical systems, time continuous and discrete. Topics include biophysics and dynamics of single and coupled neurons, bifurcations and transitions between various types of neuronal activities; modeling of synapses, dendrites and axons; locomotion and small networks; neural coding in single cells and at the population level; dynamics of large networks, including spike computing with population codes; networks learning and behavioral changes.

MATH 8520  Applied Combinatorics and Graph Theory
CREDIT HOURS  3.0
PREREQUISITES  CSC 6520
DESCRIPTION  (Same as CSC 8520.) Development of combinatorial and graphical algorithms. Techniques for the study of complexity with application to algorithms in graph theory, sorting and searching.

MATH 8525  Applied Stochastic Processes
CREDIT HOURS  3.0
PREREQUISITES  MATH 4752/MATH 6752 and MATH 4010/MATH 6010
DESCRIPTION  This course deals with stochastic processes taking place at different spatial and temporal scales, with the emphasis on simulation and analysis of biological processes. Topics include Probabilistic and deterministic models, Discrete and Continuous Probability Distributions, Poisson processes, Discrete and Continuous Markov Chains, Discrete Time Branching Processes, Continuous Birth and Death Processes, Population Dynamics, and Stochastic Differential Equations. The potential biological applications include logistic growth processes, epidemic models, enzyme kinetics, competition processes, stochastic ion channels and random walk models for neural spike trains.

MATH 8530  Topics in Applied Mathematics
CREDIT HOURS  3.0
DESCRIPTION  May be taken more than once if topics are different.

MATH 8535  Applied Matrix Algebra
CREDIT HOURS  3.0
PREREQUISITES  MATH 4435/6435 with a grade of C or higher
DESCRIPTION  Matrix algebra: its concepts, results, techniques and methods applicable to statistics, bioinformatics, neuroscience, systems biology, economics, and related fields. The topics may include advanced operations on matrices, projectors and idempotent operators, generalized inverses, inequalities for eigenvalues, matrix approximations, optimization problems in statistics and econometrics, quadratic subspaces, inequalities with applications in statistics, non-negative matrices and their models in applied sciences.
MATH 8540  Advanced Topics in Ordinary Differential Equations and Dynamic Systems

CREDIT HOURS 3.0

PREREQUISITES MATH 4275 or MATH 6275 with grade of C or higher

DESCRIPTION (Same as PHYS 8540.) This course is a graduate-level presentation of the mathematical theory of ordinary differential equations and nonlinear dynamical systems. It is designed for students who want to study the advanced topics of qualitative theory of ordinary differential equations and do research in dynamical systems. Topics include existence and uniqueness theorems; IVP and Picard iterates; stability; variational equation and Floquet theory; Jordan normal form; the center manifold theorem; relaxation oscillations and method of averaging; Smale horseshoe and transverse homoclinic orbits; Lyapunov exponents and topological entropy.

MATH 8555  Mathematics of Biomedical Image Processing

CREDIT HOURS 3.0

PREREQUISITES MATH 6211 or MATH 6751 with a C or higher, and some basic programming skills. This course focuses on fundamental algorithms, concepts, and applications of biomedical image analysis. A variety of imaging modalities will be covered, including bright field microscopy imaging, fluorescent microscopy imaging, and time-lapse microscopy imaging. Following this course, students will understand how to apply mathematical theory to the processing biomedical images with diverse real-life applications from digital pathology diagnostics to molecular cell biology.

MATH 8560  Informatics of Neural and Cardiovascular Systems

CREDIT HOURS 3.0

PREREQUISITES MATH 410/610 or MATH 6275 or MATH 4751/6751 with grades of C or higher

DESCRIPTION (Same as NEUR 8360) This course studies informatics in application to biological systems, the emerging fields of science that appeared at a cross-road of mathematics, biology, and medicine. It is designated for graduate students. Biological topics will include gating properties of ion channels, with particular application to cardiac diseases and cancer. The models of ion channels, neural and cardiac cells will be introduced. Electrical activity of biological cells will be analyzed with modern mathematical methods. The role of stochasticity in information processing by biological systems will be analyzed. Application of the mathematical modes for genetic diseases (epilepsy, arrhythmias) will be discussed.

MATH 8610  Advanced Numerical Analysis

CREDIT HOURS 3.0

PREREQUISITES MATH 4435/6435 and MATH 4610/6610 or CSC 4610/6610

DESCRIPTION (Same as CSC 8610.) Advanced topics in numerical analysis. Stability and conditioning, discretization error, convergence. Examples are drawn from linear algebra, differential and nonlinear equations.

MATH 8620  Numerical Linear Algebra

CREDIT HOURS 3.0

PREREQUISITES MATH 4435/6435; and MATH 4610/6610 or CSC 4610/6610

DESCRIPTION (Same as CSC 8620.) Computational aspects of linear algebra. Matrix factorization, least squares, orthogonal transformations, eigen-values; and methods for sparse matrices.
MATH 8800  Topics in Mathematics
CREDIT HOURS  3.0
DESCRIPTION  May be taken more than once if topics are different.

MATH 8801  Graduate Research in Mathematics
CREDIT HOURS  1.0 - 15.0
DESCRIPTION  May be repeated for credit.

MATH 8802  Graduate Laboratory in Mathematics
CREDIT HOURS  1.0 - 15.0
DESCRIPTION  May be repeated for credit.

MATH 8820  Research
CREDIT HOURS  3.0
PREREQUISITES  consent of the instructor and chair of department
DESCRIPTION  Independent investigation of topics of common interest to student and instructor.

MATH 8900  Math Colloquium
CREDIT HOURS  1.0
PREREQUISITES  Consent of Graduate Director in Mathematics
DESCRIPTION  The course is to serve the need of graduate students who are ready to start research work. It provides students the opportunity to see a wide range of topics that are currently being studied by mathematicians. It also helps students to learn the important elements of a successful professional talk and to develop skills of professional communication and presentation.

MATH 8950  Directed Research in Mathematics
CREDIT HOURS  1.0 - 15.0
PREREQUISITES  consent of the instructor
DESCRIPTION

MATH 8999  Thesis Research
CREDIT HOURS  1.0 - 15.0
PREREQUISITES  thesis option
DESCRIPTION

MATH 9116  Teaching College Mathematics
CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
DESCRIPTION  Research-based investigation of teaching college-level mathematical sciences courses: placement, prerequisites, remedial courses, services courses, preparing syllabi, grading, technology, pedagogical strategies.

MATH 9126  Epistemology of Advanced Mathematics Concepts
CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
DESCRIPTION  An investigation of various epistemological frameworks in the context of collegiate level mathematics courses. Constructivism, Platonism, Cognitivism, Empiricism, and Information Processing. Comparison of the epistemologies as as they apply to post-secondary mathematics concepts.

MATH 9136  Learning Theories Relevant to Collegiate Mathematics Education
CREDIT HOURS  3.0
PREREQUISITES  MATH 9126 with grade of C or higher
DESCRIPTION  The course focuses on a variety of learning theories relevant to collegiate mathematics education and advanced mathematical thinking including: cognitive, social, constructivists, semiotics, situated learning, behaviorist, etc. The course will look at the influence of learning theories on how mathematics educators view learning, conduct research about learning, and subsequently develop teaching methodologies.

EDMT 6460  Theory and Pedagogy of Middle Level Mathematics Instruction
CREDIT HOURS 3.0
DESCRIPTION This course provides theory and pedagogical content knowledge necessary for effective middle school instruction in mathematics. Students engage in lesson and curriculum planning, explore various teaching strategies and methods, and develop the reflective practices necessary for teaching middle grades mathematics.

EDMT 6560  Principles of Mathematics Instruction
CREDIT HOURS 3.0
COREQUISITES EDCI 6600
DESCRIPTION Students examine instructional procedures, teaching strategies, technology, and evaluation procedures for middle and secondary school mathematics.

EDMT 7360  Integration of Technology in Mathematics Instruction
CREDIT HOURS 3.0
DESCRIPTION Students examine the role of technologies in the teaching and learning of mathematics, with a particular focus on classrooms within urban environments. Course includes hands-on experience with graphing calculators, computer software tools, Internet resources, and instructional materials for integrating technology in mathematics instruction.

EDMT 7400  Mathematics Concepts for Special Learners
CREDIT HOURS 3.0
DESCRIPTION Students explore the full range of materials and strategies for developing mathematical competence in special learners. The course emphasizes diagnosis, remediation, concept learning, and mathematical problem solving taught in a concrete, student-centered manner.

EDMT 7530  Mathematics Concepts for Middle Childhood Education I
CREDIT HOURS 3.0
DESCRIPTION Develops selected topics in middle school mathematics including number systems, number theory, number and number relations, computation and estimation, algebra concepts, patterns, and functions. The course emphasizes problem solving, communicating, reasoning, connecting mathematical ideas, and using technology.

EDMT 7560  Theory and Pedagogy of Mathematics Instruction
CREDIT HOURS 3.0
DESCRIPTION Students examine classroom practices in mathematics through implementation of reflective practice and action research. A review of the literature includes an examination and articulation of theoretical frameworks for mathematics teaching and learning as they relate to classroom practice. Research focuses on equity, teaching, learning, curriculum, assessment, and technology issues in a standard-based classroom.

EDMT 8290  The Study of Learning and Instruction in Mathematics
CREDIT HOURS 3.0
DESCRIPTION Students examine psychological bases for the study of teaching and learning of mathematics. Findings of research in mathematics education related to the learning of selected topics in the school curriculum are explored. Research methods, theoretical constructs, and research perspectives in mathematics education are investigated. (Repeatable).

MUS 6200  Here and Now: Introduction to Mindfulness and Meditation
CREDIT HOURS  2.0
DESCRIPTION  This seminar teaches the understanding of our own mind, it gives you an idea how to observe it and how to transcend from an active attachment to the minds movement to a neutral awareness of it. It teaches several mindfulness techniques in connection with breathing exercises, being a direct link to the musicians physical bodywork. Meditation becomes a practical tool in your daily life as well as scales, chords or long tone exercises.

MUS 6210  Composition Seminar
CREDIT HOURS  2.0
PREREQUISITES  MUS 1440 and MUS 1540 with grades of C or higher, or equivalent, or consent of instructor
DESCRIPTION  Two lecture hours per week. Exploration of the processes and aesthetics of contemporary musical composition with additional topics to include a survey of contemporary music since 1960, advanced musical notation, advanced orchestration, and an exploration of the business of being a composer. Repeatable for credit and required of all students working in the composition area.

MUS 6230  Jazz Composition
CREDIT HOURS  2.0
PREREQUISITES  MUS 6792 with a grade of C or higher
DESCRIPTION  An introduction to jazz composition with one to four melodic voices plus rhythm section. Students will develop creative application on the basic elements melody, harmony, and rhythm in contexts and practices associated with jazz music. Theoretical and compositional study will emphasize the development of contrapuntal skills, melodic and formal development and techniques of instrumentation and orchestration.

MUS 6360  Advanced Keyboard Skills
CREDIT HOURS  2.0
DESCRIPTION  Development of advanced keyboard skills in sight playing; chord patterns; transposing; harmonizing classical, folk and popular melodies; arranging for keyboard(s); improvising; and accompanying and introductory score reading. Successful completion of this course by applied piano and piano pedagogy majors waives the piano proficiency examination.

MUS 6410  Piano Pedagogy I
CREDIT HOURS  3.0
DESCRIPTION  Approaches and materials for children and high school students at the elementary and intermediate levels. Focus will include the job market, methods, curriculum building, musicianship training, technical development, practice strategies, ensemble playing, use of technology in teaching, and professional etiquette as a clinical/adjudicator.

MUS 6411  Piano Pedagogy II
CREDIT HOURS  3.0
PREREQUISITES  MUS 4410/6410 with grade of B or higher, or consent of instructor
DESCRIPTION  Approaches and materials for the adult student at the beginner through advanced levels. Focus will include piano class teaching, methods, curriculum building, musicianship training, technical development, practice strategies, memorization, musical style and interpretation, ensemble playing, philosophical bases, piano laboratory technique, and professional etiquette as a clinician/adjudicator.

MUS 6440  Vocal Pedagogy
CREDIT HOURS  2.0
DESCRIPTION  Principles of vocal pedagogy and development of teaching skills in applied vocal instruction.
MUS 6450  Advanced Tonal Analysis
CREDIT HOURS  3.0
PREREQUISITES  MUS 6160 with grade of B or higher, or equivalent, or consent of instructor
DESCRIPTION  Three lecture hours per week. Advanced structural and stylistic analysis of large one-movement and multi-movement works from the common-practice period.

MUS 6460  Analysis of Post-Tonal Music
CREDIT HOURS  3.0
PREREQUISITES  MUS 6160 with grade of B or higher, or equivalent, or consent of instructor
DESCRIPTION  Three lecture hours per week. Theories of musical structure in the post-tonal idiom, with analytical applications to literature from major composers of the twentieth century. Compositional exercises will provide orientation to diverse styles and demonstrate creative applications of theoretical concepts. Substantial research project required.

MUS 6470  Graduate Choral Conducting Recital
CREDIT HOURS  0.0
DESCRIPTION  Each MM in choral conducting student is required to perform several graduate recitals that total 45 minutes of music over the course of the degree program. These recitals will be given with a Georgia State University School of Music choral ensemble or, in some cases, an approved outside ensemble. (Approval must come from the director of choral activities.).

MUS 6480  Choral Conducting
CREDIT HOURS  2.0
DESCRIPTION  Conducting techniques, with and without the baton, that communicate the conductor's interpretation of the musical score to the performers.

MUS 6490  Instrumental Conducting
CREDIT HOURS  2.0
PREREQUISITES  MUS 2450 with grade of B or higher, and consent of instructor
DESCRIPTION  Advanced baton techniques, score reading, interpretation, and rehearsal procedures for instrumental conducting.

MUS 6500  Historical Counterpoint
CREDIT HOURS  3.0
PREREQUISITES  MUS 6160 with grade of B or higher, or equivalent, or consent of instructor
DESCRIPTION  Three lecture hours per week. Exploration, through composition and analysis, of the style and contrapuntal techniques of the Renaissance (Palestrina-style modal counterpoint) and Baroque (Bach-style harmonic counterpoint).

MUS 6530  Accompanying
CREDIT HOURS  1.0
PREREQUISITES  Keyboard proficiency
DESCRIPTION  Developing musical sensitivity at the keyboard to enhance the performance of vocalists or instrumentalists. May be repeated for credit.

MUS 6610  Piano Literature
CREDIT HOURS  3.0
PREREQUISITES  MUS 6070 with grade of B or higher, or equivalent, or consent of instructor
DESCRIPTION  A comprehensive investigation of keyboard music from a historical and stylistic viewpoint, emphasizing major keyboard works and composers from the Baroque to the present.

MUS 6620  Solo Song Literature I: Germany and Eastern Europe
CREDIT HOURS  2.0
DESCRIPTION  Survey of the solo vocal literature of Germany, Poland, Russia, Hungary, Czechoslovakia and Romania. Includes class lectures, score study, listening analysis and class discussion.

MUS 7160  Jazz Combos  
CREDIT HOURS  .5.0  
PREREQUISITES  Audition and consent of the instructor  
DESCRIPTION  Rehearsal and performance of jazz literature for the small jazz combo (trio to sextet) with balanced instrumentation. Basic jazz improvisation, improving listening skills, combo arranging, and memorization of jazz "standards."

MUS 7200  Principles and Strategies of General Music Instruction  
CREDIT HOURS  3.0  
DESCRIPTION  Advanced understanding and practice of general music education. Emphasis on current research and strategies for maximizing musical growth. Correlated with the national standards in music education.

MUS 7220  Workshop Seminar in Choral Conducting and Performance  
CREDIT HOURS  2.0  
DESCRIPTION  Study of score preparation and analysis, advanced gesture and baton technique and comprehensive study of choral methodology through the active participation in, and observations of, choral rehearsals. Individual instruction will also apply. The seminar will also cover the study of developing a historically-informed approach to the performance of choral repertoire of all stylistic periods. Open to MM or artist certificate students in choral conducting unless permission of instructor granted.

MUS 7300  Directed Study in Music Education  
CREDIT HOURS  3.0  
PREREQUISITES  Consent of the music education faculty  
DESCRIPTION  Independently completed research conducted under the supervision of a music education faculty member. Exit project for master's degree students in music education.

MUS 7400  Foundations of Music Education  
CREDIT HOURS  3.0  
DESCRIPTION  Historical, psychological, philosophical, and social-cultural foundations of music education practice in school and community settings.

MUS 7430  Choral Methods and Techniques  
CREDIT HOURS  3.0  
DESCRIPTION  Review of fundamental concepts of vocal production, choral conducting techniques, and rehearsal methodology. Repertory, administration and supervision of school choral programs, innovative teaching/learning methods, and applications of research in choral music education.

MUS 7520  Wind Class  
CREDIT HOURS  2.0  
DESCRIPTION  

MUS 7530  Brass Class

MUS 8590  Solo Recital in Major Graduate Applied Instrument or Voice  
CREDIT HOURS  1.0  
PREREQUISITES  All degree proficiencies must be completed  
DESCRIPTION  One-hour performance is required. The recital must be presented before the end of the fourth term of Applied MUS 8000.

MUS 8620  Opera Theater Workshop  
CREDIT HOURS  1.0 - 3.0  
DESCRIPTION  May be repeated for a maximum of five credit hours. Comprehensive training in stage techniques and character development for the operatic singer-actor. Performance in "scenes" recital or opera production required.

MUS 8625  Principles of Opera Production  
CREDIT HOURS  3.0  
PREREQUISITES  MUS 8620 (1 semester) with grade of B or higher  
DESCRIPTION  Development of the skills needed for new and emerging producing directors. Focus is on the fundamentals of stage craft, performance and production.

MUS 8680  Seminar in Instrumental Conducting  
CREDIT HOURS  2.0  
PREREQUISITES  MUS 6490 with grade of B or higher, or equivalent, or consent of instructor  
DESCRIPTION  Examination of the theoretical, practical, and artistic aspects of conducting and rehearsing instrumental ensembles.

MUS 8690  Choral Conducting Project  
CREDIT HOURS  3.0  
DESCRIPTION  Preparation and execution of a choral concert and a research paper analyzing the major composition of the concert.
MUS 8890  Composition Recital
CREDIT HOURS  3.0
PREREQUISITES  at least 2 semesters of APCP 8000 with grade of B or higher, or equivalent, and consent of instructor
DESCRIPTION  A concert lasting at least 45 minutes of works written by the student composer while pursuing the composition degree.

MUS 8900  Non-Thesis Research in Music
CREDIT HOURS  1.0 - 6.0
DESCRIPTION  Supervised elective research not associated with thesis or directed-study credit.

MUS 8910  Final Project in Composition
CREDIT HOURS  2.0
PREREQUISITES  At least 2 terms of APCP 8000 with grade of B or higher, or equivalent, and consent of the instructor
DESCRIPTION  Composition of an original, major musical work.

MUS 8920  Research or Teaching Assistantship in Music
CREDIT HOURS  3.0 - 18.0
DESCRIPTION  Prerequisite MUS 8100. Does not count toward degree requirements. Assisting of music faculty members in their research or teaching classes of one's own under the supervision of a faculty member. Required of all graduate students receiving a stipend. May be repeated for credit.

MUS 8950  Practicum in Music Education
CREDIT HOURS  3.0
PREREQUISITES  MUS 8240 and MUS 8400 with grades of B or higher, or consent of instructor
DESCRIPTION  Development, reflection and critical analysis of advanced teaching competencies through a planned field project.

MUS 8960  Proseminar in Music Education
CREDIT HOURS  3.0
PREREQUISITES  For Ed.S. and Ph.D. students; others require consent of the instructor
DESCRIPTION  Examination of the major and current literature in philosophy, history, psychology, sociology, and creativity in music education. Topics may vary. May be repeated for credit.

MUS 8970  Instrumental Conducting Project
CREDIT HOURS  3.0
DESCRIPTION  Terminal project for the degree in instrumental conducting, consisting of a public concert and paper.

MUS 8980  Advanced Research Project in Music Education
CREDIT HOURS  3.0
PREREQUISITES  MUS 8240, MUS 8400, and MUS 8950 with grades of B or higher, or consent of instructor
DESCRIPTION  Independent research on a selected topic under supervision of a music education faculty member. For Ed.S. students in music education.

MUS 8999  Thesis
CREDIT HOURS  1.0 - 9.0
PREREQUISITES  Consent of Instructor
DESCRIPTION

### NEUR 6000  Neuroscience Laboratory
- **Credit Hours:** 4.0
- **Prerequisites:** NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor
- **Description:** Research techniques in neuroscience, including behavioral analysis, extracellular electrophysiology, molecular and cellular neuroscience, fluorescence microscopy, neuroanatomy, immunocytochemistry, and neuroethology.

### NEUR 6001  Computational Neuroscience Laboratory
- **Credit Hours:** 4.0
- **Prerequisites:** NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor
- **Description:** Research techniques in computational neuroscience, including biophysical modeling of neurons, synapses, and neuronal networks. Topics include calcium dynamics, cellular homeostasis, ion channel kinetics, central pattern generator dynamics, neuronal network synchronization, and artificial intelligence. Students acquire basic programming skills in Matlab and other software to build/analyze computational models from literature-based biophysical measurements.

### NEUR 6010  Neurobiology
- **Credit Hours:** 4.0
- **Prerequisites:** Consent of instructor
- **Description:** Advanced exploration of cellular and molecular function in neurons and glia. Topics include excitable membranes and cells, ion channels and receptors, synaptic transmission and plasticity, neural development, and molecular bases of neurological diseases.

### NEUR 6015  Cellular and Molecular Neuroscience
- **Credit Hours:** 4.0
- **Prerequisites:** NEUR 6010 or BIOL 6102, with a grade of C or higher, or consent of instructor
- **Description:** (Cross-listed with: BIOL 6100.).

### NEUR 6020  Cognitive Neuroscience
- **Credit Hours:** 4.0
- **Prerequisites:** NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor
- **Description:**

### NEUR 6030  Computational Neuroscience
- **Credit Hours:** 4.0
- **Prerequisites:** NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor
- **Description:** (Cross-listed with: BIOL 6030.).

### NEUR 6040  Neuroethology
- **Credit Hours:** 4.0
- **Prerequisites:** NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor
- **Description:** This course covers sensorimotor coding of behavior in a diverse array of animals including bats, owls, electric fish, and songbirds. It provides a unique perspective for students who want to understand the general principles underlying neural control of behavior. Developmental, evolutionary, systems, and comparative approaches are emphasized. Students will read classic papers as well as cutting-edge primary literature. (Cross-listed with BIOL 6050.).
NEUR 6050  Statistics for Neuroscience  
CREDIT HOURS 4.0  
PREREQUISITES NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor  
DESCRIPTION Topics include fundamentals of hypothesis testing and research design, descriptive data collection techniques, and data analysis and interpretation using correlation, regression, t-tests, and univariate design.

NEUR 6060  Neurophysiology  
CREDIT HOURS 4.0  
PREREQUISITES NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor  
DESCRIPTION The physiology of nervous systems, including the physiological bases of excitability, synaptic transmission and integration, sensory and motor processing, and behavioral choice. Current experimental and computational approaches to neurophysiological questions will be discussed.

NEUR 6070  Sensory Neuroscience  
CREDIT HOURS 3.0  
PREREQUISITES NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor  
DESCRIPTION The course will cover the neural basis of sensation and perception, from neural coding in the sense organs to central representation leading to perception. The neurobiology of vision, audition, somatosensation (touch and pain), and chemosensation (taste and smell) will be covered. (Cross-listed with: BIOL 6070.).

NEUR 6080  Clinical Neuroscience  
CREDIT HOURS 4.0  
PREREQUISITES NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor  
DESCRIPTION This course will examine the neurobiological basis of mental disorders such as depression and schizophrenia as well as the neurodegenerative conditions of Parkinson’s and Alzheimer’s Diseases. Additional topics include psychoneuroimmunology, stress and coping, the role of genetics and epigenetics in neurological and neuropsychiatric disorders, and the role of gut microbes in health and disease. (Cross-listed with: BIOL 6080.).

NEUR 6100  Developmental Neurobiology  
CREDIT HOURS 4.0  
PREREQUISITES NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor  
DESCRIPTION Introduction to the development of the nervous system. Covers the field of developmental neurobiology from neural induction to the modification of neuronal connections in the adult nervous system and uses a variety of model organisms to demonstrate the rules by which nervous systems develop. (Cross-listed with: BIOL 6094.).

NEUR 6110  Neural Plasticity  
CREDIT HOURS 4.0  
PREREQUISITES NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor  
DESCRIPTION Phenomenology and mechanisms of experience-dependent changes in the nervous system. The course will examine plasticity at many levels of analysis, from synaptic mechanisms to clinical strategies, and from molecular neuroscience to cognitive psychology.
NEUR 6115  Medical Neuroanatomy  
CREDIT HOURS 4.0  
PREREQUISITES NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor  
DESCRIPTION Human brain and spinal cord functional neuroanatomy and associated pathologies. (Cross-listed with: BIOL 6115.)

NEUR 6150  Drugs and the Nervous System  
CREDIT HOURS 3.0  
PREREQUISITES NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor  
DESCRIPTION This course provides in-depth and advanced exploration of the neuronal and chemical mechanisms underlying psychoactive drug action as well as compulsive drug usage. The focus will be both on drugs of abuse as well as pharmacological interventions in neural/behavioral disorders.

NEUR 6200  Endocrinology  
CREDIT HOURS 4.0  
PREREQUISITES CHEM 6600 or equivalent  
DESCRIPTION (Same as BIOL 6240.) Four lecture hours a week. Basic biochemistry and physiology of the endocrine system, including synthesis and secretion of steroid and protein hormones, mechanisms of hormone action, and endocrinology of reproduction.

NEUR 6250  Neuroscience of Memory  
CREDIT HOURS 3.0  
PREREQUISITES NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor  
DESCRIPTION An introduction to the neural bases of memory. The course begins with a review of the historical background, experimental methods, and relevant principles of neuroscience. The Neuroscience of memory will then be reviewed at different levels of biological organization, including molecular/cellular, neural circuit, neural systems, and behavioral. Cross-listed with: BIOL 6200 & PSYC 6250.

NEUR 6251  Neuroscience of Motivation and Emotion  
CREDIT HOURS 3.0  
PREREQUISITES NEUR 6010 or BIOL 6102 with a C or higher, or consent of instructor  
DESCRIPTION An examination of how the nervous system generates motivation and emotional states in diverse species, including humans. Topics include neural mechanisms of thirst and hunger, defense and fear, social behavior as well as disorders of emotion and motivation. Cross-listed with: BIOL 6210.

NEUR 6320  Fundamentals of Bioinformatics  
CREDIT HOURS 4.0  
PREREQUISITES Consent of instructor  
DESCRIPTION A "hands-on" approach to bioinformatics to analyze information from biological databases, emphasizing sequence and structure databases for proteins and nucleic acids, and introducing the computing skills necessary for bioinformatics. Topics include: sequences and three-dimensional structures of proteins and nucleic acids, the major databases, algorithms for sequence comparison, data mining, and prediction of structure and function. Four lecture hours per week. (Cross-listed with BIOL 6640, CHEM 6640, and CSC 6640.)

NEUR 6990  Internships in Neuroscience
CREDIT HOURS  2.0
PREREQUISITES  Consent of the instructor
DESCRIPTION  Students receive hands-on experience in activities that require knowledge and skills related to the field of Neuroscience. Specific topics available each semester will vary. May be taken for credit a maximum of two times.

NEUR 7400  Psychology of Animal Behavior
CREDIT HOURS  3.0
DESCRIPTION  (Same as PSYC 7560.) Psychological, genetic, physiological, and ecological bases of animal behavior. Basic adaptive mechanisms and their importance for understanding human behavior.

NEUR 8000  Introduction to Neuroscience
CREDIT HOURS  4.0
PREREQUISITES  BIOL 4102, BIOL 6102, or NEUR 6010 with a grade of B or higher, or equivalent, or consent of instructor
DESCRIPTION  An advanced and comprehensive survey of neuroscience. Topics include cellular, molecular, developmental, systems, behavioral, and cognitive neuroscience.

NEUR 8010  Cellular, Molecular, and Developmental Neuroscience
CREDIT HOURS  3.0
PREREQUISITES  NEUR 8000 with a B or higher, or equivalent, or consent of the instructor
DESCRIPTION  Three lecture hours a week. Advanced analysis of central concepts in cellular, molecular, and developmental neuroscience. Topics include: physiology, development and differentiation, signaling and synaptic transmission, synaptic plasticity, construction and modulation or circuits, neurogenesis/repair/regeneration, molecular bases of behavior, and neurodevelopmental and degenerative disease. May be cross-listed with BIOL 8010 and/or PSYC 8616.

NEUR 8020  Systems Neuroscience
CREDIT HOURS  3.0
PREREQUISITES  NEUR 8000 with a B or higher, or equivalent, or consent of the instructor
DESCRIPTION  Advanced analysis of how neurons are organized into systems that control behavior. Topics include functional neuroanatomy, sensory and motor systems, and the neural basis of motor learning.

NEUR 8031  Behavioral Neuroscience
CREDIT HOURS  3.0
PREREQUISITES  NEUR 8000 with a grade of B or higher, or equivalent, or permission of instructor
DESCRIPTION  Advanced analysis of functional neural systems involved in the regulation of behavior, emphasizing interactions between limbic, hypothalamic, and cortical brain systems. Topics include learning and memory, fear, aggression, homeostasis, and reward & reinforcement. Three lecture hours a week.

NEUR 8035  Psychological Research Statistics I
CREDIT HOURS  3.0
PREREQUISITES  PSYC 3010, or equivalent
DESCRIPTION  (Same as PSYC 8410.) Statistical analysis of psychological data with an emphasis on the logic of basic analytic techniques. Includes discussion of data screening, hypothesis testing, bivariate measures of association, and simple between- and within-subjects analysis of variance.
NEUR 8040  Research Design and Analysis in Neuroscience

CREDIT HOURS  4.0
DESCRIPTION  This course will train doctoral students in the design of neuroscience experiments and the statistical methodologies appropriate for analyzing these data. Topics include experimental design, parametric and non-parametric statistical analyses, as well as applied problem sets using neurobiobehavioral data. Concurrent laboratory component will cover data entry and analysis using SPSS. 4.000 Credit hours.

NEUR 8050  Skills for Professional Neuroscientists

CREDIT HOURS  3.0
PREREQUISITES  NEUR 8000 or equivalent with a grade of B or higher, or consent of the instructor
DESCRIPTION  Three lecture hours a week. Topics include: introduction to the scientific method, critical analysis of Neuroscience Literature, grant/proposal writing; peer review.

NEUR 8100  Developmental Neuropsychology

CREDIT HOURS  3.0
PREREQUISITES  NEUR 8400, PSYC 8620, or consent of instructor
DESCRIPTION  (Same as PSYC 8630.) Development of the central nervous system and brain; their relationship to behavioral development; and common CNS disorders in children.

NEUR 8200  Protein Structure and Function

CREDIT HOURS  3.0
PREREQUISITES  CHEM 6610 or consent of instructor
DESCRIPTION  (Same as BIOL 8360 and CHEM 8360.) Discussion of the structure and function of proteins and of enzyme mechanisms. Topics include protein folding and motions, descriptions of enzyme catalysis at a molecular level, consideration of the energetics of biological processes, and enzyme kinetics.

NEUR 8210  Nucleic Acid Structure and Function

CREDIT HOURS  3.0
PREREQUISITES  CHEM 6610 with grade of B or higher, or consent of instructor
DESCRIPTION  (Same as BIOL 8637 and CHEM 8370.) Topics include the structure of nucleic acids, mechanism and control of DNA and RNA synthesis, and interaction of proteins and drugs with nucleic acids.

NEUR 8230  Psychopharmacology

CREDIT HOURS  3.0
PREREQUISITES  PSYC 8610, or consent of the instructor
DESCRIPTION  (Same as BIOL 8065 and PSYC 8640.) Biological bases of psychopharmacology, including the locus of action for psychoactive substances and the mechanisms by which these substances modify neural activity and cause a change in mood and behavior. Covers neurophysiology, neurochemistry, and pharmacology of classes of psychoactive drugs used to treat mental disorders, as well as those commonly abused that may or may not have therapeutic uses.
NEUR 8240  Advanced Neuroendocrinology
CREDIT HOURS  3.0
PREREQUISITES  NEUR 8000 with a grade of B or higher, or equivalent, or consent of the instructor
DESCRIPTION  This course aims to provide the student with an overview of Neuroendocrinology at the graduate level. Hormone synthesis and mechanisms of action, as well as advanced principles regarding how hormones interact with the nervous system to influence behavior will be emphasized. Class studies in the field plus current research and techniques will be included. Three lecture hours per week.

NEUR 8300  Functional Human Neuroanatomy
CREDIT HOURS  3.0
PREREQUISITES  BIOL 3840 or PSYC 8610, or consent of the instructor
DESCRIPTION  (Same as BIOL 8040 and PSYC 8615) In-depth study of the neuroanatomy and function of the human central nervous system. Considers neuroanatomical techniques used to study the brain, neuroanatomical basis for the control of sensory and motor systems, as well as cortical, autonomic nervous system, and limbic system anatomy and function. Both normal brain anatomy and pathologies are covered.

NEUR 8310  Research Methods in Psychology
CREDIT HOURS  3.0
DESCRIPTION  (Same as PSYC 8010.) Types of research design including experimental designs, quasi-experimental designs, single-case designs, and case studies; related research issues including aspects of philosophy of science, measurement, reliability, internal and external validity, and artifacts.

NEUR 8320  Psychological Research Statistics II
CREDIT HOURS  3.0
PREREQUISITES  NEUR 8035 or PSYC 8410
DESCRIPTION  (Same as PSYC 8420.) Statistical analysis of psychological data with an emphasis on multiple and logistic regression and their interpretation. Statistical considerations when planning research such as power analysis are also discussed.

NEUR 8330  Psychological Research Statistics III
CREDIT HOURS  3.0
PREREQUISITES  NEUR 8320 or PSYC 8420
DESCRIPTION  (Same as PSYC 8430.) Advanced topics in the statistical analysis of psychological data including various forms of factor analysis, psychometric methods and theories, structural equation modeling and its use in theory construction, and multivariate analysis of variance.

NEUR 8340  Dynamical Foundations of Neuroscience
CREDIT HOURS  3.0
PREREQUISITES  MATH 4010/6010, MATH 4275/6275, or PHYS 4180/6180 with grade of C or higher
DESCRIPTION  (Same as MATH 8515.) This course deals with computational and mathematical neuroscience with the emphasis on models of neurons and neural networks described in terms of dynamical systems, time continuous and discrete. Topics include biophysics and dynamics of single and coupled neurons, bifurcations and transitions between various types of neuronal activities; modeling of synapses, dendrites and axons; locomotion and small networks; neural coding in single cells and at the population level; dynamics of large networks, including spike computing with population codes; networks learning and behavioral changes.

<td>Three lecture hours per week. Realistic modeling dynamics of neurons and neuronal networks with emphasis on testing data-driven hypotheses. Topics include modeling intracellular calcium dynamics, voltage dependent channels, synapses, activity of neurons, and synchronization regimes of neuronal networks. 3.000 credit hours.</td>
</tr>
</tbody>
</table>
**NEUR 8385  Systems Biology**

**CREDIT HOURS** 3.0

**PREREQUISITES** Grade of C or higher in MATH 6010 or MATH 6275

**DESCRIPTION** This course provides an introduction to systems biology from a mathematical modeling point of view. It will introduce biology students to mathematical modeling, and mathematical students to systems biology. Biological topics will include gene systems, protein systems, metabolic systems and signaling systems. Mathematical tools will include basic modeling concepts, approximation, static networks, linear vs. nonlinear systems and how to linearize nonlinear systems, and parameter estimation and optimization. Specific case studies will include integrative analysis of genome, protein, and metabolite data, systems biology in medicine and drug development, and synthetic biology.

**NEUR 8395  Advanced Mathematical Biology**

**CREDIT HOURS** 3.0

**DESCRIPTION** This graduate level course extends mathematical methods and models of biological systems, covered in MATH 4010/6010 (BIO 6930) Mathematical Biology. The main focus will be on multidimensional and spatial models of biological systems. The topics will include the dispersal of biological populations and age structure on population growth; rates of spread of invading organisms and population persistence; branching random walks and chain reactions; stochastic and Markov models of biological systems; cellular automata models with deterministic and stochastic rules, related to the infectious disease transmission and control; the Game of Life, and pattern formation in biological networks of different nature.

**NEUR 8400  Introduction to Clinical Neuropsychology**

**CREDIT HOURS** 3.0

**DESCRIPTION** Prerequisite: NEUR 8030, PSYC 8610 or PSYC 8618, or consent of instructor. (Same as PSYC 8620.) Topics include laterality, handedness, cerebral dominance, basic neuroanatomy, aphasia, neglect, amnesic syndromes, agnosia, alexia, split brain research, and recovery of function.

**NEUR 8410  Advanced Cognitive Psychology**

**CREDIT HOURS** 3.0

**DESCRIPTION** (Same as PSYC 8540.) Empirical and theoretical bases for understanding the processes of thought, including attention, pattern recognition, learning, memory, language, and reasoning.

**NEUR 8420  Principles of Cognitive Neuroscience**

**CREDIT HOURS** 3.0

**DESCRIPTION** Crosslisted with PSYC 8600. The integrated study of cognitive sciences and neurosciences (i.e. the neural systems underlying cognitive processes). The topics covered include basic neuroanatomy and physiology, neuroimaging methods, and the study of various mental processes linked to brain structure and function in normal human populations, with discussion of the potential relationships between neural circuitry and the formation of internal experience through the integration of sensation, perception, prediction, action, and evaluation.

**NEUR 8500  History of Psychology**

**CREDIT HOURS** 3.0

**DESCRIPTION** (Same as PSYC 8500.) Broad historical basis of psychology as a science. An account of the historical development and contemporary status of various theoretical systems of psychology.

NEUR 8750  Seminar in Philosophy of Science
CREDIT HOURS  3.0
DESCRIPTION  (Same as PHIL 8130.) Basic philosophic issues and problems attending any reasonable adequate discussion of that nature, function and limits of natural science and its relationship to the social sciences. Includes such topics as the logic of hypothesis construction, testability, criteria of confirmation, physical laws and their role in scientific explanation, the nature of scientific theories, scientific realism, the compleatability of science, the social sciences, scientism, and the difference between philosophy and science. May be repeated if topic varies. A maximum of six credit hours may be applied toward the degree.

NEUR 8760  Seminar in Philosophy of Mind
CREDIT HOURS  3.0
DESCRIPTION  (Same as PHIL 8330.) Examination of issues in philosophy of mind. Topics may include: dualism, behaviorism, identify theories, functionalism, eliminative materialism, mental content, mental causation, consciousness, qualia, subjectivity. May be repeated once if topic varies.

NEUR 8761  Seminar in Moral Psychology
CREDIT HOURS  3.0
PREREQUISITES  Consent of the instructor
DESCRIPTION  (Same as PHIL 8770.) An in-depth examination of specific issues concerned with the interdisciplinary study of mind, drawing on research from philosophy, neuroscience, psychology, anthropology, linguistics, computer science, and ethology. Topics may include: mental representation and language, sensation and perception, inference and reasoning, innateness and modularity, the emotions, learning and conceptual change, moral cognition and development, consciousness and self-consciousness, mental deficits and disorders, animal and computer models of cognition, folk psychology and reductive strategies in neurobiology; a careful reading of one or more recent influential books in philosophy or cognitive science.

NEUR 8763  Seminar in Ethics
CREDIT HOURS  3.0
PREREQUISITES  Consent of the instructor
DESCRIPTION  (Same as PHIL 8700) Topics such as Greek ethics, Kantian ethics, utilitarianism, feminist ethics, and religious ethics. May be repeated if topic varies. 3 Credit Hours.

NEUR 8764  Seminar in Bioethics
CREDIT HOURS  3.0
PREREQUISITES  Consent of the instructor
DESCRIPTION  (Same as PHIL 8740) Examination of contemporary issues in bioethics. Topics may include: research ethics-human and non-human subjects; end-of-life decision making; eugenics and The Human Genome Project; reproductive-cloning, freezing embryos, artificial insemination; abortion-maternal/fetal relations, embryonic stem cell research; and health care disparity-race, gender, and income. May be repeated if topic varies. 3 Credit Hours.

NEUR 8770  Seminar in Philosophy and Cognitive Science
CREDIT HOURS  3.0
DESCRIPTION  (Same as PHIL 8340.) NURS 6000
Advanced Psychiatric Care for Pediatric and Geriatric Clients
CREDIT HOURS
6.0
PREREQUISITES
Graduate of Adult PMH NP program
DESCRIPTION
This is a special course for graduates of the Adult PMH NP program at GSU. This is a time limited course and part of a two course curriculum to provide lifespan content to graduates to prepare them for ANCC’s Family PMH NP certification exam. The course will be offered two summers only—2012 and 2013—and is limited to this select group of graduates. The course consists of six hours of lecture and asynchronous web-enhanced learning. Clinical placements to enhance learning will consist of a minimum of sixty clinical hours with pediatric patients and a minimum of sixty clinical hours with geriatric clients. The total clinical hours of 180 allows students to specialize in pediatric or geriatric clinical areas.

NURS 6910
Caring for Families and Communities
CREDIT HOURS
5.0
DESCRIPTION
For RNs only: The course focuses on the acquisition and application of evidenced-based nursing practice with the goal of improving health at the individual and population levels. Emphasis is placed on health promotion and disease and injury prevention in collaboration with the client and key stakeholders. Under faculty supervision, the student develops and refines professional practice (3 hrs didactic credit; 2 hrs clinical credit [90 clinical contact hrs]).

NURS 6930
Leadership and Management in Nursing
CREDIT HOURS
3.0
PREREQUISITES
Must be a Registered Nurse (RN)
DESCRIPTION
The Leadership and Management in Nursing course is for registered nurses (RNs). The course focuses on the development, design and application of principles of leadership and management of health care delivery systems. Emphasis is placed upon assuming responsibility for nursing practice including decision making and nursing actions. Serves as one of the two Critical Thinking through Writing (CTW) courses required of all Nursing majors.

NURS 7000
Research Methods for Advanced Practice Nurses
CREDIT HOURS
3.0
PREREQUISITES
Admission to master's program in the School of Nursing
DESCRIPTION
Quantitative research approaches are emphasized, and qualitative research is introduced. Emphasis is on the critique and utilization of nursing research in advanced practice. Beginning skills in conducting research are introduced and serve as a foundation for the applied clinical and research projects.

NURS 7001
Culture, Health Literacy, and Disparities in Healthcare
CREDIT HOURS
3.0
PREREQUISITES
Admission to master's program in the School of Nursing
DESCRIPTION
Strategies to prepare healthcare providers to care for a changing and diverse population will also serve as a major focus of the course.

<td>The course is designed to prepare the student to provide health promotion, health maintenance activities and management of the woman during the reproductive years and throughout the lifespan</td>
<td>6.0 OR 7.0</td>
<td></td>
<td>Sociopolitical and cultural issues related to women's health will also be discussed. The student is also provided an opportunity to integrate and apply theoretical and clinical knowledge acquired in previous courses. Nurse practitioner clinical skills will be refined and evaluated in a collaborative relationship with nurse practitioners, certified nurse midwives, physicians, and other health care providers. Three credit hours lecture; three credit hours clinical practice (135 clinical practice hours).</td>
</tr>
</tbody>
</table>
NURS 7090  Advanced Practice with the Childbearing Family  
CREDIT HOURS  9.0  
PREREQUISITES  NURS 7080  
DESCRIPTION  Emphasis is placed on the development of a broad knowledge of the physiological and pathophysiological changes occurring during the periconceptual, antepartum, intrapartum, and postpartum periods. The course is designed to prepare the student to provide health promotion, health maintenance activities and management of the child bearing woman. Nursing assessment and management competencies will include the selection of appropriate diagnostic studies, pharmacological and other treatment interventions in collaboration with the responsible primary health care provider. Three credit hours lecture; six credit hours clinical practice (270 clinical practice hours).

NURS 7100  Advanced Psychiatric Care of Pediatric and Geriatric Clients  
CREDIT HOURS  6.0  
PREREQUISITES  Graduate of the Psychiatric NP/CNS Adult Program  
DESCRIPTION  This course focuses on assessment of the child, adolescent, and geriatric psychiatric mental health client. It also focuses on current treatment modalities for each age group. Students will engage in nursing and psychosocial diagnostic decision making in a variety of hypothetical and clinical scenarios. National priorities for mental health care and a critical analysis of the current delivery system will be discussed.

NURS 7120  Theories of Advanced Psychiatric Nursing  
CREDIT HOURS  3.0  
PREREQUISITES  Admission to the PMH program. Pre requisites or co-requisites: NURS 7310, NURS 7320, NURS 7500, NURS 7550, NURS 7900. This course provides concepts critical to the advanced practice of psychiatric nursing. Human responses will be examined using psychodynamic, behavioral, cognitive, humanistic, and other paradigms. Critical analysis of historic psychiatric thought will be done in the context of current research findings and sociocultural trends. Concepts that provide a basis for caring and humanistic approaches to mental health and mental illness will be explored.

NURS 7140  Advanced Psychiatric Care of Individuals  
CREDIT HOURS  6.0  
PREREQUISITES  NURS 7120, NURS 7170  
DESCRIPTION  Pre- or co-requisite: NURS 7120 and NURS 7170. This course focuses on assessment of the adult psychiatric mental health client and current treatment modalities. Students will engage in nursing and psychosocial diagnostic decision making in a variety of hypothetical clinical scenarios. National priorities for mental health care and a critical analysis of the current delivery system will be discussed. One seminar credit hour; 4 clinical credit hours (180 clinical practice hours).
**NURS 7160**  
**Psychiatric Mental Health Nursing of Families and Groups**  
**CREDIT HOURS**  
6.0  
**PREREQUISITES**  
NURS 7000, 7120, 7140, 7170, 7310, 7320, 7340, 7420, 7500, 7550, 7600, 7900  
**COREQUISITES**  
NURS 7190  
**DESCRIPTION**  
This course is designed to provide knowledge of theories related to family and group therapy and opportunity for clinical practice with acquired knowledge. Nursing assessment, interventions and evaluations for family and group therapy will be covered. Students will examine pertinent models of family and group psychotherapy and utilize critical thinking to determine treatment options. Consumer activism, family empowerment, cultural and ethical considerations, research priorities and legislative issues will be discussed. One seminar credit hour; 3 clinical credit hours (140 clinical practice hours).

**NURS 7170**  
**Advanced Psychopharmacology**  
**CREDIT HOURS**  
2.0  
**PREREQUISITES**  
NURS 7000, NURS 7120, NURS 7310, NURS 7320, NURS 7340, NURS 7500, NURS 7600, NURS 7750, NURS 7900  
**COREQUISITES**  
NURS 7140, NURS 7420  
**DESCRIPTION**  
This course is designed to provide the advanced practice health care provider with knowledge of effect of pharmacological agents on the behavioral and central nervous system, the application of these agents in prevention and treatment of psychopathological dysfunction, and developing skills in the use of prescriptive drug protocols for adult populations.

**NURS 7171**  
This course focuses on assessment of psychiatric mental health clients across the adult lifespan  
**CREDIT HOURS**  
6.0  
**DESCRIPTION**  
It also focuses on current treatment modalities including groups. Students will engage in nursing and psychosocial diagnostic decision making in a variety of hypothetical and clinical scenarios. National priorities for mental health care and a critical analysis of the current delivery system will be discussed.
NURS 7172  Advanced Medical and Psychiatric Care for Children

CREDIT HOURS  6.0

PREREQUISITES  Admission to graduate PMHN Program, NURS 7000, NURS 7120, NURS 7140, NURS 7170, NURS 7310, NURS 7320, NURS 7340, NURS 7420, NURS 7500, NURS 7550, NURS 7600, NURS 7900

DESCRIPTION  This course focuses on the integrative (physical and mental health) assessment of the individual child, adolescents, and family group that supports the child. The course will examine national priorities for integrative mental and physical health care and a critical analysis of the current delivery system. The course will provide an overview on health promotion and maintenance of infants, children and adolescents with an emphasis placed on child growth and development and the common acute and recurring problems seen in mental and physical health ambulatory care settings. This course will also focus on the role of the advanced practice nurse in caring for children and adolescents and their family constellations with common health and mental health problems in collaboration with the family including anticipatory guidance and parenting behaviors. Students will engage in nursing and psychosocial diagnostic decision making in a variety of clinical scenarios. Current treatment modalities diagnostic reasoning and management based on patho-physiological findings in the integrative care of children and adolescents will be examined.

NURS 7173  Integrative Management of Complicated Psychiatric Cases

CREDIT HOURS  4.0

PREREQUISITES  NURS7171 and 7172

DESCRIPTION  This course provides the student with the opportunity to explore psychiatric disorders along with complex medical problems while implementing psychiatric-mental health nurse practitioner roles. These various roles will be explored in consultation, education, liaison, administration, and independent practice. The focus is on assessment and intervention with persons with mental illness and complex medical issues. Concepts related to the selected problem are identified and critically appraised. Methodologies to generate evidence will be presented to examine knowledge related to the selected problem and make practice recommendations. Interprofessional collaboration with other health care providers is emphasized.

NURS 7190  Seminar on Complex Cases

CREDIT HOURS  2.0

PREREQUISITES  NURS 7000, NURS 7120, NURS 7140, NURS 7310, NURS 7320, NURS 7340, NURS 7420, NURS 7500, NURS 7550, NURS 7600, NURS 7900

COREQUISITES  NURS 7160

DESCRIPTION  This course offers complex cases involving adults and older adults with medical and mental illness and/or substance abuse. Students will discuss various advanced practice roles within psychiatric nursing, ie. consultation, education, administration, liaison, and independent practice.

Common Health Problems of Adults

**NURS 7340**

**CREDIT HOURS** 5.0 - 10.0

**PREREQUISITES** NURS7310 OR NURS7320 NURS 7500, NURS 7550

**COREQUISITES** NURS7310, NURS 7320

**DESCRIPTION** In this course the student will provide health promotion and maintenance activities for adult clients and their families either through direct intervention or by appropriate referral. The student will assess for and manage common health problems of adult clients across the lifespan in ambulatory health care settings. Nursing assessment and management competencies will include the selection of appropriate diagnostic studies, pharmacological and other treatment interventions in collaboration with the responsible primary health care providers. Content this semester also focuses on nurse practitioner role socialization.

Common Health Problems of Children and Adolescents

**NURS 7342**

**CREDIT HOURS** 6.0

**PREREQUISITES** NURS 7340

**DESCRIPTION** Four hours lecture, 9 hours of clinical/week. This course focuses on the health promotion and health maintenance of infants, children, and adolescents. Theories of growth and development are reviewed. Content in relation to parenting behaviors is included. An emphasis is placed on the assessment and management of common child and adolescent health problems.

Advanced Practicum

**NURS 7360**

**CREDIT HOURS** 4.0

**PREREQUISITES** NURS 7340, NURS 7342, NURS 7080

**DESCRIPTION** Four hours seminar/term, 12 hours of clinical/week. Final course in the primary health care sequence: student is provided the opportunity to integrate and apply theoretical and clinical knowledge acquired in previous courses. The student may select the clinical area in which intensive practice is desired. Clinical skills will be refined and evaluated in collaborative relationships with Nurse Practitioners, Physicians, and other primary health care providers. Four credit hours clinical practice (total 180 clinical practice hours).

Introduction to Trauma

**NURS 7400**

**CREDIT HOURS** 2.0

**PREREQUISITES** Admission to Master's program

**DESCRIPTION** This course will introduce the four major categories of trauma and the traumatic response. The course will be tailored to examine the complete spectrum of trauma: signs and symptoms of the traumatic response; evidence based research regarding recognition, response and treatment of trauma with a holistic paradigm; and the role of early intervention and community tools in both prevention and response to trauma. This course is designed for senior level undergraduate students and master's level students.

NURS 7610 Leadership & Organizational Behavior in Healthcare Systems

CREDIT HOURS 3.0

PREREQUISITES Admission to Master's Program or permission of the instructor

DESCRIPTION Leadership is a core concept in managing innovation. Leadership theory and the role of a leader in nursing and healthcare organizations are the key topics of this course. In addition, this course includes an introduction to organizational structures, theory, and practice.

NURS 7620 Leadership in Promoting Innovations in Nursing and Health Care Systems

CREDIT HOURS 3.0

PREREQUISITES NURS 7610

DESCRIPTION Leadership for innovation and change is a primary focus for this advanced nursing master's degree. This course builds on the previous leadership and organizational course with an additional emphasis on change theory and competencies useful to implement change. Content related to operational and strategic planning, development of objectives, proposal development and grant writing will be explored. The course will also focus on exploration of new ideals.

NURS 7630 Healthcare Policy, Healthcare Law & Medical Ethics

CREDIT HOURS 3.0

PREREQUISITES Pre- or co-requisites: NURS 7610; HA 8160

DESCRIPTION Policy affects the delivery of health care services. This course focuses on the development of public policy and factors that affect change in policy. Also, the role of professional organizations in the development of standards of practice that guide the provision of nursing services is analyzed. The basics of health care law will be included. Medical ethics as they relate to informatics, use of new technology and administrative issues will be addressed.

NURS 7660 Health Care Technology and Clinical Informatics

CREDIT HOURS 3.0

DESCRIPTION Admission to the master's program in the School of Nursing. Innovations in technology and informatics are changing the delivery of health care services. Nurse leaders must be prepared to evaluate the effectiveness of these innovations. This course includes an introduction to medical technology and clinical informatics assessment. The basic knowledge and competencies that describe the field of health care informatics are discussed. In addition, strategies to evaluate new technologies in health care will be addressed.

NURS 7670 Research Methods and Designs for Measuring Quality & Effectiveness

CREDIT HOURS 3.0

PREREQUISITES NURS 7610

DESCRIPTION Students will be introduced to a variety of research designs and appropriate statistical methods to analyze data within those designs. An emphasis will be placed on research competencies necessary to design and evaluate proposals for innovation in the delivery of health care services. Principles of evidence based practice and evaluation research will be explored and their application to the area of health care innovations will be discussed.

</table>
NURS 7955 Pathophysiology and Pharmacology for the Acute Care Nurse Practitioner Across the Lifespan

CREDIT HOURS 2.0

PREREQUISITES Pathophysiology and pharmacology courses from a previous Master's program

DESCRIPTION Admission to the Post-Master's Certificate program in the School of Nursing. This course is designed to facilitate the student’s understanding of pathophysiologic concepts and enhance knowledge of pharmacological agents used in the treatments of adults, adolescents and young children in acute care settings. Emphasis is placed on physiological and pathophysiologic phenomena and pharmacological treatment of disorders found in the acute care setting.

NURS 7956 Assessment, Diagnostics, and Procedures for the Acute Care Nurse Practitioner Across the Lifespan

CREDIT HOURS 2.0

PREREQUISITES Advanced health assessment course from previous Master's program

DESCRIPTION Admission to the Post-Master’s Certificate Program in the School of Nursing. This course is designed to advance the acute care nurse practitioner’s knowledge and understanding of concepts and skills of advanced health assessment of clients found in acute care settings.

NURS 7959 Adult Gerontology Acute Care Nurse Practitioner I

CREDIT HOURS 6.0

PREREQUISITES NURS 7955, NURS 7956, NURS 7500

DESCRIPTION In this course the student will provide advanced assessment and clinical decision making activities in the management of adult and gerontological clients and their families, either through direct intervention or by appropriate referral. The student will assess for and manage mild to moderately complex health problems of adult clients in acute care settings. Nursing assessment and management competencies will include the evidence based selection of appropriate diagnostic studies, pharmacological, and other treatment interventions in collaboration with the responsible acute care providers. Content this semester will also focus on interprofessional collaboration.

NURS 7960 Adult-Gerontology Acute Care Nurse Practitioner II

CREDIT HOURS 7.0

PREREQUISITES NURS 7955, NURS 7956, NURS 7500, NURS 7959

DESCRIPTION Final course in the Adult-Gerontology Acute Care management sequence. In this course the student will provide advanced assessment and clinical decision making activities in the management of adult and gerontological clients and their families either through direct intervention or by appropriate referral. The student will assess for and manage emergent or highly complex health problems of adult clients in the acute care settings. Students may select specialty area of practice to focus clinical skills. Nursing assessment and management competencies will include the evidence based selection of appropriate diagnostic studies pharmacological and other treatment interventions in collaboration with the responsible acute care providers. Content this semester also focuses on Interprofessional collaboration and the refinement of clinical skills.
NURS 7980  Research Practicum Directed research in collaboration with a faculty member
CREDIT HOURS  3.0
DESCRIPTION  For graduate assistants. Does not count toward degree requirements.

NURS 8000  Global Health: Clinical and Community Care
CREDIT HOURS  3.0
DESCRIPTION  Prerequisites: Entrance to graduate level professional program. This course provides a historical, cultural and sociopolitical perspective of health and health care in Central America. Students will increase their knowledge of different cultures, health care and differing health care systems. Within this context, students will focus on individuals’ health, the health of the communities in which they live, and how the health of the community impacts the health of the individual. Students will apply evidence-based nursing practice to the goal of improving health at the individual and population levels through an emphasis on health promotion, disease prevention and health education. Under faculty supervision, students develop and refine clinical practice. Successful completion of this course serves as a prerequisite for the study abroad trip to Nicaragua.

NURS 8001  Epidemiology for Health Professionals
CREDIT HOURS  3.0
PREREQUISITES  Admitted to Graduate Nursing Program
DESCRIPTION  Epidemiology for Health Professionals is a core course in the Nursing PhD program. The course is designed to introduce students to the concepts of epidemiological methods and their practical applications in the understanding of determinants and distributions of health related events. The course will cover basic principles of epidemiology, including disease control, surveillance, screening, study design, risk estimation, bias and causation. The course will demonstrate the multidisciplinary environment and ecological approach to the understanding of disease etiology and prevention. Additionally, this course will explore the interface between epidemiology and policy development. Web-based learning will be used in this course.

NURS 8012  Qualitative Research Methods
CREDIT HOURS  3.0
PREREQUISITES  NURS 8045
DESCRIPTION  This course is designed to enable the student to examine the epistemology underlying various qualitative approaches and to gain beginning skills in one qualitative research approach. Course activities are designed to provide students with experiences in data generation, data analysis methods, critique and report generation. Each student will participate in knowledge generation from a qualitative perspective.
NURS 8035  Theoretical and Philosophical Foundations for Nursing
CREDIT HOURS  3.0
PREREQUISITES  Permission of the instructor
DESCRIPTION  This course is designed to serve as a basis for doctoral study in nursing. Selected issues and approaches related to philosophy, theory, science, research and practice will be explored. Models for evaluation of theory will be considered and used in analyzing theoretical frameworks, which have been constructed by nurse scholars and others.

NURS 8040  Theory Construction
CREDIT HOURS  3.0
PREREQUISITES  NURS 8035
DESCRIPTION  This course is designed to develop the student's ability to construct and utilize theory to guide research. Different approaches to the use of theory in quantitative and qualitative research will be examined.

NURS 8045  Introduction to Advanced Nursing Research
CREDIT HOURS  3.0
PREREQUISITES  Admission to the doctoral program
DESCRIPTION  This course is the introductory course for advanced nursing research. Quantitative and qualitative approaches to nursing research are included. An overview of research designs, ethical parameters, methods, and data analysis techniques are discussed. Students identify an area of study, describe the problem, construct a purpose statement, and develop an annotated bibliography for the area. This course will include experiences for students to develop knowledge and skills related to the support, analysis, and dissemination of research.

NURS 8050  Quantitative Research Methods I
CREDIT HOURS  3.0
PREREQUISITES  NURS 8045 and NURS 8040
COREQUISITIRES  NURS 8120 with permission of instructor
DESCRIPTION  The first course in a two course sequence focuses on the application of basic quantitative research designs to nursing research. The advantages and limitations of quantitative methodologies will be presented including usefulness for knowledge development in nursing. Emphasis is on descriptive, correlational, and comparative designs and their application. Students will begin development of a quantitative research proposal based on guidelines of a selected funding agency.

NURS 8051  Quantitative Research Methods II
CREDIT HOURS  3.0
PREREQUISITES  NURS 8050
COREQUISITIRES  NURS 8140 with permission of instructor
DESCRIPTION  This second course in a two course sequence focuses on the application of diverse quantitative research designs in nursing research, including experimental, multivariate, and meta-analytic. Instrument selection and development will also be addressed. Course activities will provide students with experiences in quantitative data generation and analysis, and in further development of a quantitative research proposal.

NURS 8060  Directed Reading
CREDIT HOURS  1.0 - 3.0
PREREQUISITES  Permission of instructor
DESCRIPTION  Individual readings on special topics in nursing and related areas under guidance of a faculty member.
**NURS 8070  Comprehensive Examination**

**CREDIT HOURS** 3.0  
**PREREQUISITES** Permission of adviser  
**DESCRIPTION** The comprehensive examination is required for progression to doctoral candidacy. The purpose of the comprehensive examination is to ascertain the student's readiness to conduct the dissertation. The comprehensive examination should address the dissertation topic area, anticipated research methodologies, and related theoretical perspectives. Students register for this course at each attempt to complete the comprehensive examination. Maximum of two attempts are allowed.

**NURS 8100  Health in Vulnerable Populations**

**CREDIT HOURS** 3.0  
**PREREQUISITES** Admission to PhD program and PH 8001  
**DESCRIPTION** This course focuses on vulnerable populations from the perspective of health. Selected issues in the conduct of research with vulnerable populations will be discussed. Strategies to foster health promotion, health protection and health restoration will be explored. Students will select a vulnerable population and conduct a critical analysis of the science in a specific topic area.

**NURS 8120  Univariate Statistics**

**CREDIT HOURS** 3.0  
**PREREQUISITES** NURS 8120  
**DESCRIPTION** This course focuses on application of univariate statistical analysis methods to answer research questions and test hypotheses about clinical research data. The course includes addressing threats to statistical conclusion validity, determining the level of measurement of study variables and how this influences the choice of statistical tests, formulating an analysis plan based on research questions/hypotheses, and conducting and interpreting the output of statistical analysis. Analyzing actual clinical data using SPSS statistical software is emphasized including alternative analytic approaches such as data transformation, if the data do not meet statistical assumptions.

**NURS 8130  Introduction to GSU Institutional Review Board for Doctoral Students in Nursing**

**CREDIT HOURS** 3.0  
**PREREQUISITES** CITI Training completion, admission to the PhD or DNP program or permission of the Instructor  
**DESCRIPTION** This elective online course is designed to educate doctoral students on the process of obtaining approval from Georgia State University’s Institutional Review Board. Course content will focus on research primarily done in nursing. Students will learn about ethical conduct in human subjects research, the application management system (IRIS), components of the application, PI responsibilities, Student Investigator responsibilities, HIPPA, informed consent, communicating with the IRB, submitting a study, timelines, different types of review, data security, what to expect during review, post approval and study closeout procedures.
NURS 8140  Multivariate Statistics
CREDIT HOURS  3.0
PREREQUISITES  NURS 8120; Admission to the PhD or DNP program or Permission of the Instructor
DESCRIPTION  The second of a two course sequence in applied statistical analysis, focuses on the application of multivariate statistical analysis methods to answer research questions and test hypotheses about clinical research data. Multivariate statistical approaches in both analysis of variance and linear regression frameworks are presented. In addition, the course addresses complex analytic situations including analysis of change, repeated measures, and multiple correlated dependent variables. Special topics are also covered including meta analysis, power analysis for multivariate hypotheses and necessary components of data analysis sections of grant proposals. Analyzing actual clinical data using SPSS statistical software is emphasized including alternative analytic approaches such as data transformations, if the data do not meet statistical assumptions.

NURS 8150  Statistics for Healthcare Professionals
CREDIT HOURS  3.0
PREREQUISITES  Admission to the MSN, PhD or DNP program or permission of the Instructor
DESCRIPTION  This online course is designed to provide an understanding of fundamental statistical principles that can be applied to health research in a variety of practice settings. Students will interpret published statistical findings, select and apply appropriate statistical methods to health-related research problems using SPSS software and critique statistical methods utilized in health research. Topics covered include: hypothesis testing, types of variables, measures of central tendency, measures of dispersion, bivariate analyses, and group comparisons (parametric and non-parametric).

NURS 8160  Introduction to Health Systems
Prerequisite: Master’s degree in nursing
CREDIT HOURS  3.0
DESCRIPTION  Introduction to Health Systems will build upon students understanding of health care systems and delivery in the United States. This will be accomplished through a focused study of measurement and determinants of individual and population based health. A comparison will be made of other health systems components and interdependence and an evaluation of other health systems performance and outcomes with that of the U.S.

NURS 8200  Special Topics in Nursing and Health I
CREDIT HOURS  3.0
PREREQUISITES  Permission of the instructor
DESCRIPTION  This course is designed to provide an in-depth knowledge and critique of research and theory related to specific topics of significance to nursing and related disciplines. Topics will vary each term.

NURS 8205  Perspective on Leadership, Research, Ethics and Policy
CREDIT HOURS  3.0
PREREQUISITES  Admission to the PhD program or permission of the instructor
DESCRIPTION  This course presents perspectives on ethics, policy, and leadership as they relate to research. Scientific and professional ethics will be examined from the research perspective. The influence of ethics and research findings in the development of policy will be explored. The influence of leadership, ethics, and research on health policy and the delivery of health care services will be explored.
NURS 8230  Phenomenological Inquiry  
CREDIT HOURS 3.0  
PREREQUISITES NURS 8012 or permission of the instructor  
DESCRIPTION The focus of this course is to introduce the concept of phenomenological inquiry and to analyze its applications of its use in selected disciplines. The work of Husserl, Heidegger, Sartre and Merleau-Ponty will be used to develop an understanding of the historical underpinnings of the phenomenological movement. Implications of knowledge development will be examined.

NURS 8240  Advanced Data Management Using SPSS  
CREDIT HOURS 3.0  
PREREQUISITES NURS 8045  
DESCRIPTION This course focuses on the use of SPSS for managing research data. The course assumes a working knowledge of basic data management skills in SPSS including establishing and modifying the data dictionary using the SPSS data editor, and working with data output files. The course will focus on importing and exporting data into and out of SPSS and using commands within the syntax window to create programming language to code questionnaires, address missing data issues, and conduct major analyses.

NURS 8250  Writing for Publication  
CREDIT HOURS 1.0  
DESCRIPTION This course presents a process for developing one’s scholarship through dissemination of knowledge through publication. Pragmatic approaches of the processes involved in developing a manuscript for submission for publication in an academic venue will be addressed. The focus will be on the entire process of publishing from formation of ideas to the final closing phases for a published article. Writing both clinical and research manuscripts will be addressed. Students will have the opportunity to develop their own manuscript for submission.

NURS 8300  Doctoral Seminar I  
CREDIT HOURS 1.0  
PREREQUISITES Permission of instructor  
DESCRIPTION This course is designed to socialize the student into the role of researcher and scholar.

NURS 8301  Doctoral Seminar II  
CREDIT HOURS 1.0  
PREREQUISITES Permission of instructor  
DESCRIPTION This course is designed to socialize the student into the role of researcher and scholar.

NURS 8330  Mental Health and Aging  
CREDIT HOURS 3.0  
DESCRIPTION This is an interdisciplinary course addressing mental health issues in older adults with specific emphasis on depression in late life. Theories about mental health and aging, prevalence of mental health problems as well as assessment and treatment options will be discussed. Broader issues such as stigma associated with mental health and aging and mental health services will be explored. Students will begin to understand mental health issues, including depression in older adults and the economic quality of life impact of this health problem.

NURS 8550  Basics of Financial Management in Health Care Organizations  
CREDIT HOURS 3.0  
PREREQUISITES Master’s degree in nursing  
DESCRIPTION This course focuses on application of finance principles and concepts to healthcare organizations. It will provide tools to promote fiscal accountability.
NURS 8610  Advanced Leadership and Organizational Behavior  
Prerequisite- Admitted to Graduate Nursing Program  
CREDIT HOURS 3.0  
DESCRIPTION Organizations are the key topics of this course. In addition, this course includes an introduction to organizational structures, theory, and practice. Major content of this course is leadership theory and role of the nursing leader.

NURS 8620  Advanced Health Care Technologies  
Prerequisite: Must be a registered nurse (RN) This course provides the DNP student with essential content to allow them to be an active user, consumer and driver of current patient care health information technology  
CREDIT HOURS 3.0

NURS 8670  Evidence Based Practice  
PREREQUISITES Must be a Registered Nurse (RN)  
CREDIT HOURS 3.0  
DESCRIPTION This course provides the DNP student with an overview of evidence based management, organizational behavior and change theories applied to health care. The role of the DNP graduate as an effective system leader of interprofessional care teams will be examined.

NURS 8675  Health & Law Vulnerable Populations & Disparities  
The role of professional organizations in the development of standards of practice that guide the provision of nursing services is analyzed  
CREDIT HOURS 3.0  
DESCRIPTION The basics of health care law will be included. Medical ethics as they relate to informatics, use of new technology and administrative issues will be addressed. Additional content pertaining to health related disparities will be included. Selected issues in the conduct of research with vulnerable populations will be discussed. Strategies to foster health promotion, health protection and health restoration will be explored.

NURS 8700  Scholarly Writing  
PREREQUISITES Must be a registered nurse (RN)  
CREDIT HOURS 2.0  
DESCRIPTION This course is designed to provide learners with an opportunity to disseminate knowledge through scholarly writing. The focus will be on generating ideas, manuscript development, and the publishing process. Topics will include ethics in writing style and grammar, and manuscript organization and editing.

NURS 8990  Research Practicum  
PREREQUISITES Permission of instructor  
CREDIT HOURS 1.0 - 6.0  
DESCRIPTION This course provides students the opportunity to participate in the research process with a faculty member who is actively engaged in research.
NURS 8992  DNP Project Development Transition  
CREDIT HOURS  2.0  
PREREQUISITES  Must be a Registered Nurse (RN)  
DESCRIPTION  
This course will introduce the student to the role of the Doctor of Nursing Practice. The student will explore the role using the essentials of DNP education and its application to their own role as a clinical scholar. Use of informatics, technology, scholarship, and evidence based nursing will be required. The requirements for the DNP scholarly project will be examined and discussed in relation to various advanced practice nursing roles. The student will choose an area for scholarship immersion, identify a topic for their scholarly project, and begin to design their professional portfolio.

NURS 8994  DNP Project Planning  
CREDIT HOURS  2.0  
DESCRIPTION  Must be a Registered Nurse (RN). This course is the second course in the Doctor of Nursing Practice (DNP) practicum experience. In this course the student will have opportunities for directed practice experiences with mentors in the chosen area of specialization. Students will gain knowledge planning their scholarly projects and building their knowledge base and skills at a higher level of complexity. In this course the student with the assistance of faculty will design and plan the DNP project.

NURS 8996  DNP Implementation  
CREDIT HOURS  3.0  
PREREQUISITES  NURS 8670, NURS 8700, NURS 8992, NURS 8160, NURS 8550, NURS 8994, NURS 8001, NURS 8620  
DESCRIPTION  
This course is the third course in the Doctor of Nursing Practice (DNP) practicum experience. In this course the student will have opportunities for directed practice experiences with mentors in the chosen area of specialization. In this course the student with the assistance of faculty will implement the DNP scholarly project.

NURS 8998  DNP Project Dissemination  
PREREQUISITES: NURS 8670, NURS 8700, NURS 8992, NURS 8160, NURS 8550, NURS 8994, NURS 8001, NURS 8620, NURS 8996 and NURS 8610  
CREDIT HOURS  3.0  
DESCRIPTION  
This course is the fourth course in the Doctor of Nursing Practice (DNP) practicum experience. In this course the student will have opportunities for directed practice experiences with mentors in the chosen area of specialization. In this course the student with the assistance of faculty will demonstrate the synthesis of the student's experience, coursework, and clinical practice application. Dissemination of the findings of the DNP scholarly project will occur.
### NURS 9000 Nursing Dissertation Proposal

- **Credit Hours:** 3.0
- **Prerequisites:** Completion of 45 hours of core coursework applicable to the PhD degree, and a GPA of 3.0 or higher
- **Description:** The purpose of the Dissertation Proposal course is for students to develop and orally defend their written dissertation proposal. This will serve to ascertain the student’s ability to synthesize the knowledge accumulated in the doctoral program and communicate that knowledge in writing. Successful defense of the dissertation proposal is an indicator of the student’s preparation of and readiness to implement a rigorous scientific research plan. If the dissertation proposal is not successfully defended in one semester, the student will register for NURS 9000 for the next semester.

### NURS 9200 Nurse as Educator: Instructional Methods

- **Credit Hours:** 3.0
- **Prerequisites:** Entrance to Nursing graduate level professional programs
- **Description:** This course offers an overview of the role of nurse as educator and will focus on the variety of instructional methods employed by nurse educators to facilitate learning in the adult within a variety of settings. Distance learning and use of information technology in the educator role will also be explored.

### NURS 9210 Nurse as Educator: Assessment and Evaluation

- **Credit Hours:** 3.0
- **Prerequisites:** Entrance to Nursing graduate level professional programs
- **Description:** This course will focus on the variety of assessment strategies employed by nurse educators to evaluate learning in the adult in a variety of settings. Curriculum development and program evaluation will also be explored.

### NURS 9220 Practical Application of the Role as Nurse Educator

- **Credit Hours:** 3.0
- **Prerequisites:** NURS 9200 or NURS 9210
- **Description:** This course offers practical application of the skills and knowledge needed for the advanced specialty role of the nurse educator.

### NURS 9990 Doctoral Dissertation

- **Credit Hours:** 3.0 - 9.0
- **Prerequisites:** Successful completion of dissertation proposal
- **Description:** After other course work is completed, student must register for a minimum of 3 hours of credit continuously until dissertation is completed.

NUTR 6012  Orientation to Practice II  
**CREDIT HOURS** 1.0  
**PREREQUISITES** Permission of the instructor  
**DESCRIPTION** The skills development seminars include presentations in a variety of practice areas, including cardiology, diabetes, eating disorders, dysphagia, genetics, obesity, and include 60 practice hours for the simulations completed as a part of the skills development session. The presentations add depth to previous medical nutrition therapy coursework and include presentations by content experts from a variety of professions, and the simulations allow students to practice what they have learned.

NUTR 6100  Scientific Principles of Nutrition  
**CREDIT HOURS** 3.0  
**PREREQUISITES** BIOL 2107K & BIOL 2108K or consent of instructor  
**DESCRIPTION** The course is designed to provide graduate students who are not nutrition majors with an understanding of macro- and micronutrient metabolism and the scientific basis of nutrient requirements. The course will also focus on nutrient associations with disease and applying scientific nutrition principles to contemporary nutrition issues. This course serves as a prerequisite for subsequent graduate nutrition courses.

NUTR 6101  Nutrition Research Methods  
**CREDIT HOURS** 3.0  
**PREREQUISITES** SNHP 6000 or consent of the instructor  
**DESCRIPTION** This course provides students with an understanding of research designs/methodologies and statistical procedures commonly used in nutrition research. Students have hands-on experience in critiquing literature, using SPSS to analyze and interpret data, acquiring reference manager skills, and improving biomedical research writing skills.

NUTR 6102  Nutrition Intervention  
**CREDIT HOURS** 3.0  
**PREREQUISITES** SNHP 6000 or consent of the instructor  
**DESCRIPTION** This course enables students to critically examine multiple nutrition intervention strategies used primarily in community settings. Emphasis is placed on systematic analysis of nutrition-related health problems and interventions designed to address them. Students design a future-oriented nutrition intervention that includes nutrition education materials for a selected target group. Methods and media are emphasized to assist the student in the development of oral and written skills in the communication of nutrition principles for individual, group, and mass education.

NUTR 6103  Nutritional Epidemiology  
**CREDIT HOURS** 3.0  
**PREREQUISITES** SNHP 6000, NUTR 6101, or consent of instructor  
**DESCRIPTION** This course is designed for the graduate students who are interested in gaining an in-depth understanding of population based studies relating diet and nutrition to disease and health. The objectives of this course are to learn different methodologies used in conducting nutritionally-related epidemiological studies using current literature, to interpret the findings from these studies, and to apply the knowledge gained from the current literature in doing nutrition research projects. This course will emphasize the methodological issues as they relate to design, diet and nutrition assessment, and data analysis of population-based studies on diet and disease.

NUTR 6300 Nutrition Counseling Skills

CREDIT HOURS: 3.0

PREREQUISITES: Current student in good standing in the Master of Science in Health Science, Nutrition

DESCRIPTION: This course focuses on the application of a helping model and interviewing and counseling skills to help clients achieve and maintain dietary behavior change. The course includes practicing effective interpersonal relationship skills and the implementation of different nutrition counseling theories and strategies. Role play and mock counseling sessions will engage students to effectively communicate in both in-patient and out-patient settings, in working with difficult patients and with patients living in environments leading to non-compliance. The course will also encourage communication skills that foster collaboration with other health care professionals/team and the ability to help triage patients appropriately into expanded care/programs/classes. While practicing a variety of nutrition counseling strategies, the student will become more aware and comfortable with effective communication as a dietetics professional, in recognizing barriers to dietary change in a variety of settings, and in implementing a holistic approach to improved health.

NUTR 6350 Global Public Health Nutrition

CREDIT HOURS: 3.0

PREREQUISITES: NUTR 2100

DESCRIPTION: This course provides a foundation for understanding current global public health nutrition issues. This course will cover common global public health nutrition issues, reasons these public health nutrition issues exist, and interventions to address the nutrition issue, including nutrition and food policies.

NUTR 6500 Macronutrients

CREDIT HOURS: 3.0

PREREQUISITES: None for students accepted into the M.S. in Health Sciences concentration in Nutrition Program

DESCRIPTION: Course covers to the digestion, absorption, biochemical functions, and metabolism of carbohydrates, lipids, and protein. Emphasis is placed on the role of macronutrients in human nutrition.

NUTR 6700 Micronutrients

CREDIT HOURS: 3.0

PREREQUISITES: None for students accepted into the M.S. in Health Sciences concentration in Nutrition Program

DESCRIPTION: This course covers the digestion, absorption, biochemical functions, and metabolism of vitamins, minerals, and trace elements. Emphasis is placed on the role of micronutrients in human nutrition.

NUTR 6800 International Nutrition

CREDIT HOURS: 3.0

PREREQUISITES: Permission of Instructor

DESCRIPTION: The course will provide the student with the opportunity to understand major issues in international nutrition that influence health, survival, and development capacity of people living in developing societies and various approaches to improving nutritional well-being of those populations.

<td>3.0</td>
<td>NUTR 7200 or consent of the instructor</td>
<td>The role of nutrition is examined in adolescent and adult pregnancy, lactation, infancy, and childhood. Nutrition aspects of family planning, complications of pregnancy, management of low birth weight infants, and special feeding problems and practices of infancy and childhood are included.</td>
</tr>
</tbody>
</table>
NUTR 7105  Geriatric Nutrition
CREDIT HOURS 3.0
PREREQUISITES Graduate student in the Byrdine F Lewis College of Nursing and Health Professions or consent of instructor. A systems approach is used to discuss macro-nutrient requirements in human aging. Topics covered include nutrition assessment, nutrition in chronic disease management, health promotion and disease prevention, food intake patterns, and federal and state nutrition services for older adults.

NUTR 7106  Advanced Sports Nutrition
CREDIT HOURS 3.0
PREREQUISITES NUTR 6104 or consent of the instructor
DESCRIPTION This course focuses on the relationships between nutrition, strength, endurance and physical performance with an emphasis on nutrient utilization during exercise. Practical considerations for the nutrition assessment of athletes are discussed.

NUTR 7107  Advanced Clinical Nutrition
CREDIT HOURS 3.0
PREREQUISITES NUTR 6104
DESCRIPTION A large segment of the course is devoted to review of journal articles dealing with the most recent information on the significance and management of selected disease states.

NUTR 7108  Nutrition Assessment
CREDIT HOURS 3.0
PREREQUISITES NUTR 6104 or consent of the instructor
DESCRIPTION This course covers the indirect and direct methods used in the assessment of nutrition status. Both traditional and new methods of assessment are discussed, including anthropometric techniques, nutrition history screens, soft tissue assessment, biochemical assessment, dietary survey techniques, and demographic assessment.

NUTR 7109  Body Composition Assessment
CREDIT HOURS 3.0
PREREQUISITES Graduate student in the Byrdine F Lewis School of Nursing and Health Professions or consent of instructor.
DESCRIPTION Assessment of body weight, body dimensions, and body composition is of considerable interest to those working in the health professions, as the information derived from these assessments is associated with health risks. In addition, the health professional’s ability to accurately plot changes in body composition over time is important for determining whether the patient/client is changing in a way that reduces or increases health risk. There are numerous strategies for assessing body dimensions and composition, ranging from weight/height growth charts used with children, to skinfolds, and to more sophisticated analysis techniques that involve bioelectrical impedance and dual-energy x-ray absorptiometry. This course will review both the historical and new methods available to health professionals for the assessment of body dimensions and body composition, with special emphasis on the strengths and weaknesses of each technique and how these techniques may be appropriately used with the client/patient.

NUTR 7200  Nutrition and Disease
CREDIT HOURS 3.0
PREREQUISITES NUTR 3500/6500 and NUTR 3700/6700 or equivalent and consent of instructor
DESCRIPTION This course introduces students to the role of nutrition in the prevention and management of diseases and conditions related to the gastrointestinal tract, cardiovascular system, the renal system, and pulmonary function. Anemias, metabolic disorders, inflammation, immunological disorders, and osteoporosis are also reviewed.
NUTR 7250 Medical Nutrition Therapy Laboratory

CREDIT HOURS 2.0

PREREQUISITES None for students accepted into the Coordinated Program (without a verification statement)

DESCRIPTION This course introduces students to medical nutrition therapy through evidence based practice. Medical nutrition therapy for the prevention and treatment of the following conditions is covered: gastrointestinal, liver, gallbladder, pancreas, renal trauma, pulmonary and special feeding techniques. For each condition, nutrition assessment and food and nutrient interactions with commonly prescribed medications are discussed, as well as complementary and alternative therapies.

NUTR 7280 Nutritional Genomics

PREREQUISITES: NUTR 3500 and NUTR 3700 Course covers how nutrients affect gene expression, how nutrients and genes interact, how nutrients affect the process of select diseases, and epigenomics (alteration of gene expression without genetic change)

CREDIT HOURS 3.0

DESCRIPTION

NUTR 7500 Comprehensive Examination

CREDIT HOURS 3.0

DESCRIPTION Prerequisites- Admission to Graduate Program. This course is one of the non-thesis capstone options offered in the Department of Nutrition. The comprehensive examination will consist of essay questions taken from a pool of essay questions from each of the Health Sciences Core and Specialization Curriculum courses. The course will be taken in the semester of graduation.

NUTR 7810 Interpretation of Clinical Laboratory Values for Health Professionals

CREDIT HOURS 3.0

PREREQUISITES CHEM 1151K, CHEM 1152K, AND EITHER human physiology OR biochemistry

DESCRIPTION The course will provide the student with the opportunity to understand the interrelationships between clinical laboratory test results and the disease process occurring in the patient. Laboratory values from hematology, clinical chemistry and urinalysis, and microbiology/immunology will be interpreted for infectious diseases, liver diseases, kidney diseases, hematologic disorders, and metabolic disorders. Appropriate case studies will be used to illustrate clinical significance.

NUTR 7899 Nutrition Project

CREDIT HOURS 1.0 - 3.0

PREREQUISITES Consent of instructor

DESCRIPTION This course includes supervised independent study in an area of special interest to the student.

NUTR 7900 Special Problems in Nutrition and Dietetics

CREDIT HOURS 1.0 - 6.0

PREREQUISITES NUTR 6104 and consent of the instructor

DESCRIPTION Individual study of a selected topic under the direction of a faculty member.

NUTR 7940 Special Problems in Pediatric Nutrition

CREDIT HOURS 3.0

PREREQUISITES NUTR 7104 and consent of the instructor

DESCRIPTION Individual study of a selected pediatric nutrition topic under the direction of a faculty member.

1.0 - 12.0

**DESCRIPTION**  
Prerequisites: Doctoral student in the Department of Chemistry concentration in Nutritional Sciences program or consent of instructor. This course is designed to provide doctoral students the opportunity to conduct research in nutrition, food science or laboratory science under the direction of an approved faculty advisor before doctoral candidacy.
OT OCCUPATIONAL THERAPY

OT 5500  Human Gross Anatomy for Occupational Therapy

CREDIT HOURS  4.0
COREQUISITES  Anatomy and Physiology 1 & 2 / SNHP 5501 Gross Anatomy Lab

DESCRIPTION  This course of Human Gross Anatomy is designed to provide occupational therapy students a fundamental knowledge of human anatomy. An emphasis will be placed on the musculo-skeletal, peripheral nervous systems, and cardiovascular systems to enhance the understanding of clinical conditions that will likely be encountered in the practice of occupational therapy.

OT 5501  Human Gross Anatomy for Occupational Therapy Laboratory

CREDIT HOURS  2.0
COREQUISITES  Anatomy and Physiology 1 & 2 / SNHP 5500 Human Gross Anatomy Lecture

DESCRIPTION  This lab component of Human Gross Anatomy is designed to provide occupational therapy students with hands-on experience with cadaver dissection to gain in-depth knowledge of human anatomy. An emphasis will be placed on the musculo-skeletal, peripheral nervous systems, and cardiovascular systems to enhance the understanding of clinical conditions that will likely be encountered in the practice of occupational therapy.

OT 5600  Medical Conditions across the Lifespan

CREDIT HOURS  4.0
PREREQUISITES  Admission into the occupational Therapy Program

DESCRIPTION  This course is a survey course to introduce the student to a variety of medical conditions that are frequently encountered in various settings in which occupational therapists may practice. The course will consist of lectures, discussions, and case work related to the etiology, pathology, symptomatology, and medical/surgical management of selected medical conditions which affects an individual’s ability to participate in occupational endeavors. The student will begin to develop skills in acquiring and utilizing appropriate resources that will be added to over the next 2 years in the program.

OT 6100  Analysis and Adaptation of Occupation

CREDIT HOURS  3.0
PREREQUISITES  Admission to the OTM Program

DESCRIPTION  This first semester course provides the students with an understanding of the historical foundation of the profession of occupational therapy, focusing on philosophical assumptions, and core concepts of the profession. This course is designed to introduce students to the Occupational Therapy process and introduces The Occupational Therapy Practice Framework: Domain & Process (OTPF) 3rd edition (AOTA, 2014), an official document for the profession. Through interactive teaching, peer instruction and participatory activities, students investigate the complexities of occupation as the foundation of the practice of occupational therapy and develop an understanding of occupation, activity analysis, evaluation of ADLs/IADL and professional documentation.
OT 6101 Analysis and Adaptation of Occupation Lab
CREDIT HOURS 1.0
PREREQUISITES Admission to the OTM Program
COREQUISITES SNHP 6100- Analysis and Adaptation of Occupation
DESCRIPTION This first semester lab course accompanies SNHP 6100 Lecture course and provides the students with an opportunity for interactive, dynamic, hands on activities to develop an understanding of occupation, activity analysis, evaluation of ADLs/IADL and professional documentation. Addresses ACOTE Standards: B1.2, B2.1, B2.2, B.2.3, B2.7, B4.4, B4.10.

OT 6110 Social and Cultural Determinants of Health and Occupation across the Life Span
CREDIT HOURS 2.0
PREREQUISITES Admission to the OTM Program
DESCRIPTION This course examines current theory and research related to the development of human occupation and how it changes throughout the life course. This course also focuses on effects of occupations on health and how societal and cultural determinants influence an individual's quality of life throughout the life span. Through interactive teaching, peer instruction and participatory activities, students will observe, interpret, and describe occupational performance, and apply relevant theories and constructs to understand the development of human occupation.

OT 6120 Functional Movement Across the Lifespan Analysis and Assessment Lecture
CREDIT HOURS 3.0
PREREQUISITES Admission to the OTM Program
COREQUISITES OT 6121
DESCRIPTION In this lecture course, students will develop an understanding of clinical human anatomy and biomechanical principles underlying human movement and their application to occupational performance and how it changes across the lifespan. Students will perform detailed regional analyses of the upper and lower extremities and the trunk.

OT 6121 Functional Movement Across the Lifespan Analysis and Assessment Lab
CREDIT HOURS 1.0
PREREQUISITES Admission to the OTM Program
COREQUISITES OT 6120
DESCRIPTION This lab course accompanies OT 6120 and provides the student with an opportunity for interactive, dynamic, hands on activities to develop an understanding of functional human movement, how movement affects occupational performance, and how it changes across the lifespan. Students will perform detailed regional analyses of the upper and lower extremities and the trunk. Assessment procedures such as palpation, muscle strength testing, range of motion, and flexibility testing will be learned in order to understand their relationships to a person's engagement in occupation.

<tr>
<td>OT 6130</td>
<td>Evidence Based Practice and Clinical Research I</td>
<td>2.0</td>
<td>Admission to the OTM Program</td>
<td>This course is designed to inform students regarding the role and creation of evidence-based practice in occupational therapy. The course covers study designs, basic statistics, measurements, and strategies related to evidence-based practice. The goal of the course is to support students in the development of critical reading and analytical thinking and writing skills with particular relevance to understanding human occupation and the practice of occupational therapy through scientific inquiry. This course is the first in the sequence leading to the development of a proposal and completion of a research project later in the Master Project courses. A variety of teach / learning methods including cooperative learning, mini-lectures, experiential learning and interactive reflection and feedback will be used.</td>
</tr>
<tr>
<td>OT 6140</td>
<td>Clinical Skills for Occupation Based Practice Seminar I</td>
<td>2.0</td>
<td>Admission to the OTM Program</td>
<td>This course is the first occupation based practice seminar in a four seminar sequence and is an essential element to the first Level 1 Fieldwork experience as it facilitates the integration of information from the didactic component of the OT program to the practical clinical applications in the natural environment with seasoned professionals. The student will participate in approximately 40 hours (over the course of the semester) of supervised client involvement in a variety of settings. This seminar provides for active engagement through directed fieldwork experiences, classroom instruction, and experiential lab activities. Clinical case studies will be used to facilitate clinical reasoning processes and enhance client-centered, occupation-based practice. Students will be introduced to professional socialization, therapeutic use of self, ethical practice and group dynamics. Peer-instruction, active engagement and self-direction are essential aspects of this seminar.</td>

OT 6211  Occupational Assessment & Intervention Across the Lifespan Lab
CREDIT HOURS 1.0
COREQUISITES OT 6210
DESCRIPTION This lab course accompanies OT 6210 and provides the student with an opportunity for interactive, dynamic, hands on activities to develop an understanding of occupational performance of children including performance skills, performance patterns, context, activity demands, cultural influences and client factors that affect their occupational performance in a variety of contexts. Students will participate in the occupational therapy process of working with children using evaluation tools, intervention planning and documentation.

OT 6220  Assistive Technology and Environmental Assessment and Intervention Across the Lifespan
CREDIT HOURS 2.0
COREQUISITES OT 6221
DESCRIPTION In this lecture course, students will examine technology for health and wellness of populations and individuals with and without disabilities. Students will explore the impact of the non-human environment on occupational performance of the individuals across the lifespan and gain the necessary knowledge and skills to provide evaluation and intervention. Through this course, students learn how to apply evidence-based practice, resource coordination, and advocacy for clients who utilize technology and environmental intervention.

OT 6221  Assistive Technology and Environmental Assessment and Intervention Across the Lifespan Laboratory
CREDIT HOURS 1.0
COREQUISITES OT 6220
DESCRIPTION This lab course accompanies OT 6220 and provides the student with an opportunity for interactive, dynamic, hands on activities to develop an understanding of technology for health and wellness of populations and individuals with and without disabilities. Students will gain the necessary knowledge and skills to provide evaluation, intervention, and documentation. Through this course, students learn how to apply evidence-based practice, resource coordination, and advocacy for clients who utilize technology and environment intervention.

OT 6230  Evidence Based Practice and Clinical Research II
CREDIT HOURS 2.0
PREREQUISITES OT 6130 Evidence Based Practice and Clinical Research
DESCRIPTION This is the second course in a sequence of two courses designed to develop knowledge and skills for using scientific evidence in clinical decision-making and in understanding clinical research. Students will master all the study designs including qualitative and quantitative research. They will learn how to systematically examine evidence using a variety of quantitative and qualitative methods and where to locate scientific evidence to guide clinical decision-making. A variety of teach / learning methods including cooperative learning, mini-lectures, experiential learning and interactive reflection and feedback will be used.

<td>2.0</td>
<td>OT 6140</td>
<td>This is the second integrative seminar in the four-seminar sequence. The student will participate in approximately 40 hours of supervised client involvement in a variety of settings. The seminar portion of this course is designed to enhance clinical reasoning processes and the use of sound judgment by integrating knowledge and skills from previous educational and work experiences and from concurrent OT courses with weekly fieldwork experiences. This seminar focuses on task analysis, and active participation in the OT processes of screening, evaluation and referral. Students will participate through self-directed and collaborative learning, class participation and leadership activities.</td>

OT 7111  Disability Theory, Mental Health and Group Process: Assessment and Intervention Lab Across the Lifespan

CREDIT HOURS  1.0
PREREQUISITES  OT 7110
DESCRIPTION  This lab course accompanies OT 7110 and facilitates student learning through interactive, dynamic, hands on activities designed to provide knowledge and skills needed to select and implement specific occupational therapy assessments and interventions to individuals as well as groups focusing on mental health disorders impacting occupational functioning. The student will focus on both individual treatment as well as group dynamics used for occupational performance deficits for individual across the lifespan with mental health issues and psychological factors that negatively influence occupational engagement. Students will participate in the occupational therapy process including screening, evaluation, and intervention plan development and documentation using interactive case study design.

OT 7120  Cognitive and Perceptual Assessment and Intervention Across the Lifespan

CREDIT HOURS  2.0
PREREQUISITES  OT 7121
DESCRIPTION  In this lecture course students will learn about the cognitive and perceptual aspects of disease and disability while examining occupational therapy models of practice that support occupational performance throughout the lifespan. Students will critically analyze the evidence supporting evaluation and treatment methodologies used with individuals with cognitive and perceptual difficulties.

OT 7121  Cognitive and Perceptual Assessment and Intervention Across the Lifespan Laboratory

CREDIT HOURS  1.0
COREQUISITES  OT 7120
DESCRIPTION  This lab course accompanies OT 7120 and provides the student with an opportunity for interactive, dynamic, hands on activities to develop an understanding of cognitive and perceptual aspects of disease and disability. This course provides an introduction to evaluation tools and methodologies used in analyzing interventions in cognition and perceptual disorders.

OT 7130  Masters Project I

CREDIT HOURS  2.0
PREREQUISITES  Evidence based practice II
DESCRIPTION  This is the first course in a sequence of three courses that focus on developing, implementing and disseminating a research project for Occupational Therapy profession. This course builds on the skills developed through pre-requisite coursework as well as courses completed in the first year of the program. Through a series of lectures, small group discussions and lab activities, students are guided through the development of a research proposal related to Occupational Therapy.
OT 7140  Field Work I C and Skills for Occupational Based Practice Seminar III  
CREDIT HOURS 2.0  
PREREQUISITES OT 6140 and OT 6240  
DESCRIPTION This course is the third occupation based practice seminar in a four-seminar sequence and is an essential element to the first Level 1 Fieldwork experience. The student will participate in approximately 40 hours of supervised client involvement in a pediatric environment. This seminar provides for active engagement through directed fieldwork experiences, classroom instruction, experiential lab activities, and clinical case studies to facilitate clinical reasoning processes and enhance client-centered, occupation-based practice. Continued focus on the occupational therapy process will including intervention planning, as well as promoting professional development through initiating a professional portfolio.

OT 7210  Neurologic Assessment and Intervention Across the Lifespan Lecture  
CREDIT HOURS 3.0  
PREREQUISITES OT 6150 Co-requisites: OT 7211  
DESCRIPTION In this lecture course, students will explore diagnostic conditions and disorders, models and theories of practice, research evidence for occupational therapy practice with individuals with a variety of neurological conditions. This course will focus on clinical reasoning and occupation-based evaluation and intervention for Sensory Integration and Neuro-rehabilitation Frames of References. Content includes both individuals with acute conditions, and individuals living with long-term conditions who are most likely to benefit from remediation interventions to enable performance of meaningful occupations (e.g., ADL/IADLs, work, education, play, leisure, and social participation).

OT 7211  Neurologic Assessment and Intervention across the Lifespan Lab  
CREDIT HOURS 1.0  
PREREQUISITES OT 6151 Co-requisites OT 7210  
DESCRIPTION This lab course accompanies OT 7210 and provides the student with an opportunity for interactive, dynamic, hands-on activities to develop skills in OT processes with this population, including selecting and using evaluation tools, designing and implementing treatment methodologies, and completing documentation. Through active learning experiences, students will examine strategies to remediate performance deficits due to neurologic impairments for individuals.

OT 7220  Community Based Practice Assessment and Intervention Across the Lifespan- Lecture  
CREDIT HOURS 3.0  
PREREQUISITES OT 7110, OT 7120 Co-requisites: OT 7221  
DESCRIPTION This lecture course examines models of community occupational therapy practice along with the skills and challenges related to community practice. Evidence supporting individual, group, and community interaction to promote occupational functioning, health promotion and disease prevention will be analyzed.

<tr>
<td>OT 7221</td>
<td>Community Based Practice Assessment and Intervention Across the Lifespan- Lab</td>
<td>This lab course accompanies OT 7220 and facilitates student learning through interactive, dynamic, hands on experiences to develop skills in providing OT services focusing on community based practice. The role of occupational therapy in assisting the elderly age-in-place by looking at factors influencing occupational performance such as performance skills and patterns, activity demands, and client factors will be addressed. Students will participate in the occupational therapy process including screening, evaluation, intervention plan development and documentation with the focus on the clients' ability to plan and engage in roles, routines, and tasks for the purpose of self-maintenance, education, work, play, leisure, and social participation.</td>
</tr>
<tr>
<td>OT 7230</td>
<td>Masters Project II</td>
<td>This is the second course in a sequence of three courses that focus on developing, implementing and disseminating a research project for Occupational Therapy profession. Through small group discussion and lab activities, students will submit their IRB proposal, recruit participants, learn/implement evaluations, develop/implement data collection methods, and plan the data analyses.</td>
</tr>
<tr>
<td>OT 7240</td>
<td>Fieldwork I D Skills for Occupation Based Practice Seminar IV</td>
<td>This course is the 4th and final occupation based practice seminar in a 4-seminar sequence and is an essential element to the Level I Fieldwork experience. The student will participate in approximately 30-40 hours of supervised client involvement in Community-based settings. This seminar provides for active engagement through directed fieldwork experiences, classroom instruction, experiential lab activities, and clinical case studies. Focus will continue with the application of the OT process and professional development through the portfolio project and will include a focus on group dynamics and being able to facilitate successful groups in a natural environment. This Seminar will also help the students prepare for their Level II FW experience by reviewing the FW Manual, FW requirements and expectations and assignments.</td>
</tr>
<tr>
<td>OT 7300</td>
<td>Clinical Review Seminar-Competency Testing</td>
<td>This course will review major concepts of all competency-based coursework taught throughout the curriculum. Students will then have the opportunity to take a practical test in preparation for their fieldwork and a computer administered examination to help students prepare for the National Board of Credentialing for Occupational Therapy (NBCOT) prior to Level II Fieldwork experiences.</td>
</tr>

OT 7310  
Fieldwork Experience II A  
CREDIT HOURS  
5.0  
PREREQUISITES  
FW Seminar IA, IB, IC, ID and All Didactic Courses Successful completion of all previous OT coursework including OT 7300  
DESCRIPTION  
This fieldwork will provide student with the first 12 week, full-time supervised fieldwork experience to refine entry-level abilities and integrate OT theory, research, and practice. Addresses ACOTE Standards: All B Content Requirement Standards.

OT 7320  
Fieldwork Experience II B  
CREDIT HOURS  
5.0  
PREREQUISITES  
OT 7310  
DESCRIPTION  
This Fieldwork will provide the student with the second of two 12 week, full-time supervised fieldwork experiences (a minimum of 24 weeks (940 hours) is required by ACOTE). This fieldwork experience will focus on promoting and integrating clinical reasoning skills, reflective practice and entry-level performance competence in a select area of occupational therapy practice. The OT student will demonstrate client-centered, occupation-based, evidenced-based practice as well as cultural competency reflecting the OT/M programs philosophy. The student will also exhibit values and beliefs that foster ethical practice.

OT 7330  
Masters Project Seminar III  
CREDIT HOURS  
2.0  
PREREQUISITES  
OT 7130, OT 7230  
DESCRIPTION  
This is the final course in a sequence of three courses that focus on developing, implementing and disseminating a research project for Occupational Therapy profession. Through small group discussion and lab activities, students will analyze data, write a scientific paper in APA format, create a scientific poster, and disseminate research findings and clinical implications.

OT 7980  
Research Practicum  
CREDIT HOURS  
3.0  
DESCRIPTION  
Directed research in collaboration with a faculty member. For graduate assistants. Does not count towards degree requirements.

OT 8100  
Health Services Systems and Policy in Occupational Therapy  
CREDIT HOURS  
2.0  
PREREQUISITES  
All previous OT coursework  
COREQUISITES  
OT 8110  
DESCRIPTION  
This course analyzes health care policy and investigates how the development of policy affects the profession of occupational therapy and its consumers. Students gain essential knowledge on how health care reforms and trends create major changes in Medicare and reimbursement policies that impact how practitioners serve their clients. The course discusses and explains in detail the principles and major structures of health services and how to advocate for both private and public policy change. The students explore key issues like health care access, cost, quality, licensure, informed consent, and medical liability. The role of global and population health affecting trends in the United states, especially in the areas of special education and mental health is also discussed. Case studies, critical problem solving assignments, in class debates and group work are the primary format of the class. Addresses ACOTE standards B.1.8., B.5.18., B.6.1., B.6.2., B.6.3., B.6.4., B.6.5., B.6.6.
OT 8110  Business Development and Management in Occupational Therapy

CREDIT HOURS  3.0

PREREQUISITES  All previous OT coursework

COREQUISITES  OT 8100

DESCRIPTION  This course provides a fundamental, critical overview of health care leadership and management principles as they relate to occupational therapy practice. The course will describe and discuss major leadership philosophies and theories as well as ethical dilemmas. Detailed discussions, teamwork, practical case study experiences, as well as oral and written assignments will be used to train the students to effectively manage and supervise people and resources, and to understand political, regulatory, economic, and social forces that are affecting a constantly changing and often complex health and rehabilitation environment. Major emphasis is on advocacy and legislation, reimbursement, financial planning, personnel management, leadership, negotiation skills, conflict resolution, ethics, grant writing, starting up a new program, business or practice, entrepreneurship, and marketing. Addresses ACOTE Standards: B7.1, B7.2, B7.3, B7.4, B7.5, B7.6, B7.7, B7.8, B9.1, B9.2, B9.3, B9.4, B9.5, B9.6, B9.7, B9.8, B9.9, B9.10, B9.11, B9.12, B9.13.
Directed Readings in Personal Financial Planning

PFP 8389

1.0 - 3.0

Consent of the instructor, good academic standing

Introduction to Wealth Management

PFP 8400

3.0

None

This course introduces the student to the concepts of wealth management and personal financial planning. The course surveys the technical domains of wealth management, the processes for the efficient delivery of advisory services, and client behaviors and their role in the delivery of advice. The course considers the economics of the advisory business, evaluating the intersection of the demand for advisory services with the supply. Integration of the various elements of wealth management is done through a comprehensive planning assignment.

Financial Advice and Planning over the Life Cycle

PFP 8420

3.0

None

This course examines financial decision making over the life cycle. Among the main topics covered are setting financial objectives, insurance and risk management, planning for adequate retirement income, social security and other government benefits, income tax planning, qualified plans, pre- and post-retirement investment planning, planning for long-term care, and planning for incapacity.

Law, Enterprise, and Planning for Asset Transfer

PFP 8460

3.0

None

This course examines how law affects financial planning from the formation of the enterprise, be it a household or a business. The course analyzes the arrangement of future wealth transfers to maximize the personal and financial well being for an individual and the individual's survivors. This involves study of legal, tax and human factors surrounding the efficient transfer of property. Main topics include a study of wills, trusts, probate and non-probate transfers, and federal transfer taxation.

Advanced Studies in Wealth Management and Advisor Practice

PFP 8520

1.0 - 3.0

None

This course is designed as a capstone for students in the wealth management program. The emphasis is on integrating knowledge from the program and building the skills for a successful advisory practice. The course assesses the student's relative strengths across the domains of wealth advisory practice. The course also examines practice management and profitability of advisory firms. Students participate in case study role play exercises to build communication skills. Students identify a wealth management client and complete the advisory process. Students also prepare a wealth management paper suitable for submission to a professional journal.
PHIL 6010  Plato
CREDIT HOURS  3.0
DESCRIPTION  Advanced introduction to the major areas of Plato's philosophy, which may include the relationship between virtue and knowledge, the theory of recollection, the theory of forms, the nature of sensible objects, and the relationship between the individual and the state. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6020  Aristotle
CREDIT HOURS  3.0
DESCRIPTION  Advanced introduction to the major areas of Aristotle's philosophy, which may include early and later theories of substance, methodology, the study of nature, the soul, and ethics. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6030  Topics in Ancient Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Investigation of a specific theme, philosopher, or text, such as Aristotle's ethics, the philosophy of Socrates, Plato's Republic, Stoicism, Hellenistic ethics, or Aristotle's philosophy of mind. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6050  Topics in 17th-18th Century Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Intensive study of works of modern philosophers such as Descartes, Spinoza, Leibniz, Malebranche, Hobbes, Locke, Rousseau, Berkeley, Hume, Reid, Kant, and Hegel. Course may cover a single philosopher, or it may survey the development of a particular area of modern philosophy (such as moral philosophy, political philosophy, metaphysics, epistemology, or aesthetics). May be repeated only if content varies. A maximum of six credit hours may be applied toward the major.

PHIL 6055  Hume
CREDIT HOURS  3.0
DESCRIPTION  Advanced introduction to the major areas of Hume's philosophy. Topics may include the relation between his theoretical and moral philosophy, skepticism, causation, necessity, the foundations of human knowledge, self-consciousness, personal identity, reason, will, sentiment, naturalism, and normativity. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6060  Kant
CREDIT HOURS  3.0
DESCRIPTION  Advanced introduction to the major areas of Kant's theoretical and/or practical philosophy. Topics may include: Kant's conception of the task and method of philosophical inquiry, the relation of metaphysics and epistemology to natural science, skepticism, causality, freedom, the moral law, and the religious, political, and social ramifications of Kant's moral philosophy. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.
PHIL 6070  Marxism
CREDIT HOURS  3.0
DESCRIPTION  Origin and development of central themes in the philosophy of Karl Marx, such as alienation, exploitation, and dialectical materialism, with limited reference to contemporary trends in Marxist thought. May be repeated if topic varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6075  Topics in 19th Century Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Investigation of a specific theme, philosopher, or text, such as Hegel, Nietzsche, German Idealism, or the emergence of philosophy in America. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6085  Topics in the History of Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Investigation of a specific theme, philosopher, or text, such as Scepticism in Ancient and Modern Philosophy, Anselm, or the Summa Contra Gentiles. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6090  Topics in Continental Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Study of works of such authors as Husserl, Scheler, Heidegger, Sartre, Merleau-Ponty, and Ricoeur. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6095  Topics in Analytic Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Study of works of such authors as Russell, Moore, Carnap, Putnam, Lewis, Feinberg, Hart, and Rawls. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6100  Epistemology
CREDIT HOURS  3.0
DESCRIPTION  Problems in the concept of knowledge, such as the definition of propositional knowledge, the problem of induction, the a priori, and theories of truth. May also include theories such as coherentism, reliabilism, and foundationalism. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6130  Philosophy of Science
CREDIT HOURS  3.0
DESCRIPTION  An examination of philosophical problems associated with the nature, scope, and significance of the sciences. Topics may include: scientific versus non-scientific world views; explanation and its limits; confirmation; paradigms, laws, and theories; intertheoretic reductions; realism versus antirealism; science and human values. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6150  Topics in Epistemology
CREDIT HOURS  3.0
DESCRIPTION  Investigation of selected contemporary or classical topics in epistemology. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.
PHIL 6300  Metaphysics
CREDIT HOURS  3.0
DESCRIPTION  Topics may include personal identity and human nature; space, time, matter, and causality; freedom and determinism; teleology; and conceptions of divinity. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6330  Philosophy of Mind
CREDIT HOURS  3.0
DESCRIPTION  An examination of various theories of the mind-body relationship, such as dualism, identity theory, and functionalism, and of specific issues such as consciousness, mental representation, mental disorders, the emotions, artificial intelligence, personal identity, and free will. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6340  Philosophy and Cognitive Science
CREDIT HOURS  3.0
DESCRIPTION  An interdisciplinary examination of the problems, theories, and research strategies central to the study of the human mind and of other cognitive systems. Basic readings will come from a variety of disciplines, including philosophy, neuroscience, and psychology. Topics of investigation may include perception, mental representation, language, modularity, consciousness, emotions, moral psychology, action, mental disorders, folk psychology, and animal minds. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6350  Topics in Metaphysics
CREDIT HOURS  3.0
DESCRIPTION  Study of specific issues in metaphysics, such as free will, causation, time, personal identity, possible worlds, existence of God, realism, etc. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6500  Symbolic Logic
CREDIT HOURS  3.0
DESCRIPTION  This course will cover the fundamentals of propositional and predicate logic, and selected topics in such areas as the logic of identity and relations, modal logic, or meta-logic. Emphasis placed on construction of proofs in formal systems.

PHIL 6530  Philosophy of Language
CREDIT HOURS  3.0
DESCRIPTION  This course explores how language is able to represent the world and communicate our beliefs about it. Topics may include the nature of language, theories of meaning and reference, semantic paradoxes, private language, speech acts, and non-human language. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6700  Ethics
CREDIT HOURS  3.0
DESCRIPTION  Major Western theories, such as relativism, egoism, emotivism, utilitarianism, deontology, naturalism, intuitionism, virtue, ethics, existential ethics, and feminist ethics. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.
PHIL 6740  Biomedical Ethics
CREDIT HOURS  3.0
DESCRIPTION  Major moral problems in science and medicine, including abortion, death and euthanasia, treatment of the mentally ill, experimentation with human subjects, and genetic research. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6750  Topics in Ethics
CREDIT HOURS  3.0
DESCRIPTION  Study of the works of major authors or views in normative ethics and/or metaethics. The focus will be on contemporary ethics but the course may include some study of historical figures. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6770  Moral Psychology
CREDIT HOURS  3.0
DESCRIPTION  Examination of how humans function in moral contexts and how this information may impact debates in ethical theory. Topics may include moral judgment and intuitions, moral disagreement, reason and emotion, moral agency and responsibility, character traits and virtues, altruism and egoism, and moral development. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6780  Neuroethics
CREDIT HOURS  3.0
DESCRIPTION  Neuroethics considers how ethical theories inform neuroscientific practice and how neuroscientific discoveries inform ethical theorizing. Topics may include ethical protocols for neuroscience research, ethical and legal implications of neuroscientific research, and implications of neuroscience for debates about moral behavior and judgment. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6800  Social and Political Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Issues such as the definition and justification of human rights, justice, social welfare, and forms of political participation, and the debate between ideologies. Readings from classical and contemporary sources, for example, Plato, Locke, Mill, Marx, and Rawls. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6820  Philosophy of Law
CREDIT HOURS  3.0
DESCRIPTION  Topics such as theories of law, feminist legal theory, the nature of legal reasoning, legal obligation, law and justice, law and morality. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6830  Topics in Philosophy of Art
CREDIT HOURS  3.0
DESCRIPTION  Historical and contemporary accounts of the nature of art, aesthetic experience, creative activity, imagination, expression, interpretation, and aesthetic evaluation. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.
PHIL 6855  Advanced Topics in Political Theory
CREDIT HOURS  3.0
DESCRIPTION  Advanced survey of the great writings in political thought. Examines the contributions these works made to Western conceptions such as democracy, equality, human nature, citizenship, and liberty, as well as their continuing relevance for understanding contemporary moral and political dilemmas. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6860  Feminist Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Classical and contemporary issues concerning women, such as discrimination on the basis of gender, class, race, or sexuality, whether gender is natural or constructed, and historical roots of feminist and anti-feminist perspectives.

PHIL 6890  Topics in Social and Political Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Study of selected issues in social/political philosophy. The focus will be on contemporary ethics but the course may include some study of historical figures. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6900  Issues in Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Examination of selected philosopher(s) or topic(s). May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 8030  Seminar in Ancient Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Investigation of a specific theme, philosopher, or text such as Plato's Republic, Aristotle's metaphysics, Epicurus, Hellenistic ethics, or skepticism in ancient philosophy. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 8050  Seminar in Analytic Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Issues such as normativity, theories of truth, or contextualism. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 8060  Seminar in 17th-18th Century Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Detailed examination of the writings of one or two of the following philosophers: Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume or Kant. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 8075  Seminar in 19th Century Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Detailed examination of a major figure, theme, or text from the long 19th century (roughly 1789-1914). May be repeated but only if content varies. A maximum of six credit hours may be applied toward the major.

PHIL 8530  Seminar in Philosophy of Language
CREDIT HOURS  3.0
DESCRIPTION  Examination of issues in contemporary philosophy of language. Topics may include: truth, meaning descriptions, attitude reports. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 8600  Seminar in Philosophy of Religion
CREDIT HOURS  3.0
DESCRIPTION  Topics such as proofs of the existence of God, the nature of religious belief, the relationship between religion and ethics. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 8700  Seminar in Ethics
CREDIT HOURS  3.0
DESCRIPTION  Topics such as Greek ethics, Kantian ethics, utilitarianism, feminist ethics, and religious ethics. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 8720  Seminar in Neuroethics
CREDIT HOURS  3.0
DESCRIPTION  In-depth seminar in neuroethics—the ethical issues raised by neuroscientific research and/or the potential of neuroscience to inform ethical theorizing.

PHIL 8740  Seminar in Biomedical Ethics
CREDIT HOURS  3.0
DESCRIPTION  Examination of contemporary issues in bioethics. Topics may include: research ethics, for human and non-human subjects; end-of-life decision making; eugenics and The Human Genome Project; reproductive issues, such as cloning, freezing embryos, and artificial insemination; abortion, including maternal/fetal relations and embryonic stem cell research; and health care disparities by race, gender, or income. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 8770  Seminar in Moral Psychology
CREDIT HOURS  3.0
DESCRIPTION  An in-depth examination of select topics in moral psychology, such as moral intuitions, moral disagreement, agency and responsibility, virtues, altruism, etc. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 8810  Seminar in Social and Political Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Examination of issues in social and political philosophy. Topics such as democracy, liberalism, liberty, civil rights, and nationalism. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

<td>PT 6600</td>
<td>Human Gross Anatomy I</td>
<td>2.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses; co-requisite PT 6605 and 6610</td>
<td>This is a combined lecture laboratory program designed to present an understanding of basic and clinical human anatomy. Detailed regional analyses of the upper and lower extremities will be performed.</td>
</tr>
<tr>
<td>PT 6605</td>
<td>Gross Anatomy I Lab</td>
<td>2.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses; co-requisite PT 6600 and 6610</td>
<td>This is the laboratory component of Gross Anatomy I (PT 6600) to present an understanding of basic and clinical human anatomy. Detailed regional analyses of the upper and lower extremities will be performed.</td>
</tr>
<tr>
<td>PT 6610</td>
<td>Functional Anatomy I</td>
<td>4.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses; co-requisite PT 6600</td>
<td>This course introduces the student to the theory and practical application of basic tests and measures related to the anatomical structures in the extremities. Examination procedures that will be taught include: palpation, muscle strength testing, ROM and flexibility testing, special testing and introduction to evaluation of the results from these tests and measurements. The course is designed to apply content from Human Gross Anatomy (PT 6600) to the functioning human being.</td>
</tr>
<tr>
<td>PT 6630</td>
<td>Evidence-based Practice I</td>
<td>2.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses</td>
<td>This course is designed to prepare the student to use techniques associated with evidence based practice in physical therapy. Students will learn to develop clinical questions, develop search strategies to access best available evidence, begin to analyze selected literature, and utilize information to facilitate clinical decision making. Students will explore the impact of evidence based practice on physical therapy practice.</td>
</tr>
<tr>
<td>PT 6650</td>
<td>Clinical Experience I</td>
<td>2.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses</td>
<td>The student is assigned to a physical therapy clinic for approximately 40 hours during the semester under the direct supervision of a clinical instructor. The emphasis of the clinical experience is on professional socialization, observation of patient management models, professionalism and to assist with basic direct patient care as deemed appropriate by the clinical instructor. Additionally, the student will participate in an integrated clinical experience (ICE) in order to practice chart review and patient interview, as well as how to complete documentation of a physical therapy evaluation via S.O.A.P. note method.</td>
</tr>
</tbody>
</table>
Clinical Physiology and Pathophysiology I

**CREDIT HOURS** 3.0

**PREREQUISITES** Entry into the PT program

**DESCRIPTION** This course is an introduction to clinical applications of physiology and associated pathologies of the endocrine, reproductive, renal, hepatic/GI/biliary and musculoskeletal system with emphasis on musculoskeletal systems.

---

Professional Practice I: The Doctoring Professions

**CREDIT HOURS** 2.0

**PREREQUISITES** Entry into the PT program

**DESCRIPTION** This is the first in a three-course series on professional practice designed to enhance student growth and professional development. This course focuses on written and oral communication issues and skills, and addresses professional and patient perspectives. Students will be introduced to the history of physical therapy, the American Physical Therapy Association and its foundational documents including the Guide to Physical Therapist Practice. Physical therapy professional attributes and professional behaviors will be highlighted.

---

Human Gross Anatomy II

**CREDIT HOURS** 2.0

**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses

**COREQUISITES** PT6805 and PT6810

**DESCRIPTION** This course is designed to present an understanding of basic and clinical human anatomy. Detailed regional analyses of the head, neck, trunk and spine will be performed.

---

Human Gross Anatomy II Lab

**CREDIT HOURS** 1.0

**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses

**DESCRIPTION** Co-requisite PT6800 and 6810. This is the laboratory component of PT 6800 Human Gross Anatomy II. This course is designed to present an understanding of basic and clinical human anatomy. Detailed regional analyses of the head, neck, trunk and spine will be performed.

---

Functional Anatomy II

**CREDIT HOURS** 2.0

**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses

**COREQUISITES** PT 6800

**DESCRIPTION** This course introduces the student to the theory and practical application of basic tests and measures related to the anatomical structures in the spine. Examination procedures that will be taught include; palpation, muscle strength testing, ROM and flexibility testing, sensory testing, special tests and introduction to the evaluation of the results from these tests and measurements. This course is designed to apply content from Human Gross Anatomy II (PT 6800) to the functioning human being.

<tr>
<td>PT 6900</td>
<td>PT Management of Cardiopulmonary Disorders</td>
<td>4.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses</td>
<td>This course primarily addresses the scientific basis of cardiopulmonary dysfunction and therapeutic intervention which may be utilized by a healthcare professional team in rehabilitation of individuals with cardiopulmonary pathologies. Assessment and physical rehabilitation are emphasized. The spectrum of cardiopulmonary diseases from primary prevention to secondary prevention and long-term rehabilitation will be presented.</td>
</tr>
<tr>
<td>PT 6910</td>
<td>Exercise Physiology</td>
<td>2.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses</td>
<td>This course provides fundamental knowledge about the adaptability of human physiological systems in meeting a range of exercise demands. Areas covered include energy transfer during rest and exercise, physiologic and performance adaptations, and exercise prescription for health adults. Research evidence regarding how exercise and physical activity impact health and wellness is included.</td>
</tr>
<tr>
<td>PT 6950</td>
<td>Introduction to Radiology and Imaging in Physical Therapy</td>
<td>1.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses</td>
<td>This course is designed to present the basic concepts of diagnostic imaging as related to physical therapy practice. This course includes an overview of physical principles, diagnostic capabilities, and key points for patient education. Application to physical therapy and treatment strategies will be covered. Major diagnostic imaging procedures commonly experienced by patients with physical therapy-related diagnoses will be addressed; including radiographs, ultrasound, magnetic resonance imaging, computerized tomography, positron emission tomography, single photon emission computerized tomography, fluoroscopy, and myelogram.</td>

<tr>
<td>PT 7025</td>
<td>PT Management: Acute Medical, Surgical Pathology</td>
<td>3.0</td>
<td>Entry into the PT Program and successful completion of all prior DPT courses</td>
<td>This course exposes the student to a variety of medical and surgical conditions commonly encountered by the physical therapist. Basic principles of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics will be addressed. Key concepts of drug administration, dose-response relationships, drug interactions, and factors influencing the effectiveness of medications are discussed. Students will answer clinical questions to distinguish the diverse classes of drugs as well as understand both practical and theoretical implications of drug use for selected populations. Specific medical and surgical conditions will be discussed, as well as related laboratory values, diagnostics and medical management will be discussed in the context of physical therapy management.</td>
</tr>
<tr>
<td>PT 7040</td>
<td>Physical Therapy Interventions II</td>
<td>2.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses</td>
<td>This course will emphasize patient examination, evaluation, and intervention for wound care (integumentary system) and hydrotherapy modalities. You will practice your clinical reasoning skills to select, perform and interpret tests and measures, and to design appropriate plans of care. You will begin the essentials of patient management: to assess, evaluate, diagnose, prognosticate and intervene for patients with a variety of conditions across a variety of settings.</td>
</tr>
<tr>
<td>PT 7030</td>
<td>Physical Therapy Interventions I</td>
<td>3.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses</td>
<td>This course is the foundation for learning and demonstrating the ability to examine, evaluate, diagnose, prognosticate, develop a plan of care, determine outcomes for patients with a variety of impairments and functional limitations across a variety of settings with emphasis on the acute care setting. The course will emphasize physical therapy interventions including but not limited to positioning, functional mobility training, gait training, therapeutic exercise, and therapeutic massage.</td>
</tr>
<tr>
<td>PT 7130</td>
<td>Physical Therapy Interventions III</td>
<td>3.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses</td>
<td>In this course, you will develop skills in the delivery of physical therapy patient management in accordance with the Guide to Physical Therapy Practice. This course will emphasize patient/client interventions and management techniques including: therapeutic exercises and patient education. You will utilize clinical reasoning skills to select interventions based on the evaluation of physical therapy examination results. These essentials of patient management will assist you in selecting appropriate interventions for patients with a variety of conditions across the life span.</td>
</tr>
</tbody>
</table>
**PT 7135**
**PT Interventions III B**
**Introduction to Modalities**

**CREDIT HOURS**
2.0

**PREREQUISITES**
Enter into the PT program and successful completion of all prior DPT courses

**DESCRIPTION**
In this course, you will develop skills in the delivery of physical therapy modalities for patient management in accordance with the Guide to Physical Therapy Practice. This course will include the rationale for selecting a therapeutic modality based on known physiologic effects of the agent, the safety and use of the agent, therapeutic goals, documentation and evidence to support use of agents for neuromusculoskeletal conditions. Physical agents studied will include: ultrasound, electrotherapeutic modalities, thermal agents, physical agents, laser and traction. You will utilize clinical reasoning skills to select modalities based on the evaluation of physical therapy examination results for patients with a variety of conditions across the lifespan.

---

**PT 7250**
**Clinical Experience II**

**CREDIT HOURS**
6.0

**PREREQUISITES**
Enter into the PT program and successful completion of all prior DPT courses

**DESCRIPTION**
This is the second of five clinical experiences. The student will complete 8 weeks of a full-time experience with the major emphasis being the application of patient examination, evaluation, diagnosis, prognosis and interventions related to current and completed course work.

---

**PT 7610**
**Essentials of Medical Screening**

**CREDIT HOURS**
2.0

**PREREQUISITES**
Enter into the PT program and successful completion of all prior DPT courses

**DESCRIPTION**
This course introduces the student to principles of medical screening with emphasis on the evaluation of examination data to determine if a patient is appropriate for physical therapy intervention. The student will also learn how to perform the upper quarter and lower quarter screening exam. The art and science of a patient/client referral to other healthcare professionals is introduced per the APTA Code of Ethics, APTA Guide to Professional Conduct and the Guide to Physical Therapist Practice. Emphasis will be placed on how to relate/apply the information in clinical decision-making by the physical therapist.

---

**PT 7615**
**Movement Sciences I**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Enter into the PT program and successful completion of all prior DPT courses

**DESCRIPTION**
This course exposes the student to basic principles of movement science and motor control, kinematics and kinetics related to movement with application of these principles to the study of gait and transitional movements across the lifespan. Biomechanical rationale for movement analysis will be emphasized.
PT 7620
Movement Sciences II

CREDIT HOURS: 2.0

PREREQUISITES: Entry into the PT program and successful completion of all prior DPT courses

DESCRIPTION: Motor control insights, gleaned from Movement Sciences I and their expansion in Movement Sciences II, become the umbrella for understanding how normal and abnormal movements emerge and from which therapeutic intervention is constructed and motor patterns are evaluated. This course builds on the principles of movement science and motor control by exposing the student to the theories of motor learning and the application of principles of biomechanics and kinesiology to abnormal movement. The principles of motor learning are included for structuring and progressing treatment.

PT 7625
PT Management of Musculoskeletal Disorders I

CREDIT HOURS: 3.0

PREREQUISITES: Entry into the PT program and successful completion of all prior DPT courses

DESCRIPTION: This lecture/laboratory course is the first in a series of five musculoskeletal courses designed to teach examination, evaluation, diagnosis, prognosis, management and determine outcomes in patients with musculoskeletal dysfunctions. This course will focus of musculoskeletal dysfunctions of the shoulder, elbow, forearm, wrist and hand. The disablement model and the International Classification of Function will be utilized as a basis for examination, evaluation, diagnosis, prognosis, management and outcome assessment. This course will further promote development of knowledge in differentiating musculoskeletal dysfunctions/disorders in the cervical and thoracic spine and upper extremities.

PT 7626
PT Management of Musculoskeletal Disorders II

PREREQUISITES: Entry into the PT program and successful completion of all prior DPT courses

CREDIT HOURS: 3.0

DESCRIPTION: This course will focus on musculoskeletal dysfunctions of the cervical and thoracic spine, craniofacial dysfunctions, and rib cage. The disablement model and the International Classification of Function will be utilized as a basis for examination, evaluation, diagnosis, prognosis, management and outcome assessment. This course will further promote development of knowledge in differentiating musculoskeletal dysfunctions/disorders in the cervical and thoracic spine and upper extremities.

PT 7630
Life Span I

CREDIT HOURS: 2.0

PREREQUISITES: Entry into the PT program

DESCRIPTION: This course will provide an overview of typical development from infancy to adolescence, in all developmental domains, with a focus on motor development as well as normal aging process. The course material is presented and discussed in the context of clinical cases. Emphasis is placed on the principles, processes, and phases of growth. Normal physiologic changes with aging will be presented for adults and the impact of these changes on physical therapy management of older adults will be emphasized.

<td>3.0</td>
<td></td>
<td>This lecture/laboratory course is the third in a series of five musculoskeletal courses designed to teach examination, evaluation, diagnosis, prognosis, management and determine outcomes in patients with musculoskeletal dysfunctions. This course will focus on musculoskeletal dysfunctions of the lumbar spine, pelvis, and hip. This course will further promote development of knowledge in differentiating musculoskeletal dysfunctions/disorders in the lumbopelvic region and lower extremities. Students will synthesize the concepts of clinical reasoning and clinical decision making with an emphasis on evidence based medicine.</td>
</tr>
</tbody>
</table>
PT 7726  Patient Management
Musculoskeletal IV Knee, Foot
and Ankle

CREDIT HOURS  2.0
PREREQUISITES  Entry into the PT program and
successful completion of all prior DPT
courses

DESCRIPTION  This lecture/laboratory course is the
fourth in a series of five musculoskeletal
courses designed to teach examination,
evaluation, diagnosis, prognosis,
management and determine outcomes in
patients with musculoskeletal
dysfunctions. This course will emphasize
the knee, foot and ankle. This course will
promote development of knowledge in
differentiating musculoskeletal
dysfunctions/disorders in the lower
extremities and the concept of regional
interdependence with the hip, pelvis and
lumbar spine.

PT 7800  Evidence-based Practice II

CREDIT HOURS  1.0
PREREQUISITES  Entry into the PT program and
successful completion of all prior DPT
courses

DESCRIPTION  This course is a distance learning web-
based course designed to facilitate
application of evidence based practice in
the clinical setting. The student will have
the opportunity to use the techniques
associated with evidence based practice
in physical therapy to answer a clinical
question prompted by a patient
encounter. Students will disseminate
their findings to classmates, and may
present the EBP paper to the staff at the
clinical experience site. This enhances
the efficacy of patient/client
interventions and outcomes and
promotes best practice paradigms.

PT 7810  PT Management of
Neuromuscular Disorders II

CREDIT HOURS  3.0
PREREQUISITES  Entry into PT Program and successful
completion of all prior DPT courses

DESCRIPTION  This course is designed to introduce
students to the physical therapy
examination, evaluation, diagnosis,
prognosis and management of
individuals with the movement
dysfunction secondary to progressive and
non-progressive acquired neuromuscular
disorders. The Neuromuscular Disorders
series is designed to prepare the student
to manage and treat a variety of
progressive, non-progressive,
catastrophic, non-catastrophic or
acquired disorders of the central nervous
system in adults. This course will lay the
foundation for clinical decision making
with the neurological patient population,
including conducting an adult
neurological examination, gathering an
understanding of common diagnostic
tools in this patient population and an
introduction to a variety of interventions
and approaches for individuals with
disorders of the nervous system.
PT 7820  PT Management of Neuromuscular Disorders III  
CREDIT HOURS  2.0  
PREREQUISITES  Entry into the PT program and successful completion of all prior DPT courses  
DESCRIPTION  This course is designed to expose the student to rehabilitation approaches for treatment post Cerebrovascular Accident, Traumatic and Acquired Brain Injuries and Disorders, Multiple Sclerosis, and an introduction to Movement Disorders to include Parkinson's Disease. Pathophysiology, clinical manifestations, diagnostic procedures, evidence based practices and interdisciplinary management, along with prevention are included in discussion of the above pathologies commonly encountered in neurologic physical therapy practice. Video case studies will be utilized throughout the course to highlight the clinical manifestations of these neurological diagnoses. This is the third section of a five-section series for management of the neurologically impaired patient/client.

PT 7825  Prosthetics and Orthotics  
CREDIT HOURS  2.0  
PREREQUISITES  Entry into the PT program and successful completion of all prior DPT courses  
DESCRIPTION  This course is designed to prepare the student to: evaluate the need for lower limb orthoses and prostheses, prescribe appropriate orthoses and prostheses as a member of the prosthetic and orthotic team, evaluate fit and function of orthoses and prostheses, and implement a comprehensive plan of care for those patients utilizing orthoses and prostheses, including comprehensive gait analysis and gait training.

PT 7850  Clinical Experience III  
CREDIT HOURS  6.0  
PREREQUISITES  Entry into the PT program and successful completion of all prior DPT courses  
DESCRIPTION  This is the third of five clinical experiences. The student will complete 8 weeks of a full-time clinical experience with the major emphasis being the application of patient examination, evaluation, diagnosis, prognosis and interventions to current and completed coursework.

PT 7980  Research Practicum  
CREDIT HOURS  3.0  
DESCRIPTION  Directed research in collaboration with a faculty member. For graduate assistants. Does not count towards degree requirements.

PT 7981  Clinical Arts Laboratory  
Prerequisites: Admission into doctoral physical therapy program  
CREDIT HOURS  7.0  

PT 8100  Introductory Clinical Research  
CREDIT HOURS  3.0  
PREREQUISITES  Entry into the PT program  
DESCRIPTION  Introductory Clinical Research is the first course in a series designed to assist the DPT students in developing and completing a research project related to the field of Physical Therapy. The main purpose of this introductory course is to help students implement evidence-based practice by providing the basic research knowledge and skills necessary to critically analyze and use scientific literature. Students will be introduced to principles of evidence-based practice, research design, hypothesis generation and testing, basic statistical analyses of data, data interpretation, and process of results dissemination.
PT 8140  Health Promotion

CREDIT HOURS  2.0

PREREQUISITES  Entry into PT program and successful completion of all prior DPT courses

DESCRIPTION  This course will emphasize the concepts of health promotion and wellness as you would apply it to clinical practice. You will utilize health and fitness screening to develop an appropriate fitness program. In addition, you will incorporate health promotion and prevention methods/ideas for selected patient populations. You will practice your clinical reasoning skills to select and to design appropriate plans of care given the needs of the patient/client across a variety of settings.

PT 8500  Systematic Review, Meta-Analysis

CREDIT HOURS  2.0

DESCRIPTION  This combination of systematic review and meta-analysis, the statistical process for combining data from multiple studies, is the basis for evidence-based practice in the health sciences, social sciences, and a host of other fields. Clinicians use it to determine the most effective course of treatment. Researchers use it to plan new studies, to justify these studies (in grant applications) and to put these studies in context (in the introductory section of published papers). The objective of this course is for the student to become proficient in conducting a systematic review and meta-analysis in the health sciences. Topics will include publication bias, effect size calculation, forest plots, moderator variables, and meta-regression.

PT 8670  Lifespan IV- Geriatrics and the Multisystem Patient

CREDIT HOURS  2.0

PREREQUISITES  Entry into the PT program and successful completion of all prior DPT courses

DESCRIPTION  This course is designed to prepare the student to provide physical therapy services for the older adult. The impact of normal aging changes, as well as age-related physical syndromes and diagnoses/disorders will be explored. The student will learn principles and procedures for interview, examination, evaluation PT diagnosis, prognosis and intervention related to management of the geriatric patient as part of a multidisciplinary team. Pharmacological issues related to aging will be explored. Students will be exposed to a variety of assessment tools and outcome measures with specific application to the older adult. Psychosocial and ethical-legal issues will be integrated into the management approach.

PT 8700  Evidence-Based Practice III

CREDIT HOURS  1.0

PREREQUISITES  Entry into the PT program and successful completion of all DPT courses

DESCRIPTION  This course is a distance learning web-based course designed to facilitate application of evidence based practice in the clinical setting. The student will have the opportunity to use the techniques associated with evidence based practice in physical therapy to answer a clinical question prompted by a patient encounter. Students will disseminate their findings to classmates on the discussion board dedicated to this course.
PT 8709  Professional Practice III: Management
CREDIT HOURS  2.0
PREREQUISITES  Entry into the PT program and successful completion of all DPT courses
DESCRIPTION  This course focuses on the management of physical therapist autonomous practice in a variety of health care settings including, but not limited to, private practice, hospital, nursing home, home health, and other health care systems. A number of broad concepts and categories including the evolution of third-party reimbursement systems and managed-care, Medicaid, and the legal aspects of health care and physical therapy practice. Management concepts including human resources, continuous quality improvement, patient-centered care, interdisciplinary team management are discussed.

PT 8715  PT Management: Pediatric Physical Therapy
CREDIT HOURS  3.0
PREREQUISITES  Entry into PT program and successful completion of all prior DPT courses
COREQUISITES  PT 8720
DESCRIPTION  This course provides an overview of examination, evaluation, diagnosis, prognosis, management, and intervention of children with neuromuscular disorders utilizing clinical case examples. Common clinical diagnoses are discussed, including examination and intervention strategies, given various practice settings. Clinical decision-making is described in terms of a family-centered, culturally-competent, team approach.

PT 8720  Lifespan III: Pediatric Physical Therapy Application
CREDIT HOURS  1.0
PREREQUISITES  Entry into the PT program and successful completion of all prior DPT courses
DESCRIPTION  This laboratory course will provide practical experiences of clinical examination and intervention skills that parallel the lecture component of the course. The course will emphasize concepts of clinical decision-making for children with disabilities.

PT 8725  PT Management of Neuromuscular Disorders IV
CREDIT HOURS  3.0
PREREQUISITES  Entry into PT program and successful completion of all prior DPT courses
DESCRIPTION  This course is designed to prepare the student to manage a selection of progressive and non-progressive disorders of the central and peripheral nervous systems. Conditions discussed will include Huntington’s disease, spinal cord injury, motor neuron diseases, degenerative diseases and peripheral nervous system disorders. The student will learn principles and procedures for interview, examination, evaluation PT diagnosis, prognosis and intervention related to management of the individual as part of a multi-disciplinary team. Psychosocial issues will be integrated into the management approach. This is the fourth section of a five section series for management of the neurologically impaired patient/client.
PT 8730  
PT Management of Neuromuscular Disorders V  
CREDIT HOURS 2.0  
PREREQUISITES Entry into PT program and successful completion of all prior DPT courses  
DESCRIPTION This course focuses on the examination, evaluation, diagnosis, prognosis and management of patients/clients with vestibular pathology; seating and mobility issue, discharge needs and planning and technology in the rehab setting. The student will also be exposed to Principles of Neuromuscular Facilitation (PNF) This course will culminate in preparing for the Neuro Practical exam focusing on the evaluation and treatment of the patient with neuromuscular disorder and dysfunction. This course will integrate previous learned material from the prior 4 PT Management of Neuromuscular Disorder course series. This is the fifth section of a five section series for management of the neurologically impaired patient/client.

PT 8825  
PT Management of Musculoskeletal Disorders V  
CREDIT HOURS 3.0  
PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses  
DESCRIPTION This course emphasizes the best practice models for the examination, evaluation, diagnosis, prognosis, and management of patients/clients with musculoskeletal disorders. A variety of classification systems are presented to identify patients who will most likely benefit from selected interventions. This course will focus on the principles and techniques necessary to perform a competent physical therapy examination and intervention program for common musculoskeletal dysfunctions of the UE, LE, and spine including thrust and non-thrust techniques. Where little evidence exists, a pragmatic approach integrating basic and clinical sciences and clinical reasoning principles will be used in the clinical decision-making process.

PT 8840  
PT Interventions  
CREDIT HOURS 3.0  
PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses  
DESCRIPTION In this course, you will develop skills in the delivery of physical therapy patient management in accordance with the Guide to Physical Therapy Practice. This course will emphasize patient examination, evaluation, and interventions including EMG/NCV testing, aquatic therapy, women’s health, industrial medicine (functional capacity examinations), athletic taping, kinesiotaping, orthotic arch supports, diagnostic ultrasound, a review and progression of soft tissue mobilization, and introduction to dry needling. This course will emphasize the use of logical reasoning in clinical decision making and allow students an opportunity to discuss other novel treatments they have seen or experienced that may be utilized by licensed physical therapists.

PT 8850  
Clinical Experience IV  
CREDIT HOURS 7.0  
PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses  
DESCRIPTION This is the fourth of five clinical experiences. The student completes 10 weeks of full-time experience with the major emphasis being the application of patient examination, evaluation, diagnosis, prognosis and interventions related to current and completed coursework.

PT 8900  
Special Problems in Physical Therapy  
CREDIT HOURS 3.0  
DESCRIPTION Individual study of a selected problem of interest under the direction of a faculty member.
Special Topics in Physical Therapy: Physical Therapy Community Practice in Nicaragua

CREDIT HOURS
1.0 - 12.0

DESCRIPTION
This course will provide a historical, cultural and sociopolitical perspective of health and health care in Central America. Students will increase their knowledge of different cultures, health care and differing health care systems. Within this context, students will focus on individuals' health, the health of the communities in which they live, and how the health of the community impacts the health of the individual. Students will apply evidence-based physical therapy practice with the goal of improving health at the individual and population levels, through the emphasis on health promotion, disease prevention and health education. Under faculty supervision, students develop and refine clinical practice. Successful completion of this course serves as a prerequisite for the study abroad trip to Nicaragua. The study abroad setting will help Georgia State University students gain valuable hands on global community physical therapy experience through supervised clinical practice in community clinics and provision of health education in a public health fair in a Nicaraguan community. Students will learn about the challenges of Central America healthcare during interactive discussions with healthcare providers.

Special Topics II: Anatomy Elective

CREDIT HOURS
2.0

PREREQUISITES
Entry into the PT program and successful completion of all prior DPT courses

DESCRIPTION
An advanced laboratory course designed to challenge students with an in depth understanding of clinical human anatomy. Detailed dissections of the human body will be created by students for teaching purpose of study and publication. Students will create a project which will consist of a teaching module to be submitted to MedEd Portal or disseminated at GSU CEU conference.

Special Topics III: Complementary & Alternative Therapies

CREDIT HOURS
2.0

PREREQUISITES
Entry into the PT program and successful completion of all prior DPT courses

DESCRIPTION
This course will start with an examination of the effects of pain on the nervous system. Both physiological and psychological effects will be covered, with emphasis on chronic pain/neural plasticity. The following advanced or complimentary treatment techniques will then be instructed and practiced: pelvic floor dysfunction, yoga/breath-work, meditation, and myofascial restriction/release.
PT 8933  **Special Topics III: Advanced Practice in Pediatric Physical Therapy**

**CREDIT HOURS** 2.0

**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses

**DESCRIPTION** This elective course will emphasize advanced concepts in pediatric physical therapy, including specialized topics related to working with children with disabilities. This course is intended for students who are planning to specialize in pediatric physical therapy and will enable students to advance their skills in clinical decision making and evidence-based practice. This course provides an advanced overview of examination, evaluation, diagnosis, prognosis, management, and intervention of children with neuromuscular disorders utilizing clinical case examples.

---

PT 8934  **Special Topics: EKG**

**CREDIT HOURS** 2.0

**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses

**DESCRIPTION** This course presents a study of basic electrocardiography (EKG). Cardiac anatomy and physiology, genesis of the 12-lead EKG, determination of heart rate from EKG and modulation of HR by autonomic nervous system, analysis of normal and aberrant rhythms and conduction patterns, electrical axis, cardiac hypertrophy, and ischemia/infarct patterns are included in the content. A programmed learning, method-based approach is used to give students stools necessary to interpret EKG strips.

---

PT 8935  **Special Topics: Vestibular/Women’s Health/Wound Care/Canine Therapy**

**CREDIT HOURS** 2.0

**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses

**DESCRIPTION** This course will expose students to several specialty areas of physical therapy, to include Pelvic health, Vestibular Rehab, Wound Care & Canine Therapy. Students will observe treatment in each of these practice areas and present a single case study from their observation experience as the only project for the course.

---

PT 8936  **Special Topics: Advance Topics in Neuroscience: Education to Intervention**

**CREDIT HOURS** 2.0

**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses

**DESCRIPTION** Must have permission from the instructor. Students will apply neuroscience principles from the lab and classroom to research and clinical settings. Students will gain advanced teaching experience in the neuroanatomy lab as well as explore and analyze the latest tools in neuroscience technology to diagnose and treat various neurological conditions.
**PT 8937**  
**Special Topics: Dry Needling in Physical Therapy**

**CREDIT HOURS**  
3.0

**PREREQUISITES**  
Entry into the PT program and successful completion of all prior DPT courses

**DESCRIPTION**  
Must have permission from the department chair. This course focuses on skill acquisition of dry needling technique and clinical reasoning for implementing the intervention in the lumbar region, lower quarter, cervico-thoracic region and upper quarter. Emphasis will be placed on safe needle handling and relevant anatomical considerations for each region. Participants can expect to be proficient with palpation of soft tissue structures, assessment and treatment using dry needling. Furthermore, the most up-to-date evidence informed approaches for the use of dry needling will be discussed and utilized during this course, including exploration of modern pain science concepts, and participants will gain skill in appropriate dosing of dry needling to allow for optimal effectiveness and maximal patient comfort.

**PT 8950**  
**Clinical Experience V**

**CREDIT HOURS**  
7.0

**PREREQUISITES**  
Entry into the PT program and successful completion of all prior DPT courses

**DESCRIPTION**  
This is the last of five clinical experiences. The student completes 10 weeks of a full-time experience with the major emphasis being the application of patient examination, evaluation, diagnosis, prognosis, and interventions related to current and completed coursework. Students demonstrating the core values of professionalism and outstanding clinical and academic performance may request an area of practice (based on availability) that they want to experience prior to graduation.

**PT 8999**  
**Capstone Project in Physical Therapy**

**CREDIT HOURS**  
2.0

**PREREQUISITES**  
Prerequisite: Entry into the PT program and successful completion of all prior DPT courses

**DESCRIPTION**  
Note: A minimum of six credit hours must be taken (maximum 2 hours per semester). Directed research culminating in a written product related to the art or science of physical therapy.

**PT 9000**  
**Comprehensive Examination**

**CREDIT HOURS**  
2.0

**PREREQUISITES**  
Entry into the PT program and successful completion of all prior DPT courses

**DESCRIPTION**  
The purpose of the comprehensive review is to ascertain the student's readiness to graduate and to sit for the national licensing examination. Test-taking strategies and an intense review of the curriculum prepare students for entry into the physical therapy profession. Successful completion of the comprehensive examination is required for completion of the DPT program.
Service Learning

2.0

Entry into the PT program and successful completion of all prior DPT courses

The service learning component of the DPT curriculum is designed to complement the APTA Core Values (Appendix A; http://www.apta.org/) and CAPTE’s Professional Practice Expectations and Patient/Client Management Expectations, as outlined in the Evaluative Criteria for PT Programs (http://www.capteonline.org/) of: accountability, altruism, professional duty, communication, cultural competence, social responsibility and advocacy, prevention, health promotion, fitness and wellness. Students will participate in purposeful, community-based experiences related to health promotion, wellness, prevention and/or education. Projects/experiences must incorporate the promotion of the GSU Physical therapy program, the physical therapy profession and/or health and wellness or must serve a need identified within a community or population.

<tbody>
<tr>
<td>PHYS 6300</td>
<td>Teaching Physics</td>
<td>2.0</td>
<td>Course provides a theoretical and practical foundation for science teaching. Topics include univocal and dialogic discourse, questioning strategies, Bloom's taxonomy, mental models, formative assessment and bridging, the resource framework, motivation and cooperative learning, argumentation, metacognition, nature of science, and qualities of effective teachers. Two lecture hours per week.</td>
</tr>
<tr>
<td>PHYS 6310</td>
<td>Teaching Physics Lab Practicum</td>
<td>1.0</td>
<td>Students will practice teaching physics lessons and apply science teaching theories and methods learned in PHYS 6300. One and one half hours per week.</td>
</tr>
<tr>
<td>PHYS 6340</td>
<td>Neurophysics</td>
<td>3.0</td>
<td>Three lecture hours per week. Course provides fundamental findings of physics of neuronal systems. The course covers such topics as introduction to biomechanics, membranes, transport, electroosmotic effects, ion pumping, cellular homeostasis, the Hodgkin-Huxley formalism, energetics of spiking, neural coding, and dynamics of neurons and neuronal networks. It also covers methods of recording of neuronal activity.</td>
</tr>
<tr>
<td>PHYS 6410</td>
<td>Introduction to Nuclear and Particle Physics</td>
<td>3.0</td>
<td>Introduction quantum mechanics at a level of PHYS 3402 or higher with a grade of C or higher.</td>
</tr>
<tr>
<td>PHYS 6500</td>
<td>Advanced Topics in Physics</td>
<td>3.0</td>
<td>This course presents advanced topics of special interest in physics as may fit the needs and interests of advanced undergraduate/graduate students and faculty. Topics may be in the fields of nuclear physics, nanophysics, solid state physics, optics and electronics, and neurophysics. May be repeated if topics are different.</td>
</tr>
<tr>
<td>PHYS 6510</td>
<td>Mathematics of Physics I</td>
<td>3.0</td>
<td>(Same as MATH 6258.) Three lecture hours a week. Algebra of vectors, vector calculus, divergence, gradient, curl, line integrals, surface integrals, divergence theorem of Gauss, Stokes's theorem, conservative fields, orthogonal curvilinear coordinates, matrices, eigenvalue problems.</td>
</tr>
</tbody>
</table>
**PHYS 6520**  
Mathematics of Physics II  
**CREDIT HOURS** 3.0  
**PREREQUISITES** a course in ordinary differential equations  
**DESCRIPTION** (Same as MATH 6265.) Three lecture hours a week. Derivation and solution of partial differential equations of physics, wave equation, Laplace's equation, Schroedinger's equation, power series solution of ordinary differential equations, special functions of mathematical physics, Fourier series, Sturm-Liouville systems, complex analysis, and integration.

**PHYS 6710**  
Functional Neuroimaging  
**CREDIT HOURS** 3.0  
**PREREQUISITES** consent of instructor  
**DESCRIPTION** (Same as NEUR 6330.) Three lecture hours a week. Foundations of physics principles applied to brain processes, different imaging modalities, and neuroimaging data analysis methods. Topics include physiological basis of functional neuroimaging, physics of different imaging modalities (fMRI, PET, EEG, MEG, fNIR, TMS), experimental design, neuroimaging data analysis, and applications in cognitive neuroscience. This course is appropriate for graduate students in physics, chemistry, biology, neuroscience, psychology, mathematics, statistics, and computer science with an interest in the use of functional neuroimaging.

**PHYS 6810**  
Introduction to Quantum Mechanics  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Three lecture hours a week. Schroedinger's theory of quantum mechanics; solutions of Schroedinger's equation; perturbation theory; one-electron atoms; magnetic moments, spin, and relativistic effects; identical particles; and multi-electron atoms.

**PHYS 6910**  
Solid State Physics  
**CREDIT HOURS** 3.0  
**PREREQUISITES** PHYS 3401 and PHYS 3402 with grades of C or higher, or equivalent, or consent of instructor  
**DESCRIPTION** Three lecture hours a week. Atoms in crystals (crystal structure); waves in crystals; crystal binding, lattice constants; lattice vibrations and other thermal properties of solids, free electrons in crystals, energy bands, and semiconductors.

**PHYS 7000**  
Gateway to Physics  
**CREDIT HOURS** 2.0  
**DESCRIPTION** Two lecture hours a week. This course is intended for anyone curious about physics and its relevance to contemporary life. It is primarily for students in the Masters of Arts in Teaching program in the College of Education but is also appropriate for students in medicine, law, and business, natural sciences, social sciences, humanities, music, and fine arts. No background in physics is necessary. The course engages a broad spectrum of resources and experiential opportunities (e.g. popular science books & articles, videos, websites, lab tours, field trips, service learning opportunities, and guest presenters) to explore compelling interconnections between physics and other disciplines and career interests. Course topics may include Physics and the Human Body, Physics and the Nanoscale, Physics and the Cosmos, Physics and Technology, Physics and Art, and Chaos & Complexity.

</table>
PHYS 8515  Dynamical Foundations of Neuroscience
CREDIT HOURS  3.0
PREREQUISITES  MATH 4010/6010 or MATH 4275/6275 or PHYS 4180/6180 with grade C or higher
DESCRIPTION  This course explores the mathematical principles by which brains generate spikes, make decisions, store memories, and control actions. Topics include biophysics and dynamics of single and coupled neurons, bifurcations and transitions between various types of neuronal activities; modeling of synapses, dendrites and axons; small networks; neural coding in single cells and at the population level; dynamics of large networks, including spike computing with population codes; networks learning and behavioral changes.

PHYS 8520  Optoelectronics
CREDIT HOURS  3.0
DESCRIPTION  This course will cover optical properties of semiconductors leading to the development of Optoelectronic Devices, specifically Detectors and Lasers. Following a basic description of refraction, transmission, reflection, scattering and absorption (direct, indirect, Impurity) of infrared radiation, the course will expose how energy gaps in semiconductors lead to different types of heterostructures and optical transitions, which are exploited to build various types of devices. Quantum confinement in Quantum Dot, Wire, Ring, and Well structures and other types of optical devices, along with various aspects of device developments and characterizations, will be discussed.

PHYS 8550  Physics of Thin Films
CREDIT HOURS  3.0
PREREQUISITES  PHYS 6810 and PHYS 8110 with grades of C or higher, or consent of instructor
DESCRIPTION  Three lecture hours a week. Thin film growth methods, optical, and electrical properties of films, characterization techniques.

PHYS 8560  Nanoplasmonics
CREDIT HOURS  3.0
DESCRIPTION  Study of the fundamental properties and applications of the surface plasmonics at the nanoscale. Includes coherent effects associated with phase memory of surface plasmons, control of nanooptical phenomena, nonlinear processes, ultrafast (femtosecond and attosecond) phenomena, and quantum quasiparticles. Applications of nanoplasmonics, including the detection of ultrasmall amounts of chemical and biological compounds, scanning near-field optical microscopes (NSOMs or SNOMs), and nanolithography. Three lecture hours a week.

PHYS 8580  Principles of Nanospectroscopy of Materials
CREDIT HOURS  3.0
PREREQUISITES  PHYS 8110 with a grade of B or higher, or consent of instructor
DESCRIPTION  The following topics will be included in this course: 2D electron gas; optical properties of quantum wells; heterostructures; nanooptical microscopy techniques based on elastic and inelastic light scattering, including resonant Rayleigh scattering, interference techniques, resonant Raman scattering and photo luminescence); near-field optics; and selected topics from recent scientific literature. Three lecture hours a week.

PHYS 8610  Nuclear Physics
CREDIT HOURS  3.0
PREREQUISITES  PHYS 6410 and PHYS 6810 with grades of C or higher, and consent of instructor
DESCRIPTION  Three lecture hours a week. Nuclear force and two and three nucleon systems; spherical and deformed nuclear shell models; collective modes; electromagnetic and weak decays; nuclear scattering and reactions.

POLS POLITICAL SCIENCE

**POLS 6100**  
Seminar in American Politics  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Introduction to the major institution and processes in the national political system. Overview of Congress, the Executive Branch, and the Supreme Court.

**POLS 6139**  
Separation of Powers  
**CREDIT HOURS** 3.0  
**DESCRIPTION** This course will examine the issue of separation of powers (i.e., inter-branch relations), primarily in the American context.

**POLS 6158**  
Campaigns and Elections  
**CREDIT HOURS** 3.0  
**DESCRIPTION** The goal of this course is to provide students with an overview of the critical normative and academic questions in political science regarding campaigns and elections in the U.S.

**POLS 6162**  
Politics and Communication  
**CREDIT HOURS** 3.0  
**DESCRIPTION** An analysis of how political communications affect our relationships with political actors and processes.

**POLS 6190**  
Studies in American Politics  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Topics may include separation of powers, state and local politics, institutions, or behavior. The course be taken more than once for credit if topic varies.

**POLS 6200**  
Comparative Politics Analysis  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Concepts, theories, and methods in the study of comparative politics.

**POLS 6290**  
Studies in Comparative Politics  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Topics may include area studies, comparative governmental systems, state building, comparative legal development, and regime change. May be taken more than once for credit if topic varies.

**POLS 6400**  
International Politics  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Concepts and theories in international politics.

**POLS 6490**  
Studies in International Politics  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Topics may include international organization and law, human rights, international social movements, nations and nationalism, and international conflict resolution. May be taken more than once for credit if topic varies.

**POLS 6800**  
Research Design  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Provides students with an overview of the philosophy of science, the origins and development of political science as a discipline, the principals of high quality research design, and the basic tools of both qualitative and quantitative methods.

**POLS 6987**  
Teaching Politics with Simulations  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Decades of robust educational research show that instructional simulations and games have learning applications in the classroom. In this course, students will analyze educational research, gaming design, and learning theory for simulations and games. Students will also explore and "play" various simulations and games while examining classroom possibilities and practices.

### POLS 8480  
**Transitional Justice and the Politics of Memory**

**CREDIT HOURS** 3.0  
**DESCRIPTION** The course will provide a philosophical and theoretical framework for thinking about memory and transitional justice. It focuses on specific transitional justice institutions such as the Nuremberg Trials, the South African Truth and Reconciliation Commission, the International Criminal Tribunals for the former Yugoslavia and Rwanda, the International Criminal Court, as well as selected domestic and hybrid trials and truth commissions in many regions of the world.

### POLS 8485  
**Ethics of International Relations**

**CREDIT HOURS** 3.0  
**DESCRIPTION** Course provides a survey of contemporary ethical questions in international relations. Among the questions considered: What significance do ethical considerations have in international affairs. Is ethical conduct in international relations possible, in the world of nation states with national interests and power politics. And how, in normative terms, should we evaluate international acts. Focus is on contemporary debates about just and unjust war, use of force, humanitarian intervention, treatment of civilians in war, human rights, democratization, and development.

### POLS 8490  
**Studies in International Relations**

**CREDIT HOURS** 3.0  
**PREREQUISITES** POLS 8400  
**DESCRIPTION** Topics may include international organization and law, human rights, international social movements, nations and nationalism, and international conflict resolution. May be taken more than once for credit if topic varies.

### POLS 8510  
**Theories on Democracy**

**CREDIT HOURS** 3.0  
**DESCRIPTION** What is Democracy. This course considers a variety of contending answers to this question. In particular, we will review representative, deliberative, agonistic and radical theories of democracy . and chart disagreement on the meaning of democracy both within and across these approaches.

### POLS 8555  
**Contemporary Political Philosophy**

**CREDIT HOURS** 3.0  
**DESCRIPTION** This course examines contemporary thinking in political philosophy. Particular emphasis is placed on debates within the discipline over matters such as the ethics of war, abortion, civil rights, income distribution, judicial interpretation and homelessness.

### POLS 8560  
**Classical & Early Modern Political Thought**

**CREDIT HOURS** 3.0  
**DESCRIPTION** Survey of the great writings in political thought from Plato to Hobbes. Examines the contributions these works made to Western conceptions such as democracy, equality, human nature, citizenship, and liberty, as well as their continuing relevance for understanding contemporary moral and political dilemmas.

### POLS 8570  
**Modern Political Thought**

**CREDIT HOURS** 3.0  
**DESCRIPTION** Survey of the great writings in political thought from Machiavelli to Marx. Examines the contributions these works made to Western conceptions such as democracy, equality, human nature, citizenship, liberty, as well as their continuing relevance for understanding contemporary moral and political dilemmas.
POLS 8800  Elements of Research Design
CREDIT HOURS  3.0
DESCRIPTION  Introduction to major research methodologies. Course will examine components of research design as well as how to collect and analyze data.

POLS 8805  Introduction to Quantitative Analysis
CREDIT HOURS  3.0
DESCRIPTION  Introduction to fundamental quantitative analysis. Lays the groundwork for advanced coursework in quantitative analysis and social and political science research. To that end, students will learn about sampling, distributions, hypothesis testing, confidence intervals and a variety of other topics. Targets graduate students.

POLS 8810  Uses of Intermediate Statistical Methods in Political Science Research
CREDIT HOURS  3.0
DESCRIPTION  Intensive examination of quantitative statistics, ranging from classical regression to maximum likelihood models.

POLS 8820  Studies in Research Methodology
CREDIT HOURS  3.0
DESCRIPTION  Intensive examination of a particular methodological skill or skills. May be taken more than once for credit if topic varies.

POLS 8830  Advanced Quantitative Methods
CREDIT HOURS  3.0
PREREQUISITES  POLS 8810 with at least a B-
DESCRIPTION  This course covers a variety of topics in advanced quantitative methods with primary focus on Maximum Likelihood Estimation. The topics will be covered at both a theoretical and applied level to provide students a conceptual understanding of the techniques as well as to implement them in applied research.

POLS 8840  Qualitative Research Methods
CREDIT HOURS  3.0
DESCRIPTION  Advanced course on qualitative methods and research design in political science. Topics include concept formation and case selection; process-tracing and within-case analysis; simple set-theory and logic for cross-unit analysis; and coverage of field methods such as subject interviewing, archival research, and field experiments. Interpretive methods are also featured.

POLS 8900  Comprehensive Readings
CREDIT HOURS  3.0
DESCRIPTION  For students preparing for master's or doctoral examinations. To be taken in the term in which the examinations are taken.

POLS 8980  Directed Reading in a Special Area
CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
DESCRIPTION  May be taken more than once for credit if topic varies.

PRT 6050  Printmaking
CREDIT HOURS  3.0
PREREQUISITES  Consent of instructor
DESCRIPTION  For students not majoring in Drawing, Painting, and Printmaking. Expressive and interpretive printmaking through techniques such as etching, lithography, screen, or relief. May be repeated for a maximum of fifteen credit hours.

FEES  $20.00

PRT 6980  Directed Study
CREDIT HOURS  3.0 - 6.0
PREREQUISITES  Consent of instructor
DESCRIPTION  For students not majoring in Printmaking. Individual research. May be repeated for a maximum of twelve hours.

PRT 8400  Interdisciplinary Graduate Seminar
CREDIT HOURS  3.0 - 9.0
PREREQUISITES  M.F.A. status
DESCRIPTION  For M.F.A. students from all Art and Design majors. Readings, discussions, and engagement with advanced studio topics, led by studio faculty, to improve studio practice.

PRT 8500  Studio Practice
CREDIT HOURS  3.0 - 9.0
PREREQUISITES  Consent of instructor
DESCRIPTION  For MFA Printmaking students. Discipline specific graduate course driven by studio production and critiques. May be repeated for a maximum of twenty-four credit hours.

PRT 8980  Special Problems
CREDIT HOURS  3.0
PREREQUISITES  Consent of instructor or School director
DESCRIPTION  Independent study. Contract outlining course content is required. May be repeated for a maximum of six credit hours.

PRT 8999  Thesis Research
CREDIT HOURS  3.0 - 12.0
PREREQUISITES  Consent of thesis advisor
DESCRIPTION  Preparation of thesis and graduate exhibition.
### PMBA 8000 Managing in the Global Economy

**CREDIT HOURS**
3.0

**REQUIREMENTS**
CSP: 1, 2, 3, 6, 7 and 8

**DESCRIPTION**
Managing in the Global Economy provides students with an integrated managerial framework based on economic principles to facilitate effective decision making across and within functional areas, across and within global borders, and across and within organizational boundaries. Students will learn to formulate strategic decisions to face complex challenges through lecture, case study, discussion and exercises that emphasize critical thinking within an economic paradigm. Key concepts include the power of markets, the influence of technology on markets and organizations, the impact of incentives on actions, and how information influences decisions and actions.

### PMBA 8015 Leading Through Strategic Communication

**CREDIT HOURS**
3.0

**PREREQUISITES**
Consent of director of PMBA program

**REQUIREMENTS**
CSP: None

**DESCRIPTION**
This course presents excellent written and oral business communication as a leadership strategy critical to success in the workplace. Students master a communication model useful to identify objectives, analyze audiences, choose information, and create the most effective arrangement and channel for written and oral messages. Students will practice influencing and persuading others through strategically aligned business documents that are clear, precise, and readable including communications to executive level readers. Students will also develop skills in the effective design and delivery of persuasive presentations, delivering unwelcome information, and effective, productive group communication.

### PMBA 8025 Financial Statement Analysis

**CREDIT HOURS**
3.0

**PREREQUISITES**
None

**DESCRIPTION**
This course takes a user-oriented approach to the study of financial statements. Students study the role of the financial statements and the annual report in the financial reporting process. Using ratio analysis, students analyze past firm performance and make forecasts of future performance. Students also study the effects of differing accounting methods on financial statement analysis.

### PMBA 8030 Law Environment: Ethics and Corporate Governance

**CREDIT HOURS**
3.0

**PREREQUISITES**
None

**REQUIREMENTS**
CSP: None

**DESCRIPTION**
Companies that ignore their legal and ethical obligations to owners, customers, and consumers open the door to parties who seek legal recourse that can limit their gain or even threaten their existence. Law and Ethics, when incorporated properly into managerial decision-making, provide strategic tools to facilitate growth, creativity, competitive advantage, and legal certainty and to reduce legal risk and liability. By examining the application of law and ethics to a variety of business and corporate governance issues, this course offers the master?s student an understanding of how businesses can comply with the law and use an ethical culture as a positive strategy for making successful business decisions.
**PMBA 8040**  
**Data Driven Decision Making**  
**CREDIT HOURS** 3.0  
**DESCRIPTION**  
Equivalents: FI 8090. Evidence based decision making is critical to an organization’s ability to compete in the global economy. This course explores the role of data in driving decisions made by managers across and within functional boundaries. Specifically, students learn to understand, visualize and present data that supports organizational decision making processes. They also learn how to create data driven models such as regression and decision trees to make decisions to address critical challenges faced by organizations and society. The course features hands-on exercises with appropriate software. Students may not take both PMBA 8040 and FI 8090 for credit.

**PMBA 8050**  
**Entrepreneur & Enterprise**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** None  
**DESCRIPTION**  
This is an introductory survey course for students who might be interested in starting their own businesses or who might develop new businesses in the corporate environment. The environment of entrepreneurship and the behavior of entrepreneurs are studied. Students learn how to recognize and evaluate new business opportunities. Major activities in the course may include interviewing entrepreneurs and studying the feasibility of a business idea.

**PMBA 8045**  
**Analytics Experience**  
**CREDIT HOURS** 1.5.0  
**PREREQUISITES** PMBA 8000 and PMBA 8025  
**COREQUISITES** PMBA 8040  
**DESCRIPTION**  
The course is housed in the Insight Lab, the big-data analytics facility where analytics students and faculty conduct research and work with companies on obtaining analytical insights from data. It also teaches students to find solutions to big data challenges facing real companies and organizations. The specific problems that students will address depend on what research projects and company projects are ongoing at the time of the course. Student teams will compete to produce and communicate the best solution.

**PMBA 8115**  
**Managerial Accounting and Control Systems**  
**CREDIT HOURS** 1.5.0  
**PREREQUISITES** PMBA 8000 and PMBA 8025  
**COREQUISITES** PMBA 8015 and PMBA 8030 and PMBA 8040 and PMBA 8045  
**DESCRIPTION**  
This course demonstrates how managerial accounting and control systems can help managers make affective operating and strategic decisions within the firm. In particular, this course uses cases and other materials to demonstrate how cost, planning, and performance measurement systems can help managers increase the effectiveness of small and large firms within their current and future operating environment. To help students develop the analytical skills necessary for evaluating alternative designs of control systems, this course also introduces economic and behavioral theories of managerial control.
PMBA 8125  Digital Innovation
CREDIT HOURS  3.0
PREREQUISITES  PMBA 8000 and PMBA 8025 and PMBA 8040
COREQUISITES  PMBA 8015 and PMBA 8030 and PMBA 8040 and PMBA 8045
DESCRIPTION  This course develops competencies necessary for professionals to harness the power of digital innovation in business and society. Students will learn how established and entrepreneurial firms can leverage digital innovation to transact with markets, to source goods/services, to develop real-time context-aware processes, and to attract equity. Topics include how to leverage information technology (IT) to innovate business models, how to digitize products and services, how to apply business analytics to derive insights from structured and unstructured data, and how to leverage the power of Big Data for digital innovation. Students will also learn how to keep pace with IT developments that generate new capabilities, disrupt existing business models, and give rise to new business models.

PMBA 8135  Corporate Finance
CREDIT HOURS  3.0
PREREQUISITES  PMBA 8000, and PMBA 8025
COREQUISITES  PMBA 8015 and PMBA 8030
DESCRIPTION  This course focuses on the financial management of both publicly-held and private corporations. Students are presented with a conceptual framework for understanding and addressing problems commonly faced by corporate decision-makers and provided opportunities to apply these concepts to contemporary business situations. Topics covered include, but are not limited to: the valuation and role of debt and equity, capital acquisition and the organization of domestic and international financial markets, the relationship between risk and return including the capital asset pricing model, capital budgeting/project evaluation techniques, cost of capital, cash flow estimation, project risk analysis, real options, company valuation, and capital structure decisions.

PMBA 8145  Marketing Management
CREDIT HOURS  3.0
PREREQUISITES  PMBA 8000 and PMBA 8025
COREQUISITES  PMBA 8015 and PMBA 8030
DESCRIPTION  This course is a study of the managerial aspects of marketing. Emphasis is placed on the quantitative and qualitative criteria used in evaluating marketing alternatives and in choosing among these alternatives. The course includes topics related to market segmentation, marketing research, product/service development, branding, promotion, pricing, channels of distribution, marketing strategy, and global marketing.

<td>PMBA 8820</td>
<td>This course is designed to integrate and apply the tools of strategic leadership. Students will gain fundamental insights into the principles, tools and skills of strategic leadership as well as a deepened understanding of their own strategic leadership style and skills. The course culminates in a behavioral simulation in which students adopt executive roles in the running of an international financial services firm in order to apply course concepts and tools. Upon completing the simulation, students receive extensive quantitative and qualitative feedback experience regarding their collective and individual results.</td>

</table>
PSYC 8260  Assessment, Consultation, and Evaluation in Community Psychology II (ACE II)  
CREDIT HOURS  3.0  
PREREQUISITES  PSYC 8230 with a grade of B- or higher  
DESCRIPTION  In-depth examination of psychological consultation in mental health, community organizational, governmental, and other human service delivery settings. Focuses on applied research in ecological assessment and evaluation of settings and programs, using experimental, quasi-experimental, qualitative and observational methodologies.

PSYC 8280  Psychology, Advocacy, and Organizing  
CREDIT HOURS  3.0  
DESCRIPTION  To educate students in the role of psychological research in informing, framing, and advocating for public policy. Focus will be placed on the area of the instructor’s substantive policy research (e.g education, domestic violence). To develop students’ understanding of scholarly and community-based literature on community organizing and civic participation, with an emphasis on the principles and practices of effective community organizing via an understanding of social power dynamics.

PSYC 8410  Psychological Research Statistics I  
CREDIT HOURS  3.0  
PREREQUISITES  PSYC 3010, or equivalent  
DESCRIPTION  (Same as NEUR 8035.) Statistical analysis of psychological data with an emphasis on the logic of basic analytic techniques. Includes discussion of data screening, hypothesis testing, bivariate measures of association, and simple between- and within-subjects analysis of variance.

PSYC 8420  Psychological Research Statistics II  
CREDIT HOURS  3.0  
PREREQUISITES  PSYC 8410  
DESCRIPTION  (Same as NEUR 8320.) Statistical analysis of psychological data with an emphasis on multiple and logistic regression and their interpretation. Statistical considerations when planning research such as power analysis are also discussed.

PSYC 8430  Psychological Research Statistics III  
CREDIT HOURS  3.0  
PREREQUISITES  PSYC 8420  
DESCRIPTION  (Same as NEUR 8330.) Advanced topics in the statistical analysis of psychological data including various forms of factor analysis, psychometric methods and theories, structural equation modeling and its use in theory construction, and multivariate analysis of variance.

PSYC 8490  Scientific and Professional Ethics in Psychology  
CREDIT HOURS  3.0  
DESCRIPTION  Introduction to psychology as a science and profession, with consideration of ethical standards of psychologists and current ethical issues.

PSYC 8500  History of Psychology  
CREDIT HOURS  3.0  
DESCRIPTION  (Same as NEUR 8500.) Broad historical basis of psychology as a science. An account of the historical development and contemporary status of various theoretical systems of psychology.
PSYC 8510  Social Psychology
CREDIT HOURS  3.0
DESCRIPTION  Survey of the content of experimental social psychology, including such areas as interpersonal perception, social motivation and learning, attitude and measurement and change, and such group processes as conformity, leadership, norm formation, and group productivity.

PSYC 8511  Special Topics in Social Psychology
CREDIT HOURS  1.0 - 3.0
DESCRIPTION  Focused and systematic examination of theoretical and empirical issues associated with a particular topic from social psychology, such as stereotyping and prejudice, identity, or relationships.

PSYC 8520  Cognitive, Affective, and Social Aspects of Behavior
CREDIT HOURS  3.0
DESCRIPTION  Overview of theory and research related cognitive, affective, and social aspects of behavior.

PSYC 8540  Advanced Cognitive Psychology
CREDIT HOURS  3.0
DESCRIPTION  (Same as NEUR 8410.) Empirical and theoretical bases for understanding the processes of thought, including attention, pattern recognition, learning, memory, language, and reasoning.

PSYC 8541  Special Topics in Cognitive Psychology
CREDIT HOURS  1.0 - 3.0
DESCRIPTION  Focused and systematic examination of theoretical and empirical issues associated with a particular topic from cognitive psychology, such as memory, sound, or attention and executive function.

PSYC 8551  Cognitive and Linguistic Development
CREDIT HOURS  3.0
DESCRIPTION  Theory, research, and emerging trends in the development of cognitive and linguistic processes from infancy to adolescence. Both normative and atypical patterns of development will be considered.

PSYC 8552  Social and Emotional Development
CREDIT HOURS  3.0
DESCRIPTION  Theory, research, and emerging trends in the development of social and emotional processes from infancy to adolescence. Both normative and atypical patterns of development in a variety of social and cultural contexts will be considered.

PSYC 8553  Advanced Developmental Seminar
CREDIT HOURS  3.0
DESCRIPTION  In-depth examination of contemporary topics and issues in developmental psychology from infancy through adolescence. May be repeated if topic varies.

PSYC 8600  Principles of Cognitive Neuroscience
CREDIT HOURS  3.0
DESCRIPTION  The integrated study of cognitive sciences and neurosciences (i.e. the neural systems underlying cognitive processes). The topics covered include basic neuroanatomy and physiology, neuroimaging methods, and the study of various mental processes linked to brain structure and function in normal human populations, with discussion of the potential relationships between neural circuitry and the formation of internal experience through the integration of sensation, perception, prediction, action, and evaluation.
PSYC 8605  Methods of MRI Experimental Design and Analysis

CREDIT HOURS  3.0
PREREQUISITES  PSYC 8600, NEUR 6330, or PHYS 6710; or consent of instructor
DESCRIPTION  This is a graduate level class that focuses on experimental design and analysis of fMRI studies, structural MRI studies, and DTI. (Same as NEUR 8605.)

PSYC 8610  Functional Human Neuroanatomy and Behavioral Neuroscience

CREDIT HOURS  3.0
DESCRIPTION  Neuroanatomy and neurophysiology topics, including functional neural systems including sensory and motor systems, cortical and autonomic nervous systems. Normal function will contrasted with clinical cases and pathologies.

PSYC 8615  Functional Human Neuroanatomy

CREDIT HOURS  3.0
PREREQUISITES  BIOL 3840 or PSYC 8610, or consent of the instructor
DESCRIPTION  (Same as BIOL 8040 and NEUR 8300.) In-depth study of the neuroanatomy and function of the human central nervous system. Considers neuroanatomical techniques used to study the brain, neuroanatomical basis for the control of sensory and motor systems, as well as cortical, autonomic nervous system, and limbic system anatomy and function. Both normal brain anatomy and pathologies are covered.

PSYC 8616  Neurobiology I: Cellular Neurobiology

CREDIT HOURS  3.0
PREREQUISITES  BIOL 4102 or BIOL 6102 with a B or higher, or equivalent, or consent of instructor
DESCRIPTION  The unique cellular and molecular properties of neurons and how these properties allow neurons to perform their computational tasks. Topics include neuronal excitability, synaptic communication, and neural development. (Same as BIOL 8010 and NEUR 8010.)

PSYC 8617  Neurobiology II: Integrative Neurobiology

CREDIT HOURS  4.0
PREREQUISITES  PSYC 8616 or BIOL 8010 with grade of B or higher, or consent of instructor
DESCRIPTION  (Same as BIOL 8020 and NEUR 8020.) How neurons are organized into neural systems that control behavior. Topics include functional anatomy of sensory systems, sensorimotor integration, central pattern generators, motor and control systems, neuromodulation, neuroethology, and the neural basis of learning and cognition.
**PSYC 8618**: Advanced Behavioral Neuroscience  
**CREDIT HOURS**: 3.0  
**PREREQUISITES**: PSYC 8616 and PSYC 8617, or BIOL 8010 and BIOL 8020, or consent of instructor  
**DESCRIPTION**: (Same as BIOL 8070 and NEUR 8030.) Advanced analysis of functional neural systems involved in the regulation of behavior, emphasizing interactions between limbic, hypothalamic, and cortical brain systems. Topics include: genetic determinants of behavior, behavioral plasticity: learning and memory, reproductive behavior, sleep and biological rhythms, drinking and eating, emotion, aggression, stress, language and cognition, behavioral disorders (thought, mood, stress, and anxiety), and drug abuse.

**PSYC 8620**: Introduction to Clinical Neuropsychology  
**CREDIT HOURS**: 3.0  
**PREREQUISITES**: PSYC 8610 or PSYC 8618, or consent of instructor  
**DESCRIPTION**: (Same as NEUR 8400.) Topics include laterality, handedness, cerebral dominance, basic neuroanatomy, aphasia, neglect, amnesic syndromes, agnosia, alexia, split brain research, and recovery of function.

**PSYC 8625**: Neural Plasticity  
**CREDIT HOURS**: 4.0  
**PREREQUISITES**: NEUR 6010 or BIOL 6102 with grade of C or higher, or equivalent  
**DESCRIPTION**: (Same as NEUR 6110 and BIOL 6110.) Four lecture hours per week. Phenomenology and mechanisms of experience-dependent changes in the nervous system. The course will examine plasticity at many levels of analysis, from synaptic mechanisms to clinical strategies, and from molecular neuroscience to cognitive psychology.

**PSYC 8640**: Psychopharmacology  
**CREDIT HOURS**: 3.0  
**PREREQUISITES**: PSYC 8610, or consent of the instructor  
**DESCRIPTION**: (Same as BIOL 8065 and NEUR 8230.) Biological bases of psychopharmacology, including the locus of action for psychoactive substances and the mechanisms by which these substances modify neural activity and cause a change in mood and behavior. Covers neurophysiology, neurochemistry, and pharmacology of classes of psychoactive drugs used to treat mental disorders, as well as those commonly abused that may or may not have therapeutic uses.

**PSYC 8650**: Psychopathology  
**CREDIT HOURS**: 3.0  
**DESCRIPTION**: Critical review of the classic and contemporary empirical and theoretical literature concerning psychopathology in adults and children.

**PSYC 8662**: Adolescent Development  
**CREDIT HOURS**: 3.0  
**DESCRIPTION**: Theory, research, and emerging trends in adolescent development, emphasizing fundamental transitions (social, cognitive, and physical) and the social-ecological contexts (self-development, gender, family, peers and school, and culture). Both normative and atypical patterns of development will be considered.

**PSYC 8640**: Topics in Neuropsychology: Theories, Methods, and Interventions  
**CREDIT HOURS**: 3.0  
**PREREQUISITES**: PSYC 8620 with grade of B or higher  
**DESCRIPTION**: (Same as NEUR 8705.) Intensive study of the relevant basic and applied literature relevant to a specific topic in neuropsychology, such as language, memory, reading, or executive function.

</table>
PMAP 8010  Social Policy  
**CREDIT HOURS**  3.0  
**DESCRIPTION**  This course introduces students to contemporary social policy questions in the U.S. and how to analyze policy alternatives for addressing these questions. Specific social policy issues are chosen for discussion on the basis of their relevance to current public policy debates.

PMAP 8011  Politics and Policy  
**CREDIT HOURS**  3.0  
**DESCRIPTION**  A course designed to familiarize the student with the scope of policy studies. Particular emphasis will be given to the study of the policy process and the influence of the larger economic, political, and governmental context on public policies, as well as an understanding of the effect of policies on target groups, institutions, and society more generally.

PMAP 8021  Scope and Theory of Planning  
**CREDIT HOURS**  3.0  
**DESCRIPTION**  This course will acquaint students with the history of urban planning in the United States and the legal and administrative context in which planning takes place. It will describe several models of planning processes, and consider their appropriateness under different circumstances, the role of citizen involvement in planning, and planning ethics. Also considered are examples of recent planning practice.

PMAP 8031  Urban Political Economy  
**CREDIT HOURS**  3.0  
**DESCRIPTION**  The conceptual base for and development of public-private partnerships. Includes such community and human resource development partnerships as UDAG and JTPA. Selected case studies will be used.

PMAP 8101  Data Analysis and Visualization  
**CREDIT HOURS**  3.0  
**REQUIREMENTS**  Restricted to MIS CJA students  
**DESCRIPTION**  Students learn about public use datasets and which statistics are appropriate to identify trends and areas of concern. Students also learn how to visualize data to communicate results of data analysis.

PMAP 8111  Public Management and Democracy  
**CREDIT HOURS**  3.0  
**DESCRIPTION**  This course provides students with an introduction to the study, practice, and structure of public administration and management in the United States. Major disciplinary and conceptual foundations of public administration are covered, including theories of organization and bureaucracy, administrative behavior and management, politics and administration, and public policy-making.

PMAP 8121  Applied Research Methods and Statistics I  
**CREDIT HOURS**  3.0  
**DESCRIPTION**  An introduction to methods and statistics for applied research in the public and nonprofit sectors. Topics include the scientific method in applied research, elementary research design, measurement, qualitative research, computer-assisted data analysis, and beginning statistics including descriptive statistics, crosstabulation, introductory inferential statistics, and graphical presentations.
PMAP 8131  Applied Research Methods and Statistics II
CREDIT HOURS  3.0
PREREQUISITES  PMAP 8121
DESCRIPTION  Advanced methods and statistics in applied research. Topics include survey research, experimental and quasi-experimental designs, sampling, and intermediate statistical techniques including analysis of variance, correlation and regression, and time-series analysis. Ethics of applied research in public administration and urban policy are also examined.

PMAP 8141  Microeconomics for Public Policy
CREDIT HOURS  3.0
DESCRIPTION  The purpose of this course is to introduce principles of microeconomics to students for use when analyzing public policy for effective public administration and planning. The course will consider basic concepts of microeconomic principles including market failure, public goods, supply and demand, pricing, and externalities. These concepts will be presented using practical examples involving the public sector, and students will practice application through problem solving.

PMAP 8151  Leadership and Organizational Behavior
CREDIT HOURS  3.0
DESCRIPTION  Examination and application of theories of leadership and organizational behavior, with attention to communication, motivation, group dynamics, organizational change, leadership and decision making in public organizations.

PMAP 8161  Public Budgeting and Finance
CREDIT HOURS  3.0
PREREQUISITES  PMAP 8111 or PMAP 8011, and PMAP 8121, or consent of the instructor
DESCRIPTION  A survey of the practice and problems of modern fiscal management in government with special emphasis on budgetary procedures and the means of budgetary analysis.

PMAP 8171  Public Management Systems and Strategies
CREDIT HOURS  3.0
DESCRIPTION  Analysis of contemporary approaches to the management of public and nonprofit organizations focusing primarily on problem-solving strategies and techniques for use at the executive and operating levels.

PMAP 8201  International Development and Assistance NGOs
CREDIT HOURS  3.0
DESCRIPTION  This course studies relief and development NGOs in poor countries. The course begins with an overview of the state of the world economy and strategies for economic growth. It then turns to such topics as the role of NGOs in economic development and the formation of social capital, particularly within the context of globalization and democratization; relationships between NGOs, businesses, and national and international public agencies; and the challenges in accountability, advocacy, management and leadership.
PMAP 8203  Nonprofit Advocacy, Law, and Policy
CREDIT HOURS  3.0
DESCRIPTION  Policy directs and shapes the activities of nonprofits in many ways including how they structure themselves, raise funds, and advocate for policy change. This course examines both how policy influences nonprofits as well as how nonprofits impact policy. It will address the role of nonprofit organizations in the public policy process including advocacy strategies and techniques and examine in turn how laws shape nonprofit involvement in that process. The course will also review state and federal policy that enables and regulates nonprofits including legal forms, tax exemption, fundraising regulations, and employee compensation. Students will gain an understanding of where policy intersects with nonprofit activities and learn how to operate within a basic nonprofit legal framework.

PMAP 8210  The Nonprofit Sector
CREDIT HOURS  3.0
DESCRIPTION  The course provides an overview of the nonprofit sector in society with a consideration of the nonprofit sector's relationship to the state and to for-profit sectors. Attention will be given to the social settings in which nonprofit organizations exist, and to contemporary public policy issues regarding the nonprofit sector.

PMAP 8213  Financing and Resource Development for Nonprofit Organizations
CREDIT HOURS  3.0
PREREQUISITES  PMAP 8141 and PMAP 8210 or consent of instructor
DESCRIPTION  Economic sustainability and effective pursuit of social missions are two of the principal challenges facing contemporary nonprofit leadership. Addressing these challenges requires leaders and managers to be knowledgeable and adept at securing adequate and appropriate sources of income for their organizations. Nonprofit organizations support themselves through many different sources including charitable gifts and grants, government grants and contracts, earned income from fees, memberships and sponsorships, returns on investment, volunteer labor, gifts-in-kind and other sources. This course is intended to illuminate the theoretical rationales and practical considerations involved in developing and utilizing particular sources of income and in selecting appropriate combinations or portfolios, so that nonprofit organizations can effectively advance their particular missions, sustain the infrastructure of their organizations, remain financially healthy, and manage risk and change.

PMAP 8221  Fundraising for Voluntary Nonprofit Organizations
CREDIT HOURS  3.0
DESCRIPTION  A study of fundraising cycles and techniques for nonprofit volunteer organizations; fundraising through volunteers; board development and management for fundraising and public relations.
PMAP 8223 Nonprofit Human Resources
CREDIT HOURS 3.0
PREREQUISITES PMAP 8210
DESCRIPTION The purpose of this course is to examine the theoretical and practical aspects of managing paid and voluntary human resources in nonprofit organizations. The course reviews basic issues in nonprofit human resource management, including recruitment, retention and compensation, and explores several specialized issues, such as performance, motivation, diversity, and conflict management. The course also reviews theory and recent research on attracting, motivating, and managing volunteers. Finally, the course explores emerging trends in nonprofit human resources, including the effects of recent public policy changes on the nonprofit labor force.

PMAP 8232 Social Innovation and Enterprise
CREDIT HOURS 3.0
DESCRIPTION Social enterprise couples the resources generated by market activities with the social ambitions of nonprofit organizations. Spurred on by the social entrepreneurship movement, social enterprises transform communities through highly innovative problem solving. Their purpose is to carve out new routes to sustainable solutions to social problems on local, national and international levels. This course will examine social enterprises from both nonprofit and business perspectives and provide students with a broad overview of their purposes, forms, funding, management approaches, and impact.

PMAP 8251 Grant Writing & Management
CREDIT HOURS 3.0
DESCRIPTION This course introduces students to the world of grant writing and management and provides them with an opportunity to experience writing actual grants. Students will learn the process of identifying prospective funders, developing relationships with funders, understanding the basics of writing grants, submitting proposals, working as a collaborative, and preparing for the follow up. Students will apply course learning to write and prepare actual grant proposals.

PMAP 8261 Nonprofit Financial Management
CREDIT HOURS 3.0
DESCRIPTION This course is designed to teach students how to use financial information to make decisions in nonprofit organizations. The first half of the course is devoted to financial accounting, focusing on understanding and using the information found on financial statements. The second half of the course focuses on using principles of financial management to make operating and capital budgeting decisions and to analyze long-term financial options.
PMAP 8271 Disaster Policy and Emergency Management

CREDIT HOURS
3.0

DESCRIPTION
This course focuses on the design of disaster policies and implementation of emergency management programs to manage hazards and to deal with natural, technological, and other man-made disasters. Emphasis is on the roles of public agencies, nonprofit organizations, and private firms, as well as volunteers, in disaster mitigation, preparedness, response, and recovery efforts in the U.S. and other nations and the development of national and international standards for emergency management programs. Case studies are drawn from recent focusing events, such as the 9/11 attacks, the 2004 Sumatran tsunami, and the Hurricane Katrina disaster, and students are introduced to the profession of emergency management.

PMAP 8281 Disaster Relief and Humanitarian Assistance

CREDIT HOURS
3.0

DESCRIPTION
This course focuses on national and international disaster relief, from the politics and economics of international relief and national disaster assistance efforts to the logistics of relief operations and managing volunteers. The foci are the roles of governmental and nongovernmental organizations in disaster relief, policy issues in complex emergencies (e.g., security for relief workers in natural disasters complicated by political conflict), the development of sustainable assistance programs, links between humanitarian assistance and sustainable development, and the development of international standards for humanitarian assistance, such as the Sphere Project.

PMAP 8300 Planning for Resilient Communities

CREDIT HOURS
3.0

DESCRIPTION
The linkage between population growth, urbanization patterns, natural hazards and exposure has become increasingly obvious with mounting disasters. How do we make communities more resilient to disasters, and what is the role of planners and policy-makers. Students learn about the social, environmental and economic impacts of disasters on communities, and how to formulate planning and policy strategies for to promote community resiliency.

PMAP 8311 Urban Demography and Analysis

CREDIT HOURS
3.0

DESCRIPTION
This course addresses the role of demography in urban policy and planning, and the impact of a changing population and their activities on our cities and communities. This course makes in-depth use of the U.S. census data in deriving measurements and conducting analysis on regional and local economic and social conditions with emphasis on both the spatial and temporal perspectives. Substantive topics to be discussed include racial/ethnic composition, immigration, housing, employment, poverty and economic development, transportation, as well as land use and urban spatial structure.

PMAP 8321 Economic Development Policy

CREDIT HOURS
3.0

DESCRIPTION
An overview of recent literature and examples of options available to communities as they plan and finance economic development activities.
**PMAP 8331  Urban Development and Sustainable Cities**

**CREDIT HOURS**
3.0

**DESCRIPTION**
Causes and consequences of urban development and growth management are introduced in the light of economics and public policy theories, within the context of legal and constitutional framework. In addition to prevalent growth patterns (e.g. sprawl vs. smart growth), issues related to the physical and environmental dimension of urban development such as infrastructure, sustainable environment, housing, transportation are discussed in detail.

**PMAP 8341  Urban Transportation Planning**

**CREDIT HOURS**
3.0

**DESCRIPTION**
This course will cover automobile, public transit, airport, bicycle, pedestrian, and non-traditional transportation modes. Land use, sprawl, demand management, coordinated human services, and project prioritization are topics which will be covered.

**PMAP 8351  Local Government Management**

**CREDIT HOURS**
3.0

**DESCRIPTION**
An examination of the challenges governing America's urban areas from a public management perspective. A special effort will be made to integrate course materials with developments in the Atlanta metropolitan area.

**PMAP 8361  Housing Markets and Housing Policy**

**CREDIT HOURS**
3.0

**DESCRIPTION**
In-depth examination of housing market dynamics and processes, including racial and economic segregation, gentrification, affordability, housing finance, and other phenomena. Study of alternative local, state, and federal policies, both historical and contemporary, aimed at reducing housing problems, and providing for fair and affordable housing and sustainable community development.

**PMAP 8411  Law for Public Managers**

**CREDIT HOURS**
3.0

**DESCRIPTION**
This course introduces students to a range of legal issues relevant to employees in public organizations. Attention is given to the legal rules and principles that guide public managers in administering their organizations. Also considered is how laws and regulations impact current working relationships between government and private concerns. Other issues involve which judges enforce government contracts and agency regulations.

**PMAP 8501  Managing Public Money**

**CREDIT HOURS**
3.0

**PREREQUISITES**
PMAP 8161

**DESCRIPTION**
This course includes discussion of topics that are relevant to budgeting and financial management in the public sector such as capital investment decisions, cost-benefit and cost-effectiveness analysis, cash flow management, debt management, and the evaluation of organizational financial condition.

**PMAP 8505  Local Government Debt Issuance and Administration**

**CREDIT HOURS**
3.0

**PREREQUISITES**
PMAP 8501 or PMAP 8161 or consent of the instructor

**DESCRIPTION**
A survey of the instruments, procedures and challenges facing local government debt administrators.
PMA 8521  Evaluation Research: Design and Practice
CREDIT HOURS  3.0
PREREQUISITES  PMA 8121 or consent of the instructor
DESCRIPTION  An examination of the techniques and practice of program evaluation for effectiveness in program administration. The course contrasts deductive and inductive approaches. The instructor illustrates the advantages of using evaluation as a mechanism for program improvement.

PMA 8531  Policy Analysis
CREDIT HOURS  3.0
PREREQUISITES  PMA 8131 or consent of the instructor
DESCRIPTION  This course provides focused study about policy analysis and process techniques. This course concentrates on policy development decision strategies. Students will conduct problem solving exercises using a number of decision methods appropriate to policy analysis and evaluation. Students will leave the course with an understanding of the policy-making process at all levels of government and a knowledge of different techniques available to develop, implement, and assess policy initiatives.

PMA 8561  GIS Applications
CREDIT HOURS  3.0
DESCRIPTION  Geographic Information System (GIS) technology is widely used for planning and policy analysis in government agencies, and in the private and non-profit sectors. This introductory course provides students with a good conceptual foundation in data types & sources, coordinate systems, map design, spatial analysis and GIS applications. Students also learn the basic functions of ArcGIS software to integrate data from a variety of sources, conduct basic spatial analysis and produce quality map products.

PMA 8899  Causal Inference and Evidence-based Policy
CREDIT HOURS  3.0
PREREQUISITES  A graduate-level statistics course that covers probability theory, hypothesis testing and linear regression
DESCRIPTION  If unsure about prerequisite, contact the professor. To answer cause-and-effect questions, a counterfactual model of causality and a unified methodological framework has been developed over the last three decades. This class aims to teach students to apply and interpret the counterfactual model and associated designs for answering policy-relevant empirical questions. Students will gain a deeper understanding of, and connections among, approaches to answering causal questions and of the nature of evidence itself. The topics comprise experimental designs and a suite of observational designs, including conditioning designs, partial identification designs, multiple control group designs, instrumental variable designs, regression discontinuity designs, synthetic control designs and tests of known effects and sensitivity tests to hidden bias. These topics are examined in a broad range of policy domains (poverty, planning, economic development, politics, crime, social work, health, public finance, environment, and others).

<td>PMAP 8900</td>
<td>Capstone: Advanced Projects for Public and Nonprofit Organizations</td>
<td>3.0</td>
<td></td>
<td>This course is a capstone for graduate students pursuing careers in public service. Students work on projects in teams to address important problems facing public and nonprofit organizations using the knowledge and skills gained in prior coursework. Projects vary based on the needs of the organization, but all require implementing a work plan with the client, collecting and analyzing data, developing findings and recommendations, writing a final report, and presenting findings to the client. Students must be in the last two semesters of their graduate program to take the course.</td>

PMAP 8916  Comparative Perspectives in Public Management and Policy

CREDIT HOURS  1.0 - 3.0

DESCRIPTION  This course explores processes, issues and practices fundamental to Public Management and Policy through the study of international systems. The course will be offered as a study abroad program or in partnership with an international university through an exchange or a dual degree program.

PMAP 8921  Special Topics

CREDIT HOURS  3.0

PREREQUISITES  Consent of instructor

DESCRIPTION  A seminar designed to explore in depth the most recent issues and/or research results in a particular area of public administration, urban studies, or human resources development. The course can be repeated when topics vary.

PMAP 8941  Internship

CREDIT HOURS  3.0

REQUIREMENTS  Requires consent of the instructor

DESCRIPTION  Consult the appropriate internship manual and application for availability and requirements specific to degree programs. This course involves supervised field placement for the purpose of utilizing and extending the theories, concepts, and practices acquired in previous courses.

PMAP 8945  Internship II

CREDIT HOURS  3.0

PREREQUISITES  Departmental approval required for this course

DESCRIPTION  Consult the appropriate internship manual and application for availability and requirements specific to degree programs. This course involves supervised field placement for the purpose of utilizing and extending the theories, concepts, and practices acquired in previous courses.

PMAP 8981  Practicum

CREDIT HOURS  3.0 - 6.0

PREREQUISITES  Consent of the instructor

DESCRIPTION  The practicum is supervised application practice either in the student’s own work setting or an approved field practice site. May include a project.

PMAP 8991  Thesis

CREDIT HOURS  3.0 - 6.0

PREREQUISITES  Consent of the instructor

DESCRIPTION  See graduate catalog for requirements and thesis process. Individual study of a selected topic under the direction of the student’s faculty adviser or other designated faculty member which leads to a paper acceptable to a thesis committee composed of faculty members.

PMAP 9111  Advanced Research Methods I

CREDIT HOURS  3.0

DESCRIPTION  This course will cover advanced analytical and modeling methods. Topics may include: nonparametric statistical methods, path analysis, principal component and factor analysis, or econometrics.

PMAP 9121  Advanced Research Methods II

CREDIT HOURS  3.0

PREREQUISITES  PMAP 9111

DESCRIPTION  This course will cover experimental and quasi-experimental design, a survey of research methods and evaluation. Case study and qualitative analysis may also be included.
PMAP 9131 Research Seminar in Public Policy
CREDIT HOURS 3.0
DESCRIPTION This course will familiarize students with standards for published research and the variety of research methods used in public policy. The course will also provide students with practice in critiquing and writing reviews of research papers. The chief requirement is to design and execute original empirical research.

PMAP 9141 Advanced Topics in Program Evaluation
CREDIT HOURS 3.0
DESCRIPTION This course provides an in-depth examination of the field of program evaluation. The course covers the development of the evaluation field, including its history, theory, and principles, and the techniques of evaluation, including program theory and logic models, evaluation research designs, cost-effectiveness and cost-benefit analysis, performance monitoring and organizational scorecards, and trends in the field.

PMAP 9151 Scope and Theory of Public Policy
CREDIT HOURS 3.0
DESCRIPTION This course is designed to provide doctoral students a detailed familiarity with the context of public policy studies, including both institutions and practices. It will provide an overview of the core literature, including: intellectual bases of public policy studies, the history of public policy studies, analysis of institutional structure, and other topics.

PMAP 9171 Logic of Policy Inquiry
CREDIT HOURS 3.0
DESCRIPTION This course presents the conceptual foundations of models of policy inquiry. Topics include the scientific, rational-actor, and ethical models. The ethical values underlying cost benefit analysis, pareto-optimal models, and market models are also examined.

PMAP 9181 Dissertation Colloquium
CREDIT HOURS 3.0
DESCRIPTION This course is a seminar focusing on dissertation research preparation. It provides discussions of dissertation topics and research strategies, and assistance to students in writing and public presentation skills. The course culminates with each student conducting a public colloquium in which they present their preliminary dissertation proposals to other students and faculty.

PMAP 9211 Applying Research to Policymaking: Examples from Health Care Policy
CREDIT HOURS 3.0
DESCRIPTION The goal of this course is to understand the relationship between research and policy so that students may contribute more effectively to both in their careers. Through a series of case studies taken from health care policy, the class will explore the relevance of good research to various steps in the policy-making process. We will examine when research influences policy, when it does not, and why.

EDRD 6600  Introduction to Materials and Methods in Reading Instruction
CREDIT HOURS  3.0
DESCRIPTION  Intended for students who do not have a background in education or who are not majoring in language and literacy education. This course introduces students to classroom approaches to reading instruction. Foci include examination of how children learn to read and analysis of specific strategies and materials used to teach reading. Students are involved in observing and analyzing literacy programs in field experience settings.

EDRD 7210  Family and Community Literacies
CREDIT HOURS  3.0
DESCRIPTION  This course focuses on scholarship by literacy and language researchers who utilize diverse methodologies and practical applications in understanding families' literate and community lives and learning. This course involves learning and working with diverse populations, in and out of school contexts, through nonprofit sectors and parent, family and community agencies for human learning and development. In addition, this course allows students to consider critical contemporary perspectives, related to family and school involvement, the role of class and culture in literacy, popular culture and digital and social media.

EDRD 7260  Early Literacy Development and Instruction
CREDIT HOURS  3.0
DESCRIPTION  Students examine theories and research on language and literacy development in childhood. Psychological, social, and cultural factors that influence early literacy development are related to educational implications for students' understanding and effective use of language and literacy. Instructional approaches for developing phonemic awareness, phonics, fluency, vocabulary, and comprehension abilities of beginning readers are explored. Cross-listed with ECE 9420.

EDRD 7550  Literacy Assessment and Curriculum Development
CREDIT HOURS  3.0
DESCRIPTION  This course involves advanced study of the planning and managing of classroom literacy events based on assessment information. Emphases include a supervised classroom experience where students (1) examine ways of recording, analyzing, and using assessment information in daily classroom instruction to inform curriculum development; (2) consider cultural, psychological, social, and political issues associated with traditional ability groups and alternative approaches to ability grouping that can be implemented to meet students' needs; and (3) understand and assess reading programs.

EDRD 7600  Theory and Pedagogy in the Study of Literacy
CREDIT HOURS  3.0
DESCRIPTION  This course addresses the theories, methodologies, and materials used to teach reading and writing instruction, language development, and literacy strategies. Students will learn about the theories and practical application for teaching reading to all students including those representing diverse cultural and linguistic communities.

<td>RE 8000 or RE 8020 or RE 8030</td>
<td>Presenting information on valuation parameters for Real Estate Investment Trusts and other public real estate companies, this course focuses on the relationship of various performance metrics, sources and uses of capital, and management decisions to overall entity valuation. Underlying concepts associated with cash flow analysis, net present value, internal rate of return and yield capitalization are treated. Different sectors within the real estate investment arena as well as tools and resources available to conduct relative valuations are incorporated into discussions. In-class illustrations will be used to highlight analytical techniques.</td>
</tr>
</tbody>
</table>
RE 8040  Commercial Real Estate Law & Negotiations

CREDIT HOURS  3.0
PREREQUISITES  None
DESCRIPTION  This course focuses on legal foundations to value and opportunities to enhance value through negotiations, all from the perspective of a commercial property owner. Topics include negotiating purchase contracts, leases, partnership agreements, loan documents, construction agreements, changes to land use regulation, as well as negotiating with lenders when delinquent. Students engage in negotiations that are designed to simulate the process of acquiring commercial property.

RE 8050  Commercial Real Estate Development

CREDIT HOURS  3.0
PREREQUISITES  None
DESCRIPTION  This course focuses on ground-up and value-add development projects for commercial real estate. Students learn the development process, including site selection, design, cost analysis, market feasibility, capitalization, construction, marketing, leasing, and stabilization or sale. Students gain understanding for the economic fundamentals that affect development feasibility, which are distinct for each property type. Topics include land development, multifamily, industrial, office, retail, and mixed-use projects.

RE 8060  Commercial Real Estate Market Analysis

CREDIT HOURS  3.0
PREREQUISITES  None
DESCRIPTION  This course focuses on analyzing market supply and demand models to evaluate the feasibility of a proposed commercial real estate project. Students examine the role of location and market area within the context of economic cycles. Students develop skills for sourcing market data, applying research techniques, forecasting market capture and project absorption. Topics include market analysis for multifamily, industrial, office, retail, hospitality, and mixed-use projects.

RE 8070  Quantitative Analysis for Real Estate

CREDIT HOURS  3.0
PREREQUISITES  RE 8020
DESCRIPTION  Responding to the needs of real property analysts often operating in environments of data poverty, this course develops the student’s skills in quantitative analysis. Standard tools, such as parametrical statistical estimation and linear regression, are examined to determine their relevance to problems confronted in real estate. Projects include the analysis of large electronic databases. The course also introduces nonparametric and other small sample tools not typically encountered in the business curriculum but which are of critical importance to real estate.
RE 8080  Real Estate Project Planning and Development
CREDIT HOURS 3.0
PREREQUISITES RE 8020 or RE 8030 and RE 8060
DESCRIPTION This course employs specific techniques of real property analyses and project planning to solve problems in real property projects. The student uses real estate financial and market analyses and physical and legal/regulatory aspects of real property to address specialized problems and solutions for real property projects. Focusing on the pre-architectural phase of development management, this course considers the impact of technological changes on development and construction along with the impact of changing technical and economic activities on product design and development. Traditional and technical databases and resources such as the Internet are incorporated in the class format.

RE 8100  Commercial Real Estate Asset Management
CREDIT HOURS 3.0
PREREQUISITES None
DESCRIPTION This course focuses on the ownership and operation of commercial real estate assets. Students acquire a framework for evaluating the major asset management decisions faced by a commercial property owner over the holding period. Topics include the acquisition decision, capital and ownership structures, leasing and property management, corporate real estate, asset enhancement, dispositions, and portfolio management.

RE 8200  Leading the Real Estate Enterprise
CREDIT HOURS 3.0
PREREQUISITES None
DESCRIPTION This course addresses leadership in the real estate industry. Students will examine and apply theories of leadership with focus on motivation, group dynamics, and organizational change. Participants gain experiential knowledge of practices that are effective and ineffective. The lives, philosophies, and business experiences of successful real estate leaders will be examined. Assessments of participants’ leadership-relevant skills and characteristics will be used to provide guidance on how to improve as leaders. Skills improvement comes from enhanced insight and knowledge, activities conducted in class, as well as from out-of-class tasks.

RE 8389  Directed Readings in Real Estate
CREDIT HOURS 1.0 - 3.0
PREREQUISITES RE 8020 and RE 8030 and RE 8040 and RE 8050 and RE 8060; and consent of instructor, good academic standing
DESCRIPTION
**RE 8400 Commercial Real Estate Investments**

**CREDIT HOURS**
3.0

**PREREQUISITES**
RE 8020

**DESCRIPTION**
This course focuses on investment strategies for commercial real estate. Students learn about commercial real estate’s positioning as an alternative asset class in the context of the broader investment universe, and how this affects capital sourcing. Students gain understanding for the commercial real estate investment process, including underwriting deals, financial analysis, and due diligence. Students examine property type-specific operating nuances and risk characteristics. Students learn about different investment strategies in commercial real estate (core, value-add, opportunistic), and evaluate whether the market context for supply-demand fundamentals aligns with an investment thesis.

**RE 8450 Taxation of Real Estate Investment**

**CREDIT HOURS**
3.0

**PREREQUISITES**
RE 8000 or RE 8020 or TX 8020

**DESCRIPTION**
In this course the student examines the income tax codes of the federal government and the state of Georgia. These various subparts of these tax codes are initially review and analyzed and then placed into the context of real estate equity investment analysis. Subjects shall include, but not limited to: basis, depreciation, at-risk rules, passive loss rules, capital gain/loss treatment, like-kind exchanges, installment sales, various tax entity classifications, estate and trust tax considerations.

**RE 9480 Seminar in Real Estate Behavioral Research**

**CREDIT HOURS**
3.0

**PREREQUISITES**
RE 8040 or RE 8210 or RE 8400

**DESCRIPTION**
This course familiarizes the student with the behavioral approach to research in real estate. Framework and theory of behavioral research are presented, as are methods of data development and evaluation. Current research is surveyed, and the student is required to develop a dissertation-quality research proposal.

**RE 9490 Seminar in Real Estate Finance and Land Economics Research**

**CREDIT HOURS**
3.0

**PREREQUISITES**
RE 8020 or RE 8030 or MGS 9940 or MGS 9950, and MGS 9960; or consent of instructor

**DESCRIPTION**
This seminar is designed for students to develop skills in research methodology and gain further insights into real estate finance and land economics. The students develop skills in basic inquiry, formulating problem statements, general and working hypotheses, and the delineation of appropriate research methods. The Ph.D. candidate investigates alternative research techniques, with an emphasis on positive logical and empirical research. The course also entails critical analysis of existing research in real estate economics.
RE 9580  Seminar in Real Estate Research I
CREDIT HOURS  3.0
DESCRIPTION  This seminar will focus on publishing real estate research in high quality journals. Students will develop the skills to write an abstract, do an exhaustive literature search, use appropriate methodology, and locate data, analyze results, and formulate conclusions. Students will also be instructed in how to respond to journal editors and journal referees. As a logical output from the course, the student will be required to submit a paper to a top journal for review.

RE 9590  Seminar in Real Estate Research II
CREDIT HOURS  3.0
DESCRIPTION  This seminar will focus on publishing real estate research in high quality journals. Students will develop the skills to write an abstract, do an exhaustive literature search, use appropriate methodology, locate data, analyze results, and formulate conclusions. Students will also be instructed in how to respond to journal editors and journal referees. As a logical output from the course, the student will be required to submit a paper to a top journal for review.

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RELS 6030</td>
<td>Introduction to Human Rights</td>
<td>3.0</td>
<td>Introduces students to historical and contemporary debates around human rights. Drawing on scholarship from disciplines such as history, anthropology, sociology, political philosophy, religious studies, and literature, students will review case studies in order to bring different scholarly perspectives to bear on human rights claims in a globalized world.</td>
</tr>
<tr>
<td>RELS 6040</td>
<td>Augustine and Aquinas</td>
<td>3.0</td>
<td>(Same as PHIL 6040.) Selected works of the major religious philosophers of the Middle Ages with emphasis on their views on topics such as God, sin, human nature, free will, faith, and politics.</td>
</tr>
<tr>
<td>RELS 6080</td>
<td>Religious Dimensions in Human Experience</td>
<td>3.0</td>
<td>Examines religions as integral aspects of human cultures. Integrates theoretical and methodological approaches to religious studies that center on human experiences, expressions, practices and beliefs with examples from particular historical and geographical locations. Topics and source materials may include material culture, archaeology, visual culture, literature, aesthetics, film and ethnography.</td>
</tr>
<tr>
<td>RELS 6090</td>
<td>Jesus Inside and Outside the Gospels</td>
<td>3.0</td>
<td>Comparative study of portrayals of Jesus as they have evolved over the past two millennia. Topics may include the differences between the Synoptic and Johannine materials, non-canonical gospels, the way Jesus is depicted in texts from other religions (e.g., Qur’an, Gandhi’s “What Jesus Means to Me”), and visual depictions of Jesus, including in modern media such as film and the internet.</td>
</tr>
<tr>
<td>RELS 6100</td>
<td>Religious Studies Study Abroad</td>
<td>3.0</td>
<td>Provides students with opportunities to study religious life and practice outside of the United States. Includes travel to selected sites for visitation and study led by faculty familiar with the site's history and religious significance. Also includes direct supervision of students' on-the-ground experience of religious life around the globe. Open to majors and non-majors. No foreign language necessary; instruction will be in English. Enrollment must be approved by program director.</td>
</tr>
<tr>
<td>RELS 6200</td>
<td>Religions in America</td>
<td>3.0</td>
<td>Religion in the United States, from colonial times to the present. Introduces historical and social contexts for religion as well as the impact of religions, which may include Native American religions, African-American religions, Christianity, Islam, and Asian religions.</td>
</tr>

<td>--------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>RELS 6225</td>
<td>Psychology and Religion</td>
<td>3.0</td>
<td>This course will survey the fields of psychology and religious studies. Addressing this tension, our course is designed to create a constructive, respectful dialogue between both perspective. Can we conceive ways in which religious behavior and the study of religion may inform, or even construct, psychological theory. Conversely, how do psychological perspectives and cognitive science tell a richer, deeper story of what is happening in religious experiences. We will consider postmodern and qualitative critiques to such investigations, as well as the emerging field in &quot;explaining&quot; religion through cognitive science and evolutionary theory. This course will also consider Eastern forms of religious expression and spirituality.</td>
</tr>
<tr>
<td>RELS 6240</td>
<td>Death and the Afterlife</td>
<td>3.0</td>
<td>Introduction to the general beliefs and practices associated with death and the afterlife in several world religious traditions. Topics may include religious perspectives on the process of dying, treatment of the body, methods of grieving, views of suicide and martyrdom, and contemporary issues surrounding death and the afterlife.</td>
</tr>
<tr>
<td>RELS 6245</td>
<td>Cognitive Foundations of Religion</td>
<td>3.0</td>
<td>This course will explore the neural foundations and cognitive mechanisms of religious behavior and experiences. This course will also look at the evolutionary development of religion, the more recent findings in cognitive processing of particular religious beliefs, and the neural imaging of religious experiences.</td>
</tr>
<tr>
<td>RELS 6250</td>
<td>African-American Religion</td>
<td>3.0</td>
<td>(Same as AAS 6090.) Survey of the development of African-American religion from colonial times to the present, including an examination of both theological arguments and spiritual experiences.</td>
</tr>
<tr>
<td>RELS 6255</td>
<td>Religion, Race, Nation</td>
<td>3.0</td>
<td>From colonialism to black nationalism to globalization, how do the three issues of religion, race, and nation affect each other. How has religious thought dealt with issues of race, and how has the concept of race been shaped by religious thought. How do racial and religious communities differ. We will approach these questions using theory, world literature, and film.</td>
</tr>
<tr>
<td>RELS 6260</td>
<td>Religion and Literature</td>
<td>3.0</td>
<td>(Same as ENGL 6260.) Examines how religious institutions, beliefs, and values have been presented in and challenged within novels. Readings include works by authors from various religious communities as well as theoretical work done by scholars working in the field of religion and literature.</td>
</tr>
<tr>
<td>RELS 6270</td>
<td>Women and Religion</td>
<td>3.0</td>
<td>(Same as WGSS 6370.) Multicultural exploration of the role of women and female divinities in diverse religious traditions; readings from ancient myths to contemporary feminist theology.</td>
</tr>
</tbody>
</table>
RELS 6281  Racial Thought in Religion and Philosophy
CREDIT HOURS  3.0
DESCRIPTION  This course will evaluate the logic of racial thought, its presence in religion and philosophy, and the difficult process of countering the resulting forms of racism that structure minds and lives.

RELS 6290  Pilgrimage
CREDIT HOURS  3.0
DESCRIPTION  Exploration of the central role played by pilgrimage in world religious traditions, including study of its vital social and religious functions. Examples from Judaism, Christianity, Islam, Hinduism, Buddhism, as well as theoretical readings on the phenomenon of pilgrimage.

RELS 6301  Animals and Religion: Between Animals and Gods
CREDIT HOURS  3.0
DESCRIPTION  Are people born to sort, organize, classify, and order their environments. Do we impose order on nature, or do we observe an order inherent in nature. To what degree are our systems of classification culturally dependent. How do people negotiate competing ways of ordering the world. In this course, you will explore questions like these in relation to two populations against which we humans define ourselves: animals and gods.

RELS 6400  Internship in Religious Studies
CREDIT HOURS  3.0
DESCRIPTION  Supervised worked coupled with academic instruction. Students may propose internships they have been able to arrange (although these must be approved by the department faculty member supervising the internship and the undergraduate or graduate director, as appropriate). Students may also choose from several internship opportunities established by the department, including internships in the media, non-profit administration, business, and government.

RELS 6450  Modern Judaism
CREDIT HOURS  3.0
DESCRIPTION  Key issues and historical events shaping Judaism in the modern world, including Zionism, the development of Jewish denominations, the Holocaust, Middle East conflict, women's roles in Jewish life, and the development of Judaism in the United States. No previous knowledge of Judaism is required; all readings are in English.

RELS 6460  Judaism in the South
CREDIT HOURS  3.0
DESCRIPTION  Examination of the historical and cultural development of Judaism in the American south. Topics may include Jewish immigrants, issues of assimilation, Jews and the Civil War, Jewish involvement in the Civil Rights Movement, the Leo Frank case, the Temple bombing in Atlanta, and contemporary issues in Southern Jewish life.
RELS 6465  |  Religion in the American South  
CREDIT HOURS  |  3.0  
DESCRIPTION  |  Examines the historical and cultural development of Religion in the American South. Students will explore the increasing religious diversity in the New South and discuss the ways in which southern religious values have shaped conversations on race, sex, gender, politics, nationalism, science, and social reform.

RELS 6470  |  Martin Buber: His Thought and Influence  
CREDIT HOURS  |  3.0  
DESCRIPTION  |  An exploration of Buber's writings on subjects such as Hasidic folklore, Asian thought, dialogical philosophy, and Middle Eastern politics, with consideration of how his work has been received both inside and outside of Jewish circles.

RELS 6480  |  Modern Islam: Tradition & Transformation  
CREDIT HOURS  |  3.0  
DESCRIPTION  |  The purpose of this course is to understand the Islamic tradition in the contemporary world through a study of its history, society, institutions, as well as its various relationships to non-Muslim societies and cultures. The task is to try to gain familiarity with the multiple manifestations and transformations of Islam from the pre-modern to the modern periods, with an emphasis on the changes brought about by the rise of European hegemony and colonial modernity. As a survey, the course will review broad socio-historical patterns in order to give students the ability to better assess a range of contemporary issues related to Islam as well as provide a basis through which further investigations can be made.

RELS 6490  |  Topics in Judaism  
CREDIT HOURS  |  3.0  
DESCRIPTION  |  Examination of selected topics in Judaism. May be repeated if topic varies.

RELS 6500  |  Ethics of Violence  
CREDIT HOURS  |  3.0  
DESCRIPTION  |  In this course we will work our way through theoretical, ethnographic and fictional texts in order to explore the different ways in which violence has been examined as a dimension of human experience.

RELS 6570  |  Special Topics in Islam  
CREDIT HOURS  |  3.0  
DESCRIPTION  |  Investigation of a specific theme, figure(s), or text(s) within Islam, such as Islamic ethics, historical portrayals of Muhammad, or the Nation of Islam. May be repeated if topic varies.

RELS 6580  |  Life of Muhammad  
CREDIT HOURS  |  3.0  
DESCRIPTION  |  Study and contrast of various perspectives of the life of the Prophet Muhammad, including medieval Muslim hagiographies, medieval European polemics, and modern reinterpretations by both Muslims and non-Muslims.

RELS 6610  |  Hinduism  
CREDIT HOURS  |  3.0  
DESCRIPTION  |  Introduction to the Hindu gods and goddesses, Hindu temple and domestic worship, and key themes in modern Hinduism. Will include an overview of the development of Hindu thought and practice from ancient times to the present.
**RELS 6615**  
**Introduction to Buddhism in Asia and the West**  
**CREDIT HOURS**  
3.0  
**DESCRIPTION**  
This course offers a selective historical survey of the Buddhist traditions in India, Southeast Asia, Tibet, China, Japan, and North America. Topics include the life and image of Buddha, the four noble truths, the philosophy of emptiness, the discipline of meditation, ethics and popular practice, devotional cults, and the concept of nirvana.

**RELS 6620**  
**Introduction to Daoism, Confucianism, and the Religions of China**  
**CREDIT HOURS**  
3.0  
**DESCRIPTION**  
Selective historical survey of the Daoist, Confucian, Buddhist, and folk traditions of China. Topics will include gods and goddesses, ritual, questions of human nature, ethics, death and the afterlife, and mysticism.

**RELS 6625**  
**Introduction to Zen Buddhism, Shinto, and the Religions of Japan**  
**CREDIT HOURS**  
3.0  
**DESCRIPTION**  
Selective thematic survey of the Shinto, Buddhist, and folk traditions of Japan, with a special emphasis of Zen Buddhism. Topics include attitudes toward nature, the interpenetration of religion and the arts, monasticism and meditation practices, modern Zen philosophy, new religious movements, and the influence of the West.

**RELS 6630**  
**Comparative Study of Mysticism**  
**CREDIT HOURS**  
3.0  
**DESCRIPTION**  
In-depth study of mystical texts and traditions, with special attention given to theoretical and methodological inquiry. Readings drawn from a range of traditions and historical periods, as well as from works in contemporary critical theory in the study of religion.

**RELS 6645**  
**Religion & Sex in Pop Culture**  
**CREDIT HOURS**  
3.0  
**DESCRIPTION**  
Explores religion and sexuality in forms of American popular culture such as music, television, motion pictures, fashion, print/nonprint media, and the internet. Students will also examine how popular culture has shaped religious debates about sexuality and been shaped by religious values.

**RELS 6650**  
**Religion and Ethics**  
**CREDIT HOURS**  
3.0  
**DESCRIPTION**  
Study of the relation between religion and morality, including both Eastern and Western religious perspectives. Topics may include such issues as warfare, social justice, sexual ethics, and issues in modern medicine.

**RELS 6660**  
**Ethics in Health and Medicine**  
**CREDIT HOURS**  
3.0  
**DESCRIPTION**  
In-depth examination of the moral and ethical concerns found in healthcare settings. Explores relevant bioethics theories in relation to contemporary ethics issues, like the use of life-sustaining technologies, genetic modification and treatment, and reconciling patient values with medical treatments.

**RELS 6680**  
**War, Peace, and Religion**  
**CREDIT HOURS**  
3.0  
**DESCRIPTION**  
Comparative study of attitudes towards war and peace in major religious traditions. Topics may include the Christian just-war tradition; Islamic notions of jihad; Buddhist renunciation and pacifism; the writings of Gandhi; nuclear arms and the status of noncombatants; civil disobedience and conscientious objection; and religiously motivated terrorism.

RELS 8960  Research in Religious Studies
CREDIT HOURS  3.0 - 12.0
DESCRIPTION  Does not count toward degree requirements. Authorization required. May be repeated for credit.

RELS 8970  Teaching Religious Studies
CREDIT HOURS  6.0
DESCRIPTION  Does not count toward degree requirements. Preparation course for teaching, covering syllabus design, making up tests, grading papers, and other classroom techniques. Required for becoming a graduate teaching assistant. May be repeated with approval of graduate director.

RELS 8980  Teaching Practicum
CREDIT HOURS  3.0
DESCRIPTION  Does not count toward degree requirements. Apprenticeship in teaching for graduate teaching assistants under faculty supervision. Required for all graduate teaching assistants in their first semester of teaching. May be repeated for credit with approval of graduate director.

RELS 8985  Advanced Teaching Practicum in Religious Studies
CREDIT HOURS  3.0 - 12.0
DESCRIPTION  Does not count toward degree requirements. Apprenticeship in teaching for advanced graduate teaching assistants under faculty supervision. Required for all graduate teaching assistant in their second and subsequent semesters of teaching. GTAs learn how to document and collect materials for Teaching Portfolio. May be repeated for credit.

RELS 8998  Prospectus Research and Writing
CREDIT HOURS  3.0
DESCRIPTION  Students enrolled in this course will complete the research required to writing a Masters thesis prospectus that conforms to the guidelines established by the Department. Students whose prospectuses are approved by the faculty may continue in the thesis research and writing process. This course is not required of students wishing to present a prospectus, but it does give students credit for preparing the prospectus. It does not count toward the thesis track degree requirements. Permission from the instructor and Director of Graduate Studies is required.

</table>
RT 7030  Advanced Mechanical Ventilation
CREDIT HOURS  3.0
PREREQUISITES  Entry into the Graduate RT Program
DESCRIPTION  Advanced study in methods of mechanical ventilatory support. Patient assessment by advanced monitoring is stressed, with attention to patient ventilator interactions, optimization of ventilatory support, and weaning of marginal patients. New ventilation technology and modes of support are discussed.

RT 7040  Advanced Practice Monitoring
PREREQUISITES: Admission to a Master of Science RT degree program
CREDIT HOURS  3.0
DESCRIPTION  This course will be an overview to interpretation of ventilation waveforms, providing an understanding of how ventilation waveforms are generated and how to interpret them. The goal of this course is to impart and understanding of how waveforms are generated which will allow the practitioner to deduce the cause and implications of previously unseen as well as familiar waveforms. This course will also serve as an overview of advanced practice procedures and monitoring in critical care specialty units. Advanced practice procedures such as arterial line insertion techniques, central line placement, pulmonary artery catheter insertion techniques, balloon pump management, management of extracorporeal membrane oxygenator circuits, and other advanced devices managed by respiratory therapist in specialty units will be discussed.

RT 7050  Statistical Research II
CREDIT HOURS  3.0
PREREQUISITES  Entry into RT graduate program
DESCRIPTION  HHS 6000. This is the second course for research in the health sciences. Emphasis will be placed on methods and principals, as well as statistical techniques utilized in modern research in the health sciences.

RT 7051  Clinical Practice IV
CREDIT HOURS  4.0
DESCRIPTION  Prerequisites Entry into RT graduate program. RT 6050, RT 6051 and RT 6052 Sixteen hours of clinical per week, one hour of lecture. A third course in the sequence of clinical rotations which provides instruction and experience in the adult critical care setting. Case presentations are required to integrate clinical and classroom theory.

RT 7052  Clinical Practice III
CREDIT HOURS  5.0
PREREQUISITES  Prior courses in program sequence
DESCRIPTION  Clinical experience is divided into neonatal and pediatric care, and adult critical care. Alternate sites for respiratory care practice are possible, if a student desires.

RT 7055  Clinical Applications in Sleep Medicine
CREDIT HOURS  3.0
DESCRIPTION  This course provides a basic introduction into sleep medicine and technology. Patient hookup procedures, sleep diagnostic equipment, EEG waveform recognition that make up a polysomnogram, recognition of various sleep problems and titration of therapy to treat those sleep abnormalities will be covered. Sleep clinics will be visited with students demonstrating skills in performance of a sleep study and the duties of a sleep technician including reading, scoring, and reporting a sleep study. Both adult and pediatric sleep disorders will be covered.

<tbody>
<tr>
<td>RT 7060</td>
<td>Critical Care Therapeutics</td>
<td>3.0</td>
<td>Admitted to RT Graduate Program</td>
<td>This course will utilize a wide assortment of therapies and procedures utilized in the care of Intensive Care patients. Students will examine and interpret radiological exams (CXR, CT, MRI) as it pertains to life threatening illnesses and trauma. Fluid status, nutrition, and hemodynamic status will be examined through an interdisciplinary lens to unlock therapeutic goals and improved outcomes. Additionally, an exploration of chest born carcinoma will be examined to understand the RT role in oncological therapies.</td>
</tr>
<tr>
<td>RT 7070</td>
<td>Advanced Cardiac Life Support</td>
<td>2.0</td>
<td>RT 1010 or BLS</td>
<td>Advanced Cardiac Life Support. The Advanced Cardiac Life Support (ACLS) course is designed to develop the participant's proficiency in providing care in a cardiorespiratory arrest. This course is offered over a seven-week period to allow for understanding of pathophysiology and the assimilation of the knowledge to carry out skills required in emergent circumstances.</td>
</tr>
<tr>
<td>RT 7075</td>
<td>Patient Care Management</td>
<td>3.0</td>
<td>Prior course work in the RT program</td>
<td>An analysis of patient care management strategies for the respiratory therapist. Patient assessment and critical care management topics will be emphasized.</td>
</tr>
<tr>
<td>RT 7080</td>
<td>Pediatric Respiratory Care</td>
<td>2.0</td>
<td>Entry into RT graduate program</td>
<td>A study of respiratory care treatment and support modalities, with associated equipment. Emphasis is placed on understanding application to patient situations, assessment of care, and principles of operation of equipment.</td>
</tr>
<tr>
<td>RT 7081</td>
<td>Neonatal Respiratory Care</td>
<td>2.0</td>
<td>Prior course work in the RT program</td>
<td>The processes of growth and development relating to respiratory care from the fetus to the infant will be discussed. Techniques of assessment, diagnosis, and treatment will be utilized to enable he student to develop the processes needed to combine physiological function with care modalities.</td>
</tr>
<tr>
<td>RT 7085</td>
<td>Professional Practice: From Current Trends to Extended Care</td>
<td>3.0</td>
<td>Entry into RT graduate program</td>
<td>An analysis of the current professional environment and the role of the respiratory therapist in that atmosphere. An overview of concepts, procedures, and long-term care and how the respiratory therapist's role is impacted interacting between the acute care facility and self-administered care in the patient's home is emphasized. Other topics include medical ethics, smoking cessation and sleep medicine. The emphasis may vary. Serves as one of the two Critical Thinking through Writing (CTW) courses required of all Respiratory Therapy majors.</td>

</tbody>
</table>
RMI 8050  Risk Management Modeling  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  None  
**DESCRIPTION**  This spreadsheet-based course surveys the principles of probability theory and mathematical finance for solving a diverse set of risk management problems related to the valuation and measurement of operational and financial risk exposures of the firm. The course is designed for all students interested in risk management and its application in finance, accounting, strategic management and economics.

RMI 8120  Property and Liability Insurance  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  None  
**DESCRIPTION**  This course introduces the fundamental principles of property and liability insurance and a framework for designing and analyzing insurance contracts. The course examines property and liability loss exposures and their management, with primary emphasis on insurance.

RMI 8150  Corporate Risk Management  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  MBA 8135  
**DESCRIPTION**  Business organizations are exposed to loss-causing events that may have significant impact on their financial position. This course explores the analysis, control and financing of property, liability and human resource loss exposures. Risk analysis includes loss-forecasting studies using microcomputer spreadsheets. Risk control focuses on principles of loss causation and mitigation and techniques for implementing risk control strategies. Risk financing alternatives include both funded and unfunded approaches. Traditional insurance, loss-sensitive insurance, cash-flow plans, self-insurance, captives, pooling, and financial risk management arrangements are examined. Case studies synthesize the risk management concepts covered in the course.

RMI 8300  Predictive Risk Modeling  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  MSA 8190  
**DESCRIPTION**  This course is an applied modeling course which introduces students to statistical learning and predictive analytics. It covers following topics; General Strategies (data pre-processing, over fitting-model tuning), Regression Models (linear regression, partial least squares, penalized models, non-linear models, neural networks, multivariate adaptive regression splines, support vector machines, k-nearest neighbor), Regression Trees (random forest, boosting), Re-sampling Method, Principal Component Analysis and generalized Additive Models. Students will use R and/or SAS for class projects.
RMI 8370  Financial Risk Management  
**CREDIT HOURS** 3.0  
**PREREQUISITES** MBA 8135  
**DESCRIPTION** The course presents the fundamentals of corporate financial risk management. The objective is a realistic and conceptually motivated overview of risk management for major global companies. The strategic approach to risk management requires an understanding of insurance and alternative risk financing, as well as financial, insurance and commodity derivatives.

RMI 8389  Directed Readings in Risk Management and Insurance  
**CREDIT HOURS** 1.0 - 3.0  
**PREREQUISITES** Consent of a graduate adviser in Department of Risk Management and Insurance, good academic standing  
**DESCRIPTION**

RMI 8400  InsurTech: New Technologies in Insurance Markets  
**CREDIT HOURS** 3.0  
**PREREQUISITES** None  
**DESCRIPTION** This course exposes students to the role of new technology in changing the pricing, process, and products in insurance markets, sometimes referred to as InsurTech. More specifically, it will cover topics such as the use in insurance markets of blockchain technology, telematics, big data, virtual claims, visual analytics, digital underwriting, drone inspections, geospatial analytics, workplace wearables/trackers, and robotic process automation.

RMI 8450  Machine Learning in Actuarial Science and Risk Management  
**CREDIT HOURS** 3.0  
**PREREQUISITES** MSA 8150 or ECON 8740 or permission of instructor  
**DESCRIPTION** This course explores how machine learning changes the practice of actuarial science and risk management. The course presents the modeling, measuring and managing of different risks faced by financial institutions such as banks and insurance firms, using statistical and stochastic methods. Advanced machine learning techniques will be used to integrate different risk disciplines: market risk, credit risk, operational risk, asset and liability management and performance measurement. Students also study the specific risk management and regulatory challenges faced by InsurTech and FinTech firms.

RMI 9080  Actuarial Analytics  
**CREDIT HOURS** 3.0  
**PREREQUISITES** None  
**DESCRIPTION** The course presents advanced computational and statistical techniques in analyzing actuarial and financial data and uses the statistical R software to demonstrate how to apply these techniques to solve practical problems in risk management such as risk estimation, backtest, capital allocation, fund management, etc. Statistical methodologies include linear predictive model with AR-GARCH errors and persistent predicting variables, generalized linear model, copula model, extreme value theory, quantile regression, bootstrap method, and statistical learning.
RMI 9100  Theory of Risk and Insurance
CREDIT HOURS  3.0
PREREQUISITES  Consent of a graduate adviser in the Department of Risk Management and Insurance
DESCRIPTION  This course is a study of the generalized concept of risk and the alternative methods of risk accommodation from the viewpoint of the individual and businessperson. Special consideration is given to the theory of insurance and its proper utilization relative to risk.

RMI 9250  Reading Seminar in Risk and Insurance
CREDIT HOURS  3.0
PREREQUISITES  Consent of a graduate adviser in the Department of Risk Management and Insurance
DESCRIPTION
RCB 8040     Competing on Analytics and Organizational Knowledge

CREDIT HOURS     3.0
PREREQUISITES    None
DESCRIPTION     Businesses are becoming increasingly "knowledge intensive." Analytics can help organizations develop a comprehensive approach to their knowledge assets to make better decisions and create distinctive competitive capabilities. High performing corporations compete on knowledge capabilities with their internal business processes as well as their external business processes. Data lies at the heart of this knowledge. Increasingly, decisionmakers rely on intelligent systems to analyze these data systematically and assist them in their decisionmaking. In many cases, automating the decisionmaking process is necessary because of the speed with which new data are generated. This course connects real world data to decisionmaking through cases from finance, marketing and operations.
EDSC SCIENCE EDUCATION

EDSC 6470  Theory and Pedagogy of Middle Level Science Instruction
CREDIT HOURS 3.0
DESCRIPTION This course provides theory and pedagogical content knowledge necessary for effective middle school instruction in science. Students engage in lesson and curriculum planning, explore various teaching strategies and methods, and develop the reflective practices necessary for teaching middle grades science.

EDSC 6550  Principles of Science Instruction
CREDIT HOURS 3.0
PREREQUISITES EDCI 6600
COREQUISITES EDCI 7660
DESCRIPTION Students examine instructional procedures, teaching strategies, technology, and evaluation procedures for middle and secondary school science. EDSC 6550 is cross listed with EDSC 4655.

EDSC 7550  Theory and Pedagogy of Science Instruction
CREDIT HOURS 3.0
PREREQUISITES EDSC 6550
COREQUISITES EDCI 7670 and EDCI 7680
DESCRIPTION Examines current issues, strategies, materials, and technology related to the teaching and learning of science at the middle and secondary school levels. Science curriculum, teaching, and research in science education are investigated. EDSC 7550 is cross-listed with EDSC 4755.

EDSC 8400  Strategies of Instruction in Science
CREDIT HOURS 3.0
DESCRIPTION Designed for teachers in middle schools and high schools. The course explores topics such as the nature of science and learning and the implications for teaching science, alternative uses for technology, assessment of science learning, and teaching.

EDSC 8430  Nature of Science
CREDIT HOURS 3.0
DESCRIPTION Students explore cultural, economic, political, and social structures and discourses as they related to science, science teaching and learning, and research in science and science teaching and learning. Course includes examination of how research in science and science education are framed and enacted within different theoretical frameworks.
EDSC 8450
Crosscutting Concepts in the Sciences
CREDIT HOURS 3.0
DESCRIPTION This course will provide an overview of integrated science content knowledge essential for developing middle and secondary science curriculum. The course will focus on the conceptual understanding of major scientific concepts and themes drawn from the range of natural sciences; biological, earth-space, and physical/chemical sciences. In addition, course activities will include science specific pedagogy as we explore opportunities to make the science content knowledge relevant and appropriate to named grades and to the realization of the vision of science education as described in the Framework for K-12 Science Education (2012), Next Generation Sunshine State Standards (2013), Georgia Standards of Excellence in Science (2017). That is you will learn science content, processes, and practices in order to transform them into meaningful, age appropriate and understandable forms for children. In addition, you will appreciate science as a body of knowledge that explains how our environment works, and as a dynamic quest involving the process of inquiry and science practices.

EDSC 8550
Trends and Issues in Teaching Science
CREDIT HOURS 3.0
DESCRIPTION Explores the current problems, trends, and curriculum issues related to teaching science in middle and secondary schools.

EDSC 8600
Science in the School Curriculum
CREDIT HOURS 3.0
DESCRIPTION Acquaints teachers with the basis of curriculum decisions, the purpose and nature of science curricula, science curricula in the schools historically, current innovations and future directions, and the process of developing curricula. Emphasis will be placed on developing necessary knowledge, skills, attitudes, and self-confidence to contribute to the revitalization of science curricula.

EDSC 8780
Advanced Research Seminar in Science Education
CREDIT HOURS 1.0 - 3.0
PREREQUISITES EDCI 9900 or consent of instructor
DESCRIPTION This course is designed for advanced doctoral students in science education. Students explore research methodology, research findings, and design of experiments in science education. Seminar may extend beyond one term. (Repeatable).

<tr>
<td>SW 7100</td>
<td>Foundations of Community Partnerships</td>
<td>3.0</td>
<td>This integrative course will introduce students to community partnerships from social systems and ecological perspectives. Macro content from human behavior and social environment, policy, and practice content, undergirds the community partnership framework. Provided is an overview of community practice, through an examination of theories, history, applications, and domains. Students will develop an understanding of the mission of social work and issues of economic and social justice in the context of community and will participate in community building through an experiential component.</td>
</tr>
<tr>
<td>SW 7200</td>
<td>Human Development Through the Life Course</td>
<td>3.0</td>
<td>This course presents knowledge on developmental issues occurring throughout the life span. The focus is on gaining knowledge on individuals, families, small groups and interpersonal relationships in a multi-cultural context. Students will develop a critical understanding of current theories of well being, stress, coping, and adaption, as well as macro issues such as oppression, privilege, and discrimination. The inter-relationships between small and large social systems will be explored, as well as the influence of bio-psycho-social factors on individual and family well being. The implications of this knowledge for all social work practice in the community will be considered.</td>
</tr>
<tr>
<td>SW 7300</td>
<td>Methods of Community Research</td>
<td>3.0</td>
<td>This course is designed to provide an overview of basic principles of social science research that provide the foundation for research in social work settings. Research processes will be examined in stages from problem formulation to data collection and some basic descriptive analysis. Both qualitative and quantitative methods will be reviewed. This course will stress the importance of the relationship between research and social work practice, and prepare students to evaluate existing social science research. Ethical issues, human diversity, and issues in community research will be discussed.</td>
</tr>
<tr>
<td>SW 7400</td>
<td>Social Work Practice I</td>
<td>3.0</td>
<td>SW 7400 and SW 7800 are designed as a continuum. SW 7400 is designed to introduce students to the purpose, values and ethics of the profession and to provide foundation knowledge and skill development for generalist social work practice from a strengths perspective. Students will develop skills in critical thinking, building relationships, interviewing clients, assessing situations, planning and implementing change and evaluating outcomes across all levels of practice. Various theoretical frameworks used to describe and analyze interactions among and between individuals, families, groups and communities will be presented.</td>
</tr>
<tr>
<td>SW 7500</td>
<td>Field Education I: Generalist Practice</td>
<td>5.0</td>
<td>This course provides a field experience that enables the social work student to integrate generalist practice knowledge, values, and skills with agency based social work practice. This experience incorporates an agency based field practicum and field integrative seminar.</td>
</tr>
</tbody>
</table>
**SW 7501 Diversity and Social Justice**  
CREDIT HOURS 1.0  
COREQUISITES SW 7500 Field Education I  
DESCRIPTION This course provides an introduction to understanding diversity in the context of social justice in the United States and in social work practice. The course focuses on understanding and applying multicultural concepts to practice, developing awareness of one's cultural identity, and exploring how diversity and justice issues impact generalist practice in the context of field education.

**SW 7600 Social Welfare Policy**  
CREDIT HOURS 3.0  
DESCRIPTION This course focuses on the historical development and implementation of contemporary social welfare policies and programs in the United States. Critical analysis of the policy making process is emphasized. The influence of social values on the policy development process is highlighted relative to the differential allocation of material and social resources. Specific attention is given to understanding roles performed by social workers as community practitioners to affect change, and acknowledging the interplay among legislative, judicial and administrative levels of government. Although the primary focus is on federal/state government policies; presentations will incorporate policy development at the local as well as organizational/agency levels when appropriate. The current provisions and service delivery systems emanating from social welfare policies are examined, with special attention given to society’s most vulnerable population defined by status, age, health or economic circumstances.

**SW 7700 Community Foundation Integrative Seminar**  
CREDIT HOURS 2.0 - 3.0  
DESCRIPTION This seminar course explores the professional identity shift from that of a generalist social worker to one as a community partnerships practitioner. Students will critically analyze contexts and trends that shape community partnerships practice. This is a required course of all advanced standing students prior to entry to the second year of the MSW program.

**SW 7800 Social Work Practice II**  
CREDIT HOURS 3.0  
DESCRIPTION SW 7400 and SW 7800 are designed as a continuum. Building on generalist practice content, this course will focus on the change process and the sustainability of change efforts that target individuals, families, groups, organizations, and communities. This course moves students from learning about generalist social work practice to applying it across micro, mezzo and macro levels.

**SW 7900 Field Education II: Generalist Practice**  
CREDIT HOURS 6.0  
DESCRIPTION 15 lecture hours; 200 field hours. This course is a continuation of SW 7500.

**SW 7950 Selected Topics in Social Work**  
CREDIT HOURS 1.0 - 6.0  
DESCRIPTION This course will offer knowledge and skills on variable topics that impact social work practice. May be repeated up to six hours if topic varies.

1.535
**SW 7960**  Seminar on Community Partnerships: Practice and Issues  
**CREDIT HOURS**  2.0  
**DESCRIPTION**  An exploration of current challenges, issues, research skill or areas of special interest related to the social work practice of community partnerships. May be repeated up to six hours if topics vary.

**SW 7980**  Research Practicum  
**CREDIT HOURS**  1.0 - 15.0  
**DESCRIPTION**  Directed research in collaboration with a faculty member. For graduate assistants. Does not count towards degree requirements.

**SW 7990**  Directed Individual Study  
**CREDIT HOURS**  1.0 - 6.0  
**REQUIREMENTS**  A social work faculty member must agree to supervise this study, and it must be approved by the school director  
**DESCRIPTION**  This course allows the student to extend his/her knowledge in a particular area through an independent study.

**SW 8100**  Skills and Techniques of Community Partnerships I  
**CREDIT HOURS**  3.0  
**DESCRIPTION**  This is the first of two courses that focus on core skills, techniques and strategies for community partnership practice. Through the course students will develop skills in creating and sustaining community partnerships necessary for addressing social, economic and political issues facing communities today. Students will examine community practitioner roles and skills and apply these to contemporary community practice conceptual frameworks and models. The application of skills necessary for building organizational and community capacity and the development of authentic community partnerships will be emphasized.

**SW 8200**  Skills and Techniques of Community Partnerships II  
**CREDIT HOURS**  3.0  
**DESCRIPTION**  This is the second of two courses that focus on core skills, strategies and techniques for community partnership practice. This course addresses the vital role of evaluation and technology in the modern social work environment. The course develops students' skills in the formative and summative evaluation of community service delivery systems. With strong emphasis on the integration of evolving technologies for the human services, including on-line and data analysis tools, students will address methods for assessing and improving the quality of programs, policies, and community partnerships.

**SW 8300**  Leadership and Management  
**CREDIT HOURS**  3.0  
**DESCRIPTION**  This course offers students a general introduction to the theory and practice of leadership management from a social perspective within public, for-profit and non-profit organizations. Theories of management (human resource, policy, functional and strategic management) organizational structures, roles and skills for mezzo and macro practice within an agency or organization are examined. The unique perspective that social workers bring to this discipline in resolution of community and agency decision making are central elements in this course. The ways in which the social work manager as leader can facilitate community partnerships will also be examined.

<tr>
<td>SW 8310</td>
<td><strong>Group Facilitation</strong></td>
<td>3.0</td>
<td>This course addresses knowledge and skill development in group facilitation. Issues, principles, and challenges common to diverse groups (e.g., focus groups, work teams, committees, partnerships, coalitions) are explored. Students will be exposed to specific methods of group facilitation, such as team building, consensus planning, and strategic action planning, and to the facilitator's role in working with macro-focused groups.</td>
</tr>
<tr>
<td>SW 8315</td>
<td><strong>Social Media Tools for Community Partnerships Practice</strong></td>
<td>3.0</td>
<td>This course will focus on how to incorporate the use of social media in community partnerships practice. Students will examine both the theoretical framework for the use of social media by human service organizations and the application of social media to meet organizational mission through actual case studies. Organizational challenges in implementing social media will be addressed. Course will be an applied experience offering students' tools and techniques for integration in professional practice.</td>
</tr>
<tr>
<td>SW 8320</td>
<td><strong>Grantwriting</strong></td>
<td>3.0</td>
<td>This course offers applied grantwriting techniques within the governmental, corporate, and private sectors of grantmaking. Students will learn how to successfully compete for funding to support academic research and community-based service projects.</td>
</tr>
<tr>
<td>SW 8330</td>
<td><strong>Contemporary Health Challenges</strong></td>
<td>3.0</td>
<td>This course is designed to introduce students to chronic short- and long-term health concerns in our society. The course will address such illnesses as AIDS, hepatitis, tuberculosis, Alzheimer's, sexually-transmitted diseases (STD), and other health issues. The focus of the course will be upon treatment, identification and transmittal, with an examination of the impact of governmental regulations on drugs, the perception of patients, family members, and health care professionals.</td>
</tr>
<tr>
<td>SW 8340</td>
<td><strong>Restorative Justice and Law</strong></td>
<td>3.0</td>
<td>This course explores restorative justice as a strategy for dialogue, peacemaking, and transformation. Restorative justice will be presented as an alternative to incarceration, and a strategy to support victims, offenders, and communities following crime including state violence. The course will focus on restorative practices with individuals, families, communities, and organizations. Disparities within the justice system, legal issues, trauma, and conflict transformation will be addressed. The course will also practice skills in peacemaking circles and restorative conferencing.</td>
</tr>
</tbody>
</table>
SW 8350  Economic Justice, Inequality, and Poverty

CREDIT HOURS  3.0

DESCRIPTION  This course will address causes and solutions to poverty and inequality through the lenses of political, social, and economic factors. Special attention is given to the working poor, the growth of extreme poverty, discrimination, and the policies, social movements, and interventions that have historically impacted poverty and inequality.

SW 8360  Forensic Social Work

CREDIT HOURS  3.0

DESCRIPTION  The course will include a critical analysis and study of particular social issues and the impact of those issues on the purposes and the effectiveness of organizations and individuals who work within the legal system. The course will address social work skills and ethical issues in a forensic setting.

SW 8370  Behavioral Health & Psychopathology: Practice, Policy, and Research

CREDIT HOURS  3.0

DESCRIPTION  This course focuses on behavioral health problems as characterized by a state of mental or emotional challenges, diagnosed pathological disorders, and/or psychological distress that impact well-being. Emotions, behaviors, and biology are interrelated components that encompass well-being and ability to function. Behavioral health problems exact an enormous toll on individuals, families, communities, and the broader society. Becoming informed about behavioral health problems, prevention, intervention, policy, and research will enhance the students' understanding of this complex social issue.

SW 8440  Global Social Work Practice, Policy, and Research

CREDIT HOURS  3.0

DESCRIPTION  This course will offer students an introduction to social work issues from an international perspective. Using literature from around the world that focuses on global social issues, the course will address concepts of power, class, gender, race, sexuality, religion, violence, poverty, immigration, and social exclusion. Students will be required to evaluate critically what the international perspective might teach us about social work theory, practice, policy and research in the US.

SW 8450  Child Maltreatment Practice, Policy, and Research

CREDIT HOURS  3.0

DESCRIPTION  Child abuse and neglect are examined from both historical and contemporary perspectives using an ecological framework. Methodological and theoretical issues surrounding the study of maltreatment are highlighted. Symptomatology and sequelae of abusive behavior are examined with specific reference to the implications for family and community systems. Medical, legal, social, and cultural aspects of child maltreatment are explored. The role of community partnerships in the identification, intervention, treatment and prevention of child maltreatment is emphasized.

SW 8460  Aging Practice, Policy, and Research

CREDIT HOURS  3.0

DESCRIPTION  This course is designed to provide the basic knowledge and entry-level skills appropriate for social work practice with older people and their families. Special attention is given to the biological, sociological, psychological, political and economic factors affecting older adults and methodology meeting these needs.
### SW 8470 Behavioral Health: Substance Abuse and Dependence

**CREDIT HOURS** 3.0  
**DESCRIPTION** This course explores behavioral health problems that may be evident in the persistent use of a medication, non-medically indicated drug, or toxin indicating substance abuse, misuse, and/or dependence. Both substance abuse and dependence result in adverse social consequences that impact interpersonal relationships, families, work/school obligations, communities, and the broader society among all population groups. Students will learn about the classification of drugs and toxins, their impact on behavioral health and well-being, and the resulting consequences.

### SW 8480 Disabilities Practice, Policy, and Research

**CREDIT HOURS** 3.0  
**DESCRIPTION** This course will provide students with the opportunity to develop their knowledge of the impact of both physical and developmental disabilities on individuals and families. Focus is on responses to those disabilities diagnosed at birth or acquired through illness or injury. Emphasis is placed on utilizing appropriate social work interventions, while recognizing such variables as age, socioeconomic status, family constellation, cultural issues, and premorbid conditions. Understanding disabilities from a human rights perspective and the impact of oppression on people with disabilities will be explored. A historical perspective on how disability has been perceived and addressed by societal institutions will be presented.

### SW 8490 Child Welfare Practice, Policy, and Research

**CREDIT HOURS** 3.0  
**DESCRIPTION** This course is an introduction to the range of child welfare services including foster care, adoptions, permanency planning, and family preservation. Students will have the opportunity to explore current challenges inherent in the delivery of child welfare services to children, youth, and families. This course is intended to serve as a forum for the exchange of ideas and will focus on a range of critical issues in the field of child welfare including family violence, child maltreatment, HIV, drug exposure, and homelessness.

### SW 8500 Field Education I: Community Partnerships

**CREDIT HOURS** 6.0  
**DESCRIPTION** 18 lecture hours; 250 internship hours. SW 8500 and SW 8900 are designed as a continuum. This course provides a field education experience that enables the social work student to apply the knowledge, values, and skills of creating community partnerships. This experience incorporates a community-based field education practicum and field integrative seminars.

### SW 8800 Community Project

**CREDIT HOURS** 3.0  
**DESCRIPTION** This course is designed to have students synthesize, integrate and apply generalist practice and community partnerships knowledge and skills through the creation of a community project. In coordination with one or more agencies and working in small groups, students will develop, implement, and evaluate a community project.
SW 8900  
Field Education II: Community Partnerships

CREDIT HOURS 6.0

DESCRIPTION 18 lecture hours; 250 internship hours. This course is a continuation of SW 8500.
SOCI 6279  Metropolitan Atlanta  
CREDIT HOURS  3.0  
DESCRIPTION  (Same as HIST 6320 and Geog 6768.) Interdisciplinary perspective focusing on social, historical, and geographic processes which have shaped the Atlanta region.

SOCI 7110  Aging Policy and Services  
CREDIT HOURS  3.0  
DESCRIPTION  (Same as GERO 7110.) Overview of aging policy, services, and programs with emphasis on legislation, funding, planning, the aging network, and the long-term care system.

SOCI 8000  Proseminar in Sociology  
CREDIT HOURS  3.0  
PREREQUISITES  consent of Director of Graduate Studies  
DESCRIPTION  Introduction to central concepts, methods, and professional practices in sociology; development of basic skills used in theoretical and empirical work; and orientation to the discipline and this department of sociology.

SOCI 8010  Intermediate Sociological Statistics  
CREDIT HOURS  3.0  
PREREQUISITES  SOCI 8020 with grade of B or higher, or consent of instructor  
DESCRIPTION  Parametric and nonparametric statistical topics pertinent to sociological research.

SOCI 8020  Research Methodology  
CREDIT HOURS  3.0  
PREREQUISITES  SOCI 3020 with grade of B or higher, or consent of instructor  
DESCRIPTION  Problem formulation, the logic of research design, scale construction, operational and measurement techniques, and forms of tabular presentation employed in the social survey.

SOCI 8030  Sociological Theory I  
CREDIT HOURS  3.0  
DESCRIPTION  Roots of the major theoretical orientations in sociology, with special attention given to the early history of conflict theory, functionalism, and symbolic interactionism.

SOCI 8040  Cognitive Sociology  
CREDIT HOURS  3.0  
DESCRIPTION  Perceiving, focusing, classifying, timing, symbolizing, and remembering in a societal context. How thinking can vary cross-nationally and historically. The social construction of racial, ethnic, gender, sexual, and temporal boundaries; social connection between collective memories and national and group identities; and social foundations of knowledge and myth.

SOCI 8101  Family Sociology  
CREDIT HOURS  3.0  
PREREQUISITES  (Same as WGSS 8101.) Key concepts and processes of family sociology with application to sexuality, partner selection, transition to parenthood, parenting and children, housework and paid work, conflict and violence, divorce and remarriage, grandparenting, caregiving, and alternative families.

SOCI 8102  Life Course Sociology  
CREDIT HOURS  3.0  
PREREQUISITES  (Same as GERO 8102.) Development of the key concepts and processes of life course theories, with application to issues such as: child development and socialization, adolescence, marriage and parenting, work and occupational careers, retirement, illness and institutionalization, and death and bereavement.

</thead>
<tbody>
<tr>
<td>SOCI 8110</td>
<td>Social Psychology</td>
<td>3.0</td>
<td>How roles, norms, and social interaction influence self, identity, and behaviors. How individuals actively participate in their social worlds; and how self, identity, and role processes change through the life course.</td>
</tr>
<tr>
<td>SOCI 8116</td>
<td>Sociology of Aging</td>
<td>3.0</td>
<td>(Same as GERO 8116.) The study of aging as a social process affecting individuals, societies, and social institutions. Topics include age stereotypes, social roles, socioeconomic status, minority elders, older women, work and retirement, family and community relationships, politics, housing, and health care.</td>
</tr>
<tr>
<td>SOCI 8118</td>
<td>Aging, Health, and Disability</td>
<td>3.0</td>
<td>(Same as GERO 8118.) Individual experience of physical aging, disease, disability, and death in old age; patterns and social causes of physical and mental illness, mortality, and longevity; illness behavior of older people, including health care utilization, compliance, patient-practitioner interaction, and health promotion behavior.</td>
</tr>
<tr>
<td>SOCI 8119</td>
<td>Global Aging and Social Policies</td>
<td>3.0</td>
<td>(Same as GERO 8119.) This course examines issues of aging and social policies in global perspective. Topics include global and comparative studies of demographic changes, aging and social inequality, retirement and social security, intergenerational exchange, and health care and elder care.</td>
</tr>
<tr>
<td>SOCI 8122</td>
<td>Death, Dying, and Loss</td>
<td>3.0</td>
<td>(Same as GERO 8122.) Death and dying; loss; and the cultural processes of grief, mourning, and bereavement.</td>
</tr>
<tr>
<td>SOCI 8124</td>
<td>Diversity and Aging</td>
<td>3.0</td>
<td>(Same as AAS 6042 and GERO 8124.) A broad overview of aging within the framework of race and ethnicity in American society. Major issues include minority aging research methodology; theories of ethnicity and aging; and life-course, &quot;life-chance,&quot; and socialization differences among older adults attributable to race, ethnicity, and/or minority status.</td>
</tr>
<tr>
<td>SOCI 8126</td>
<td>Health Disparities</td>
<td>3.0</td>
<td>Health disparities across gender, race-ethnicity, age, and socioeconomic status are systemic within the U.S. society. This course offers a comprehensive understanding of the issues and complexities involved in the emergence and persistence of these health disparities. It explores theories and research from multiple disciplines most prominently sociology, but also including public health, psychology, and biomedical fields.</td>

<td>3.0</td>
<td>Critical issues in the generation and maintenance of economic inequalities, both domestically and globally. Emphasis on the role of socioeconomic forces in the production of poverty and wealth as well as individual and group attitudes and behaviors.</td>
</tr>
<tr>
<td>SOCI 8234</td>
<td>Race-Ethnicity and Health</td>
<td>3.0</td>
<td>This course focuses on social and behavioral aspects of health as they relate to race and ethnicity in the United States. Specifically, the course is designed to provide students with an overview of risk and protective factors related to health and health disparities across race-ethnic groups.</td>
</tr>
</tbody>
</table>
SOCI 8235  HIV/AIDS  
CREDIT HOURS 3.0  
DESCRIPTION AIDS has had an incredible impact on the world. In a time when infectious diseases have supposedly been conquered, a new virus, one with incredible stigma and other negative connotations attached, comes along and baffles the biomedical community. Further it has profoundly affected societal systems as diverse as sexual practices and the FDA drug approval process. Over twenty five years after AIDS was first announced we still do not have a handle on this epidemic. This course explores the social dimensions of HIV/AIDS in the U.S. and globally. We examine the social forces that impact and determine the course and experience of the epidemic as we also explore the impact the epidemic has had on communities and cultures worldwide. The course surveys 1) the social construction of the disease and its controversies; 2) the cultural aspects of AIDS; 3) the impact upon and response from particularly affected communities and social groups; 4) economic causes and consequences of AIDS; and 5) the politics of governmental, non-governmental and grassroots responses to the disease. There is no prerequisite for this course.

SOCI 8236  Race, Class, and Gender  
CREDIT HOURS 3.0  
DESCRIPTION This course examines the ways race, gender, and class are socially constructed concepts that are best understood as intersecting factors rather than mutually exclusive categories. Building on the work of pioneers in this field, this class considers how intersections of race, gender, and class shape social institutions like the workplace, family, school, and labor market, as well as the interactions that occur within these structures.

SOCI 8238  Critical Race Theory  
CREDIT HOURS 3.0  
DESCRIPTION Critical race theories analyze how race and racism are foundational social structures that shape the lived experience of people. This course will survey some of the major ideas and themes that define contemporary critical race theory and explore new directions in the field, especially colorblind racism and postcolonial studies.

SOCI 8342  Qualitative Methods in Sociology  
CREDIT HOURS 3.0  
PREREQUISITES SOCI 8020 with grade of B or higher, or consent of instructor  
DESCRIPTION Methodological strategies in sociological research involving participant observation, in-depth interviewing, and the use of public and private documents. Special attention given to the analysis of text data (in contrast to numerical data) and the writing of text-based dissertations, articles, and books.

SOCI 8360  Sociology of Religion  
CREDIT HOURS 3.0  
DESCRIPTION Social dimensions of religion, the relationship between religion and society, sociological theories of religion, religious organizations and behavior, religion and social change, secularization, and the future of religion.

SOCI 8380  Sociology of Education  
CREDIT HOURS 3.0  
DESCRIPTION Sociological approach to the study of education as an institution in urban settings.

SOCI 8900  Special Topics in Sociology  
CREDIT HOURS 3.0  
DESCRIPTION May be taken more than once if topics are different.

SPAN 8110  Teaching Listening in a Foreign Language Classroom: From Theory to Practice
CREDIT HOURS  3.0
DESCRIPTION  This course will focus on the importance of listening in the acquisition/learning of a foreign language and how this ability relates to the other language skills. Students will learn about the process of listening, review, and assess the listening material available in the Spanish FL setting, and learn how to select, develop, and use listening material in the FL classroom.

SPAN 8601  Spanish Linguistics
CREDIT HOURS  3.0
DESCRIPTION  Spanish Linguistics. Study of all areas of Spanish linguistics: phonetics, phonology, morphology, syntax, historical linguistics, and dialectology.

SPAN 8603  Cultural Studies
CREDIT HOURS  3.0
DESCRIPTION  Study of particular aspects or periods of Spanish, Latin American, and other Spanish speaking communities. May be repeated if topics vary.

SPAN 8710  Special Topics in Spanish Applied Linguistics
CREDIT HOURS  3.0
DESCRIPTION  May be repeated for credit if topic varies.

SPAN 8800  History of the Spanish Language
CREDIT HOURS  3.0
DESCRIPTION  The phonological and morphological evolution of Spanish from Vulgar Latin to standard modern Spanish. Several old Spanish texts will be examined.

SPAN 8805  Medieval Spanish Literature
CREDIT HOURS  3.0
DESCRIPTION  Evolution of Spanish literature from the "jarcha" through La Celestina.

SPAN 8810  Topics in Golden Age Literature
CREDIT HOURS  3.0
DESCRIPTION  Study of particular aspects or periods of Golden Age Literature. May be repeated if topics vary.

SPAN 8835  Contemporary Spanish Literature
CREDIT HOURS  3.0
DESCRIPTION  Study of particular aspects of Contemporary Spanish Literature. May be repeated if topics vary.

SPAN 8840  Trauma, Memory, and Artistic Representation: State Terror in Argentina (1976-83)
CREDIT HOURS  3.0
DESCRIPTION  A look at how different artistic expressions (literature, film, music, visual arts) have represented state terror and the trauma of the "desaparecidos" in the decades following the 1976-83 military dictatorship in Argentina.

SPAN 8855  The Latin American "Boom" Novel
CREDIT HOURS  3.0
DESCRIPTION  (Not open to students with prior credit for SPAN 855B.) The "Boom" phenomenon of the 1960s and 1970s (including early manifestations in the 1940s and 1950s) as a radical departure from previous narrative forms.

SPAN 8860  The Contemporary Latin American Novel
CREDIT HOURS  3.0
DESCRIPTION  (Not open to students with prior credit for SPAN 855C.) Newest trends in the post-Boom novel since the mid-1970s as both a continuation and a departure from the "Boom."
SPAN 8865  Latin American Short Story
CREDIT HOURS  3.0
DESCRIPTION  The evolution of the genre in the nineteenth and twentieth centuries, as manifested in the various schools of romanticism, modernism, realism, naturalism, "vanguardismo," and contemporary trends.

SPAN 8880  Special Topics in Spanish Literature
CREDIT HOURS  3.0
DESCRIPTION  May be repeated for credit if topics vary.

SPAN 8885  Special Topics in Latin American Literature and/or Culture
CREDIT HOURS  3.0
DESCRIPTION  May be repeated for credit if topics vary.

SPAN 8895  Research
CREDIT HOURS  1.0 - 21.0
DESCRIPTION  Independent Research for credit.

SPAN 8999  Thesis Research
CREDIT HOURS  1.0 - 9.0
STAT 8090  Applied Multivariate Statistics
CREDIT HOURS  3.0
PREREQUISITES  consent of the instructor
DESCRIPTION  Matrix algebra, Multivariate normal distributions, discriminant analysis, canonical correlations, and Multivariate analysis of variance.

STAT 8310  Bayesian Data Analysis
CREDIT HOURS  3.0
PREREQUISITES  MATH 4752/6752 (Mathematical Statistics II) or equivalent, and R programming
DESCRIPTION  This course will cover the topics in the theory and practice of Bayesian statistical inference, ranging from a review of fundamentals to questions of current research interest. Motivation for the Bayesian approach. Bayesian computation, Monte Carlo methods, asymptotics. Model checking and comparison. A selection of examples and issues in modeling and data analysis. Discussion of advantages and difficulties of the Bayesian approach. This course will be computationally intensive through analysis of data sets using the R statistical computing language.

STAT 8440  Survival Analysis
CREDIT HOURS  3.0
PREREQUISITES  MATH 4752/6752
DESCRIPTION  Topics included are survival function, hazard function, right censoring, nonparametric methods for comparing two survival distributions, parametric and nonparametric regression methods with survival data.

STAT 8540  Advanced Methodologies in Biostatistics
CREDIT HOURS  3.0
PREREQUISITES  MATH 6752
DESCRIPTION  Topics included are clinical trials, longitudinal data analysis, Bayesian method, and diagnosis.

STAT 8550  Applied functional data analysis
CREDIT HOURS  3.0
PREREQUISITES  MATH 4752 or MATH 6752
DESCRIPTION  Functional data arises in many scientific areas. With an increasing number of cases, the collected data are curves or functions. This course introduces basic concepts and methods of functional data analysis. Topics include: functional data representation, smoothing methods, exploration of functional data, registration of functional data, functional principal component analysis, canonical correlation and discriminant analysis, functional linear models.

STAT 8561  Linear Statistical Analysis I
CREDIT HOURS  3.0
PREREQUISITES  MATH 4751/6751 and MATH 4752/6752
DESCRIPTION  Topics included are statistical inference, Multivariate normal distribution, distribution of quadratic forms, linear models, regression models and experimental design models.

STAT 8581  Statistical Theory I
CREDIT HOURS  3.0
PREREQUISITES  MATH 4662 or MATH 6662
DESCRIPTION  The course is primarily on the theory of statistical estimation. Topics included are method of moments, least squares, maximum likelihood, minimum variance unbiased estimation, the sufficiency and completeness of statistics, Fisher information and Cramer-Rao bounds, statistical decision theory, and Bayes decision rules.

STAT 8582  Statistical Theory II
CREDIT HOURS  3.0
PREREQUISITES  STAT 8581
DESCRIPTION  Classical and modern statistics, probability, decision theory, estimation theory, testing hypotheses, confidence intervals, large sample theory, and sequential analysis.
STAT 8600  Probability Theory  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4752/6752  
DESCRIPTION  Random variables and expectations, distribution and characteristic functions, laws of large numbers and central limit theorem, conditional probability, and expectation.

STAT 8610  Time Series Analysis  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4752/6752  
DESCRIPTION  Introduction to stationary stochastic processes, spectral representations; Box-Jenkins time series models; forecasting methods. Applications include use of a statistical computer package.

STAT 8630  Experimental Designs  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4752/6752  
DESCRIPTION  Analysis of randomized and incomplete block designs; factorial and nested designs using fixed, random, and mixed effects models. Applications include use of a statistical computer package.

STAT 8670  Computational Methods in Statistics  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4752/6752, and the ability to program in a high-level language  
DESCRIPTION  Topics included are optimization, numerical integration, bootstrapping, cross-validation and Jackknife, density estimation, smoothing, and use of the statistical computer package of S-plus/R.

STAT 8674  Monte Carlo Methods  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 6752 with grade of C or higher  
DESCRIPTION  Topics included are the Monte Carlo method for integration, Metropolis-Hastings algorithms, the Gibbs sampler and other Markov chain-based methods, importance sampling, simulated tempering, perfect sampling, and other related subjects. Some applications will be illustrated by real examples. Applications include use of a statistical computer package.

STAT 8678  SAS Programming and Data Analysis  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4544, MATH 6544, or equivalent  
DESCRIPTION  This course covers programming using the SAS statistical software package, and it provides an introduction to data analysis stressing the implementation using SAS. Topics include two main parts: 1) SAS programming: data management and manipulation, basic procedures, macro programming; 2) data analysis: descriptive statistical analysis, one- and two-sample inference, basic categorical data analysis, regression analysis, and other selected topics.

STAT 8680  Applied Nonparametric Methods  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4752/6752  
DESCRIPTION  Three lecture hours a week. Nonparametric testing and estimation procedures are introduced. Topics include rank methods for one sample and two sample problems, rank tests for one-way layouts, linear regression and independence problems, robust estimates, goodness-of-fit test, U-statistics, recent developments in nonparametric statistics.
STAT 8690  Topics in Statistics  
CREDIT HOURS  3.0  
DESCRIPTION  May be repeated for credit if topics vary.

STAT 8691  Graduate Research in Statistics  
CREDIT HOURS  1.0 - 15.0  
DESCRIPTION  May be repeated for credit.

STAT 8692  Graduate Laboratory in Statistics  
CREDIT HOURS  1.0 - 15.0  
DESCRIPTION  May be repeated for credit.

STAT 8693  Statistical Internship  
CREDIT HOURS  1.0 - 3.0  
PREREQUISITES  Consent of instructor  
DESCRIPTION  This course involves supervised, off-campus experience in a field in which statistical science plays an important role.

STAT 8694  Topics in Biostatistics  
CREDIT HOURS  3.0  
PREREQUISITES  Consent of instructor  
DESCRIPTION  This course involves opportunity to study new research topics. Students will develop advanced statistical skills in the frontier of biostatistics.

STAT 8700  Categorical Data Analysis  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4752 or MATH 6752  
DESCRIPTION  Analysis of Multinomial Data and Contingency tables, loglinear model for count data, model selection procedures; applications include use of statistical software packages, like SAS and S+.

STAT 8760  Sample Surveys  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4752/6752  
DESCRIPTION  Sampling from finite populations; random, stratified, cluster, and systematic sampling; estimation of means and variances; and ratio and regression sampling.

STAT 8800  Statistical Consulting I  
CREDIT HOURS  1.0  
PREREQUISITES  graduate students who have taken at least one-year courses in statistics  
DESCRIPTION  The objectives of Statistical Consulting Practicum are for students to develop skills needed by a successful statistical consultant, such as the effective collaboration skills with researchers in other disciplines, the communication skills, both written and verbal. In the orientation phase, a number of lectures will cover topics on consulting philosophy, effective problem identification, consulting session management and positive interaction with clients. In the practicum phase, students will be exposed to realistic statistical and scientific problems.

STAT 8820  Research  
CREDIT HOURS  3.0  
PREREQUISITES  consent of instructor and chair of department  
DESCRIPTION  Directed research leading to a research paper in statistics or analysis of a statistical problem. This course is intended to satisfy the requirement for a research paper or a written report of a laboratory experience for the non-thesis option.
STAT 8900  Colloquium
CREDIT HOURS  1.0
DESCRIPTION  The course is to serve the need of graduate students who are ready to start research work. It provides students the opportunity to see a wide range of topics that are currently being studied by statisticians. It also helps students to learn the important elements of a successful professional talk and to develop skills of professional communication and presentation.

STAT 8930  Data Science MS Project
CREDIT HOURS  1.0 - 3.0
DESCRIPTION  Students work on independent master's project that demonstrates concepts, techniques, skills, data analysis, and conclusions learned throughout the graduate program. Students are required to submit a final written report. Each project will need to encompass the following fundamental stages of a data mining project: 1) data collection/preparation, 2) machine or statistical learning, and 3) evaluation/assessment followed by the interpretation of discovered new knowledge.

STAT 8950  Directed Research in Statistics
CREDIT HOURS  1.0 - 15.0
PREREQUISITES  consent of the instructor
DESCRIPTION

STAT 8999  Thesis Research
CREDIT HOURS  1.0 - 18.0
PREREQUISITES  thesis option
DESCRIPTION

STAT 9999  Dissertation Research
CREDIT HOURS  1.0 - 18.0
PREREQUISITES  consent of instructor
DESCRIPTION  doctoral Dissertation Research.

</thead>
<tbody>
<tr>
<td>TX 8020</td>
<td>Advanced Federal Taxation</td>
<td>3.0</td>
<td>ACCT 4510 or ACCT 8040, with a minimum grade of C-</td>
<td>This course provides an in-depth study of the fundamentals of federal taxation of corporations and partnerships. This course prepares students for the comprehensive corporation and partnership courses. Students may not receive credit for both TX 8020 and ACCT 8120.</td>
</tr>
<tr>
<td>TX 8030</td>
<td>Tax Research</td>
<td>3.0</td>
<td>ACCT 4510, with minimum grade of C-</td>
<td>This course is a study of tax law sources, tax research methodology, and research documentation.</td>
</tr>
<tr>
<td>TX 8040</td>
<td>Tax Practice and Procedures</td>
<td>3.0</td>
<td>TX 8020 and TX 8030</td>
<td>This course is an in-depth study of techniques and procedures used by various tax administrators.</td>
</tr>
<tr>
<td>TX 8080</td>
<td>Taxation of Partnerships and Partners</td>
<td>3.0</td>
<td>TX 8020 and TX 8030</td>
<td>This course is a study of the income tax consequences of transactions relating to the partnership life cycle including preformation, formation, operation and termination.</td>
</tr>
<tr>
<td>TX 8100</td>
<td>Taxation of Property and Securities Transactions</td>
<td>3.0</td>
<td>TX 8020 and TX 8030</td>
<td>This course is a study of the income tax consequences of transactions relating to purchase, sale or exchange of property and securities.</td>
</tr>
<tr>
<td>TX 8120</td>
<td>Taxation of Corporations and Shareholders</td>
<td>3.0</td>
<td>TX 8020 and TX 8030</td>
<td>This course is a study of the income tax consequences of transactions relating to the corporate life cycle of Subchapter C and Subchapter S including preformation, formation, operation and termination.</td>
</tr>
<tr>
<td>TX 8140</td>
<td>Tax Aspects of Corporate Reorganizations and Liquidations</td>
<td>3.0</td>
<td>TX 8020, TX 8030, and TX 8120</td>
<td>This course is an advanced study of income tax laws relating to corporate acquisitions, reorganizations, divisions, tax attributes, and consolidated returns.</td>
</tr>
<tr>
<td>TX 8180</td>
<td>Current Topics in Taxation</td>
<td>3.0</td>
<td>TX 8020 and TX 8030</td>
<td>This course is a study of the contemporary issues in taxation. Subject matter for study is selected based upon current and proposed legislation in the area of taxation.</td>
</tr>
<tr>

<td>--------------------------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>TX 8220</td>
<td>Estate/Gift Taxation and Estate Planning</td>
<td>3.0</td>
<td>TX 8020 and TX 8030</td>
<td>This course is a study of federal estate and gift tax laws involved in intervivos and testamentary transfers of property.</td>
</tr>
<tr>
<td>TX 8270</td>
<td>State and Local Taxation</td>
<td>3.0</td>
<td>TX 8020 and TX 8030</td>
<td>This course examines current issues in state and local taxation as well as the interaction between the Internal Revenue Code and various state and local tax provisions.</td>
</tr>
<tr>
<td>TX 8300</td>
<td>International Aspects of Taxation</td>
<td>3.0</td>
<td>TX 8020 and TX 8030</td>
<td>This course is a study of income tax consequences of foreign income to U.S. taxpayers and of U.S. income for foreign businesses and individuals.</td>
</tr>
<tr>
<td>TX 8320</td>
<td>Accounting for Income Taxes</td>
<td>3.0</td>
<td>TX 8020 and TX 8030</td>
<td>This course is a study of the fundamental principles of Accounting for Income Tax (ASC 740). It emphasizes the income tax provision and financial statement analysis for tax planning.</td>
</tr>
<tr>
<td>TX 8389</td>
<td>Directed Readings in Taxation</td>
<td>1.0 - 3.0</td>
<td>TX 8020 and TX 8030 and consent of instructor, good academic standing</td>
<td>This course allows the supervised study of a specialized area not provided in the regular curriculum or provides a supervised study of a topical area of varied length, i.e., one to three semester hours. An arrangement must be made with a full-time faculty member to sponsor a student's research.</td>
</tr>
<tr>
<td>TX 8390</td>
<td>Advanced Case Studies in Taxation</td>
<td>3.0</td>
<td>3.0 or higher GPA and B grade or higher in ACCT 4510; or consent of instructor</td>
<td>In this course students will use advanced real world cases to identify tax accounting and tax planning issues in unique fact patterns, select and apply appropriate tax laws to unique fact patterns and make decisions requiring knowledge of the tax law and its effect.</td>
</tr>
<tr>
<td>TX 8391</td>
<td>Field Study in Taxation</td>
<td>3.0</td>
<td>TX 8020 and TX 8030 both with minimum grade of B; consent of instructor</td>
<td>This field study is a supervised, employer-site learning experience. In this experience, students have the opportunity to apply tax-related skills in a professional setting. Students must consult with the instructor or the MTx program coordinator before registering to determine whether the internship experiences will qualify for credit. Current/existing employment responsibilities do not qualify for field study credit. Field studies from other programs do not qualify for TX 8391.</td>
</tr>
<tr>

<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>TX 8510</td>
<td>Issues in Individual Taxation</td>
<td>3.0</td>
<td>TX 8020 and TX 8030</td>
<td>This course focuses on identification of individual tax issues, analysis of court opinions, and provides students with a conceptual framework for decision-making.</td>
</tr>
<tr>
<td>TX 8670</td>
<td>Tax Crimes and Forensics</td>
<td>3.0</td>
<td>TX 8020 and TX 8030</td>
<td>This course is a study of tax crimes under Title 26 and related crimes under Titles 18 and 31 of the United States Code. Topics include tax evasion and fraud, money laundering, currency transaction crimes, and related civil procedures.</td>
</tr>
<tr>
<td>TX 8800</td>
<td>Tax Analytics</td>
<td>3.0</td>
<td>TX 8020, TX 8030, and TX 8120</td>
<td>This course should be taken in the last semester of the program. It introduces students to tax analytics using a variety of data analytics and visualization tools.</td>
</tr>

### Applied Linguistics for the Bilingual/English as a Second Language Teacher

**Course Code:** TSLE 7250  
**Credit Hours:** 3.0  
**Description:** Students receive an overview of the principles of language structure, the processes of first and second acquisition, and the issues involved in assessing language proficiency with special attention paid to the application of linguistic knowledge to the multilingual and multicultural school setting. TSLE 7250 can be cross-listed with TSLE 4250.

### Cultural Issues for the Bilingual/English as a Second Language Teacher

**Course Code:** TSLE 7260  
**Credit Hours:** 3.0  
**Description:** Students examine the concept of culture and study cultural influences and the uses of culture in the education of children. Special attention is paid to the application of linguistic and cultural knowledge to the multilingual and multicultural school setting. TSLE 7260 can be cross-listed with TSLE 4260.

### Methods and Materials for the Bilingual/English as a Second Language Teacher

**Course Code:** TSLE 7440  
**Credit Hours:** 3.0  
**Description:** This course familiarizes students with current second language classroom research and with effective methods and materials with an emphasis on adapting these methods and materials to a specific classroom setting. TSLE 7440 can be cross-listed with TSLE 4440.

URB 8010  Urban Theory and Praxis
CREDIT HOURS  3.0
DESCRIPTION  The purpose of this course is to understand the conceptual dilemmas presented when analyzing the urban, and to explore insights (and blind spots) offered by a variety of contemporary urban theoretical perspectives. Students will gain a strong grounding debates over how we understand and research the city, and will develop the critical thinking skills necessary to creatively assess and interpret uneven geographic development, processes of urbanization, and the experience of global urbanism as a way of life.

URB 8020  Global Urban Trajectories
CREDIT HOURS  3.0
DESCRIPTION  This course compares and debates the main trajectories or pathways of cities, from past to present and future, and from a global perspective. In understanding the evolution of cities, historical and comparative global perspectives must be considered. The course will move between empirical observation and theory.

URB 8060  Urban Environments
CREDIT HOURS  3.0
DESCRIPTION  Examines the physical environmental processes relating to soil, climate, water, and ecosystems that characterize urban environments as opposed to more natural or rural ones. Explores the human-environmental interface in urban areas as reflected in issues such as environmental justice, sustainability, resilience, population growth, unequal distribution of resources, and public health. Sustainability will be particularly emphasized. The City of Atlanta is used as a living laboratory for the course.

URB 8097  Urban Special Topics
CREDIT HOURS  3.0
DESCRIPTION  A seminar designed to explore in depth the most recent issues and/or research results in a particular area of urban studies. The course can be repeated when topic vary.

URB 8110  Capstone Paper Research
CREDIT HOURS  3.0
DESCRIPTION  Capstone Paper is for students to undertake original research in a particular substantive area of Urban Studies. Students will demonstrate their capacity for critical thinking and apply the data collection and analytical skills developed through the MIS program to evaluate existing, and generate new knowledge regarding a key challenge facing cities.

URB 8120  Capstone Research Paper Advanced
CREDIT HOURS  3.0
DESCRIPTION  Capstone Paper is for students to undertake original research in a particular substantive area of Urban Studies. Students will demonstrate their capacity for critical thinking and apply the data collection and analytical skills developed through the MIS program to evaluate existing, and generate new knowledge regarding a key challenge facing cities.

URB 8130  MIS Urban Studies Internship
CREDIT HOURS  3.0
DESCRIPTION  The purpose of the MIS Internship is to expose students to a professional workplace where urban issues are being addressed and to provide the student with some experience in addressing such issues in a professional environment, which might be in the public, nonprofit, or private sector.
URB 8140  Directed Studies
CREDIT HOURS  1.0 - 3.0
DESCRIPTION  This course allows the supervised study of a specialized area not provided in the regular curriculum or provides a supervised study of a topical area of varied length, i.e. one to three semester credit hours. An arrangement must be made with a full-time faculty member to sponsor a student's research or study.

URB 8660  Urban Environments
CREDIT HOURS  3.0
DESCRIPTION  Examines the physical environmental processes relating to soil, climate, water, and ecosystems that characterize urban environments as opposed to more natural or rural ones. Explores the human-environmental interface in urban areas as reflected in issues such as environmental justice, sustainability, resilience, population growth, unequal distribution of resources, and public health. Sustainability will be particularly emphasized. The City of Atlanta is used as a living laboratory for the course.

URB 8661  Housing Markets and Housing Policy
CREDIT HOURS  3.0
DESCRIPTION  In-depth examination of housing market dynamics and processes, including racial and economic segregation, gentrification, affordability, housing finance, and other phenomena. Study of alternative local, state, and federal policies, both historical and contemporary, aimed at reducing housing problems and providing for fair and affordable housing and sustainable community development.

URB 8999  Graduate Research in Urban Studies
CREDIT HOURS  3.0 - 15.0
PREREQUISITES  None
DESCRIPTION  This course is designed for graduate research and teaching assistant seeking to conduct supervised research on topics related to project duties or instructional technologies. May be repeated for credit; does not count towards degree requirements.

URB 9010  Advanced Seminar in Urban Theory
CREDIT HOURS  3.0
PREREQUISITES  Must be a PhD student
DESCRIPTION  Addressing the urban question - or, what is analytically distinct about urban social processes - lies at the core of urban studies. In this advanced doctoral seminar, students will examine the foundations and frontiers of urban theory and research.

URB 9011  Urban Environmental Sustainability
CREDIT HOURS  3.0
PREREQUISITES  Enrolled PhD student
DESCRIPTION  Masters students require instructor approval. This course is designed to increase the understanding of systems dynamics, cascading effects, and scale, and to develop expertise in transdisciplinary research to address urban environmental sustainability challenges using a systems approach.

URB 9012  Urban Economic Resilience
CREDIT HOURS  3.0
DESCRIPTION  This course will focus on the economic capacity (e.g., productivity, employment, investment) of cities and their ability to absorb shocks and disturbances while retaining functionality; mitigation policies, and adaptation strategies to cope with changing economic fortunes.
**URB 9020**  
**Advanced Urban Analysis**  
**CREDIT HOURS**  
3.0  
**PREREQUISITES**  
PhD Student  
**DESCRIPTION**  
This course will introduce students to the key concepts, considerations, and debates of research design in urban studies. This would likely include theories of knowledge, ethical issues, exploration of quantitative, qualitative and mixed methods, and practical guidelines for developing a successful and feasible dissertation research project.

**URB 9000**  
**Comprehensive Exam Development**  
**CREDIT HOURS**  
6.0  
**DESCRIPTION**  
The coverage of the written comprehensive exam will be described in a Field Description, developed by the student in conjunction with the Committee under direction of the Committee Chair. This course will develop the Field Description expected to include a description of both theoretical and empirical work and including a detailed bibliography for each section.

**URB 9400**  
**Dissertation Proposal and Research Design**  
**CREDIT HOURS**  
3.0  
**DESCRIPTION**  
This course will enable students to develop their dissertation proposal and methods. Upon completion students will have to defend this proposal successfully in order to continue to dissertation research.

**URB 9500**  
**Dissertation Research**  
**CREDIT HOURS**  
3.0 - 18.0  
**DESCRIPTION**  
This course provides space for students to work on their dissertation research in preparation for oral defense. The dissertation allows the Ph.D. candidate to demonstrate his or her ability to conduct a research program leading to a significant contribution to the candidate's discipline. At least 15 hours of research must be completed, though a student may also register for more should the circumstance call for it.
**WGSS 6010 Feminist Praxis**

- **CREDIT HOURS**: 3.0
- **DESCRIPTION**: This course questions how structures and cultures influence our praxis in formal organizations as well as can our daily choices be feminist praxis. Using feminist concepts this course challenges us to explore ways that feminist understandings shape and ground organizing, praxis and everyday life. Students will be introduced to works targeting the six main aspects of a feminist’s life: relationships, family, work, friends, spirituality and intellect, and personal well being.

**WGSS 6040 Gender/Race/Class in Complex Societies**

- **CREDIT HOURS**: 3.0
- **DESCRIPTION**: (Same as ANTH 6060). Experiential learning in the urban setting through direct exposure to and experience in an ethnic community. Informed awareness of the knowledge, attitudes, and practices of ethnic communities within the community and larger society.

**WGSS 6052 Africana Women and Socio Political Change**

- **CREDIT HOURS**: 3.0
- **DESCRIPTION**: An examination of gender and power relationships in the Africana World. Crosslisted as AAS 6052.

**WGSS 6111 Anthropology of Self and Emotion**

- **CREDIT HOURS**: 3.0
- **DESCRIPTION**: This course draws upon readings in anthropological theory and ethnography to consider the cultural construction of self-hood, identity, and feelings, with an emphasis on the historical specificity of particular experiences, how they may be influenced by factors such as capitalism, how they may change over time, and the significance of gender. (Same as ANTH 6111.).

**WGSS 6210 Gender and Power in Ethnographic Perspective**

- **CREDIT HOURS**: 3.0
- **DESCRIPTION**: (Same as ANTH 6420.) Ethnographic and theoretical examination of the role of gender in human societies, including role differences and inequalities between women and men cross-culturally; the cultural significance and social institutions associated with public and domestic spheres; power, ideology, and the production of historically specific gender identities and sexualities; global perspectives on feminism and approaches to women’s empowerment.

**WGSS 6240 Sexuality and Gender in Asia**

- **CREDIT HOURS**: 3.0
- **DESCRIPTION**: Students will be exposed to studies of sexuality and gender in Asia from the perspective of feminist theory, queer theory, LGBT studies, and women’s gender, and sexuality studies. Materials explored include academic texts, memoir, fiction, and film. No prior course on Asian Studies is required. The course will be particularly useful for majors/minors in Women’s Studies and anthropology. (Same as ANTH 6241.).

**WGSS 6310 Girls**

- **CREDIT HOURS**: 3.0
- **DESCRIPTION**: (Same as ANTH 6320 and SOCI 6315.) Feminist analyses of who girls are and how they are socialized in our society. Girls’ experiences with social institutions, growth and development issues, self-esteem and body image, sexuality, culture and media, third-wave feminism, and girls' movements.

<tbody>
<tr>
<td>WGSS 6470</td>
<td>Visual Culture</td>
<td>3.0</td>
<td>Study of the visual politics of social organization with emphasis on the images and the arenas of everyday life in North American culture. Includes explorations of the fashion system, the medical body, the cosmetic and fitness industry, visual colonialism, museum displays, and high and popular art. (Same as ANTH 6470.).</td>
</tr>
<tr>
<td>WGSS 6510</td>
<td>Feminist Political Theory</td>
<td>3.0</td>
<td>(Same as POLS 6510.) This course is divided into three sections. The first is an overview of the treatment of women in Western political thought. The second is an analysis of five strands of feminist thinking: liberal, Marxist, socialist, radical, and postmodern. The third is a more detailed look at a few particular authors, including de Beauvoir, Gilligan, hooks, and MacKinnon.</td>
</tr>
<tr>
<td>WGSS 6580</td>
<td>Thinking the Body</td>
<td>3.0</td>
<td>This course considers different threads of feminist and social body theory as they consider the idealization and representation of the body, the input of biopolitical and scientifico-medical discourses on notions of the body, and interrogate the perceived materiality of the body. The course also addresses interventions in normalizing body discourses, specifically in genres of performance art, memoir, and personal essay. Crosslisted with WGSS 4580.</td>
</tr>
<tr>
<td>WGSS 6590</td>
<td>Cultural Studies of Gender</td>
<td>3.0</td>
<td>Introduces students to cultural studies as methodological approach to studying gender and culture. The topics vary each year; however, the course will consistently examine how popular culture provides a means for understanding social negotiation, politics and identity construction that people enact in everyday activities with a special focus on the role of gender.</td>
</tr>
<tr>
<td>WGSS 6720</td>
<td>Feminist Issues in Contemporary Art</td>
<td>3.0</td>
<td>Crosslisted with AH 4720, AH 6720, and WGSS 4720 Emphasis on feminist analyses of contemporary art and visual culture.</td>
</tr>
<tr>
<td>WGSS 6740</td>
<td>Women Artists</td>
<td>3.0</td>
<td>(Same as AH 6750). A survey of women artists from prehistory to the present.</td>
</tr>
<tr>
<td>WGSS 6750</td>
<td>Black Feminist Thought</td>
<td>3.0</td>
<td>(Same as AAS 6007.) Explores the tradition of Black feminism in the nineteenth and twentieth centuries. Students will critically read, discuss, and respond in writing to a series of texts representing Black feminist thought and its relationship to other feminisms. Students will be expected to demonstrate their knowledge of the Black feminist tradition and to demonstrate their ability to query, compare, and extend Black feminist theories.</td>

<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>WGSS 6760</td>
<td>Activism: History and Theory</td>
<td>3.0</td>
<td>Theoretical and historical perspectives on activism, focusing on how various types of activism are intertwined, the emergence of second-wave feminism within the context of civil rights and anti-war movements, and current feminist activisms within broader social justice frameworks. Students are required to spend a specified number of hours per week working on an activist project. This course is required for students following the Activist Track of the M.A. in Women's Studies.</td>
</tr>
<tr>
<td>WGSS 6770</td>
<td>Gender and Sexuality in the African Diaspora</td>
<td>3.0</td>
<td>This course thinks about the kinds of conceptual tools: questions, methods, theories, histories, geographies, time periods, and social/cultural movements needed in order to understand the dynamic and shifting terrain of gender and sexuality in the African Diaspora. Colonialism, slavery, social movements as well as transnational circuits of music, self-expression, desire and consumption/production will frame our approach to theorizing gender and sexuality in the actual and imagined spaces of the African Diaspora. Crosslisted with WGSS 4770.</td>
</tr>
<tr>
<td>WGSS 6780</td>
<td>African-American Lesbian and Gay Activism</td>
<td>3.0</td>
<td>Examines the speeches, writings, and other public communication of African-American lesbians and gay men who promote democratic ideals. Surveys historical and contemporary issues confronting this marginalized population. Emphasis on thematic and cultural critical approaches.</td>
</tr>
<tr>
<td>WGSS 6791</td>
<td>Sexuality, Space, and Global Cities</td>
<td>3.0</td>
<td>Considers the ways that space/geography, particularly the &quot;global city,&quot; informs how we approach studying sexuality, gender and globalization. Examines how attending to the production of space and bodies can expand the ways we think about gender formation, sexual practices, behaviors, desires and identities.</td>
</tr>
<tr>
<td>WGSS 6810</td>
<td>Feminism and Foucault</td>
<td>3.0</td>
<td>Provides a broad overview of the works of the French philosopher, Michel Foucault, and emphasizes feminist/womanist use of his theories and methods to analyze domination and resistance.</td>
</tr>
<tr>
<td>WGSS 6820</td>
<td>Feminism and Queer Theory</td>
<td>3.0</td>
<td>Analyzes the relations of sexuality and gender identity, as well as the interrelationships among these identities and other institutions, such as capitalism, globalization, art and performance, the law, media, and academia.</td>
</tr>
<tr>
<td>WGSS 6830</td>
<td>Class Matters</td>
<td>3.0</td>
<td>Investigates the complexities of class in the U.S., where it is elusive because we often imagine ourselves free from the fixed hierarchies of other societies or, at the very least, overestimate our class mobility. Connects issues of social stratification to other systemic oppressions, such as race and gender, in the context of increasing globalization.</td>

<tr>
<td>WGSS 6842</td>
<td>Sexuality and Nationalism</td>
<td>3.0</td>
<td>This course explores the relationship between modern forms of identity, sexuality, gender and political regimes. We will explore the deployment of sexuality in various political systems and discuss the specific relations between nationalism and sexuality.</td>
</tr>
<tr>
<td>WGSS 6844</td>
<td>Youth and Sexualities</td>
<td>3.0</td>
<td>This class takes up the intersections of youth and sexuality. Readings, discussion, and analysis focus on the ways adults seek to govern the sexual subjectivities of young people and the ways young people respond to their surroundings as they create identities and social practices related to sexuality. Focuses of the course include practices of governing others and the self relating to sex education, the creation of &quot;LGBT&quot; and &quot;queer&quot; youth, social scientific &quot;expertise,&quot; and popular culture.</td>
</tr>
<tr>
<td>WGSS 6846</td>
<td>Gender, War, and Militarism in/and the Middle East</td>
<td>3.0</td>
<td>Crosslisted with WGSS 4846. This course explores the interrelationships of war and militarism with gender and sexuality, with a focus on the geopolitical context of the Middle East. Students will engage with a variety of feminist and queer perspectives and disciplinary and interdisciplinary methodologies, including history, anthropology, literature, international relations, and cultural studies.</td>
</tr>
<tr>
<td>WGSS 6860</td>
<td>Feminist Philosophy</td>
<td>3.0</td>
<td>(Same as PHIL 6870). Classical and contemporary issues concerning women, such as discrimination on the basis of gender, class, race, or sexuality, whether gender is natural or constructed, and historical roots of feminist and anti-feminist perspectives.</td>
</tr>
<tr>
<td>WGSS 6910</td>
<td>Special Topics</td>
<td>3.0</td>
<td>Intensive treatment of specified topics in women's studies. May be repeated for credit if topic varies.</td>
</tr>
<tr>
<td>WGSS 8001</td>
<td>Feminist Theories</td>
<td>3.0</td>
<td>Students will be exposed to feminist intersectional approaches to gender, race, class and sexuality. This course serves as an introduction to the spectrum of feminist theories and their intellectual contexts. Students will be exposed to theoretical projects such as liberalism/neoliberalism, marxism, post-structuralism/post-modernism, psychoanalytic theory, and post-colonial studies. Engagements and critiques of these theories may include but are not limited to womanism, black feminist thought, queer theory, ecofeminism, transnational feminism, marxist/socialist feminism, and psychoanalytic feminism.</td>
</tr>
</tbody>
</table>
WGSS 8002  Globalization and Gender
CREDIT HOURS 3.0
DESCRIPTION An exploration of the social, political, and economic impacts of globalization aimed toward understanding the gendered dynamics of global economic restructuring. The course will include a consideration of the relationship between globalization on the one hand and imperialism, national security, and imprisonment on the other. Students will survey a range of feminist theories and responses to globalization, including, but not limited to, transnational feminisms, postcolonial theory, and postmodern theories.

WGSS 8003  New Directions in Feminism
CREDIT HOURS 3.0
DESCRIPTION Emerging perspectives in feminist theory, feminist activism, and the field of women’s studies. May examine how feminism and women’s studies intersect with other critical theories and social movements. Specific topics vary by instructor.

WGSS 8004  Feminist Methodologies
CREDIT HOURS 3.0
DESCRIPTION This interdisciplinary course critiques masculinist and other hegemonic knowledge practices by moving between epistemology, theory, methods and ethics. Rather than training students in particular research methods, this course engages students with feminist epistemological and methodological critiques and theories applicable to their research methods and design.

WGSS 8005  Proseminar in Women’s, Gender, and Sexuality Studies
CREDIT HOURS 1.0 OR 0.0 2.0
DESCRIPTION Introduction to discipline-specific research skills and socialization experiences in women’s, gender, and sexuality studies. Required for all first-year WGSS M.A. students. Students take Part A of this year-long course in Fall for 1 credit hour, and Part B in the Spring for 2 credit hours. Students are required to attend certain departmental events in addition to class sessions.

WGSS 8006  Feminist Pedagogy
CREDIT HOURS 3.0
DESCRIPTION Introduction to both theoretical and practical components of feminist pedagogy. The phrase “feminist pedagogy” refers to pedagogical practices that work to be anti-oppressive and liberatory. It develops within a tradition of critical pedagogy, which involves both a critique of the university as a place that acts as a gatekeeper for class privilege and an appropriate subject-formation as well as a vision of the university where we can contest power relations and imagine new possibilities for expanding the intelligible. In other words, feminist pedagogy imagines the classroom as a space to encourage deep exploration of social problems in order to critically evaluate and explore social justice frameworks. In the class, students will utilize these theoretical frameworks in order to develop their own specific goals and evaluate specific teaching strategies for use in their own classrooms.

Appendix II Administration and Faculty

This chapter contains information on administration for the University System of Georgia, Board of Regents and Georgia State University. A list of all Georgia State University faculty is provided.

The University System of Georgia

The University System of Georgia includes all state-operated institutions of higher education in Georgia: four research universities, four comprehensive universities, nine state universities, and nine state colleges. These 26 public institutions are located throughout the state.

A 19-member constitutional Board of Regents governs the University System, which has been in operation since 1931. Appointments of board members, five from the state-at-large and one from each of the state’s fourteen congressional districts, are made by the governor and are subject to confirmation by the State Senate. Regular terms of board members are seven years.

The chairperson, vice chairperson, and other officers of the Board of Regents are elected by the members of the board. The chancellor, who is not a member of the board, is the chief executive officer of the board and the chief administrative officer of the University System.

The overall programs and services of the University System are offered through three major components: instruction, public service and continuing education, and research.

Instruction consists of programs of study leading toward degrees, ranging from the associate (two-year) level to the doctoral level, and certificates.

Standards for admission of students to instructional programs at each institution are determined by the institution pursuant to policies of the Board of Regents. The board establishes minimum standards and leaves to each institution the prerogative to establish higher standards. Applications for admission should be addressed to the institutions.

Public service and continuing education consist of non-degree activities, primarily, and special types of college degree credit courses. The non-degree activities include short courses, seminars, conferences, and consultative and advisory services in many areas of interest. Typical college degree credit courses are those offered through extension center programs and teacher education consortiums.

Research encompasses scholarly investigations conducted for discovery and application of knowledge. Most of the research is conducted through the universities; however, some of it is conducted through several of the senior colleges. The research investigations cover matters related to the educational objectives of the institutions and to general social needs.

The policies of the Board of Regents provide a high degree of autonomy for each institution. The executive head of each institution is the president, whose election is recommended by the chancellor and approved by the board.

Faculty

Andrew Young School of Policy Studies Faculty

Addie, Jean-Paul, Ph.D. (York University), Assistant Professor, Urban Studies Institute
Almada, Lorenzo, Ph.D. (Georgia State University), Clinical Assistant Professor of Economics
Bahl, Roy W., Jr., Ph.D. (University of Kentucky), Dean and Regents' Professor Emeritus of Economics
Ballard, Ellen, M.S. (Boston University), Clinical Instructor of Criminal Justice and Criminology
Banzhaf, H. Spencer, Ph.D. (Duke University), Professor of Economics
Beck, Elizabeth L., Ph.D. (University of Pittsburgh), Professor of Social Work
Bourdeaux, Carolyn, Ph.D. (Syracuse University), Associate Professor of Public Management and Policy
Brezina, Timothy J., Ph.D. (Emory University), Professor of Criminal Justice and Criminology
Bride, Brian E., Ph.D. (University of Georgia, Director and Distinguished University Professor of Social Work
Brooks, Fred P., III, Ph.D. (University of Georgia), Associate Professor of Social Work
Camp, Damon Davis, Ph.D. (Claremont Graduate University), Associate Professor Emeritus of Criminal Justice and Criminology
Capers, K. Juree, Ph.D. (Texas A&M University), Assistant Professor of Public Management and Policy
Carattini, Stefano, Ph.D. (University of Barcelona), Assistant Professor of Economics
Chen, Ruiyun (Frances), Ph.D. (University of Pennsylvania), Assistant Professor of Criminal Justice and Criminology
Chong, Alberto, Ph.D. (Cornell University), Professor of Economics
Collins, Sue Carter, Ph.D. (Florida State University), Associate Professor of Criminal Justice and Criminology

Cox, James C., Ph.D. (Harvard University), Professor of Economics, Director of the Experimental Economics Center and Holder of the Noah Langdale, Jr. Eminent Scholar and the Georgia Research Alliance Eminent Scholar Chair

Cummings, Ronald G., Ph.D. (University of Kansas), Professor Emeritus of Economics

Cunningham, Christopher R., Ph.D. (Syracuse University), Adjunct Associate Professor of Economics

Dabney, Dean A., Ph.D. (University of Florida), Chair and Professor of Criminal Justice and Criminology

Daigle, Leah, Ph.D. (University of Cincinnati), Professor of Criminal Justice and Criminology

Dantzler, Prentis, Ph.D. (Rutgers University), Assistant Professor of Urban Studies Institute

Dear, Renanda Wood, M.S.W. (University of Georgia), Director of Field Education and Senior Academic Professional of Social Work

Eau, Grace, Ph.D. (University of Kansas), Clinical Associate Professor of Economics

Esnard, Ann-Margaret, Ph.D. (University of Massachusetts at Amherst), Associate Dean for Research and Strategic Initiatives and Distinguished University Professor of Public Management and Policy

Farnham, Paul G., Ph.D. (University of California, Berkeley), Associate Professor Emeritus of Economics

Feltenstein, Andrew, Ph.D. (Yale University), Professor of Economics

Forge, Nicholas, Ph.D. (Fordham University, New York City), Clinical Associate Professor of Social Work

Friedmann, Robert R., Ph.D. (University of Minnesota), Professor Emeritus of Criminal Justice and Criminology and Director of the Georgia International Law Enforcement Exchange (GILEE) Program

Frost, Shelby, Ph.D. (University of Colorado, Boulder), Clinical Associate Professor of Economics

Gurmu, Shiferaw, Ph.D. (Indiana University), Chair and Professor of Economics

Hacker, Joseph F., Ph.D. (University of Pennsylvania), Clinical Associate Professor of Public Management and Policy and Director of the Undergraduate Program

Hansen, Carol D., Ph.D. (University of North Carolina, Chapel Hill), Associate Professor Emerita of Public Management and Policy and Member of the W. T. Beebe Institute of Personnel and Employment Relations

Hartinger-Saunders, Robin, Ph.D. (The State University of New York at Buffalo), Associate Professor of Social Work
Heaghney, Jr., Kenneth, Ph.D. (Rice University), Research Professor of Economics

Hildreth, W. Bartley, Ph.D. (University of Georgia), Professor of Public Management and Policy

Hill, Sharon L., Ph.D. (University of Texas – Arlington), Clinical Associate Professor of Public Management and Policy

Hinkle, Joshua, Ph.D. (University of Maryland), Associate Professor of Criminal Justice and Criminology

Hirsch, Barry, Ph.D. (University of Virginia), Professor Emeritus of Economics

Hotchkiss, Julie L., Ph.D. (Cornell University), Adjunct Professor of Economics

Hunt, Donald, Ph.D. (Georgia State University) Post-Doctoral Research Fellow of Criminal Justice and Criminology

Immergluck, Daniel, Ph.D. (University of Illinois at Chicago), Professor, Urban Studies Institute

Ivery, Jan, Ph.D. (Virginia Commonwealth University), Associate Professor of Social Work

Iwaniec, David, Ph.D. (Arizona State University), Assistant Professor, Urban Studies Institute

Jacques, Scott Thomas, Ph.D. (University of Missouri, St. Louis), Associate Professor of Criminal Justice and Criminology

Johnson, Cyntoria, J.D. (Florida Coastal School of Law), Clinical Assistant Professor of Criminal Justice and Criminology

Kerlin, Janelle A., Ph.D. (Syracuse University), Associate Professor of Public Management and Policy

Kim, Mirae, Ph.D. (Rutgers University), Assistant Professor of Public Management and Policy

Kreisman, Daniel, Ph.D. (University of Chicago), Assistant Professor of Economics

Kropf, Nancy P., Ph.D. (Virginia Commonwealth University), Dean of Perimeter College and Professor of Social Work

Laury, Susan K., Ph.D. (Indiana University), Associate Professor of Economics

Lewinson, Terri, Ph.D. (University of Georgia), Associate Professor of Social Work

Lewis, Gregory, Ph.D. (Syracuse University), Professor of Public Management and Policy

Li, Fei, Ph.D. (New York University), Assistant Professor, Urban Studies Institute

Ligon, Jan H., Ph.D. (University of Georgia), Associate Professor of Social Work
Littrell, Jill, Ph.D. (Arizona State University), Associate Professor of Social Work

Liu, Cathy Yang, Ph.D. (University of Southern California), Chair and Professor of Public Management and Policy

Lyons, Peter, Ph.D. (The State University of New York at Buffalo), Professor of Social Work

Maimon, David, Ph.D. (Ohio State University) Associate Professor of Criminal Justice and Criminology

Manns, Edith Kelley, Ed.D. (University of Virginia, Charlottesville), Associate Professor Emerita of Public Management and Policy

Martin, James Francis, LL.M. (University of Georgia), Clinical Associate Professor of Public Management and Policy

Martinez-Vazquez, Jorge L., Ph.D. (Washington University), Regents’ Professor of Economics and Director of the International Center for Public Policy

Marton, James, Ph.D. (Washington University), Associate Professor of Economics

Melkadze, Givi, Ph.D. (Georgetown University), Assistant Professor of Economics

Mescon, Michael H., Ph.D. (New York University), Dean Emeritus of the Andrew Young School of Policy Studies and Regents’ Professor Emeritus of Economics

Minyard, Karen J., Ph.D. (Georgia State University), Director of the Georgia Health Policy Center and Research Professor of Public Management and Policy

Moore, Robert E., Ph.D. (Cornell University), Associate Professor of Economics

Mroz, Tom, Ph.D. (Stanford University), Professor of Economics and Ramsey Chair

Newman, Harvey K., Ph.D. (Emory University), Professor Emeritus of Public Management and Policy

Nguimkeu, Nguedia Pierre, Ph.D. (Simon Fraser University), Assistant Professor of Economics

Nigro, Lloyd G., Ph.D. (University of Southern California), Professor Emeritus of Public Management and Policy

Nijman, Johannes, Ph.D. (University of Colorado), Professor and Director, Urban Studies Institute

Noonan, Douglas S., Ph.D. (The University of Chicago), Adjunct Associate Professor of Economics

O'Kane, John, M.S.W. (Washington University at St. Louis), Professor of Practice of Public Management and Policy and Outreach Director of the Nonprofit Studies Program

Ouellet, Marie, Ph.D. (Simon Fraser University), Assistant Professor of Criminal Justice and Criminology
Palm, Risa, Ph.D. (University of Minnesota), Professor of Urban Studies

Parko, Jr., Joseph Edward, M.B.A. (Georgia State University), Assistant Professor Emeritus of Public Management and Policy

Patrick, Carlianne, Ph.D. (The Ohio State University), Assistant Professor of Economics

Patton, Carl V., Ph.D. (University of California, Berkeley), President Emeritus of Georgia State University, Professor of Public Management and Policy and Professor of Geosciences

Perrault, Louis, Ph.D. (Queen’s University), Assistant Professor of Economics

Pesko, Michael, Ph.D. (University of Illinois at Chicago), Assistant Professor of Economics

Ratajczak, Donald, Ph.D. (Massachusetts Institute of Technology), Regents’ Professor Emeritus of Economics

Ray, Barbara Jean, Ph.D. (Emory University), Associate Professor Emerita of Public Management and Policy

Reed, Mark D., Ph.D. (The State University of New York at Albany), Associate Professor of Criminal Justice and Criminology

Ribar, David, Ph.D. (Brown University), Professor of Economics

Rider, Mark, Ph.D. (Georgia State University), Associate Professor of Economics

Roberson, Karen, Ph.D. (Jackson State University), Lecturer of Social Work

Roch, Christine H., Ph.D. (The State University of New York at Stony Brook), Professor of Public Management and Policy and Director of Ph.D. Programs in Public Policy

Ross, II, Glenwood, Ph.D. (Georgia State University), Clinical Associate Professor of Economics

Rubenstein, Ross, Ph.D. (New York University), Professor of Public Management and Policy and Dan E. Sweat Distinguished Chair in Educational and Community Policy

Rushing, Francis W., Ph.D. (University of North Carolina, Chapel Hill), Professor Emeritus of Economics

Sabol, William, Ph.D. (University of Pittsburgh) Professor of Criminal Justice and Criminology

Sadiraj, Vjollca, Ph.D. (University of Amsterdam), Associate Professor of Economics

Saposnik, Rubin, Ph.D. (University of Minnesota, Twin Cities), Professor Emeritus of Economics

Sass, Tim R., Ph.D. (University of Washington), Distinguished University Professor of Economics
Scott, Jr., Lionel D., Ph.D. (The Ohio State University), Associate Professor of Social Work

Searcy, Cynthia, Ph.D. (Syracuse University), Associate Dean for Academic Innovation and Strategy of the Andrew Young School of Policy Studies and Clinical Associate Professor of Public Management and Policy

Seelman, Kristie L., M.S.W. (University of Denver), Associate Professor of Social Work

Shapiro, Michael Bruce, J.D. (Emory University), Clinical Assistant Professor of Criminal Justice and Criminology

Sjoquist, David L., Ph.D. (University of Minnesota), Professor of Economics

Skogstad, Samuel M., Ph.D. (Washington University in St. Louis), Professor Emeritus of Economics

Smith, Carol H., M.S.W. (Valdosta State University), Academic Professional of Social Work

Smith, Jonathan, Ph.D. (Boston University), Assistant Professor of Economics

Snyder, Angela Bauer, Ph.D. (Yale University), Research Associate Professor of Public Management and Policy and Director of Health Policy and Financing

Snyder, Susan M., Ph.D. (University of California, Los Angeles), Associate Professor of Social Work

Stephan, Paula Elizabeth, Ph.D. (University of Michigan), Professor Emerita of Economics

Swarthout, J. Todd, Ph.D. (University of Arizona), Academic Professional of Economics

Tchernis, Rusty, Ph.D. (Brown University), Associate Professor of Economics

Teltser, Keith, Ph.D. (Michigan State University), Assistant Professor of Economics

Thomas, John Clayton, Ph.D. (Northwestern University), Professor of Public Management and Policy and Political Science and Director of the Master’s Programs

Timofeev, Andrey, Ph.D. (Charles University in Prague), Research Assistant Professor of Economics

Topalli, Volkan, Ph.D. (Tulane University), Professor of Criminal Justice and Criminology

Valev, Neven, Ph.D. (Purdue University), Adjunct Associate Professor of Economics

Wallace, Sally, Ph.D. (Syracuse University), Dean of the Andrew Young School of Policy Studies and Professor of Economics

Warner, Barbara D., Ph.D. (The State University of New York at Albany), Emeritus Professor of Criminal Justice and Criminology

Watkins, Karen Y., Ph.D. (University of Georgia), Clinical Assistant Professor of Social Work
Waugh, Jr., William Lee, Ph.D. (University of Mississippi), Professor Emeritus of Public Management and Policy

Wertheimer, Mindy R., Ph.D. (Georgia State University), Director of the MSW Program and Clinical Professor of Social Work

Whitley, Deborah M., Ph.D. (University of Pittsburgh), Professor of Social Work

Willis, Verna, Ph.D. (The State University of New York at Buffalo), Associate Professor Emerita of Public Management and Policy

Wolk, James L., D.S.W. (Tulane University), Professor Emeritus of Social Work

Wright, Richard, PhD. (Cambridge University), Regents’ Professor of Criminal Justice and Criminology

Xu, Yongsheng, Ph.D. (Tulane University), Professor of Economics

Yu, Shaohua, M.A. (The State University of New York at Albany), Clinical Instructor of Criminal Justice and Criminology

College of Arts and Sciences Faculty

Acosta, Katie, Ph.D. (University of Connecticut, Storrs) Associate Professor, Sociology

Adams, Ellis, Ph.D. (Michigan State University) Assistant Professor, Geosciences

Aharoni, Eyal, Ph.D. (University of California, Santa Barbara) Assistant Professor, Psychology

Ahuja, Tarushee, Ph.D. (University of Delhi) Lecturer, Chemistry

Ainsworth, James, Ph.D. (Ohio State University) Associate Professor, Sociology

Akbas, Erol, Ph.D. (University of Illinois, Chicago) Senior Lecturer, Mathematics and Statistics

Akhter, Erica, Ph.D. (Emory University) Lecturer, Neuroscience

Akinyela, Makungu, Ph.D. (Emory University) Associate Professor, African-American Studies

Albers, H. Elliott, Ph.D. (Tulane University) Regents’ Professor, Neuroscience, Biology, and Psychology

Alexander, Margo, Ph.D. (Georgia State University) Senior Lecturer, Mathematics and Statistics

Alger, Candice, A.B.J. (University of Georgia) Professor of Practice, Creative Media Industries

Alghoul, Zahra, Ph.D. (Florida State University) Lecturer of Chemistry
Altman, Daniel, Ph.D. (Massachusetts Institute of Technology) Assistant Professor, Political Science
Anderson, Page, Ph.D. (University of Georgia) Associate Professor, Psychology
Aneja, Ritu, Ph.D. (University of Delhi) Distinguished University Professor, Biology
Angra, Aakansha, Ph.D. (Purdue University) Academic Professional, Biology
Angryk, Rafal, Ph.D. (Tulane University) Professor, Computer Science
Apalkov, Vadym, Ph.D. (University of Utah) Professor, Physics and Astronomy
Arav, Marina, Ph.D. (Technion-Israel Institute of Technology) Associate Professor, Mathematics and Statistics
Armistead, Lisa, Ph.D. (University of Georgia) Professor, Psychology (Associate Provost for Graduate Programs)
Artinian, Liana, Ph.D. (University of Illinois, Urbana-Champaign) Lecturer, Biology
Ashok, Ashwin, Ph.D. (Rutgers University) Assistant Professor, Computer Science
Atkinson, Jaynette, Ph.D. (University of Kansas) Associate Professor, Communication
Attanasio, Roberta, D.Res. (University of Rome) Associate Professor, Biology
Aydin, Berkay, Ph.D. (Georgia State University) Assistant Research Professor, Computer Science
Babaie, Hassan, Ph.D. (Northwestern University) Associate Professor, Geosciences and Computer Science
Baker, H. Robert, Ph.D. (University of California, Los Angeles) Associate Professor, History
Banda, Juan, Ph.D. (Montana State University) Assistant Professor, Computer Science
Barber, Sarah, Ph.D. (Stony Brook University) Assistant Professor, Psychology
Baro, Deborah, Ph.D. (University of Illinois) Professor, Biology and Neuroscience
Baron, Fabien, Ph.D. (University of Paris) Associate Professor, Physics and Astronomy
Barouch, Timothy, Ph.D. (Northwestern University) Assistant Professor, Communication
Barthlow, Douglas, Ph.D. (University of Georgia) Principal Senior Lecturer, Communication
Bascomb, Lia, Ph.D. (University of California, Berkeley) Assistant Professor, African-American Studies
Bassett, Molly, Ph.D. (University of California, Santa Barbara) Associate Professor, Religious Studies
Chair

Becker, Mark, Ph.D. (Pennsylvania State University) Professor, Mathematics and Statistics (University President)

Beirne, Mark, M.D. (St. Louis University School of Medicine) Senior Lecturer, Biology

Belcher, Diane, Ph.D. (Ohio State University) Professor, Applied Linguistics and English as a Second Language (Chair)

Belkasim, Saeid, Ph.D. (University of Windsor) Associate Professor, Computer Science and Neuroscience

Bell, David, Ph.D. (Emory University) Senior Lecturer, Religious Studies

Bellon, Joseph, Ph.D. (University of Georgia) Senior Lecturer, Communication

Belykh, Igor, Ph.D. (University of Nizhny Novgorod, Russia) Professor, Mathematics and Statistics and Neuroscience

Benson, Charlie Garnett, Ph.D. (Emory University) Associate Professor, Biology

Bentz, Misty, Ph.D. (Ohio State University) Associate Professor, Physics and Astronomy

Beran, Michael, Ph.D. (Georgia State University) Associate Professor, Psychology

Berg, Louis-Alexandre, Ph.D. (Georgetown University) Assistant Professor, Political Science

Berman, Larry, Ph.D. (Princeton University) Professor, Political Science (Dean, Honors College)

Bermudez, Maria Elena, Ph.D. (University of Georgia) Senior Lecturer, World Languages and Cultures

Berry, Jessica, Ph.D. (University of Texas, Austin) Associate Professor, Philosophy

Black, Michael, Ph.D. (Georgia State University) Senior Lecturer, Neuroscience

Black, Steven, Ph.D. (University of California, Los Angeles) Associate Professor, Anthropology

Blackmon, Doug, B.A. (Hendrix College) Professor of Practice, Creative Media Industries

Blaustein, David, Ph.D. (Georgia State University) Senior Academic Professional, Biology

Bloom, Mia, Ph.D. (Princeton University) Professor, Communication

Bolsen, Toby, Ph.D. (Northwestern University) Associate Professor, Political Science

Bondarenko, Vladimir, Ph.D. (M. V. Lomonov Moscow State University) Associate Professor, Mathematics and Statistics
Bonnette-Bailey, Lakeyta, Ph.D. (Ohio State University) Associate Professor, African-American Studies and Political Science

Bourgeois, Anu, Ph.D. (Louisiana State University) Associate Professor, Computer Science

Bowman, Sara, Ph.D. (Georgia Institute of Technology) Lecturer, Psychology

Branum-Martin, Lee, Ph.D. (University of Houston) Professor, Psychology

Brattain, Michelle, Ph.D. (Rutgers University) Associate Professor, History (Chair)

Brewer, Matthew, Ph.D. (University of Wisconsin) Senior Academic Professional, Biology

Brinton, Margo, Ph.D. (University of Pennsylvania) Regents’ Professor, Biology

Brooke-Bocca, James, B.A. (Queens College) Professor of Practice, Creative Media Industries

Brooks, Jody, M.F.A. (Georgia State University) Principal Senior Lecturer, English

Brosnan, Sarah, Ph.D. (Emory University) Professor, Psychology, Neuroscience, and Philosophy

Brown, Chris, Ph.D. (University of Georgia) Senior Lecturer, Political Science

Brown, Murray, Ph.D. (University of Nebraska, Lincoln) Associate Professor, English

Bunting, John, Ph.D. (Georgia State University) Principal Senior Lecturer, Applied Linguistics and English as a Second Language

Burgess, Elizabeh, Ph.D. (University of Southern California) Professor, Gerontology (Director) and Sociology

Burnet, Jennie, Ph.D. (University of North Carolina, Chapel Hill) Associate Professor, Anthropology

Burns, Robert, Ph.D. (Georgia State University) Senior Lecturer, English

Burrison, John, Ph.D. (University of Pennsylvania) Regents’ Professor, English

Bykowski, Richard, Ph.D. (Indiana University) Lecturer, Biology

Cai, Zhipeng, Ph.D. (University of Alberta) Associate Professor, Computer Science

Caison, Gina, Ph.D. (University of California, Davis) Associate Professor, English

Caldwell, Tanya, Ph.D. (University of Toronto) Professor, English

Calhoun, Vince, Ph.D. (University of Maryland, Baltimore) Distinguished University Professor of Psychology
Calhoun-Brown, Allison, Ph.D. (Emory University) Associate Professor, Political Science (Vice President for Student Engagement and Programs)

Campbell, Ian, Ph.D. (Emory University) Associate Professor, World Languages and Cultures

Cao, Xiajun, Ph.D. (State University of New York, Buffalo) Professor, Computer Science

Carey, Henry, Ph.D. (Columbia University) Associate Professor, Political Science

Carlin, Ryan, Ph.D. (University of North Carolina, Chapel Hill) Professor, Political Science

Carruth, Laura, Ph.D. (University of Colorado, Boulder) Associate Professor, Neuroscience and Biology

Carter, Sierra, Ph.D. (University of Georgia) Associate Professor, Psychology

Cash, Annette, Ph.D. (Ohio State University) Principal Senior Lecturer, World Languages and Cultures

Castillo-Ruiz, Alexandra, Ph.D. (Michigan State University) Assistant Research Professor, Neuroscience

Cavusgil, Sharon, M.A. (Michigan State University) Senior Lecturer, Applied Linguistics and English as a Second Language

Chapman, Rebekah, Ph.D. (University of Georgia) Senior Lecturer, Biology

Chassaing, Benoit, Ph.D. (Auvergne University) Assistant Professor, Neuroscience

Chen, Guantao, Ph.D. (University of Memphis) Regents’ Professor, Mathematics and Statistics (Chair)

Chen, Jiayu, Ph.D. (University of New Mexico) Assistant Research Professor, Psychology

Chen, Yanyi, Ph.D. (Georgia State University) Academic Professional, Chemistry

Cheshier, David, Ph.D. (University of Iowa) Associate Professor, Creative Media Industries

Chikwanda, Patreck, D.A. (Idaho State University) Lecturer, Mathematics and Statistics

Chin, Kuk Jeong, Ph.D. (University of Konstanz) Associate Professor, Biology

Chou, Rosalind, Ph.D. (Texas A&M University) Associate Professor, Sociology

Christie, Angela, Ph.D. (Georgia State University) Senior Lecturer, English

Christie, Eddie, Ph.D. (West Virginia University) Associate Professor, English

Cohen, Andrew I., Ph.D. (University of NC, Chapel Hill) Associate Professor, Philosophy

Cohen, Andrew J., Ph.D. (Georgetown University) Professor, Philosophy
Cohen, Lindsey, Ph.D. (University of Georgia) Professor, Psychology (Chair)

Cohen, Rachelle, Ph.D. (University of Georgia) Senior Lecturer, Psychology

Collins, C. Brennan, Ph.D. (Georgia State University) Senior Academic Professional, English

Conner, Robin, Ph.D. (Emory University) Senior Lecturer, History

Connors, David, Ph.D. (Stony Brook University) Lecturer, Chemistry

Connors, Megan, Ph.D. (State University of New York, Stony Brook) Assistant Professor, Physics and Astronomy

Cook, Sarah, Ph.D. (University of Virginia) Professor, Psychology (Associate Dean, Honors College)

Cortes, Viviana, Ph.D. (Northern Arizona University) Associate Professor, Applied Linguistics and English as a Second Language

Cox, Daniel, Ph.D. (Duke University) Professor, Neuroscience

Cox, Edward, Ph.D. (University of Oklahoma) Senior Lecturer, Philosophy

Crenshaw, D. Michael, Ph.D. (Ohio State University) Distinguished University Professor, Physics and Astronomy

Crossley, Scott, Ph.D. (University of Memphis) Professor, Applied Linguistics and English as a Second Language

Cruz, Francisco, Ph.D. (Pennsylvania State University) Senior Academic Professional, Biology

Cui, Jainmei, Ph.D. (Chinese Academy of Medical Sciences) Academic Professional, Chemistry

Cummings, Alexander, Ph.D. (Columbia University) Associate Professor, History

Cushing, Sara, Ph.D. (University of California, Los Angeles) Professor, Applied Linguistics and English as a Second Language

Cymbalyuk, Gennady, Ph.D. (Moscow State University, Russia) Associate Professor, Neuroscience and Physics and Astronomy

da Rosa, Grace Dorea, Ph.D. (Iowa State University) Lecturer, Gerontology

Dai, Dajun, Ph.D. (Southern Illinois University) Associate Professor, Geosciences and Public Health

Davarpanah, Armita, Ph.D. (Georgia State University) Lecturer, Geosciences

Davidson, Denise, Ph.D. (University of Pennsylvania) Professor, History
Davis, Marni, Ph.D. (Emory University) Associate Professor, History

Davis, Sarita, Ph.D. (Cornell University) Associate Professor, African-American Studies

Davis, Tomeka, Ph.D. (Emory University) Associate Professor, Sociology

De Vries, Geert, Ph.D. (University of Amsterdam) Professor, Neuroscience and Biology (Chair)

del Rio Parra, Elena, Ph.D. (Brown University) Professor, World Languages and Cultures

Deocampo, Daniel, Ph.D. (Rutgers University) Professor, Geosciences (Associate Dean for Research and Graduate Studies)

Derby, Charles, Ph.D. (Boston University) Regents’ Professor, Neuroscience and Biology

Dhamala, Mukesh, Ph.D. (University of Kansas) Associate Professor, Physics and Astronomy and Neuroscience

Diem, Jeremy, Ph.D. (University of Arizona, Tucson) Professor, Geosciences

Dischinger, Matthew, Ph.D. (Louisiana State University) Lecturer, English

Dix, Richard, Ph.D. (Baylor College of Medicine) Professor, Biology and Neuroscience

Dixon, Dabney, Ph.D. (Massachusetts Institute of Technology) Professor, Chemistry

Dobranski, Stephen, Ph.D. (University of Texas, Austin) Distinguished University Professor, English

Doluweera, Sumith, Ph.D. (University of Cincinnati) Senior Lecturer, Physics and Astronomy

Dotson, Vonetta, Ph.D. (University of Florida) Associate Professor, Psychology

Drakeford, Jason, Professor of Practice, Creative Media Industries

Duffield, John, Ph.D. (Princeton University) Professor, Political Science

Dwyer, Sandra, Ph.D. (Emory University) Principal Senior Lecturer, Philosophy

Edmundson, William, Ph.D. (University of California, Berkeley) Regents’ Professor, Law and Philosophy

Edwards, Booker, M.A. (Clark Atlanta University) Professor of Practice, Creative Media Industries

Eichenbaum, Zehava, Ph.D. (Wiezmann Institute of Science, Rehovot, Israel) Associate Professor, Biology

Eilertson, Carmen, Ph.D. (North Dakota State University) Principal Senior Lecturer, Biology

Elliott, W. Crawford, Ph.D. (Case Western Reserve University) Associate Professor, Geosciences
Enescu, Florian, Ph.D. (University of Michigan, Ann Arbor) Professor, Mathematics and Statistics
Ernst, Rachel, Ph.D. (University of Reading) Lecturer, History
Eskew, Glenn, Ph.D. (University of Georgia) Professor, History
Estrada, Rolando, Ph.D. (Duke University) Assistant Professor, Computer Science
Evans, Michael, Ph.D. (University of Maryland) Assistant Professor, Political Science
Evans, Stephanie, Ph.D. (University of Massachusetts, Amherst) Professor, Women's, Gender, and Sexuality Studies (Director)
Fang, Ning, Ph.D. (University of British Columbia) Associate Professor, Chemistry
Fanoe, Andrew, Ph.D. (Columbia University) Lecturer, Mathematics and Statistics
Feit, Mario, Ph.D. (Johns Hopkins University) Associate Professor, Political Science
Fernández-L’Hoeste, Héctor, Ph.D. (State University of New York, Stony Brook) Professor, World Languages and Cultures
Fernando, Nilmi, Ph.D. (Georgia State University) Senior Lecturer, Chemistry
Fix, Michael, Ph.D. (University of South Carolina) Associate Professor, Political Science
Flemming, Timothy, Ph.D. (Georgia State University) Lecturer, Psychology
Fletcher, Ian, Ph.D. (Johns Hopkins University) Associate Professor, History
Forger, Nancy, Ph.D. (University of California, Berkeley) Professor, Neuroscience (Director)
Francis, Gladys, Ph.D. (Purdue University) Associate Professor, World Languages and Cultures
Frantz, Kyle, Ph.D. (University of Florida) Professor, Neuroscience and Biology
Freeman, Carrie, Ph.D. (University of Oregon) Associate Professor, Communication
Friedman, Sarah, Ph.D. (Emory University) Lecturer, Sociology
Friginal, Eric, Ph.D. (Northern Arizona University) Professor, Applied Linguistics and English as a Second Language
Fromherz, Allen, Ph.D. (University of St. Andrews) Professor, History
Fujioka, Yuki, Ph.D. (Washington State University) Associate Professor, Communication
Fuller, Harcourt, Ph.D. (London School of Economics) Associate Professor, History

Gadda, Giovanni, Ph.D. (University of Milan) Distinguished University Professor, Chemistry

Gaffield, Julia, Ph.D. (Duke University) Associate Professor, History

Gaillet, Lynée Lewis, Ph.D. (Texas Christian University) Distinguished University Professor, English (Chair)

Galchinsky, Michael, Ph.D. (University of California, Berkeley) Professor, English (Associate Provost for Institutional Effectiveness)

Gaucher, Eric, Ph.D. (University of Florida) Professor, Biology

Gayles, Jonathan, Ph.D. (University of South Florida) Professor, African-American Studies (Chair)

Gayman, Mathew, Ph.D. (Florida State University) Associate Professor, Sociology

Germann, Markus, Ph.D. (University of Calgary) Professor, Chemistry and Neuroscience

Gershon, Sarah, Ph.D. (Arizona State University) Associate Professor, Political Science

Gies, Douglas, Ph.D. (University of Toronto) Regents’ Professor, Physics and Astronomy

Gilbert, Eric, Ph.D. (University of California, Riverside) Associate Professor, Biology

Glebova, Olga, Ph.D. (Georgia State University) Lecturer, Computer Science

Glover, Jeffrey, Ph.D. (University of California, Riverside) Associate Professor, Anthropology

Gobron, Louise, M.A. (Georgia State University) Senior Lecturer, Applied Linguistics and English as a Second Language

Goode, Christopher, Ph.D. (University of Washington) Senior Lecturer, Psychology

Goodman, Audrey, Ph.D. (Columbia University) Professor, English

Goss, Desmond, Ph.D. (Georgia State University) Lecturer, Sociology

Gozem, Samer, Ph.D. (Bowling Green State University) Assistant Professor of Chemistry

Grant, Kathryn, Ph.D. (Columbia University) Professor, Chemistry

Grindstaff, Davin, Ph.D. (Pennsylvania State University) Senior Lecturer, Communication

Grinshpon, Mark, Ph.D. (Virginia Polytechnic Institute and State University) Senior Lecturer, Mathematics and Statistics
Grober, Matthew, Ph.D. (University of California, Los Angeles) Associate Professor, Biology and Neuroscience

Grubbs, Larry, Ph.D. (University of South Carolina) Senior Lecturer, History

Grussendorf, Jeannie, Ph.D. (Bradford University, UK) Senior Lecturer, Political Science

Gu, Baotong, Ph.D. (Purdue University) Associate Professor, English

Guano, Emanuela, Ph.D. (University of Texas, Austin) Professor, Anthropology

Gutzler, Stephanie, Ph.D. (Georgia State University) Academic Professional, Biology

Gylys, Beth, Ph.D. (University of Cincinnati) Professor, English

Hall, Frank, Ph.D. (North Carolina State University) Professor, Mathematics and Statistics

Hall, Jennifer, Ph.D. (Georgia State University) Senior Academic Professional, English

Hamelberg, Donald, Ph.D. (Georgia State University) Professor, Chemistry (Chair)

Hamm, Jordan, Ph.D. (University of Georgia) Assistant Professor, Neuroscience

Hankins, Katherine, Ph.D. (University of Georgia) Professor, Geosciences (Chair)

Hankla, Charles, Ph.D. (Emory University) Associate Professor, Political Science

Harden, Donald, M.S. (Georgia State University) Instructor, Mathematics and Statistics

Harden, Jeremiah, Ph.D. (University of Tennessee) Senior Lecturer, Chemistry

Harker, Michael, Ph.D. (Ohio State University) Associate Professor, English

Harrison, Robert, Ph.D. (Yale University) Professor, Computer Science and Biology

Hartley, Christie, Ph.D. (University of Michigan) Associate Professor, Philosophy

Hassan-Richardson, Stephanie, Ph.D. (State University of New York, Albany) Lecturer, English

Hastings, Gary, Ph.D. (Imperial College of Science and Technology) Professor, Physics and Astronomy

Hastings, Laura, Ph.D. (Massachusetts Institute of Technology) Senior Lecturer, Political Science

He, Xiaochun, Ph.D. (University of Tennessee) Distinguished University Professor, Physics and Astronomy

He, Ying, Ph.D. (Carleton University) Lecturer, Computer Science
Henary, Maged, Ph.D. (Georgia State University) Associate Professor, Chemistry

Henrich, Christopher, Ph.D. (Yale University) Professor, Psychology

Henry, Louis, M.S. (University of Maryland) Instructor, Computer Science

Henry, Todd, Ph.D. (University of Arizona) Distinguished University Professor, Physics and Astronomy

Herb, Michael, Ph.D. (University of California, Los Angeles) Professor, Political Science

Herman, Jonathan, Ph.D. (Harvard University) Associate Professor, Religious Studies

Hermann, Carmen, Ph.D. (University of Texas, Austin) Associate Professor, World Languages and Cultures

Hidalgo-Odio, Paulo, Ph.D. (Michigan State University) Senior Lecturer, Geosciences

Hilliard, Julia, Ph.D. (Baylor College of Medicine) Professor, Biology and Neuroscience (Georgia Research Alliance Eminent Scholar)

Hobson, Maurice, Ph.D. (University of Alabama) Associate Professor, African-American Studies

Hocks, Mary, Ph.D. (University of Illinois, Urbana-Champaign) Associate Professor, English

Hoffner, Cynthia, Ph.D. (University of Wisconsin, Madison) Professor, Communication

Holman, John, Ph.D. (University of Southern Mississippi) Professor, English

Holmes, Ashley, Ph.D. (University of Arizona) Associate Professor, English

Holmes, Daniel, M.F.A. (Queens University, Charlotte) Lecturer, English

Horgan, John, Ph.D. (University College Cork, Ireland) Distinguished University Professor, Psychology

Houghton, John, Ph.D. (Texas A&M University) Associate Professor, Biology

Howard, Robert, Ph.D. (State University of New York, Stony Brook) Professor, Political Science

Hu, Xiaolin, Ph.D. (University of Arizona) Professor, Computer Science

Huff, Robin, Ph.D. (Emory University) Senior Lecturer, World Languages and Cultures

Huhman, Kim, Ph.D. (University of Georgia) Distinguished University Professor, Neuroscience and Psychology

Ivanov, Ivaylo, Ph.D. (Scripps Research Institute) Associate Professor, Chemistry
Iyer, Suri, Ph.D. (Indiana University) Professor, Chemistry

Jacobson, Stephen, Ph.D. (University of Michigan, Ann Arbor) Senior Lecturer, Philosophy

Jefferies, Stuart, Ph.D. (University of London) Professor, Physics and Astronomy

Ji, Shihao, Ph.D. (Duke University) Associate Professor, Computer Science

Jiang, Chun, Ph.D. (Shanghai Brain Research Institute) Professor, Biology and Neuroscience

Jiang, Jie, Ph.D. (Georgia State University) Lecturer, Chemistry

Jiang, Yi, Ph.D. (University of Notre Dame) Professor, Mathematics and Statistics

Jiles, Jennifer, M.A. (Webster University) Instructor, Communication

Joseph, Sheri, Ph.D. (University of Georgia) Professor, English

Joyner, Jessica, Ph.D. (University of Georgia) Lecturer, Biology

Judson, Robert, B.A. (University of Central Florida) Professor of Practice, Communication

Jurjevic, Andrea, M.F.A. (Georgia State University) Lecturer, English

Jury, Joanna, Ph.D. (Georgia State University) Lecturer, History

Kabengi, Nadine, Ph.D. (University of Florida) Associate Professor, Geosciences and Chemistry

Kail, Benjamin, Ph.D. (Florida State University) Associate Professor, Sociology

Keller, Chad, M.F.A. (Savannah College of Art and Design) Lecturer, History

Kemp, Candace, Ph.D. (McMaster University) Professor, Gerontology

Kennedy, Davon, Ph.D. (Emory University) Associate Professor, Chemistry

Kerce, Stephanie, Ph.D. (Emory University) Lecturer, Political Science

Kiage, Lawrence, Ph.D. (Louisiana State University) Associate Professor, Geosciences

Kim, Jung, Ph.D. (Georgia State University) Senior Lecturer, Sociology

Kim, YouJin, Ph.D. (Northern Arizona University) Associate Professor, Applied Linguistics and English as a Second Language

King, Tiffany, Ph.D. (University of Maryland, College Park) Assistant Professor, Women’s, Gender, and Sexuality Studies
King, Tricia Zawacki, Ph.D. (University of Florida) Professor, Psychology and Neuroscience

Kleider-Offutt, Heather, Ph.D. (Arizona State University) Associate Professor, Psychology and Neuroscience

Kocela, Christopher, Ph.D. (McGill University) Associate Professor, English

Kong, Jun, Ph.D. (Ohio State University) Associate Professor, Mathematics and Statistics

Kozaitis, Kathryn, Ph.D. (University of Michigan, Ann Arbor) Associate Professor, Anthropology (Chair)

Krache, Donna, M.Ed. (University of New Orleans) Lecturer, Communication

Krishnamurthy, Lisa, Ph.D. (University of Texas, Arlington) Assistant Research Professor, Physics and Astronomy

Kubala, Juliana, Ph.D. (Emory University) Senior Lecturer, Women’s, Gender, and Sexuality Studies

Kumar, Mukesh, Ph.D. (University of Hawaii, Manoa) Assistant Professor, Physics and Astronomy

Kuperminc, Gabriel, Ph.D. (University of Virginia) Professor, Psychology

Kwakye, Chamara, Ph.D. (University of Illinois, Chicago) Lecturer, Women’s, Gender, and Sexuality Studies

Laroui, Hamed, Ph.D. (University Henri Poincare of Nancy) Assistant Professor, Chemistry

Larsson, Margareta, M.S. (Georgia State University) Senior Lecturer, Applied Linguistics and English as a Second Language

Latzman, Robert, Ph.D. (University of Iowa) Associate Professor, Psychology

Lazarus, Jeffrey, Ph.D. (University of California, San Diego) Professor, Political Science

Le Calvez, Eric, Ph.D. (University of Paris, III) Professor, World Languages and Cultures

Ledford, Sarah, Ph.D. (Syracuse University) Assistant Professor, Geosciences

Lee, Hakyoon, Ph.D. (University of Hawai‘i, Mānoa) Assistant Professor, World Languages and Cultures

Lee, Jeong Min, Ph.D. (University of Delaware) Lecturer, Psychology

Lei, Sidong, Ph.D. (Rice University) Assistant Professor, Physics and Astronomy

Lemieux, Anthony, Ph.D. (University of Connecticut) Professor, Communication

Lepine, Sebastien, Ph.D. (University of Montreal) Professor, Physics and Astronomy (Chair)
Li, Shuai, Ph.D. (Carnegie Mellon University) Associate Professor, World Languages and Cultures
Li, Wei, Ph.D. (George Washington University) Assistant Professor, Computer Science
Li, Yingshu, Ph.D. (University of Minnesota, Twin Cities) Professor, Computer Science
Li, Zhongshan, Ph.D. (North Carolina State University) Professor, Mathematics and Statistics
Lightsey, Scott, Ph.D. (University of Delaware) Associate Professor, English
Lin, Chuan, M.Ed. (Vanderbilt University) Lecturer, World Languages and Cultures
Lindeman, Stephanie, Ph.D. (University of Michigan, Ann Arbor) Associate Professor, Applied Linguistics and English as a Second Language
Lindsay, Peter, Ph.D. (University of Toronto) Professor, Political Science and Philosophy
Lisby, Gregory, Ph.D. (University of Tennessee, Knoxville) Professor, Communication (Chair)
Liu, Hui, Ph.D. (Georgia State University) Academic Professional, Mathematics and Statistics
Liu, Jingyu, Ph.D. (University of New Mexico) Associate Professor, Computer Science
Liu, Yuan, Ph.D. (University of South Alabama) Professor, Biology
Liu, Zhi-Ren, Ph.D. (Florida State University) Distinguished University Professor, Biology
Llorente, Raul, Ph.D. (Universidad de Valladolid) Senior Lecturer, World Languages and Cultures
Long, William, Ph.D.; J.D. (Columbia University; Georgetown University) Professor, Political Science
Lopez, Elizabeth, Ph.D. (Purdue University) Associate Professor, English
Love, Suzanne, J.D. (Yale University) Assistant Professor, Philosophy
Luo, Ming, Ph.D. (Purdue University) Professor, Chemistry
Mabb, Angela, Ph.D. (University of Wisconsin, Madison) Assistant Professor, Neuroscience
Machluf, Karin, Ph.D. (Florida Atlantic University) Lecturer, Psychology
Malamud, Randy, Ph.D. (Columbia University) Regents’ Professor, English
Malins, Jeffrey, Ph.D. (University of Western Ontario) Assistant Professor, Psychology
Mani, Ramesh, Ph.D. (University of Maryland) Professor, Physics and Astronomy
Manning, Carrie, Ph.D. (University of California, Berkeley) Professor, Political Science
Manson, Steven Trent, Ph.D. (Columbia University) Regents’ Professor, Physics and Astronomy
Mariani, Victoria, Ph.D. (Georgia Institute of Technology) Senior Lecturer, Chemistry
Marsh, Leslie, Ph.D. (University of Michigan) Associate Professor, World Languages and Cultures
Marshall, Amani, Ph.D. (Indiana University) Lecturer, History
Martens, Petrus, Ph.D. (Universiteit Utrecht) Professor, Physics and Astronomy
Martin, Eliza, Ph.D. (University of California, Santa Cruz) Lecturer, History
Martin, James, Professor of Practice, Creative Media Industries
Maxwell, Robert, Ph.D. (Georgia State University) Senior Academic Professional, Biology
Maune, Jeremy, Ph.D. (Georgia State University) Lecturer, Physics and Astronomy
McClymond, Kathryn, Ph.D. (University of California, Santa Barbara) Professor, Religious Studies (Associate Dean for Faculty Development)
McCoy, Jennifer, Ph.D. (University of Minnesota) Professor, Political Science
McGimsey, Ben, Ph.D. (University of Florida) Senior Lecturer, Physics and Astronomy
McKee, Laura, Ph.D. (University of Vermont) Associate Professor, Psychology
McLeod, Melissa, Ph.D. (Georgia State University) Senior Lecturer, English
McMillian, John, Ph.D. (Columbia University) Associate Professor, History
Meadows, Leslie, Ph.D. (Georgia State University) Senior Lecturer, Mathematics and Statistics
Metcalfe, Doug, M.B.A. (DeVry University) Professor of Practice, Communication
Meyer, Brian, Ph.D. (Georgia State University) Lecturer, Geosciences
Meyers, Marian, Ph.D. (University of Iowa) Professor, Communication
Mezencevova, Andrea, Ph.D. (Technical University of Kosice, Slovakia) Academic Professional of Chemistry
Miller, Robyn, Ph.D. (Cornell University) Assistant Professor, Computer Science
Miller, Valerie, Ph.D. (University of South Carolina) Associate Professor, Mathematics and Statistics
Milligan, Richard, Ph.D. (University of Georgia) Assistant Professor, Geosciences
Mingo, Chivon, Ph.D. (University of South Florida) Associate Professor, Gerontology
Molkov, Yaroslav, Ph.D. (Russian Academy of Sciences) Associate Professor, Mathematics and Statistics
Montiel, Mariana, Ph.D. (University of New Hampshire) Associate Professor, Mathematics and Statistics
Moore, Gregory, Ph.D. (University of Cambridge) Associate Professor, History and Philosophy
Mooring, Suazette, Ph.D. (Georgia State University) Associate Professor, Chemistry
Moreno, Oscar, Ph.D. (University of Southern California) Senior Lecturer, World Languages and Cultures
Morgan, Jennifer, Ph.D. (University of North Carolina, Chapel Hill) Associate Professor, Gerontology
Morris, Jamae, Ph.D. (University of South Florida) Assistant Professor, African-American Studies
Morris, Robert, Ph.D. (University of Florida) Regents’ Professor, Psychology and Educational Psychology and Special Education
Moultrie, Monique, Ph.D. (Vanderbilt University) Associate Professor, Religious Studies
Murphy, Anne, Ph.D. (University of Cincinnati) Professor, Neuroscience and Biology
Mussa, Awad, Ph.D. (Colorado State University) Lecturer, Computer Science
Mutanyatta-Comar, Joan, Ph.D. (University of Botswana; University of Wurzburg) Principal Senior Lecturer, Chemistry
Nadri, Ghulam, Ph.D. (Leiden University) Professor, History
Nahmias, Edward, Ph.D. (Duke University) Professor, Philosophy and Neuroscience
Naim, S. Rashid, Ph.D. (University of Illinois, Urbana-Champaign) Principal Senior Lecturer, Political Science
Navarro-Eisenstein, Angela, Ph.D. (Georgia State University) Senior Lecturer, Chemistry
Nazarko, Taras, Ph.D. (National Academy of Sciences, Ukraine) Associate Professor, Biology
Newton, Veronica, Ph.D. (University of Missouri, Columbia) Assistant Professor, Sociology
Nichols, William, Ph.D. (Michigan State University) Associate Professor, World Languages and Cultures (Chair)
Noble, Mark, Ph.D. (Johns Hopkins University) Associate Professor, English
Nogueira, Ricardo, Ph.D. (Louisiana State University) Senior Lecturer, Geosciences
Normandin, Joseph, Ph.D. (Georgia State University) Lecturer, Neuroscience
Norton, Laurah, M.F.A. (Georgia State University) Senior Lecturer, English
Nusnbaum, Matthew, Ph.D. (Georgia State University) Senior Lecturer, Biology
O'Keefe, Timothy, Ph.D. (University of Texas, Austin) Associate Professor, Philosophy
Oakley, Deirdre, Ph.D. (University at Albany, State University of New York) Professor, Sociology
Oommen, Kavita, Ph.D. (Baylor College of Medicine) Senior Lecturer, Biology
Özçaliskan, Seyda, Ph.D. (University of California, Berkeley) Associate Professor, Psychology
Pan, Yi, Ph.D. (University of Pittsburgh) Distinguished University Professor, Computer Science (Chair)
Pandit, Kavita, Ph.D. (Ohio State University) Professor, Geosciences (Associate Provost for Faculty Affairs)
Pangle, Luke, Ph.D. (Oregon State University) Assistant Professor, Geosciences
Papavasiliou, Faidra, Ph.D. (Emory University) Senior Lecturer, Anthropology
Parent, Marise, Ph.D. (University of California, Irvine) Professor, Neuroscience and Psychology
Parks, Samantha, Ph.D. (Georgia Institute of Technology) Senior Lecturer, Biology
Parrott, Dominic, Ph.D. (University of Georgia) Professor, Psychology
Pasciuti, Daniel, Ph.D. (Johns Hopkins University) Assistant Professor, Sociology
Pascoe, Keith, Ph.D. (University of West Indies, Jamaica) Principal Senior Lecturer, Chemistry
Patico, Jennifer, Ph.D. (New York University) Associate Professor, Anthropology
Patonay, Gabor, Ph.D. (Technical University of Budapest) Professor, Chemistry
Pattillo, Linda, M.S. (Columbia University) Lecturer, Communication
Perera, Unil, Ph.D. (University of Pittsburgh) Regents’ Professor, Physics and Astronomy and Neuroscience
Perry, Joseph, Ph.D. (University of Illinois) Associate Professor, History
Petrulis, Aras, Ph.D. (Cornell University) Associate Professor, Neuroscience and Psychology
Plis, Sergey, Ph.D. (University of New Mexico) Associate Professor, Computer Science

Poister Tusher, Chantal, Ph.D. (Georgia State University) Senior Lecturer, Psychology

Poley, Jared, Ph.D. (University of California, Los Angeles) Professor, History

Poole, Therese, Ph.D. (University of Wisconsin, Madison) Senior Lecturer, Biology

Poon, Gregory, Ph.D. (University of Toronto) Associate Professor, Chemistry

Pratt, Jane, Ph.D. (University of Texas, Austin) Assistant Professor, Physics and Astronomy

Pullman, George, Ph.D. (Rensselaer Polytechnic Institute) Professor, English

Qin, Gengsheng, Ph.D. (Hong Kong University of Science and Technology) Professor, Mathematics and Statistics

Raghavan, Deepak, Ph.D. (Georgia State University) Lecturer, Physics and Astronomy

Rajiva, Jay, Ph.D. (University of Toronto) Assistant Professor, English

Ramzy, Rasha, Ph.D. (Georgia State University) Senior Lecturer, Communication

Rand, Sebastian, Ph.D. (Northwestern University) Associate Professor, Philosophy

Ray, Gigi, Ph.D. (Princeton University) Principal Senior Lecturer, Chemistry

Reati, Fernando, Ph.D. (Washington University, St. Louis) Professor, World Languages and Cultures

Reber, Amy, Ph.D. (Georgia State University) Senior Lecturer, Biology

Reimann, Kim, Ph.D. (Harvard University) Associate Professor, Political Science

Renick, Timothy, Ph.D. (Princeton University) Professor, Religious Studies (Vice President for Enrollment Management and Student Success and Vice Provost)

Repnikova, Maria, Ph.D. (University of Oxford) Assistant Professor, Communication

Richardson, LeeAnne, Ph.D. (Indiana University) Associate Professor, English

Richey, Sean, Ph.D. (City University of New York) Associate Professor, Political Science

Richtarik, Marilynn, D.Phil. (Oxford University) Professor, English

Rizzo, Rebecca, Ph.D. (Florida Institute of Technology) Senior Lecturer, Mathematics and Statistics

Robbins, Chandan, Ph.D. (Georgia State University) Academic Professional, Biology
Robilotto, Thomas, Ph.D. (Case Western Reserve University) Academic Professional, Chemistry

Rodgers, Edmund, Ph.D. (Georgia State University) Lecturer, Biology

Rodrigo, Victoria, Ph.D. (University of Southern California) Professor, World Languages and Cultures

Rodrigues, Luciana, Ph.D. (State University of Campinas) Lecturer, Communication

Römer, Ute, Ph.D. (Leibniz University Hanover) Associate Professor, Applied Linguistics and English as a Second Language

Romski, Mary Ann, Ph.D. (University of Kansas, Lawrence) Regents’ Professor, Communication; Psychology; and Educational Psychology, Special Education & Communication Disorders

Roseberry, Aaron, Ph.D. (Northwestern University) Associate Professor, Biology

Rosen, Sara, Ph.D. (Brandeis University) Professor, Applied Linguistics and English as a Second Language (Dean, College of Arts and Sciences)

Roudané, Matthew, Ph.D. (University of Oregon) Regents’ Professor, English

Rozier, Kelvin, Ph.D. (Georgia State University) Lecturer, Mathematics and Statistics

Ruel, Erin, Ph.D. (University of Illinois, Chicago) Professor, Sociology

Ruprecht, Louis, Ph.D. (Emory University) Professor, Anthropology (William M. Suttles Chair in Religious Studies)

Russell, Joshua, M.F.A. (Louisiana State University) Professor, English

Russell, Tillman, Ph.D. (Purdue University) Assistant Professor, Communication

Ryan, Maura, Ph.D. (University of Florida) Senior Lecturer, Sociology

Sarkar, Sutandra, M.S. (Georgia Institute of Technology) Senior Academic Professional, Mathematics and Statistics

Sarsour, Murad, Ph.D. (University of Houston) Professor, Physics and Astronomy

Scarantino, Andrea, Ph.D. (University of Pittsburgh) Professor, Philosophy and Neuroscience

Schatteman, Renée, Ph.D. (University of Massachusetts) Associate Professor, English

Schiffer, Sheldon, M.F.A. (University of California, Los Angeles) Professor, Creative Media Industries

Schmidt, Manfred, Ph.D. (Johann Wolfgang Goethe-University, Germany) Academic Professional, Neuroscience
Schmidt, Paul, Ph.D. (University of Minnesota) Associate Professor, English
Schorpp, Susanne, Ph.D. (University of South Carolina) Assistant Professor, Political Science
Sehat, David, Ph.D. (University of North Carolina, Chapel Hill) Professor, History
Sellers, P. Douglas, Ph.D. (Florida Atlantic University) Lecturer, Psychology
Selwood, Jacob, Ph.D. (Duke University) Associate Professor, History
Sevcik, Rose, Ph.D. (Georgia State University) Regents’ Professor, Psychology
Sexton, Megan, Ph.D. (Georgia State University) Academic Professional, English
Shamsi, Shahab, Ph.D. (Miami University) Professor, Chemistry
Shannon, Lisa, Ph.D. (Georgia State University) Lecturer, African-American Studies
Sharratt, Nicola, Ph.D. (University of Illinois-Chicago) Assistant Professor, Anthropology
Shi, Hang, Ph.D. (University of Tennessee) Professor, Biology
Shilnikov, Andrey, Ph.D. (Nizhny Novgorod State University, Russia) Distinguished University Professor, Neuroscience and Mathematics and Statistics
Shreckengost, Jacob, Ph.D. (Emory University) Lecturer, Neuroscience
Simonds, Wendy, Ph.D. (City University of New York) Professor, Sociology
Sinnott, Megan, Ph.D. (University of Wisconsin, Madison) Associate Professor, Women’s, Gender, and Sexuality Studies
Sitvarin, Michael, Ph.D. (Miami University) Lecturer, Biology
Skums, Pavel, Ph.D. (Belarus State University) Assistant Professor, Computer Science
Smalls-Glover, Ciara, Ph.D. (University of Michigan) Associate Professor, Psychology
Smirnova, Alexandra, Ph.D. (Kansas State University) Professor, Mathematics and Statistics
Smith, David, Ph.D. (University of Pennsylvania) Professor, Psychology
Smolinski, Reiner, Ph.D. (Pennsylvania State University) Professor, English
Song, Chi-Sun, Ph.D. (Georgia State University) Senior Lecturer, Biology
Spring, Amy, M.A. (University of Washington) Assistant Professor, Sociology

1.600
Stappenbeck, Cynthia, Ph.D. (University of Texas, Austin) Associate Professor, Psychology
Steigerwalt, Amy, Ph.D. (University of California, Berkeley) Professor, Political Science
Stern, Javier, Ph.D. (University of Buenos Aires) Professor, Neuroscience
Stewart, Faye, Ph.D. (Indiana University) Associate Professor, World Languages and Cultures
Stewart, Michael, Ph.D. (University of Illinois) Associate Professor, Mathematics and Statistics
Stockman, Mark, D.Sc. (Institute of Automation and Electrometry of the Russian Academy of Sciences) Regents’ Professor, Physics and Astronomy
Stombler, Mindy, Ph.D. (Florida State University) Principal Senior Lecturer, Sociology
Stroev, Mikhail, Ph.D. (Georgia State University) Academic Professional, Mathematics and Statistics
Stroeva, Elina, Ph.D. (Moscow Chemical Technological Institute, Russia) Senior Lecturer, Chemistry
Subedi, Rishi, Ph.D. (University of Toledo) Lecturer, Mathematics and Statistics
Subotic, Jelena, Ph.D. (University of Wisconsin) Professor, Political Science
Suchke, Dara, M.A. (Georgia State University) Lecturer, Applied Linguistics and English as a Second Language
Sui, Jing, Ph.D. (Beijing Institute of Technology) Associate Research Professor, Computer Science
Sui, Jing, Ph.D. (Beijing Institute of Technology) Associate Research Professor, Computer Science
Sunderraman, Rajshekhar, Ph.D. (Iowa State University) Professor, Computer Science and Neuroscience
Sylvester, Jonathan, Ph.D. (Georgia Institute of Technology) Lecturer, Biology
Takabi, Hassan, Ph.D. (University of Pittsburgh) Associate Professor, Computer Science
Talburt, Susan, Ph.D. (Vanderbilt University) Professor, Women’s, Gender, and Sexuality Studies
Thomas, Calvin, Ph.D. (University of Wisconsin, Milwaukee) Professor, English
Thomas, John, Lecturer of Creative Media Industries
Thoms, Brian, Ph.D. (Cornell University) Associate Professor, Physics and Astronomy
Thornton, Judd, Ph.D. (Michigan State University) Assistant Professor, Political Science
Thota, Jyotsna, Ph.D. (University of Connecticut) Senior Lecturer, Chemistry
Tighe, Elizabeth, Ph.D. (Florida State University) Assistant Professor, Psychology
Tone, Erin McClure, Ph.D. (Emory University) Associate Professor, Psychology and Neuroscience
Torres, Germán, Ph.D. (University of Georgia) Associate Professor, World Languages and Cultures
Trask, Jeffrey, Ph.D. (Columbia University) Associate Professor, History
Tully, Erin, Ph.D. (Emory University) Associate Professor, Psychology
Turner, Jessica, Ph.D. (University of California, Irvine) Professor, Psychology
Turner-Livermore, Bethany, Ph.D. (Emory University) Associate Professor, Anthropology
Ulrich, Paul, Ph.D. (University of Delaware) Senior Lecturer, Biology
Umoja, Akinyele, Ph.D. (Emory University) Professor, African-American Studies
Van der Holst, Hendricus, Ph.D. (University of Amsterdam) Associate Professor, Mathematics and Statistics
Van Leeuwen, Neil, Ph.D. (Stanford University) Associate Professor, Philosophy and Neuroscience
Vergara, Victor, Ph.D. (University of New Mexico) Assistant Research Professor, Psychology
Vidakovic, Draga, Ph.D. (Purdue University) Professor, Mathematics and Statistics
Visaggi, Christy, Ph.D. (North Carolina, Wilmington) Senior Lecturer, Geosciences
Voss, Paul, Ph.D. (University of California, Riverside) Associate Professor, English
Wade, W. Patrick, Ph.D. (Northwestern University) Assistant Professor, Communication
Walter, Dror, Ph.D. (University of Pennsylvania) Assistant Professor, Communication
Wang, Binghe, Ph.D. (University of Kansas) Regents' Professor, Chemistry (Georgia Research Alliance Eminent Scholar)
Wang, Danzhu, Ph.D. (Georgia State University) Lecturer, Chemistry
Wang, Gangli, Ph.D. (University of North Carolina, Chapel Hill) Professor, Chemistry and Neuroscience
Wang, Ruili, Ph.D. (Georgia State University) Senior Lecturer, Physics and Astronomy
Waterson, Michael, Ph.D. (University of Michigan) Lecturer, Biology
Way, John, Ph.D. (Yale University) Associate Professor, History
Weber, Irene, Ph.D. (Oxford University) Regents’ Professor, Biology, Chemistry, and Neuroscience

Wedeman, Andrew, Ph.D. (University of California, Los Angeles) Professor, Political Science

Weeks, Michael, Ph.D. (University of Southwestern Louisiana) Associate Professor, Computer Science and Neuroscience

Weiskopf, Daniel, Ph.D. (Washington University) Professor, Philosophy and Neuroscience

West, Elizabeth, Ph.D. (Emory University) Professor, English

Weyermann, Andrea, Ph.D. (Georgia State University) Senior Lecturer, Psychology

White, Cassandra, Ph.D. (Tulane University) Associate Professor, Anthropology

White, Russel, Ph.D. (University of California, Los Angeles) Professor, Physics and Astronomy

Whitney, Carrie, Ph.D. (Georgia State University) Lecturer, Communication

Wilczynski, Walter, Ph.D. (University of Michigan, Ann Arbor) Professor, Neuroscience

Wilding, Nick, Ph.D. (European University Institute, Fiesole, Italy) Professor, History

Wilkin, Holley, Ph.D. (University of Southern California) Associate Professor, Communication

Williams, Ann, Ph.D. (University of Michigan) Associate Professor, Communication

Williams, Frank L’Engle, Ph.D. (University of Massachusetts, Amherst) Professor, Anthropology

Wilson, Eric, Ph.D. (Emory University) Associate Professor, Philosophy

Wilson, Kathryn, Ph.D. (University of Pennsylvania) Associate Professor, History

Wilson, Megan, Ph.D. (Georgia Institute of Technology) Lecturer, Psychology

Wilson, William David, Ph.D. (Purdue University) Regents’ Professor, Chemistry

Winkler, Carol, Ph.D. (University of Maryland) Professor, Communication

Wright, Eric, Ph.D. (Indiana University) Distinguished University Professor, Sociology (Chair) and Public Health

Wu, Yubao, Ph.D. (Case Western Reserve University) Assistant Professor, Computer Science

Xu, Bin, Ph.D. (University of North Carolina, Chapel Hill) Senior Academic Professional, Chemistry

Xu, Hao, Ph.D. (Scripps Research Institute) Associate Professor, Chemistry
Xue, Bingzhong, Ph.D. (University of Tennessee) Professor, Biology

Yan, Zhisheng, Ph.D. (State University of New York, Buffalo) Assistant Professor, Computer Science

Yang, Hae Sung, Ph.D. (Georgia State University) Lecturer, Applied Linguistics and English as a Second Language

Yang, Jenny, Ph.D. (Florida State University) Regents’ Professor, Chemistry and Neuroscience

Yao, Senmei, Ph.D. (West Virginia University) Lecturer, Mathematics and Statistics

Yao, Yongwei, Ph.D. (University of Kansas) Associate Professor, Mathematics and Statistics

Ye, Xiaojing, Ph.D. (University of Florida) Associate Professor, Mathematics and Statistics

Yin, Jun, Ph.D. (University of California, Berkeley) Professor, Chemistry

Young, Jeffrey, Ph.D. (Emory University) Senior Lecturer, History

Zelikovskiy, Aleksandr, Ph.D. (Institute of Mathematics of the Byelorussian Academy of Sciences) Distinguished University Professor, Computer Science

Zellars, Malcolm, Ph.D. (Georgia State University) Senior Lecturer, Biology

Zhan, Heying, Ph.D. (University of Kansas) Associate Professor, Sociology

Zhang, Hongmei, Ph.D. (Georgia State University) Lecturer, Biology

Zhang, Jing, Ph.D. (Harvard University) Assistant Professor, Mathematics and Statistics

Zhang, Yanqing, Ph.D. (University of South Florida) Professor, Computer Science and Neuroscience

Zhao, Jun, Ph.D. (University of Georgia) Associate Professor, Sociology

Zhao, Yi, Ph.D. (Rutgers University) Professor, Mathematics and Statistics

Zhao, Yichuan, Ph.D. (Florida State University) Professor, Mathematics and Statistics and Neuroscience

Zhong, Changyong, Ph.D. (Vanderbilt University) Senior Lecturer, Mathematics and Statistics

Zhu, Ying, Ph.D. (George Mason University) Associate Professor, Computer Science and Neuroscience

**College of Education and Human Development Faculty**

Abbott, Laura, M.S. (Georgia State University), Clinical Instructor of Kinesiology and Health
Albers, Margaret M., Ph.D. (Indiana University), Professor of Middle and Secondary Education

Alberto, Paul A., Ph.D. (Georgia State University), Dean and Regent’s Professor of Learning Sciences

Amanti, Cathy, Ph.D. (University of Arizona), Clinical Assistant Professor of Early Childhood and Elementary Education

Ari, Omer, Ph.D. (Georgia State University), Clinical Assistant Professor of Middle and Secondary Education

Ashby, Jeffrey S., Ph.D. (Pennsylvania State University), Professor of Counseling and Psychological Services

Auslander, Susan, L., Ph.D. (University of Alabama), Associate Professor of Early Childhood and Elementary Education

Behizadeh, Nadia, Ph.D. (Emory University), Associate Professor of Middle and Secondary Education

Bhatnagar, Ruchi, Ph.D. (University of Michigan, Ann Arbor), Clinical Assistant Professor and Unit Assessment Coordinator

Bingham, Gary, Ph.D. (Purdue University), Professor of Early Childhood and Elementary Education

Boden, Lauren, Ph.D. (Georgia State University), Clinical Assistant Professor of Learning Sciences

Bohan, Chara, Ph.D. (University of Texas, Austin), Professor of Educational Policy Studies

Boyles, Deron R., Ph.D. (Vanderbilt University), Professor of Educational Policy Studies

Brandon, Leslie Jerome, Ph.D. (University of Illinois, Urbana-Champaign), Professor of Kinesiology and Health

Brezicha, Kristina, Ph.D. (Pennsylvania State University), Assistant Professor of Educational Policy Studies

Bridges-Rhoads, Sarah, Ph.D. (University of Georgia), Associate Professor of Early Childhood and Elementary Education

Buras, Kristen L., Ph.D. (University of Wisconsin, Madison), Associate Professor of Educational Policy Studies

Burns, Janet L., Ph.D. (Georgia State University), Clinical Professor of Learning Sciences

Calandra, Brendan D., Ph.D. (University of South Florida), Chair and Professor of Learning Sciences

Carlson, Sarah, Ph.D. (University of Minnesota), Assistant Professor of Learning Sciences
Carter, Patricia, Ph.D. (University of Cincinnati), Clinical Professor of Educational Policy Studies

Chang, Catherine, Ph.D. (University of North Carolina, Greensboro), Professor of Counseling and Psychological Services

Chilungu, E. Namisi, Ph.D. (University at Buffalo), Clinical Assistant Professor of Learning Sciences

Cianfrone, Beth A., Ph.D. (University of Florida), Associate Professor of Kinesiology and Health

Cohen, Jonathan, Ph.D. (University of Virginia), Assistant Professor of Learning Sciences

Conine, Daniel, Ph.D. (University of Florida), Assistant Professor of Learning Sciences

Covey, Douglass, Ed.D. (University of North Florida), Clinical Assistant Professor of Educational Policy Studies

Crisp, Thomas, Ph.D. (Michigan State University), Associate Professor of Early Childhood and Elementary Education

Cross, Stephanie Behm, Ph.D. (Virginia Polytechnic Institute and State University), Associate Professor of Middle and Secondary Education

Davis, Don E., Ph.D. (Virginia Commonwealth University), Associate Professor of Counseling and Psychological Services

Davis, Natalie, Ph.D. (University of Michigan, Ann-Arbor), Assistant Professor of Early Childhood and Elementary Education

DeBlaere, Cirleen, Ph.D. (University of Florida), Associate Professor of Counseling and Psychological Services

Demir, Abdulkadir, Ph.D. (University of Missouri, Columbia), Associate Professor of Middle and Secondary Education

Dew, Brian J., Ph.D. (The University of North Carolina), Chair and Associate Professor of Counseling and Psychological Services

Dispenza, Franco, Ph.D. (Georgia State University), Associate Professor of Counseling and Psychological Services

Domke, Lisa, Ph.D. (Michigan State University), Assistant Professor of Early Childhood and Elementary Education

Donehower, Claire, Ph.D. (University of Central Florida), Assistant Professor of Learning Sciences

Doyle, James Andrew, Ph.D. (The Ohio State University), Associate Professor of Kinesiology and Health
Durden, Tonia, Ph.D. (Georgia State University), Clinical Associate Professor of Early Childhood and Elementary Education

Earl, Chantee, Ph.D. (University of Pittsburgh), Clinical Associate Professor of Middle and Secondary Education

Ellis, Rebecca, Ph.D. (University of Florida), Associate Professor of Kinesiology and Health

Emerson, Judith, Ph.D. (University of Southern Mississippi), Clinical Associate Professor of Learning Sciences

Enderle, Patrick, Ph.D. (Florida State University), Assistant Professor of Middle and Secondary Education

Esposito Norris, Jennifer, Ph.D. (Syracuse University), Chair and Professor of Educational Policy Studies

Feinberg, Joseph, Ph.D. (University of Georgia), Associate Professor of Middle and Secondary Education

Fernandes Williams, Rhina, Ph.D. (Emory University), Clinical Associate Professor of Early Childhood and Elementary Education

Fisher, Teresa, Ph.D. (Georgia State University), Clinical Assistant Professor of Early Childhood and Elementary Education

Fortner, Kevin, Ph.D. (Georgia Institute of Technology and Georgia State University), Associate Professor of Educational Policy Studies

Fournillier, Janice, Ph.D. (University of Georgia), Associate Professor of Educational Policy Studies

French-Lee, Stacey, Ph.D. (Georgia State University), Clinical Assistant Professor of Early Childhood and Elementary Education

Garrett-Rucks, Paula, Ph.D. (University of Wisconsin, Madison), Associate Professor of Middle and Secondary Education

Gilbert, Stephanie, M.S. (University of Alabama), Clinical Instructor of Communication Sciences and Disorders

Gilbride, Dennis, Ph.D. (University of Southern California), Professor of Counseling and Psychological Services

Gordon, Charity, Ph.D. (Georgia State University), Clinical Assistant Professor of Middle and Secondary Education

Greenberg, Daphne, Ph.D. (City University of New York), Distinguished University Professor of Learning Sciences

Gurewicz, Rachael, Ph.D. (West Virginia University), Associate Professor of Kinesiology and Health
Hackett, Jacob, Ph.D. (University of Washington), Clinical Assistant Professor of Middle and Secondary Education

Hansen, Sarah, Ph.D. (University of Oregon), Assistant Professor of Learning Sciences

Holbrook, Teri, Ph.D. (University of Georgia), Associate Professor of Early Childhood and Elementary Education

Houchins, David E., Ph.D. (University of Florida), Professor of Learning Sciences

Ingalls, Christopher P., Ph.D. (Texas A&M University), Professor of Kinesiology and Health and Physical Therapy

Irving, Miles A., Ph.D. (University of California, Santa Barbara), Associate Professor of Learning Sciences

Jimenez, Eliseo, Ph.D. (The Ohio State University), Assistant Professor of Learning Sciences

Jessup, Naomi, Ph.D. (University of North Carolina, Greensboro), Assistant Professor of Early Childhood and Elementary Education

Jenor-Clarke, Pier., Ph.D. (University of Toronto), Clinical Professor of Middle and Secondary Education

Kahrs, James, Ed.D. (University of Georgia), Clinical Assistant Professor of Educational Policy Studies and Director of the Principles Center

Kasun, G. Sue, Ph.D. (University of Texas, Austin), Associate Professor of Middle and Secondary Education

Kaufmann, Jodi, Ph.D. (University of Georgia), Associate Professor of Educational Policy Studies

Kellison, Timothy, Ph.D. (Florida State University), Assistant Professor of Kinesiology and Health

Kesner, John E., Ph.D. (The Ohio State University), Associate Professor of Early Childhood and Elementary Education

Kilian, Chad, Ph.D. (University of Illinois, Urbana-Champaign), Assistant Professor of Kinesiology and Health

Kim, Min Kyu, Ph.D. (University of Georgia), Assistant Professor of Learning Sciences

King, Joyce, Ph.D. (Stanford University), Professor of Educational Policy Studies and Benjamin E. Mays Endowed Chair

King, Natalie, Ph.D. (University of Florida), Assistant Professor of Middle and Secondary Education

Kruger, Ann C., Ph.D. (Emory University), Associate Professor of Learning Sciences
Kurumada, Katharine, (Georgia State University), Ph.D. Clinical Assistant Professor of Early Childhood and Elementary Education

Lakes, Richard D., Ph.D. (The Ohio State University), Professor of Educational Policy Studies

Laures-Gore, Jacqueline, Ph.D. (University of Wisconsin, Madison), Associate Professor of Communication Sciences and Disorders

Law, Michael, Ph.D. (University of Georgia), Clinical Assistant Professor of Learning Sciences

Lemons-Smith, Shonda, Ph.D. (Indiana University), Clinical Associate Professor of Early Childhood and Elementary Education

Leroux, Audrey, Ph.D. (University of Texas, Austin), Assistant Professor of Educational Policy Studies

Li, Hongli, Ph.D. (Pennsylvania State University), Associate Professor of Educational Policy Studies

Magliano, Joseph, Ph.D. (University of Memphis), Professor of Learning Sciences

Many, Joyce E., Ph.D. (Louisiana State University), Senior Associate Dean of Undergraduate Programs and Educator Preparation and Professor of Middle and Secondary Education

Margulieux, Lauren, Ph.D. (Georgia Institute of Technology), Assistant Professor of Learning Sciences

Mason, Erin, Ph.D. (Georgia State University), Assistant Professor of Counseling and Psychological Services

May, Laura, Ph.D. (University of Texas, Austin), Chair and Associate Professor of Early Childhood and Elementary Education

McCarthy, Kathryn, Ph.D. (University of Illinois, Chicago), Assistant Professor of Learning Sciences

McCluney, Ebony Nicole, PhD. (University of Georgia), Clinical Assistant Professor of Kinesiology and Health

McGrail, Ewa, Ph.D. (Syracuse University), Associate Professor and Middle and Secondary Education

McKinney, Tracy, Ph.D. (University of Central Florida), Clinical Assistant Professor of Learning Sciences

Meyers, Joel, Ph.D. (University of Texas), Regent’s Professor of Counseling and Psychological Services

Meyers, Laura, E., Ph.D. (Purdue University), Clinical Associate Professor of Early Childhood Education

Middleton, Gregory, Ph.D. (Mercer University), Limited Term Clinical Assistant Professor of Educational Policy Studies

Miles, Angela, M.S. (Loma Linda University), Clinical Instructor of Communication Sciences and
Disorders

Moss, Sheryl, Ph.D. (University of South Carolina), Clinical Associate Professor of Educational Policy Studies

Muhummad, Gholnecsar, Ph.D. (University of Illinois, Chicago), Associate Professor of Middle and Secondary Education

Myers, Jonte, Ph.D. (University of Florida), Assistant Professor of Learning Sciences

Newman, Timothy, Ph.D. (United States Sports Academy), Clinical Assistant Professor of Kinesiology and Health

Orr, Jonathan, Ph.D. (University of New Orleans), Clinical Associate Professor of Counseling and Psychological Services

Ortiz, Nickolaus, Ph.D. (Texas A&M University), Assistant Professor of Middle and Secondary Education

Oshima, T. Chris, Ph.D. (University of Florida), Professor of Educational Policy Studies

Otis, Jeffrey, Ph.D. (Virginia Polytechnic Institute and State University), Associate Professor of Kinesiology and Health

Patterson, DaShaunda, Ph.D. (Georgia State University), Clinical Assistant Professor of Learning Sciences

Perkins, Catherine, Ph.D. (Georgia State University), Clinical Associate Professor of Counseling and Psychological Services

Pigott, Terri, Ph.D. (University of Chicago), Professor of Educational Policy Studies and Public Health

Puranik, Cynthia, Ph.D. (University of Florida), Associate Professor of Communication Sciences and Disorders

Renken, Maggie, Ph.D. (University of Wyoming), Associate Professor of Learning Sciences

Rice, Kenneth, Ph.D. (University of Notre Dame), Matheny Endowed Chair and Professor of Counseling and Psychological Services

Rice, Robert, Ph.D. (Georgia State University), Clinical Associate Professor of Counseling and Psychological Services

Roach, Andy, Ph.D. (University of Wisconsin, Madison), Associate Professor of Counseling and Psychological Services and Public Health, and Associate Director of the Center for Leadership in Disability (CLD)

Robinson, Kimberly, Ph.D. (Georgia State University), Clinical Assistant Professor of Counseling and Psychological Services
Rohleder, Peter, M.Ed. (Wichita State University), Clinical Instructor of Kinesiology and Health

Rumbaugh, Will, Ph.D. (University of Georgia), Clinical Assistant Professor of Educational Policy Studies

Sauers, Nick, Ph.D. (Iowa State University), Associate Professor of Educational Policy Studies

Schafer, Nancy, Ph.D. (Georgia State University), Clinical Associate Professor of Early Childhood and Elementary Education

Schober-Peterson, Debra L., Ph.D. (University of Illinois, Urbana-Champaign), Clinical Professor of Communication Sciences and Disorders

Schwartz, Renee, Ph.D. (Oregon State University), Professor of Middle and Secondary Education

Scott, Jessica, Ed.D. (Harvard Graduate School of Education), Assistant Professor of Learning Sciences

Shannonhouse, Laura, Ph.D. (University of North Carolina, Greensboro), Assistant Professor of Counseling and Psychological Services

Shapiro, Deborah, Ph.D. (Indiana University), Professor of Kinesiology and Health

Solano-Campos, Ana, Ph.D. (Emory University), Assistant Professor of Early Childhood and Elementary Education

Stevens, Elizabeth, Ph.D. (University of Texas, Austin), Assistant Professor of Learning Sciences

Stinson, David, W., Ph.D. (Georgia State University), Professor of Middle and Secondary Education

Strosnider, Courtney, M.S. (James Madison University), Clinical Instructor of Kinesiology and Health

Sullivan, Caroline, Ph.D. (University of Texas, Austin), Clinical Associate Professor of Middle and Secondary Education

Swafford, K. Journey, M.Ed. (University of Tennessee), Clinical Assistant Professor and Associate Project Director in Early Childhood and Elementary Education

Tanguay, Carla, Ph.D. (Georgia State University), Clinical Assistant Professor of Early Childhood and Elementary Education

Thomas, Christine D., Ph.D. (Georgia State University), Professor of Middle and Secondary Education

Tinker Sachs, Gertrude, Ph.D. (University of Toronto), Chair and Associate Professor of Middle and Secondary Education

Truscott, Diane M., Ph.D. (State University of New York, Buffalo), Associate Professor of Early Childhood and Elementary Education
Truscott, Stephen D., Ph.D. (State University of New York), Professor of Counseling and Psychological Services

Tullis, Christopher, Ph.D. (The Ohio State University), Assistant Professor of Learning Sciences

van Leer, Eva, Ph.D. (University of Wisconsin), Associate Professor of Communication Sciences and Disorders

Varjas, Kristen, Psy.D. (State University of New York), Professor of Counseling and Psychological Services

Wallen, Stacey, Ph.D. (The Ohio State University), Clinical Associate Professor of Communication Sciences and Disorders

Wang, Yinying, Ph.D. (University of Cincinnati), Assistant Professor of Educational Policy Studies

Washington, Julie, Ph.D. (University of Michigan), Chair and Professor of Communication Sciences and Disorders

Wendling, Elodie, Ph.D. (University of Florida), Assistant Professor of Kinesiology and Health

Williams, Brian, Ph.D. (Emory University), Clinical Professor of Early Childhood and Elementary Education and Director of the Alonzo A. Crim Center for Urban Educational Excellence

Wilson, Kathryn, Ph.D. (University of Georgia), Assistant Professor of Kinesiology and Health

Wojnowski, David, Ph.D. (Kent State University), Clinical Assistant Professor of Early Childhood and Elementary Education

Wong, Brett, Ph.D. (University of Oregon), Associate Professor of Kinesiology and Health

Wu, Jianhua (Jerry), Ph.D. (University of California, Davis), Associate Professor of Kinesiology and Health

Yang, Feng, Ph.D., (Beijing University of Aeronautics and Astronautics), Assistant Professor of Kinesiology and Health

Zhang, Chenyi, Ph.D. (Purdue University), Assistant Professor of Early Childhood and Elementary Education

Zhao, Yali, Ph.D. (University of Georgia), Associate Professor of Early Childhood and Elementary Education

Ziols, Ryan, Ph.D. (University of Wisconsin, Madison), Assistant Professor of Early Childhood and Elementary Education

Zoss, Michelle, Ph.D. (University of Georgia), Associate Professor of Middle and Secondary Education
Byrdine F. Lewis College of Nursing and Health Professions Faculty

Adebayo, Modupeola, D.N.P. (Georgia State University), Clinical Assistant Professor of Nursing

Atraga, Cheru, D.N.P. (University of Massachusetts Amherst), Clinical Assistant Professor of Nursing

Aycock, Dawn, Ph.D (University of Alabama), Ph.D Program Director and Associate Professor of Nursing

Bates, Teresa, M.N. (Georgia College), Clinical Assistant Professor of Nursing

Bhattacharjya, Sutanuka, Ph.D. (University at Buffalo), Assistant Professor of Occupational Therapy

Breslin, Susan, D.N.P. (University of South Alabama), RN-BSN Program Director and Clinical Assistant Professor of Nursing

Buchman, Emily, D.O.T. (University of Illinois at Chicago), Clinical Assistant Professor of Occupational Therapy

Casseus, Karis, M.S.N (Mercer University), Clinical Assistant Professor of Nursing

Chen, Mei-Lan, Ph.D. (University of North Carolina at Greensboro), Assistant Professor of Nursing

Chen, Yi-An, Ph.D. (University of Southern California), Assistant Professor of Occupational Therapy

Chen, Yu-ping, Sc.D. (Boston University), Associate Professor of Physical Therapy

Clark, Karen, Ph.D. (University of Missouri), Assistant Professor of Nursing

Cranford, Joan, Ed.D (University of Georgia), Assistant Dean for Undergraduate Programs and Clinical Professor of Nursing

Cranwell-Bruce, Lisa, D.N.P (Mercer University), DNP Program Director and Clinical Professor of Nursing

Culbreth, Rachel, Ph.D. (Georgia State University), Assistant Professor of Respiratory Therapy

Davis, Stephan, D.N.P. (Yale University), Clinical Assistant Professor of Nursing

DeMars, Laura, M.S. (Mercer University), Clinical Instructor of Nursing

Eades, Lee, D.N.P(Georgia Southern University), Clinical Assistant Professor of Nursing

Farrell, Bradley, Ph.D. (Georgia Institute of Technology), Assistant Professor of Physical Therapy

Faulkner, Melissa, Ph.D. (University of Alabama Birmingham), Lewis Chair and Professor of Nursing
Feresin, Rafaela, Ph.D. (Florida State University, Assistant Professor of Nutrition)

Frederick, Laryssa, M.S. (Georgia State University), Clinical Instructor of Respiratory Therapy

Galen, Sujay, Ph.D. (University of Strathclyde), Chair and Associate Professor of Physical Therapy

Garcia, Jodan, D.P.T (A.T Still University), Clinical Associate Professor of Physical Therapy

Gardenhire, Douglas S., Ed.D (University of Georgia), Chair and Clinical Associate Professor of Respiratory Therapy

Gay, Linda, M.S.N. (Kennesaw State University), Clinical Instructor of Nursing

Goodfellow, Lynda, Ed.D, (University of Georgia), Professor of Respiratory Therapy and Senior Associate Dean of Academic Affairs

Gore, Jane, Ph.D (Georgia State University), Clinical Assistant Professor of Physical Therapy

Grantham, Carol A., Ph.D. (University of Michigan), Clinical Assistant Professor of Nursing

Gross, Jade, O.T.D (Washington University in St. Louis), Clinical Assistant Professor of Occupational Therapy

Hawks, Miranda, Ph.D. (Augusta University), Clinical Assistant Professor of Nursing

Henderson, Gena, D.P.T. (Belmont University), Clinical Assistant Professor of Physical Therapy

Hendry, Terri, D.N.P. (Georgia College), Clinical Assistant Professor of Nursing

Hires, Kimberly, Ph.D. (University of Miami), Clinical Assistant Professor of Nursing

Horne, Eva M., Ph.D (University of Georgia), M.S. Program Director and Clinical Associate Professor of Nursing

Huggins, Carla, D.P.T (Temple University), Clinical Assistant Professor of Physical Therapy

Irwin, Jacob, D.P.T. (University of Southern California), Clinical Assistant Professor or Physical Therapy
